| Baden .....       | 67              | 4,400    | 28,740      | 665 "                   |
| Alsace .....      | 173             | 10,705   | 67,292      | 630 "                   |

The above figures do not take into account any plots of hops under 5 hectares or 12½ acres, but hops are cultivated on such small plots, to the extent of 2,401 hectares, or about 6,000 acres, and it is estimated that these small holdings have produced in all 24,272 cwt. of hops, averaging rather over 4 cwt. per acre. We may therefore take the total number of planters in the German Empire to be about 1,860, the total area being 97,142 acres, and the weight of the 1906 crop being this season 420,252 cwt. This yield is thus classified:—Young hops, 0.2 per cent.; yearlings, 5.7 per cent.; choice quality, 20.6 per cent.; good, 49.2 per cent.; medium, 16.7 per cent.; low medium, 4.7 per cent.; common, 2.9 per cent.

The area under hops has increased since 1903 in the German Empire by 2,194 hectares, or 5,485 acres, so that it appears that planters find that the cultivation is profitable. The crop last year amounted to 585,138 cwt., the average being rather less than 6 cwt. per acre. The average for 1906 comes out about 4½ cwt. per acre.

## Northern Notes.

IT is a pleasure to record the infectious nature of the movement among farmers for the protection of their important interests. An agricultural Protection Association is now talked of for the district of Thirsk. A deputation from the Darlington Club has set the ball rolling, and a provisional committee is empowered to pursue the good intentions of all those interested. Early in the New Year a vigorous effort will be undertaken to carry the project through. The large business interests which centre round Thirsk warrant the formation of a society, with all the potentialities of success.

A YORKSHIRE clergyman is lecturing this winter on a walk through Sweden, and he assures his audiences that he did thirty-one miles per diem on a quart of milk, and he says he never felt less fatigued. The value of a milk diet was also recently extolled by the Regius Professor of Medicine at Oxford. An eminent physician had shown him a patient whom he had brought to a very robust state. The professor said, "I suppose you have fed him on the fat of the land?" "No," he replied, "I have fed him on the fat of the cow."

THE Wensleydale Pure Milk Society is awakening public opinion to the necessity for improving the condition of dairies and the methods used for the distribution of milk. The first report has been issued, and though a loss on the year is accounted for by the expenses of establishing the business, now that some prominent professional and well-known philanthropic people are associated with the scheme, the society expects to more than cover expenses from June 30. The society in any case is expressly limited to a profit of 5 per cent. Its objects are (1) to improve the sources of the milk supply of the towns, and (2) to see that it is not contaminated between the sources of supply and delivery at the doors of the consumers.

THE aim of the promoters is more philanthropic than profit-making, and already a great change has been effected upon the dairymen's premises. Upon eight farms new dairies had been built, and upon eleven others an alteration of buildings made in order to comply with the society's regulations as to filtering and cooling the milk. It is the intention of the society not to rest satisfied until they are in a position to give the producers some real interest in the concern. The society has depots at Newcastle, Jarrow, Scarborough, Leeds, and other centres. The turnover during the year reached a total of £10,000.

THE mangold crop continues to be very highly spoken of in Yorkshire this season. Some specimens were casually weighed on the farm of Mr. Dixon Nicholson, at Walton Grange, and the scale at 21 lb. each. Their value is becoming more appreciated as a spring food, and some 8,000 acres were grown in the last Riding last year, though the average yield 13 1/2 tons per acre, compares unfavourably with other parts of Yorkshire, and with Somerset, where the yield of 28 tons to the acre was the heaviest in England.

IN the north a very useful institution called the Cow Club is carried on in a number of villages. There is one also at Malton, a town of six or seven thousand people; and on the estates of Sir Tatton Sykes—in the Wold villages—the clubs are very useful in promoting good fellowship and inculcating that mutual consideration for each other which is too often lacking in small communities. The members are able to insure their cows on a mutual basis, without having resort to insurance societies, and the club being very economically managed, the system has its advantages. Last year at Malton the society suffered a loss on the year's working, the income amounting to £67 12s. 5d., and the expenditure was £84 3s. 6d. There is, however, a small balance in the bank. The society was formed five years ago, and has in that period paid compensation to the amount of £319.

SEVERAL important prospective agricultural gatherings are arranged. Sir Thomas Elliott has promised to be present at a meeting of the Ripon Agricultural Association on December 6, and to hear their views on the Land Tenure Bill, the Sheep Dipping Order, and the Swine Fever Regulations. Sir Thomas has sent a very kind note to the secretary, in which he acknowledges the excellent work of the association in connection with the amendment of the law as to fertilisers and feeding stuffs, and says he will be very glad to make the acquaintance of the members. The Darlington Chamber is to meet on January 7, under the presidency of the Marquis of Londonderry, who has always something practical to say on agricultural topics; and he will have the support of the Marquis of Zetland, Lord Strathmore,

Lord Barnard, Sir Wilson Todd, the Hon. F. W. Lambton, and other well-known personages.

THE fairs at which grazing cattle are offered are now over. The prices realised show a disparity between fat and grazing cattle. This is in a state of affairs to which we are growing accustomed—stores high in price, fat beasts selling badly. It is the old story. The displacement of the pig trade in the north seems to have made no appreciable difference in the price of beef.

IN some parts of Yorkshire the herbage on round-lands is let by the Parish Council to the highest bidder. A dispute was heard in a county court the other day by Judge Dolds, when some amusing incidents were brought out by counsel. The

## Midland Notes.

AS in other parts of the country, the promoters of ploughing competitions in the Midlands find it hard to secure entries of young people. Now and then one hears of junior classes without a single competitor, and as a rule there are but three or four. How often, again, is it complained that thatching and hedge-cutting are in danger of becoming lost arts!

YET there are not many of us, fortunately, who could say (as a well-known Leicestershire farmer did to the Tariff Commission), "Our youngest agricultural labourer in Wigston is seventy years."

GENERALLY speaking, the supply seems pretty fair, and if the quality is not always what it ought to be, and used to be more commonly years ago, there is no scarcity of good men in any district where there is a fair chance of a good man winning in the end an independent living from the land.

VERY evidently what we need most is some means of getting young lads interested in rural work before the age when they begin to think of moving into town, on to the railways, or to the ironworks and potteries. From sixteen to twenty, or perhaps twenty-five, seems to be the critical time. Once married, our young men seldom move from the country; the difficulty is to keep them through the restless days of youth, and to do that one must set some object before them that is worth striving after, and teach them in early years that even the dull work of an out-of-the-way farm is worthy of occupying a man's time and energies.

ONE would like to see a little more enterprise on the lines of the Berkeley Hunt Agricultural Society, which is hardly to be called a Midland organisation, but may perhaps be mentioned here, since its last prize list has just reached me. In this case prizes are offered for competition by members, their sons, and employees, who must be under twenty-five years old, and have to pass an oral and written examination in practical agriculture, estimate weights of stock, judge a cart horse for value and soundness, and show that they can thatch a rick, or undertake a piece of hedging or ditching in a workmanlike style.

THERE is no difficulty in the Berkeley Vale in getting young men to enter for these prizes, and considering that the majority get no special technical instruction beyond an hour a week from a county lecturer, they show a remarkably sound knowledge of ordinary, everyday farming.

MENTION of the Tariff Commission reminds one what a wonderfully interesting document the full report is—not the shilling pamphlet of recommendations, I mean, but the red bound, half-crown north volume which contains the evidence of the farmer witnesses set out at length. On this subject of labour the remarks are wonderfully diverse. But there is hardly anything more suggestive, I think, than the statement casually made by Mr. Thomas Latham, of Dorchester. "I work several reaping machines," says Mr. Latham, "and always have a boy to each every year to ride my horses during the holidays, and invariably these boys stop with me." Have we not the secret and solution of many of our difficulties here in a phrase? "To ride the horses during the holidays." Could any young country lad of spirit ask for a happier way of spending his time? If only we could get the boys interested in the work while they are still young! But how often does the schoolmaster stand inexorably in the way!

THE diversity of the evidence is illustrated very forcibly in the case of fruit-growing. "The apples we grow," complains a Worcestershire witness, "are scarcely saleable when we have a big crop. This is due to American competition." Against that put the cheerful declaration of a

parish meeting was attended by four persons, three of whom were members of the lanes. Two parishioners desired to monopolise the lot. The chairman, however, decided that the third party—a now-come in the parish—should have a certain portion. The sequel to this affair was that the new-come was done out of his herbage, with the result that he sued the trespassers on his rights for 35s., and won his case. The rent he paid to the parish was 10s. The defendant was a very deaf man, and his daughter attended the parish meeting with her father to act as his interpreter. The Judge asked the girl if she spoke at the parish meeting. She replied in the vernacular of the district: "No, sir, they would soon tell me to shut up, if I did it." "Then," said the Judge, "you must agitate."

November 30, 1906.

fellow-grower in the same county, who tells the commission "You cannot overdo the English market with good apples. Until five years ago we did not cultivate them, but now our little men are finding them more profitable than any other fruit."

AMONG the people who are doing well just now—perhaps better than anybody else—are our friends who can turn out fair quantities of thoroughly reliable cheese. The makers of real Stilton wear a happy smile, for they find no difficulty in selling all they can make at profitable rates; and not for a long time past have the capital brands which come from cheshire found so good and general a demand. But what has become of that fine cheese, the old-fashioned rich Leicestershire? It is very little heard of now outside the districts where it is made, and one would like to see it sharing in the revival. There is still room for development in the cheese trade. It would be possible to dispose of more fine Stiltons in the summer months than ever reach the big centres of population; and the soft cheese branch awaits development in the Midlands. There is a great demand in Birmingham, Wolverhampton, and other big towns for little soft cheeses brought from other districts far away. The makers are entitled to all possible credit for their enterprise and commercial smarts; but could we not produce the same thing nearer home?

November 23, 1906.

## Imports of Agricultural Produce.

The following account issued yesterday shows the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week which ended last Saturday. The quantities in the corresponding week of last year are given in parentheses:—

Animals, living:—Oxen, bulls, cows, and calves (11,554), 11,577; sheep and lambs (1,896), 995; horses (194), 187.

Fresh meat:—Beef (71,163 cwt.), 57,083; mutton (54,421), 50,197; pork (13,325), 14,722.

Salted or preserved meat:—Bacon (100,811 cwt.), 90,984; beef (3,357), 1,904; hams (25,224), 13,946; pork (1,771), 2,293; meat, unenumerated, salted or preserved (12,123), 10,673; meat, preserved, otherwise than by salting (28,504), 1,342.

Dairy produce and substitutes:—Butter (72,630 cwt.), 68,205; margarine (20,632), 27,398; cheese (62,853), 43,402; milk, fresh, in cans or drums (60), nil; milk, cream (90), 60; milk, condensed (16,361), 13,209; milk, preserved, other kinds (77), 257.

Eggs (great hundreds) (432,421), 372,423; poultry (value £5,834), £8,612; game (value £2,037), £5,268; rabbits, dead, not tinned (19,633 cwt.), 7,698; laid (45,000 cwt.), 32,232.

Corn, grain, meal, and flour:—Wheat (1,532,900 cwt.), 1,743,200; wheat meal and flour (330,800), 295,100; barley (395,300), 445,900; oats (288,700), 443,700; peas (29,890), 26,670; beans (14,630), 7,890; maize or Indian corn (501,000), 723,000.

Fruit, raw:—Apples (147,319 cwt.), 196,081; bananas (126,970 bushels), 90,460; grapes (4,809 cwt.), 16,280; lemons (14,492), 17,691; oranges (161,954), 70,500; pears (3,134), 6,825; plums (10), 397; unenumerated (3,350), 4,731.

Hay (1,939 tons), 2,577; straw (989) 511; moss litter (1,740), 1,917; hops (1,946 cwt.), 957; locust beans (10,43) nil.

Vegetables, raw:—Onions (121,449 bushels), 231,612; potatoes (35,819 cwt.), 54,530; tomatoes (18,032), 9,052; unenumerated (5,862), 14,141; 44,518; vegetables, dried (3,272 cwt.), 8,558; preserved by canning (6,081), 8,862.

Commencing Saturday next the Great Northern Railway Company will issue cheap Saturday to Monday tickets from London (King's Cross) to any purely Great Northern station, also between any pair of purely Great Northern stations. Full particulars of these cheap bookings may be obtained at any Great Northern Railway office, the station, or direct from the Chief Passenger Agent at King's Cross, N.

## IMPLEMENTS.

### Trials of Swath Turners and Rakes at Lincoln Royal Show.

Particulars have just been issued by the Royal Agricultural Society of silver and bronze medals offered in connection with the trials of swath turners and side delivery rakes at the Lincoln Royal Show.

The entries for these prizes must be sent to the Secretary, 16, Bedford Square, London, W.C., on or before Friday, March 15, 1907, and must be accompanied by a deposit of £5 for each entry. Such deposit will be forfeited if the machine is not submitted for competition at the time appointed for the trials and is not exhibited at the Lincoln Show.

The regulations provide that—

1. The trials will be held in the neighbourhood of Lincoln on or about the third week in June. The locality and the exact date will be notified as soon as it can be ascertained when the crops will be ready.

2. Entries for these prizes must be made on the society's forms, together with detailed specifications giving general over all dimensions and setting out the special merits claimed for the machines.

3. Provision will be made by the society for the housing of the several implements competing, but the competitors must arrange for the delivery of their machines to the site, and also provide the necessary horses for the trials.

4. Each competitor, or his representative, to be present to give any desired information to the judges, and to direct generally the working of the machine, but only one man must actually work the machine.

5. The trials will be made as far as practicable under similar conditions as would rule in the use of the machines in ordinary work on a farm.

6. The trials will be conducted on ridge and furrow land, as well as on the flat.

7. Trials will also be made with the dynamometer to ascertain the draft and load on the horse's back, and each machine must be weighed either before or after the trial.

8. The points to which the judges' attention will be specially directed are:—(a) Mechanical construction. (b) Weight and draft. (c) Ease of handling and adjustment. (d) Efficient turning over of the crop. (e) Freedom from winding or choking. (f) Adaptability of windrowing as well as swath turning. (g) Adaptability for working on ridge and furrow land. (h) Adaptability for transport on road and rail. (j) Price.

Mr. George Harrison, of Ganiford Hall, Darlington, has despatched this week for shipment to the Argentine, to the order of Mr. Reed, three Leicester shearing rams, sired respectively by My Choice 710, Royal Maidstone 521, and Ganiford Lad 695.

## OBITUARY.

Mr. Edward Rowell, J.P., of Walbottle, died last week at Walbottle House, in his eighty-first year. In March, 1905, he suffered a paralytic seizure, from which he never completely recovered. Mr. Rowell was born at Branton, near Chollerford, on January 1, 1826. He devoted himself to farming, and became one of the leading agriculturists of South Northumberland. For many years he held the tenancy of the Dewlaw Farm on the Maffett estate. He was an able valuer and arbitrator in land disputes, and as such his services were recognised, not only in his own country, but throughout England and Scotland.

We regret to record the death of Mr. John Tudball, at his residence, Chew Magna. Deceased had been in weak health for some time past. Mr. Tudball was of a good old West Somerset family, and was born at Withey Pool, Dulverton, where several generations of his ancestors have resided. He lately went to live at Chew Stoke, and then went on to Chew Magna, where he resided forty-seven years. When the North-East Somerset Farmers' Club was founded in 1872, Mr. Tudball was chosen as assistant secretary, the late Mr. J. H. Braikenridge being secretary. On the occasion of the second show at Clutton Mr. Tudball assumed the position of secretary, which he continued until January last.

By the death of Mr. Robert Milburn, of Laverick Hall Farm, a notable agriculturist has passed away. Unlike many farmers, the deceased gentleman showed a practical interest in public affairs. In that matter Mr. Milburn set, indeed, an example that farmers would do well to follow. Few men were better known among the agriculturists of the North of England than Robert Milburn, of Laverick Hall.

## NOTES AND NEWS OF AGRICULTURAL SOCIETIES.

### Chester.

The Cheshire Agricultural Society's annual meeting was held at Chester on Tuesday. There was some discussion on the advisability of holding a two days' show next year, but it was decided to hold the show as usual on the last Wednesday in August. There was an equally divided vote on a resolution to alter the radius of the society to five miles from the county boundary, or ten miles from Chester Town Hall. The vote was taken twice. The first time fifteen voted on each side, and the second time seventeen. The chairman then gave his casting vote against the resolution.

### Herefordshire Chamber.

At a council meeting of this society on Thursday, Mr. J. W. Smith in the chair, the finance committee having gone through the applications, recommended Mr. W. G. C. Britten for the post of secretary, and he was accordingly appointed. A long discussion took place in regard to local taxation, and there was a strong feeling expressed that something should be done to remove the iniquitous inequality as affecting agriculturists. On the motion of the chairman, seconded by Mr. Russell, the council resolved to urge the Government to deal with the question in the King's Speech next session, and to bring in measures to equalise the incidence.

### Hunts Chamber.

On Monday afternoon, at St. Ives, a meeting of this chamber was held at the Corn Exchange, Huntingdon, at which Mr. J. A. Preece, of the Drayton Home farm, read a practically interesting paper on "Sheep Breeding." Mr. Preece laid down the axiom that it was more profitable to the farmer to breed sheep than to breed horses, and his remarks on foot-rot, when he declared that this could easily be eradicated, led to considerable criticism. It was affirmed by some that it was impossible to stamp it out, and the nature of the land, whether high and dry, or low and damp, had a lot to do with the disease. Mr. Preece, in the course of his speech, alluded to the hailstorm which had afflicted them, and expressed his sincere sympathy. He was glad to see that much was doing to give this sympathy a practical effect. For himself and his district, they could not do much, but they had done all they could.

### Royal Lancashire.

The annual meeting of the Royal Lancashire Agricultural Society was held at Preston on Wednesday. Mr. H. L. Storey (president) took the chair.

Mr. J. White (chairman of the council), in moving the adoption of the report (which has already appeared in our columns), said that through the energy of the secretary and the catering committee they had managed to come out with a small balance in hand, which none of them expected. The profit was due to a decrease in the expenditure by something like £1,200, the principal saving being in the fitting up of the showyard.

Mr. Philip Park, in seconding the motion, said a saving of £1,096 had been made by the society fitting up the show ground themselves, instead of having it done by a contractor. He was sorry to see that the Yorkshire Society had had to issue a most unsatisfactory report.

The report was adopted. It was decided to hold the 1907 show at Bolton on August 1, 2, 3 and 5.

The Earl of Ellesmere was elected president for the ensuing year.

Mr. Fitzherbert-Brockholes announced that the increase of 200 members during the year was a record, and was due to the president's exertions.

## ROBERT A. COLT, LTD.

73a, CHISWELL ST., LONDON, E.C.

**HOUGHTON  
EGG CARRIER**  
COMBINES  
PERFECT SAFETY  
WITH

# 'PRACTICE WITH SCIENCE'

IT will be generally admitted that unless the findings of science are carefully tested by the experience of actual practice, that science is more likely to hinder than to help the farmer. This is particularly true in relation to the question of the analysis of Feeding Cakes and Meals, although the

proposed amendments in the Fertilisers and Feeding Stuffs Act of 1893 will tend to give greater protection to the farmer and improve the position of the honest manufacturer. We do not under-rate the value of the chemist's certificate, for we have always insisted on the importance of a good analysis, and have had our guarantees printed on every bag, as well as on the invoice, which, so far as we are aware, has not been done by any other manufacturer. Moreover, we have always asked our customers to have the goods analysed regularly, and in the event of any deficiency being found, we bind ourselves to pay the analyst's fee and three times the value of the deficiency—

The following letter from an esteemed customer, who is a very extensive feeder of stock, is typical of many others received:—

[Conv.]

Dear Sirs,

Greengill, Penrith.  
25/11/05.

Having used a quantity of your Fattening Cake, averaging up to 100 tons per annum, for the last 13 years, I have much pleasure in stating it has given me every satisfaction.

Previous to using your Cake I was a stout believer in pure linseed, but find your quality of Cake gives better results at considerably less cost. Being both a Winter and Summer Feeder, I also see telling results on my grass land, it being both earlier and sweeter where the Cake has been used.

I might say I have used other Compound Cakes costing less money, but find yours the most satisfactory and always analysing according to guarantee.

—Yours truly,

(Signed) THOS. MITCHELL.

Messrs. R. Silcock & Sons, Liverpool.

this is our testimony to the value we place on analysis, and to the confidence we have in the quality of our goods. After all, however, the analysis is only the finding of science, and if it were conclusive, then the work of both the manufacturer and feeder would be much simplified; but, as we have often pointed out, it is possible to show a high analysis and yet leave the cake or meal at very low feeding value, and it is here that science must be confirmed by practice. It is no secret that unsound materials (unless absolutely perished) will in most cases analyse as well as sound ingredients, although the former may be of very little value for feeding; while in the case of oil, it may also show a high analysis, and yet prove to be of a kind altogether unsuitable for fattening purposes. You must test the analysis at the feeding trough, you must combine

## PRACTICE with SCIENCE

if you are to buy to the best advantage as regards price and quality. The feeder's interests are fully protected by our system of doing business, as we not only give a guarantee, but penalise ourselves in the event of any deficiency. Hundreds of farmers bear testimony to the excellence and value of Silcocks' Cakes and Meals for Cattle and Sheep.

For particulars of the various Cakes and Meals apply to Local Agent, or to

## WINTER COMFORT.

The one essential to a

Winter Perfect Foot Comfort for you is to wear the well known

'FIFE' BOOTS (Regd.) 15/6

With or without Tacks. Car. paid. Well known for their quality, comfort, and long service. Send size & P.O. Trial pair prices

Strong Boots for Farm Hands, 7/9. Send Size and P.O. Illus. Catalogue Free. A. T. HOGG (No. 45), Strathmillo, Fife.

## BAGS EQUALTONU.

Have supplied Used Bags as above for over 50 years, for all purposes. Also buyer of sugar-feed and other bags.

Write for list to—  
R. DAVIE, Sen., Sack Manufacturer, LIVERPOOL. Established 1870.

## NOTE ITS EASY ACTION Simply TO and FRO

WILLCOX SEMI-ROTARY WING

## PUMP

As a LIFT AND FORCE

Pump this is FAR AHEAD of the old plunger pump. It is QUICKLY

FIXED by the Lugs. It Lifts 25 ft. and Forces to a great height, and the LABOUR IS MUCH LESS.

We MOUNT them in various ways for working by HAND or POWER.

FOR

WATER BARREL and General AGRICULTURAL PURPOSES.

Ask for Illustrated List of these. Also our CATALOGUE of

General Engineers' Stores.

W. H. WILLCOX & CO., LTD.  
23, 34, & 36, Southwark Street, LONDON.

THE LARGEST MANUFACTURER IN THE KINGDOM

10 for 65s. Carriage paid, 10 for 70s. If Creosoted, Sixpence each extra.

Lamb Creeper, with 8 movable rollers, 10s. each, carriage paid.

Illustrated Catalogue post free.

R. MALLON, Station Works, SWAFFHAM, NORFOLK.

Patronised by Royalty. Six Prize Medals awarded. SHEEP TROUGH. Cheapest and best. 10 ft. long, best foreign red deal, well hooped and bolted. SHEEP FODDER RACKS, 10 feet long, on wheels, 50s. each. CATTLE CRIBS. Gates, Poultry Appliances, Shepherds' Huts. Lamb Troughs, 10 for 42s.

GOLD MEDAL, PARIS, 1900, FOR CHAFF CUTTERS, CORN CRUSHERS, & C. RICHMOND & CHANDLER, Ltd., Manchester,

Manufacturers of Royal First Prize and Exhibition Medal

CHAFF CUTTERS, CORN CRUSHERS,

New Pattern WEB-FEED ROOT PULPERS, GRATERS, SLICERS, and FINGER PIECE CUTTERS Horse Gears, Steaming Apparatus, Kneading Machines, Oil Cake Breakers, Chaff Sifters and Cleaners.

BEST METHOD OF SAFEGUARDING CHAFF CUTTERS, to comply with the Chaff Cutting Machinery (Accidents) Act, 1897.

GREAT COMPETITION at the Royal Agricultural Society of England's Birmingham Show, June, 1898.

Sixteen different Appliances were Tested at this Trials. The Judges awarded the Prize of £10 to RICHMOND & CHANDLER, Ltd., for their "Multiple" Safety Feeder. (Since improved)

## Seasonable Topics.

**Hiring Fairs.** OF late, in accordance with a time-honoured custom, annual hiring fairs have been in different parts of the country, and though these institutions seem to have been more or less doomed for a long time past, they, in common with others associated with agriculture, appear to be dying a hard death. Just like the seasons, local hiring fairs come round, some being held at Michaelmas, others at Martinmas, and others again about Christmas time, according to the customs of the locality. The period about hiring fair time is when the farm lad rejoices in his one legitimate holiday of the year. How he spends it is his own concern, but in many cases he has inherited the habits of his father, and makes a round of the hiring fairs in his district before he goes back to his place or enters on a year's service under another employer. Year after year we seem to see a less number of youths standing in the market-place waiting to be hired, and probably more engagements are made in a private way than used to be the case, because the system of yearly hirings still survives. We have listened to a good many arguments both for and against it, but as one of our correspondents recently observed, no plan has yet been propounded that could be generally accepted as a substitute.

#### The Stamina of Farm Lads.

WHEN one compares the physique and build of a youth who has been brought up to rural life and farm work with that of one of the thousands who have known no other life but that of the town, the comparison is very much in favour of the former. We are told that fresh air and country life makes the difference, and so they do to a certain extent, but there is also another important factor—namely, food. We recently heard a labourer with a large family observe that he believed in getting his boys' legs under somebody else's table, because they would get a better supply of food at a farmhouse than they could at home. It did not trouble him whether the lads stuck to farm labour or left it for something better, but he knew that farmhouse diet at a growing age would build up a physique that is desirable in any capacity of labour. This is quite true, and it explains the reason why youths from the farm are accepted for the police force, railways, and various town occupations in preference to those who are brought up in a forest of bricks and mortar. (Growing lads want good, simple, and wholesome food, and plenty of it, which they get at farmhouse tables, and this is why they compare so favourably in appearance and health with their cousins in the town. We will not argue the point as to whether town training sharpens the wits, but we are convinced

that town air and town food do not build up the specimens of humanity that the nation needs.

#### Uniformity in Butter.

THE man in the street who buys his butter from any of the big shops that deal with this commodity in huge quantities, never has reason to trouble much about the quality. Perhaps the butter he gets is not quite up to the standard of the best dairymade article, but it is fairly good on the whole, and above everything it is uniform. Week after week the butter is practically the same, and rarely does the buyer have reason to complain. This is where the local butter-maker in a small way fails to compete with the wholesale producer. We know butter-makers who turn out as good butter as one could possibly get, but they do not always do it, and little things often make the difference. "My butter is beautiful this week," is the happy remark of the old country dame, whose great delight in life is that it should be so, but the next week her face drops and she admits that for some conjectured reason, the butter is not up to the mark. A dairy expert might easily explain all about it, but the man in the street does not go into details, and he asks, not unnaturally, why the butter he gets from the local farm-house is not so uniform as that which he buys at the stores.

#### Crop Returns in 1906.

WE take it that a good many of our readers have seen the preliminary statement issued by the Board of Agriculture showing the estimated yield of the leading farm crops in 1906. We venture to refer to it here because it is pleasant reading, and bears testimony to the favourable character of the season. Taking the cereal crops of wheat, oats, and barley, we find a substantial increase in each case, and one must also remember the beautiful harvest time for corn, which lessened the cost of getting in the crops. Beans show a big increase as also do peas, and in spite of the drought the average weight of turnips and swedes is estimated at 14-22 tons per acre against 13-14 in 1905. A heavier aggregate weight of mangels was grown this year than last, but the area was greater and the average return per acre is not quite so high as in 1905. Increases are also shown in hay from permanent grass, sainfoin, and clover, but the increased acreage of hay from permanent grass is put at nearly 100,000 acres. Potatoes show a falling off, as less were planted this year than last, and the average return per acre is slightly lower. Finally, though figures and statistics are generally wearying to read, we can do it cheerfully when they point to a healthier condition of our great national industry.

#### Threshing.

AS we write we can hear the hum of the thresh-her at an adjoining farmstead, and there are reasons why the work should be pushed on in the dull, short days of December. In the first place it is only the big corn-growers who possess apparatus of their own, and those who do not have to make ready for the machine when they can get it. Secondly, the yards are occupied by cattle just now, and they must needs have straw. Chaff is wanted for cows and horses, and the farmer must run somewhat on the supply of corn for feeding. Unfortunately the markets are not so good just now as one would like to see them, and we hear complaints about low prices, but the farmers must have money all the same, and this he cannot get for his corn until the grain is threshed out and in the market. When the price is low at threshing time farmers are sometimes disposed to hold over the grain, but the wisdom of doing so is often open to question, because the hoped-for rise may not come, and corn has a habit of going lousy and out of condition. We have to admit that we sometimes see a good deal of waste going on at threshing time. Straw is left strewn about, is badly stacked or not properly protected, and one observes at times a careless waste of chaff. All these items should be given attention at threshing time, because the old proverb of "Waste not, want not," is us applicable to the farm as it is to anything else.

#### Female Labour.

THE depopulation of rural districts, the somewhat changed conditions of life, and the advance of machinery, have all had an effect on female labour, and women do not work in the fields to the extent they used to do. In some respects it is as well that this should be so, because if a working man's earning powers are greater, and he can afford to have his wife more at home to look after his household this must add to the family comfort, but in some districts the earnings of women in agricultural occupations are still very considerable. In Kent, for instance, there is a keen demand for female labour both for fruit picking and amongst the hops. The dainty fingers of women are well adapted for training and tying the young hop growths, and from then up to the time that the hops are pulled down there is periodical work for the women in the gardens. We hear varied expressions of opinion regarding the employment of women on the land, but our views are that in the various branches of farming there are many tasks which are neither labourious nor unpleasant which women can perform, and by doing so the farmer is benefited, and some good is brought to the mill of the labouring fraternity.

**Draining.**

IN travelling about the country one sees a good deal of land that would be all the better if it were drained, and at the present time some of this necessary work is being done. We remember some years ago what might be called a great wave of draining passed over the country. Many miles of pipes were laid on different estates and the land was improved, but of late years the returns from the land have not been sufficient to merit spending big sums on improvements. Perhaps, after all, however, this is not quite the right way of looking at the matter, because money spent on draining land that needs it is always a good investment. We know of nothing more deplorable than to see fields growing little but rushes, 'hassocks, and rank herbage, especially when one knows that by spending a little money on draining away the stagnant water, the comparatively waste land would be transformed into useful meadow or pasture. We would add that after draining do not forget the lime, for a dressing of this useful material after wet land has been drained has an excellent effect in encouraging the growth of sweet herbage.

**Drainers.**

SPEAKING of draining reminds us of the men who cut out the gutters and lay the pipes, and though we do not urge for this class of work that there is any great art in it, the fact nevertheless remains that it requires experience, and some men are more expert at it than others. A few years ago we had dealings with a man who had a gang under him and took draining work by contract. That man was a perfect masterpiece at putting in drains. With his eye he would calcu-

late the number of drains required in a field, and would dig out the gutters and lay the pipes as accurately as if he used a ruler and pencil. Always sure of his fall, and putting the pipes in deep or shallow according to the character of the ground, when the work was done there was no need to fear about the water being carried away. Rheumatism, the result of frequent wettings, which a drainer can hardly avoid, laid him aside at last, and he was a missed man in the district. In fact, humble though they be, it is this class of men that the country can ill afford to lose.

**Where Experts Disagree.**

ANYONE who reads books and papers connected with agriculture (and we advise all farmers to add to their knowledge in this way, though we know the business cannot be learnt from literature without the essential practical experience), will observe how the opinions of experts appear to be diametrically opposed to each other in many things connected with farming. The sceptic seizes on this as a strong handle to use in his arguments against the value of theory, but the uninitiated mind is merely bewildered as to who is right and who is wrong. Let him not be so, for neither of the experts may be wrong, and what appears to be opposite opinions may be the result of actual experience in each case, but where the soil and climate are of a widely different character. As a matter of fact, allowances must always be made for these differences, and the reader who is in search of knowledge may boil down the arguments of this expert and that and find out for himself which method is best adapted to the conditions under which he works.

60,000 and 80,000 labourers; but this, after all, is but a third of the decrease. For the real cause of this developing menace we have to search deeper. Can it be found in the gathering fascination of the towns to the rural mind? Surely not, with the gaunt army of urban unemployed gathering in clamorous strength, and the misery of the congeries of our urban life festering in more pestilential venom? Can it be found in the rural housing problem? Possibly, in a measure; but this can scarcely be an entire explanation of this terrible business, seeing that in the very years in which the decline has been most emphasised there has been a more sympathetic desire to secure better houses. Can it be found in the failure on the part of the State to secure a disciplined system of allotments and small holdings? In this very period, however, this question has been protruded into the active political arena.

**A Challenge to Statecraft.**

Be that cause what it may, the facts remain a challenge to our statecraft, to our benevolence, to our wisdom, and to our humanity. We cannot afford the grim malevolent luxury of a perishing peasantry. And, for heaven's sake, let no man—with the knowledge that, as compared with the two millions of people engaged on the soil of this country forty years ago we have now less than seven hundred thousand—talk about a disciplined system of rural emigration to the colonies. Such a proposal now is something worse than a cynicism.

**What Lord Carrington Should Seek.**

I heartily congratulate Earl Carrington on his invitation to the farmers attending the Show to come to the Board of Agriculture and confer with him on any matter affecting their individual weal or the weal of the interest. Such an incident as this—even though the invitation may not be widely accepted—will go far to convince farmers that the Board of Agriculture is, after all, a life-and-blood organism, and not a mere academic department which concerns itself with paper resolutions and lack-lustre performances. Lord Carrington's desire is evidently to associate, with the Board some of his own breezy unconventionality and manly anxieties. This is assuredly well; but let me seek to persuade his lordship that his Board cannot be the effective instrument he aims at making it unless it has a command of sufficient financial resources. At this moment he has not command of those resources, with the result that the Board is reduced to achieving its task by voluntary means and willy-nilly agencies. It is in a large measure innocuous, instead of being a great advisory influence in the agrarian economy. The grant by the State to the Board of Agriculture is so parsimonious as to be chiefly an assurance of inefficiency. The best tribute to the statesmen who have held the portfolio of agriculture is that they have accomplished so much with so astoundingly modest means.

**Justice-Seat for Political Roysterers.**

Still those whom I may call the Anti-Loreburn-crusaders among the Radicals pursue their merry way with unceasing vivacity. If Lord Loreburn will not appoint to the magisterial bench those whom they unofficially nominate, then they will make him beware of them. The latest suggestions are that if he will do as Lord Herschell threatened to do in the appointments to the county magisterial bench and simply override and discountenance the Lords-Lieutenant—who apparently have no constitutional right to the appointment of magistrates and enjoy the privilege as a concession—the duty of nomination should be handed over to the Home Secretary, who should act upon the suggestion of local Members of Parliament. Frankly, I greatly marvel that the Prime Minister, who certainly has the chivalrous sense and exalts personal loyalty to the height of a virtue, does not interfere to check this banality. Such a method of appointment would mean the reduction of the county bench to a mere partisan instrument. Its character would fluctuate with every spasm of evanescent political emotion. Conceivably, too, the position of the unfortunate legislator: If he were not immediately responsive to the clamorous application of vainglorious, self-seeking partisans, who had elevated their own merits to inflated heights and believed they were heaven-born Solons, he would lay up for himself a colossal store of tribulation, jealousy, and dislike.

# Agricultural Politics.

BY A LOBBYIST.

**The Lords' Wise Policy.**

THE promoters of the Land Tenure Bill have no serious reason to be dissatisfied with the reception of the measure in the House of Lords. Of course, that reception was not exuberant, but, at all events, it was not laden with tragic resolve. The Duke of Rutland had previously voiced the prevailing sentiment of the Upper Chamber in the prophecy that the Bill would do little good, but no serious harm. The peers felt that they had better bear the ills this measure may inflict upon them than fly to others they wot not of. In other words, while believing the measure to be unnecessary, the majority of their lordships were moved by the conviction that 'were better to accept it rather than to, by rejection, stimulate the Radical demand for more drastic dealing with the land question. Perhaps the chief antagonism—expressed in conversation rather than in formal speech—was revealed towards what may be described as the game clauses. Lord Onslow, indeed, reflected a real vivid Conservative sentiment when he declared that the Bill would confer a double measure of compensation for damage by game, in cases where an allowance for such damage had been made when the rent was fixed. An equally vivid and widely held sentiment was Lord Camperdown's fear that the Bill will increase the cost of the management of estates. Perhaps a third active sentiment is the conviction that the Bill, under the profession of desiring to level-up the ethics and methods of the bad landlords to the ethics and methods of the good landlords, will really gravely penalise the latter. Still, even the professors of these pessimisms did not profess to be eager to deliver a death-blow. This was not due to the poor desire to wound, but, craven-like, daring not to strike. It was rather the first-fruit of the conviction that the Bill has been in a large measure deprived of its virus and maleficence, due to the conviction that it is rather the legal embodiment of platitudes than an active instrument of revolution.

**Both Should be Satisfied.**

I now prophesy that both parties—those friendly to the Bill, and those who originally regarded it with foreboding and prophesied ruin as a sequel, with Jeremiah-like unction—will be satisfied. First of all, the friends of the measure will congratulate themselves on having at least established new principles (will compensation for capricious eviction be one of them?) in connection with the conduct of estates. Second, the antagonists of the measure will congratulate themselves on

having drawn the sting from the tongue of those principles. Of course, the balance of success is certainly with the first. Never mind, however tepid may be the original expression of your principles, once embody them in legislation and ere long they are given a backbone. This is the epitomised story of the history of compensation for improvements. There is a third section of Parliamentarians—that body which professes to regard the Bill with mild interest, and whose stern soul refuses to regard it as aught but a weak and invertebrate dalliance with a grim problem. Yes, but these men are not likely to have their revolutionary ideals at once gratified. The mere passing of a Bill dealing in however unheroic a fashion with the problems of tenure means for awhile that we shall have a respite from legislation. Herein lies the wiliness and subtle cleverness of the Lords. Had they at once pierced the measure to the heart they would have made its strenuous resurrection assured. The Parliamentary stomach would now rebel against a surfeit of land legislation. It has shown us that it has an epicurean's conception of what its diet should be. It may agree to a Small Holdings Bill—this, indeed, is an inevitable sequel of this Bill, unless Parliament is willing to acquiesce in harm to the small cultivators; but then it would demand a change of menu. The Parliamentary victory is always with the shouters, and the shouters now are the representatives of the towns; and they must be persistently clamorous in order not to disappoint their own clamorous clientele. Yes, the Lords have been wise. They will make the Bill a barrier against more vehement schemes.

**The Tragedy of a Perishing Peasantry.**

No sane-minded man can read the report of the Board of Agriculture on the decline of the agricultural population between the years 1881 and 1906 without being possessed by a deep sense of a grave economic menace. Here are facts which can only be described as appalling, perturbing, and ominous. In 1881 the number of agricultural labourers in England, Scotland, and Wales was 983,919; in 1891, 866,546; in 1901, 689,292. During twenty years—with the general population of the country increasing, and hence with the demand for agrarian products accentuated—there was a decrease in the number of agricultural labourers to the extent of 294,627. Of that number of labourers England lost 241,152, Wales 11,009, and Scotland 42,376. Of course, the loss of two million acres of arable land in the twenty years was responsible for throwing out of work between

# FAT STOCK SHOWS.

## THE SMITHFIELD SHOW.

The one hundred and eighth annual show of the Smithfield Club opened to-day at the Royal Agricultural Hall, Islington, under most promising circumstances. The entries show a decided improvement when compared with last year, the total being 937 as against 879. The increase, however, is not in the live stock and carcass sections, for here the total entries are 697 as against 712 in 1905, but as will be seen from the following table this year's entries compare favourably with those of 1904 and two preceding years. The entries represent all the well-known feeders and exhibitors, and as many of the first prize winners and some of the champions at recent shows were present here, competition is keen.

The following table shows the entries in the chief sections of the show for this and the four preceding years:—

The only other alteration we have to note is that in the pig carcass classes the animals are not only classed according to weight as last year, but an age limit is introduced, thus pigs not exceeding 100 lb. live weight must not be over six months old; pigs between 100 and 222 lb. must not exceed nine months; and those between 220 lb. and 300 lb. must not be more than twelve months old.

The poultry section will undoubtedly prove as popular as ever, a good entry having been received, whilst the implement section will be one of the most prominent features of the show. The whole of the available space downstairs is taken up with the exhibition of steam and oil engines, gas engines, with suction gas plant, thrashing machines, ploughs, &c.; the galleries being filled with mowing and reaping machines and other lighter agricultural implements, agricultural seeds,

mach. It will be remembered that last year the challenge cup presented by H.R.H. the Prince of Wales for sheep was finally won by his Majesty the King, and a new cup has been graciously presented by his Royal Highness the president.

H.R.H. the Prince of Wales, as President, officially opens the Show, whilst His Majesty has announced his intention of being present, and we understand that our Royal visitor from Norway, King Haakon, will also attend. Altogether the show should prove another big success for the Smithfield Club.

The following is a list of the judges:—

### Cattle.

Devons, South Devons, and Saxses: C. N. Skinner, Shortland, Kent; Daniel Swafford, Mumford, Kingsnorth, Ashford, Kent. Herefords and Red Polled: John H. Yeomans, Withington, Hereford; Fred. Smith, Woodbridge, Suffolk. Shorthorns and Cross Breeds: Arthur S. Gibson, The Elms, Ruddington, Nottingham; John Wortley, Shipdham, Norfolk. Aberdeen-Angus and Galloways: C. W. Schroeter, Bella Vista, Haywards Heath; A. B. Matthews, Newton Stewart, N.B. Welsh and Highland: R. W.

The Hereford Steer illustrated above is the animal with which Mr. W. H. Cooke, The Green, Stanford Bridge, Worcester, took the First Prize for Hereford Steers exceeding two and not exceeding three years old, and the Special Prize for the best Hereford at the Birmingham Fat Stock Show. It was bred by Mr. Cooke, is by Centurion out of Best, and its age last week was given as 2 years 10 months 1 week and 6 days, whilst it weighed 16 cwt. 1 qr. 0 lbs.

|                     | 1906. | 1905. | 1904. | 1903. | 1902. |
|---------------------|-------|-------|-------|-------|-------|
| Cattle .....        | 283   | 301   | 276   | 286   | 262   |
| Pens of sheep ..... | 151   | 163   | 168   | 152   | 165   |
| Pens of pigs .....  | 125   | 107   | 106   | 115   | 101   |

|              | 1906. | 1905. | 1904. | 1903. | 1902. |
|--------------|-------|-------|-------|-------|-------|
| Cattle ..... | 32    | 24    | 32    | 22    | 15    |
| Sheep .....  | 70    | 60    | 50    | 56    | 37    |
| Pigs .....   | 36    | 57    | 35    | 39    | —     |
|              | 697   | 712   | 676   | 670   | 580   |

The classes are on practically the same lines as last year, but there are one or two alterations that can be noticed. For instance, in the Mountain breeds sheep classes a separate class being this year provided for Welsh Mountain wethers of any age; but it is extra class is made up for by the withdrawal of one of the pig classes, Small Whites or Small Blacks being given only one class—for two pigs over nine and not exceeding twelve months old—as against one for pigs not exceeding nine months old, and another for those over nine and not exceeding twelve months old, last year. The schedule, however, contains one more class than that of 1905, for a new one is provided for porkers—viz., pens of two pigs of any breed or cross, not exceeding six months old, suitable for the London pork trade, with prizes of £10, £5, £3, probably a fourth, if ten entries are received. This new class should, we think, prove a popular one.

roots, feeding-stuffs, manures, &c., the whole forming a most complete collection of agricultural implements.

As regards the prizes, it may be mentioned that the total is £4,152 6s. 2d., as compared with £4,153 1s. 4d. last year, so that there is only the difference of 15s. 2d. The cattle classes get £2,013, sheep £1,154, pigs £437, carcass competition £281; and table poultry, £121 18s.; whilst those popular prizes for feeders of the first prize animals absorb £125 8s. 2d. In the majority of the cattle classes the prizes are:—first £25, second £15, and third £10, whilst in any cases where there are ten entries the judges may, if there be sufficient merit, award a fourth prize. This also applies to the sheep and pig sections. The sheep class prizes range from £15 to £3, and pigs from £10 to £3, whilst in addition there are the usual numerous and valuable special awards as well as the popular Breed Cups.

How valuable are the prizes offered may be judged when it is stated that it is possible for a steer or ox to win as much as £260, for a heifer £255, a pen of three long or short woolled sheep to win £110, and for a pen of two pigs to win £70. These amounts of course include the magnificent challenge cups presented by his Majesty the King, for cattle; H.R.H. the Prince of Wales, for sheep; and H.R.H. Prince Christian, for pigs, the winners of which also receive the club's gold

Pritchard, Coedmarion, Carnarvon; J. R. Campbell, Shianess, by Lurg, Sutherland. Kerry, Dexter, and Small Cross-bred Cattle: H. D. Betteridge, "Drayton," Woodstock Road, Summertown, Oxford; Henry C. Webb, Audley End, Saffron Walden. £25 Cup, £50 Cups, Champion Plate, and King's Challenge Cup: Samuel Kidner, Bickley, Milverton, Somerset; William Reid, 160, Central Meat Market, E.C.

### Sheep

Leicesters, Border Leicesters, Cotswolds, and Lincoln: George Harrison, Gainsford Hall, Darlington; Robert Wright, Nocton Heath, Lincoln. Kentish or Romney Marsh, Devons, and South Devons: F. Austin Bensted, The Lawn, Sittingbourne, Kent; J. G. Pedler, The Barton, Salford Peverell, Tiverton, Devon. Cheviots and Mountaine: M. S. McKerrow, Foreland of Southwold, Suffolk; James Moffatt, Crick, Hawick, N.B. Southdowns and Shropshires: George F. Hempsion, Estate Office, Garton Park, Reigate; Matthew Williams, Whiston Hall, Albrighton, Wolverhampton. Hampshire Downs and Suffolks: Cary Cole, Manor House, Whitebourne Steak, Salisbury; D. Abbott Green, Fingringhoe Hall, Gillingham, Oxford Downs and Cross Breeds: John White, Ham Court Farm, Hampton, R.S.O., Oxon; George Simpson, 71, Central Meat Market, E.C. Lye lands and Dorset, &c.: F. Hawkins, Sugwas

Swainshall, Herefordshire; L. C. Attrill, Bowcombe Farm, Carlisle. Champion Plates for Long and Short-wooled Sheep and Prince of Wales's Challenge Cup: Henry Smith, Junr., The Cottage, Cropwell Butler, Nottingham; James P. Case, Binham, Wighton, R.S.O., Norfolk.

#### Pigs

Small White or Small Black, Middle and Large White breeds: Herbert Bloom, Wissett Hall, Halesworth; John Angus, Whitfield, Morpeth. Large Black and Berkshires: A. H. Cobbald, Eldo House, Bury St. Edmunds; William A. Barnes, Hasluck's Green Farm, Shirley, Birmingham. Tamworths and Cross-Breds: D. W. Phillip, The Redlands, Whitacre, Birmingham; Robert Wallace, Auchenbarn, Mauchline, N.B. Champion Plates and Prince Christian's Challenge Cup: Col. F. A. Walker-Jones, The Manor House, Burton, Westmoreland; S. R. Sherwood, Playford, Ipswich.

#### Carcass Competition.

Cattle and Sheep: William Coggan, Braemar, 58, Thurlow Park Road, Dulwich, S.E.; G. H. Walker, Abbey Gateway, Great Malvern. Pigs: J. W. Bowyer, 259, Central Meat Market, E.C.; W. E. Hoare, 220, Central Meat Market, E.C. Champion Prizes and Challenge Cups: William Hayden, 411, Brixton Road, S.W. Table Poultry: W. Bellamy, 118, Jernyn Street, S.W.; John Bailey, 116, Mount Street, Grosvenor Square.

#### Birmingham.

The Birmingham Fat Stock Show, of which we gave a lengthy report in our last issue, was brought to a conclusion on Thursday, and that it has lost little of its attractions was proved by the large attendance of visitors each day, the total for the five days being no less than 42,112. This number is not so large as in the preceding three or four years, being a decrease of 1,599 when compared with last year. Neither were the receipts so good, the sum taken being £1,227 3s., as against £1,292 15s. last year; but these slight fallings off could easily be accounted for by the numerous other attractions of the week.

The following table shows the receipts for this and three preceding years:—

|                 | RECEIPTS. |           |          |          |
|-----------------|-----------|-----------|----------|----------|
|                 | 1906.     | 1905.     | 1904.    | 1903.    |
|                 | £ s. d.   | £ s. d.   | £ s. d.  | £ s. d.  |
| Second day .... | 219 12 0  | 238 6 9   | 17 0     | 285 13 0 |
| Third day ....  | 290 12 0  | 282 5 0   | 287 1 0  | 338 10 0 |
| Fourth day .... | 437 2 0   | 491 5 0   | 451 12 6 | 437 15 6 |
| Fifth day ....  | 279 17 0  | 285 9 0   | 298 1 6  | 231 14 0 |
| 1227 3 0        | 1292 15 0 | 1233 12 0 | 1374 1 6 |          |

A meeting of the council of the Birmingham Agricultural Exhibition Society was held on Thursday, under the presidency of Sir Henry A. Wiggin, Bart., when it was announced by Mr. W. H. Lythall (the secretary) that Messrs. Elkington and Co. had kindly offered another trophy on the same conditions as before, to replace the one won outright by His Majesty the King. No official intimation had been received from Messrs. Webb and Sons, but little doubt was felt that at the next meeting of the members of the firm they would also decide to replace the cup which has this year been won by the Royal exhibit.

On the motion of Sir Henry A. Wiggin, Bart., seconded by Mr. G. D. Willmot, the following resolution was unanimously passed:—"That this council accepts with pleasure the handsome gift of a further challenge cup, value 100 guineas, from Messrs. Elkington and Co., Ltd., and begs to thank them most sincerely for their renewed generosity and for the continued interest they take in the society's welfare."

This is the seventh cup which Messrs. Elkington and Co. have presented to the society. The first was offered in 1873, when the conditions were that it must be won two years in succession by the same exhibitor before absolute ownership in it was secured. It was won in 1882 by Mr. John Price, Pembroke.

The second cup was carried off in 1884 by Mr. Clement Stephenson, Newcastle-on-Tyne; the third was acquired in 1890 by her late Majesty Queen Victoria, and the fourth was won in 1894 by Mr. Stephenson, who presented it to the Newcastle-on-Tyne Museum and Art Gallery. The conditions were then altered so that the cup must be won three times by the same exhibitor, although not necessarily in successive years. Under these conditions the fifth trophy was won by the late Queen Victoria in 1903, and now His Majesty the King has secured the sixth cup.

Our attention has been drawn to an error which crept into our report of the sheep section. We stated that Sir R. C. Cooper won the champion honour, and was also reserved, but the latter distinction should have been credited to Mr. J. Flower, of Chilmark, Salisbury, who was given the reserve ticket for his pen of Hampshire Downs.

#### Totnes.

The Totnes Fat Stock Show was held on Tuesday in favourable weather, and attracted a large number of visitors. The entries on the whole were decidedly satisfactory, and showed an increase of forty-three over the previous year. In the bullock section there was a decrease of three, but

the quality of the animals exhibited was in advance of anything seen at previous exhibitions, being, in the opinion of the judges, as good a lot of beasts as could possibly be brought together from a county.

The 5 guinea cup, offered by the Mayor of Totnes (Mr. J. Harris) for the best bullock in the show was won by Messrs. J. M. Peeke and Son, of Harbertonford, with a steer typical of the South Hams breed. The winner was run very closely by a steer owned by Mr. T. Luscombe, of Stancombe, and the judges had to call in a third party.

The sheep section, though represented by a small entry, contained more than one pen of excellent quality. The poultry section, as usual, proved a prominent feature of the show, the entries aggregating 272, as compared with 259 last year. The pigeon classes were also well filled, as were the other sections, and, on the whole, the exhibition was a conspicuous success.

#### Chichester.

The Sussex, East Hants, and Chichester Christmas Fat Stock show took place in Messrs. Hobgen Bros.' Repository at the Chichester Cattle Market last week, and was altogether successful. The exhibits in the classes for beasts were about the same, but there were a few more sheep and also pigs. The most satisfactory feature of the show, however, was the all-round high standard of quality. Mr. R. L. Batchelor, of Greatham, Pulborough, won the champion prize for the best beast with a very fine Aberdeen-Angus heifer, but the steers shown by Mr. W. G. Fladgate, of Stinfold, and Mr. Wildman Cattley, of West Grinstead, were also excellent specimens.

In the class for grass-fed steers or heifers of pure Devon breed, which had not been yarded or stalled between May and September, both prizes were carried off by Mr. John Langmead, of Climping, who had been awarded similar honours the previous day at Pulborough for the same exhibits, although the order of merit was reversed.

There was some remarkably keen competition in the five classes for sheep, and, in one instance, the judges were so evenly divided in their opinion that an umpire had to be called to assist in the decision. The championship prize went to Mr. F. N. Hobgen, of Appledram, for a pen of three fat Southdown wether lambs, to which it would have been difficult to find a more perfect lot.

As an instance of the high quality of the sheep, it may be mentioned that a pen of five fat wether or ewe lambs, of any breed, that had not been yarded, housed, shorn, or trimmed after October 1, with which Mr. John Langmead secured the championship prize at Pulborough and a first at Horsham, failed to secure a prize at all, the first award being won by Mr. A. E. Whittle, of Boxgrove, and the second by Mr. Geo. Howe, of Easebourne. It was in this class that an umpire became necessary. There was also a good show of pigs, roots, corn, and dead poultry.

#### Ipswich.

The Suffolk Fat Cattle Club's Show at Ipswich last week was not so large as in some previous years, but was as regards quality quite up to the average. Cattle, sheep, and pigs, unfortunately, were nothing like so numerous as last year, cattle showing a drop of 17, the number being 74, as against 91, and 82 in 1904. Sheep were less than for several years, numbering only 32, as against 60 last year and 65 in 1905, whilst of pigs there were 80 entries, or a decrease of 27 on 1905 and 18 on the previous year. Corn entries, however, showed an increase, as did roots and dairy produce, but they did not altogether atone for the decreased display of stock.

The entry of fat cattle was undoubtedly affected by the "clashing" with Birmingham, for very few beasts coming from outside the district were entered. The first class brought under notice of the judges was one of steers or heifers of any pure or cross-bred under three years old, and the winner was found in Mr. J. Spence, of Dawson's well-grazed and well-brought-on bullock, which later was reserve for the championship, and was very near indeed to gaining for its owner the high place that he took in 1904. In Class 2, for steers or heifers of any pure or cross-bred grazed in Tuffok, and not exceeding three years old, the first prize was won by Mr. R. J. Thurman, Dairy Farm, Semer, with a cross-bred heifer, weighing just over 15 cwt., bred by Mr. John Ross. The quality and size usually anticipated in the Aberdeen-Angus-Shorthorn cross were here exemplified, and the judges gave it the Challenge Cup, presented by the ex-Mayor for the best beast in the show, and the heifer may be expected to give a good account of herself if sent to Islington this week. Mr. Thurman took the championship last year, and if successful again the cup becomes his property. As at Norwich, not much could be said about the Red Polls outside the winners. Sir Walter Corbet, Bart., Acton Reynold, Shrewsbury, took first prize in the older class with a magnificent steer, a credit to the breed, while the Right Hon. A. E. Fellowes was

second. These positions were reversed in the class for Red Polls not exceeding two years, and so was the judgment at Norwich. The class for steers or heifers, over eighteen months and not exceeding two years old, was the strongest in the show, there being thirteen entries. The first prize went to a very fine cross-bred sent by Sir Frederick Adair, but Mr. S. R. Sherwood was very close up second with a Shorthorn heifer. For steers or heifers, one year old and not exceeding eighteen months, Mr. Thurman won again with a cross-bred heifer full of promise. An enormous ox (an Aberdeen-Angus), quite the type of what used to be associated with Christmas, was shown by Messrs. Goodman, of Dundalk, Ireland, its weight being close upon 14 ton.

The disappointing entry of sheep was to some extent balanced by the quality, which was exceedingly good, the few exhibits coming from flocks which have already attained great notoriety. In the class of three wethers over twelve months and under twenty-three months old there were but two entries, and they both came from the noted Walton Grange flock, and were awarded both prizes. In the class for three Suffolk wether lambs, three years old, there were but four entries, three of these belonging to Mr. Herbert Smith, and they carried off the three chief prizes, the fourth going to Earl Cadogan. The lambs as a whole were not, perhaps, quite up to the usual mark. With respect to three pure-bred lambs other than Suffolk, Southdowns put in an appearance; there were but three pens, one belonging to Sir Thomas Gooch, and the other two to Mr. Kenneth M. Clark. Sir Thomas Gooch's trio were much admired, and were deservedly placed first, second honours going to the Sudbourne Hall flock. The champion prize for the best pen of fat sheep or lambs in the yard went to Mr. Herbert Smith's wethers, which were uncommonly good-backed sheep.

The decreased entry of pigs was due no doubt to the Swine Fever Regulations, still the various classes proved attractive. The first class was for fat pig of any breed, and the judges had not a very easy task in awarding the prizes. The first prize was won by a Berkshire, sent by Earl Cadogan, which was afterwards awarded the championship as the best fat pig in the yard. Mr. Russell Walker, Mulsford, who is invariably a strong competitor in the swine classes, was second with a well-grazed Large White, which was reserved for the championship. The class for two pigs for bacon was perhaps the largest, and included some nice deep-sided animals, the fight for chief honours resting between Mr. E. W. Snell, Darmsden, and Mr. John Symonds, Thistleton Hall, Burch, and the pen belonging to the former gentleman took the eye of the judges as being the best adapted for bacon purposes. Another class which attracted special notice was that one in which Messrs. Whans and Thos. Harris and Co., Ltd., Calne, Wilt., offered a silver tankard for the best pen of two pigs for bacon purposes from 200 lb. to 260 lb. live weight. Mr. E. Ward Snell won the trophy with a couple of pigs which were regarded as exactly the type of animal required by the firm offering the prize, Mr. John Symond's pen running the winners very close.

The corn display was a good one, in which barley was the chief attraction; whilst roots and vegetables were, on the whole, better than expected, whilst there was an interesting display of sugar beet.

#### Inverness.

At the thirty-ninth annual show of the Northern Counties Breeding and Fat Stock Club, which took place in the auction premises of Messrs. Macdonald, Fraser, and Co., Ltd., at Inverness, on the 1st inst., the entries in the cattle and sheep classes were almost similar to last year, but with the exception of a few classes the competition was somewhat limited, and as a result the show lacked a good deal of the interest which would be associated with a more numerous display. At the same time, the entries comprised the principal feeders of fat stock in the north, and the quality was all round good, and reflected the high position which the feeders of fat stock in the north have so long and deservedly maintained.

The awarding of the special prizes created much interest. The Rosehaugh Cup was won by a two-year-old ox from Meikle Tarrel, in the best pure-bred Shorthorns, whilst for the best cross-bred, as was anticipated, a two-year-old ox from Meikle Tarrel secured the Rosehaugh Cup. The Breeders' Cup for best pure-bred Polled cattle was won by a finely brought-out heifer shown from the Cullen House herd. This heifer won the Cawdor Challenge Cup, the blue ribbon of the show, and was well worthy of the honour, her symmetry, substance, and quality warranting the first place.

Sheep were a disappointing display numerically, but the quality of the exhibits compared very favourably with previous shows. This year the exhibition of roots was revived, and, judging from the numerous entries and the excellent quality of the exhibits, it will doubtless now be

permanently continued in connection with this annual show.

### Tonbridge Show.

This annual show secures large support in the district, and although in some respects the show held on Monday and Tuesday last was hardly up to many of the preceding shows, it is satisfactory to note that, taken as a whole, the result was eminently satisfactory. The poultry section has been dropped this year, and increased attention given to the root, corn, hop, and fruit classes, &c., with a result that in these sections an almost, if not quite, record show was secured. The apple classes were excellent, and many of the exhibits were of the highest merit.

The cattle section adjudicated upon by Messrs. W. Reid and W. Massie has been better so far as regards the Sussex classes, which must be written as being below the average. The winner in the older steers was owned by Mrs. Montefiore, a choice steer of high quality; two others from those well-known herds owned by Messrs. F. S. W. Cornwallis and W. F. Winch were second and third, and one of the Earl of Derby's, a herd mate of this however won first place in the under two-year-old class. This was a well-grown and symmetrical steer of high merit, a riper and wider steer took second honours for Mr. W. W. Berry, leaving a weightly and backward steer from L. Huth's herd the third honour, a position that could have been occupied by a well lengthy steer sent by Mr. L. Hardy, M.P. The Heifer Class, generally so good a one, was the

leaving the run for Mr. W. Cattley with one bred by Mrs. E. Hills. The last mentioned exhibitor won first honours and ran champion honours with a deeply fleshed, wide topped heifer bred by Mr. C. Stephenson. Mr. W. W. Berry's second winner here was one of good merit, a well-fed and very symmetrical heifer from Aberdeenshire. Mr. Hubble's entry well deserved the third place, leaving the run to Mr. Gay Ewing, whose single entry in the yearling class took first honours.

The two classes for calves under twelve months are a feature at these Kent shows. This year, however, only two entries were found in the Sussex class; Mr. Berry's gained the preference over the entry by the Earl of Derby, a pair of promising youngsters. In the other class the first place was easily filled by that superior and thoroughly typical Shorthorn calf owned by Messrs. Denny, a capital calf with fine flesh and quality; next came two Aberdeen-Angus, owned by Mr. W. W. Berry and Mrs. E. Hills. Several fine animals were found in the tenant-farmer classes. Probably one of the best Sussex in the show was a winner in these classes, that grand steer owned by Mr. W. Levett. The entry in these, though satisfactory, should have been considerably larger.

The competition in the sheep section, judged by Messrs. Allan Cooper and Arthur Finn, was not so keen as we have witnessed in former shows. Mr. C. Gordon Neame won both first and a second with good Kent or Romney Marsh sheep, Sir H. E. Dering taking second for lambs. In the Southdowns Mr. W. W. Berry, with a choice pen, was first and champion, the pen being wethers

How well this effort succeeded this year was fu apparent as we walked through and viewed the grand exhibit of live and dead poultry, roots, hay, corn, &c.

It is not needful to give details of the various winners in these classes, but what is necessary is to emphasise the fact that, given liberal encouragement, every society might be able to secure for its winter exhibition a general entry that would attract all sections of the agricultural community, and give full opportunity to all interested in its many sections to display to their credit and also to the advantage of their *confreres* specimens of their skill either as cultivators of the soil, breeders of poultry, or workers in the dairy, &c.

As intimated above, the cattle section was numerically weak, but in the winning steer in the Aberdeen-Angus cattle classes for over two years old, Mr. W. Levett's Tonbridge Champion, we found a real grand beast, ripe and mellow, with a thoroughly symmetrical carcass. Mr. W. Cattley came second here with a cross-bred, and occupied the same position in the heifer class with one bred by Mr. C. Stephenson. Mr. J. H. Bridges, president of the association, owned the winning heifer, and also the first, second, and run in the younger steer classes, all of which were fine specimens of their breed, and worthy representatives of the Langshott Aberdeen-Angus herd. A short entry of Sussex cattle, brought about doubtless by the fact that steers and heifers were classed together, represented this breed—once the principle one formed at this show. Mr. W. F. Winch and Mr. W. Levett were principal contestants for the leading honours in the older class; the former won, but a reversal of this award is quite probable when they next meet. In the younger class Messrs. W. W. Berry, S. Agate, and the Exors. of Louis Huth won the prizes.

A very good lot of grass fed steers filled this class, in which the animals were exhibited in pairs, and these, like the entries in the tenant farmer classes, were of that merit one looks for in prime Christmas beef of the first quality.

It was pleasing to find so good an increase in the entry of sheep, coupled with the fact that the increase had been secured without loss of merit. Mrs. Montefiore won with a choice good quality pen of lambs, and Messrs. W. Clifton and S. Clifton were also successful in the other classes.

The entry of pigs was an admirable one, larger than usual, but fully equal in merit. The Reigate Corporation, the Earlwood Asylum, and Mr. R. Perry were the principal exhibitors.

Judges: Messrs. G. Warde and W. S. McWilliam for cattle, and Messrs. T. Bannister and N. Clayton for sheep and swine.

### Scottish National.

The Scottish National Fat Stock Club's tenth annual show at Edinburgh was again worthy as the pioneer fat stock show of Scotland. There was a decrease of twenty-five in the cattle entries, but the other sections of live stock were quite up to the average in extent, while roots and grain made a larger display than on any former occasion, there being no fewer than 468 entries in this department, or 128 more than last year, whilst the total entries for the show were 830, as against 743 last year.

Aberdeen-Angus cattle had increased interest attached to them this year by the presence of exhibits from the King and Lord Rosebery. The latter's herd was unprecedented here last year, but his lordship himself selected the one Polled heifer which was to be sent forward on this occasion, and she amply justified his practical judgment by carrying off everything for which she was eligible. Lord Rosebery has in former years been a prominent prize-taker and the winner of the championship here and at Smithfield with animals which he had bought and fed, but this is the first occasion on which he has gained the "blue ribbon" with one of his own breeding. The heifer was the three-year-old Ida of Dalmeiny 3rd, by the £500 Ballindalloch bull, Elbbero. She is a magnificent specimen, and there was no getting over her grand quality. Carrying a wealth of flesh, mellow to the touch, and with not a bit of waste about her, she is as beautiful a type as has been seen here for a long time, and when the champion cup for the best beast in the show and the cup for the best cow or heifer were given to her the awards were received with popular favour. She also gained the Breed Cup, the Thorley Challenge Cup for the breeder of best animal in the breed or cross breed classes, and the Webb Challenge Cup for the best animal bred by exhibitor. His Majesty the King's exhibit is a steer under three years old, bred at Aberfeldie, and sired by Elandslaagte. It is a low-standing, lengthy animal, with a nicely sprung rib, and had little difficulty in getting first prize in this class, whilst it was also placed reserve to Lord Rosebery's heifer for the breed cup.

Shorthorns were not so good as they have been on some former occasions, but they were a distinct improvement on last year. The big export trade which has been going on of late has diminished their numbers, and fewer have been kept for feed-

At the Birmingham Fat Stock Show, the Shropshire Sheep shown above won the Cooper Challenge Cup for the best pen of Sheep, the Shropshire Sheep Breeders' Association's Special for the best pen of Shropshires, and the First Prize in the class for Shropshire Wethers not exceeding 23 months old. They were bred and exhibited by Sir R. P. Cooper, Bart., Shenstone Court, Lichfield. They are 21 months old and weighed at Birmingham 7 cwt. 0 q. 19 lbs.

contrary this year. The winner, a difficult one to pass over and yet not satisfactory as a winner, came from Mrs. Montefiore; her nearest competitor was one sent by Mr. A. Langridge, but the run, a lengthy, level, and well-finished heifer from the Earl of Derby, was thought by some to be hardly treated. The yearling class numbered but two. Messrs. W. Ford and the Earl of Derby were placed in the order given.

The Aberdeen-Angus herd was the preponderant one in the Classes for Any Other Pure Breeds. In the Older Steer Class first honours, as well as champion and several of the principal special prizes, went to a notably well-finished Aberdeen-Angus steer two weeks under three years, exhibited by Mr. W. Levett, and bred by Mr. T. Wotton. In close attendance came a beautifully moulded steer, one of Mr. J. Ross's cross breeds, exhibited by Mr. W. Cattley; to look at this steer is nearly perfection, but when handled lacks that twitch and good finish one finds in the first winner. Mr. G. Drummond was third with a level but rather backward Aberdeen-Angus steer, and another of the same breed, owned by Mr. W. W. Berry, was run.

A choice lot made up the under two-year-old class, the best of which was adjudged to be a capital steer owned by Mr. G. Drummond, whilst next in order of merit came a pair from Mr. J. H. Bridges' well-known herd at Langshott, Horley,

bred by Colonel Hammond. In the classes for wether lambs and ewes, Mr. W. M. Cazzell's flock provided winners of both first and second prizes, the leading pen of lambs taking the run for champion honours. The crossbred pens and those for tenant farmers were fairly well supported.

Mr. E. Croucher, who judged the pigs, found a capital lot to adjudicate upon, the competition being a keen one. The Duchess of Devonshire won first and champion honours for Berkshires. The other principal winners in these classes were Mr. O. E. d'Avigdor-Goldsmid and Sir H. E. Dering.

### Red Hill Show.

An excellent show was to be seen this year at Red Hill. It is true that in the cattle classes of former years larger entries have been seen, but when reference be made to the other sections of the show, it will be found seldom, if ever, at any rate not in recent years, has competition been so keen.

It is a fault at many of the Christmas shows that as a rule the live stock sections receive the great preponderance of support, and those other equally important ones but little or no encouragement. With this society it is different, and in the classes for agricultural produce, roots, corn, hay, &c., and poultry, every reasonable encouragement is given to secure a full and representative entry.

ing purposes. In a class of eight young steers, Mr. John Ross, Meikle Tarrel, was first with the red ox with which he won the breed cup at Inverness. Bred by himself, and sired by Ajax, it is an animal of very nice build and showing great character, but just strong enough in his bones. It was awarded the breed cup, and was placed reserve to Lord Roselery's Polled heifer in all the championship competitions, also winning Sir James Sivewright's cup for the best animal bred by a tenant farmer.

In the Galloway classes, Messrs. Thomas Biggar and Sons, Chapelton, showing only three animals, carried off three first prizes as well as the breed (u) and reserve for the champion cow or heifer. Highland cattle might have been stronger both in numbers and quality, but there were some outstanding animals, notably that with which Sir William Ogilvy-Dalgleish came to the front in the old steer class. It was a yellow steer of his own breeding which was first here and at Smithfield last year, a bullock of great scale and substance, and he was also awarded the breed cup.

Cross breeds were the feature of the cattle section both as regards quality and quantity. The breed cup fell to Mr. George Bruce's young red steer T-oh-bell Charlie, and the reserve to Mr. Gordon Duff's blue heifer Nell.

The show of sheep was quite as good as usual, which means a good deal at the Scottish National Show. There were uncommonly few blanks, and competition from first to last was exceptionally keen. The championship went to Mr. John McDowall, Girdlingwood, for a pen of splendid Cheviot wethers, which were first in their class, and took the breed cup as the best Cheviots. They scaled 776 lb., an l were, perhaps, the nicest from the quality point of view that the exhibitor has shown for some years past. The reserve tickets went to Sir John Gilmour for a pen of exceptionally good blackfaced lambs, which were not only first in their class, but carried off the breed cup for the best pen of blackfaced. These naturally had not the weight of the Cheviots, but they were of quite out-tinting quality, two of them especially being about as good blackfaced lambs as have been seen in the Waverley Market.

In a good show of pigs, Mr. John E. B. Cowper, Gogar House, Corstorphine, secured the champion cup with a pair of a white breed, one of which scaled five stone five weight. The show of roots was of such dimensions and excellence that the work of the judges was long and arduous. Turnips and potatoes were of superb quality, and the exhibits of grain were of a high standard of merit.

## York.

The Yorkshire Society for the Christmas exhibition of fat stock, &c., held their jubilee show last week, but the entries were not altogether worthy of the event, for, despite special attractions such as special jubilee awards and an increased prize list—the total was £1,415, or £250 more than last year—the entries were lower than last year by about £250, whilst the chief section, that for ewes, was the smallest for four years, only 105 animals being forward as against 124 last year. Sheep (67), pigs (90), and live poultry were, however, improvements on recent years. No doubt the clashing with the Birmingham Show had a great deal to do with the decreased entry, but one would have liked to have seen a larger display at the jubilee show of a most useful society.

The cattle were of good quality, and competition was at times somewhat keen. The champion was a Black Polled ox, two years and nine months old, shown by Mr. Peter Dunn, Sigglethorpe, Hull, who had previously won the trophy, the Faber Challenge Cup, twice, so that last week he finally made it his absolute property. Mr. Dunn's exhibit, which was bred by Mr. J. H. Bridges, Lang-shott, is a very good steer, evenly covered with flesh, with a very thick top, his only fault being that he stands rather badly. The final choice for the championship rested between Mr. Dunn's exhibit and a black cross-bred ox, two years and nine months old, shown by Mr. Charles Emmerson (East Laxton, Loughborough), and there was not so much to choose between the two. Mr. Emmerson's beast, which is straight, level, and well-fleshed, though a trifle on the leg, won in its class from a blue grey belonging to Messrs. R. and J. Davison (Wellham, Malton), and took the York Challenge Cup for the best beast exhibited by a tenant farmer resident in Yorkshire, and a special jubilee cheque of five guineas given by the committee for the best Shorthorn or cross-bred ox or heifer not exceeding three years old.

Neither sex was well represented among animals of a Shorthorn type, but a young ox from Lambton Castle attracted some attention for its superior quality. Young bullocks of any breed or cross except of a Shorthorn type made a good show, the winning trio specially, and here, as well as in a smaller class of heifers, irrespective of breed, Mr. Emmerson was a conspicuous winner.

The King was first in both the Highland classes. With his yellow ox he was easily first in a class of half-dozen, and with a red heifer he beat Lord Durham's exhibit, a heavy beast, but not considered of so good a type. Lord Durham was also

second in the ox class, Sir John Swinburne coming third.

Irish cattle, of which there was a rather strong muster, included some good butchers' beasts with heavy weights. The dairy cows were inferior to what might have been expected, lacking size and quality.

The sheep were of uniformly high standard, and made an excellent show. A pen of three South-down sheep were forwarded from Sandringham, and though of good quality, were too small to win, and Messrs. Davison and Captain Clive Behrens took the prizes. An excellent class was the Mountain or Scotch Cross Breeds, and the

keenest competition of the day was witnessed among the Horned Scotch or Mountain Wethers, where Lord Middleton and Sir John Swinburne were the chief winners. The lambs were remarkable for size and weight, and with their pen Messrs. Davison, having won it three times, gained permanent possession of the silver challenge cup, and also a gold jubilee medal. The tenant farmers' classes were well filled, and most of the animals of capital character, whilst the butchering classes contain some of the best sheep in the show. Pigs were, on the whole, of grand quality, and in good condition, while there was a creditable display of farm produce.

# CORRESPONDENCE.

## Comparative Test of Fifty-one Varieties of Potatoes.

SIR.—The comparative test of 1906 has been in all essential particulars a repetition of those undertaken here in 1903, 1904, and 1905, differing in one respect as regards the *locality* of the plots. In the previous trials, when the price of some of the varieties varied from £1 to £10 per lb., it was only an exercise of common prudence to grow them in the safe enclosure of the kitchen garden, and under spade cultivation. Now they have been transferred to the open field, and grown under the ordinary cultivation of the field crop.

A single pound of each variety (divided into twelve sets, as far as possible of equal size, and all except eight varieties comprising twelve whole tubers) was planted 15 in. apart, in drills 30 in. wide.

*Dates of Planting and Raising.*—All were planted on April 11, and with the object of testing relative disease resistance, all were purposely left unsprayed. All (second-earlies as well as Maincrop) varieties were raised between September 10 and 20, and I regret that circumstances prevented the raising of the first named earlier, which doubtless accounts for the larger proportion of disease noted in some of these. The previous crop had been autumn sown cabbage plants, following vetches on lea.

*Manures.*—Immediately previous to planting a mixture at the rate of 6 cwt. per statute acre, consisting of four parts superphosphate, and one part each of sulphate of ammonia and sulphate of potash, was sown on the drills over a medium dressing of farmyard manure.

*General Remarks.*—The yields have been certified by independent public men, who kindly supervised the raising on different dates. The consistency of the relative cropping power of some of the varieties during the four years over which these trials have extended is noticeable, as will be seen from the following table:—

|                        | Years. |       |       |       |

Regarding the following varieties the returns are unreliable, owing to the failure of sets or other causes:—

| No. | Name,                  | Yield<br>in lbs. | Character of<br>Haulm. |
|-----|------------------------|------------------|------------------------|
| 44  | Up-to-Date ...         | 32½              | very strong            |
| 45  | Lymn Gray ...          | 27½              | do.                    |
| 46  | Lord Dundonald ...     | 17½              | do.                    |
| 47  | The Recorder ...       | 14½              | medium                 |
| 48  | Southern Queen ...     | 11½              | do.                    |
| 49  | Daniel's Sensation ... | 9½               | do.                    |
| 50  | The Leader ...         | 5½               | do.                    |
| 51  | Sutton's Discovery ... | 5                | weak                   |

The following varieties showed more or less disease when raised. It must, however, be remembered that none were sprayed, and that the Second Earlies should have been raised sooner.

Considerably diseased—Windsor Castle, British Queen, Ireland's Best, Great Scott, Diamond Reef, Dalmeny Radium, Maxim, Gold Reef, Old Champion, Carter's Snowball.

Diseased—General Buller, Dalmeny Regent, Million Maker, The Colleen, Table Talk, Johnson's Diamond, Engineer, Lord Dundonald.

In again venturing to publish the results of these trials, I only offer them for what they are worth. I make no attempt to draw general conclusions from them, and only regard them as valuable for the comparative indications which they furnish. These may supply a lead for further tests to be repeated under varying conditions of soil and over a more prolonged period. At the same time I believe that even such trials, highly speculative as their results may be, when taken from a single instance, may if repeated with fairly consistent results, prove to be of more or less deductive importance. J. F. WILLIAMSON.

Summer Hill, co. Cork, November, 1906.

## Home Raised Meat versus the Foreign Supplied to our Army.

SIR.—In reference to my former letter on this subject which you granted me the favour to appear in your widely-circulated journal, may I beg further space for another letter upon this subject, so intimately associated in the nation's welfare?

I venture to think the axiom of great statesmen of every country and time has been that the thorough cultivation of home land should ever be of prime and anxious consideration by every true statesman governing their country, and that the axiom holds good still, however measures in a contrary direction by supplying foreign meat to our home-raised for our army, in order to show an apparent gain of £150,000 by our War Minister in this department of his administration, however it may be excused and defended by him and the Chancellor of the Exchequer, the two gentlemen immediately responsible, swayed by the exigencies of "Party."

Thus has been diverted to foreign lands a d labour, and cast into foreign circulation, and so lost to us for ever, the sum of £1,332,000; this to show an apparent gain of £150,000, in order to show a net deal, misleading the great gain which would have been brought to the country by £1,482,000 expended in buying home-raised meat instead of the foreign imported. In the first instance, by retaining the money in the circulation of the country, and by distribution among the occupiers and the labourers required to produce from 140,000 acres of land the cattle needed to supply the quantity of meat required, and again distributed to the various industries inseparably associated, and so on to others, would, through the Excise and Inland Revenue, be returned to the Treasury again.

One thing this Government has made clear that, unless an equality in the price of home and foreign

meat be established by an impost of 5d. per stone of 8 lb. (1.6 per lb.) on the foreign, the home raising of cattle must at no distant date be destroyed, as some other industries have been, by an unfair competition. May I ask the favour to allow my letter to appear in next Monday's issue of the journal.

The estimate of 5d. on a stone of 8 lb. (1.6 per lb.) I made in October last when fairly good carcasses of ox beef could be bought in the Metropolitan Meat Market at 3s. 1d. per stone of 8 lb., and foreign at Liverpool at 2s. 8d. Whether this estimate will be sufficient for our graziers experts must decide, but to obtain anything like fair consideration of the matter, the susceptibilities of free traders must be taken into account.—Yours truly, ALFRED WELCH.  
Southall, December 5, 1906.

### Single v. Double Furrow Ploughs.

SIR,—Seeing in your issue of December 3 "Single v. Double Furrow Ploughs," I beg to say that I have used double furrow balance ploughs for some years now, and that they make as good work as the single furrow ploughs, which is borne out in comparison at the annual ploughing matches in this part of East Kent. At the Isle of Thanet ploughing this year the champion prize for the best work on the field was won by a double furrow balance plough in competition with 42 ploughs of various make on Nov. 14, 1906. About three years ago I got Messrs. Ransomes, Sims and Jelleries, of Ipswich, to take up double furrow balance ploughs, and now I have three of them at work on my farm. This double furrow balance plough has been specially designed to meet the requirements of East Kent farmers. It is simple in construction, light in draught, can be worked with perfect ease by the ploughman, and turned at the headlands as easily as the single furrow. It turns a true inverted Kentish furrow, and by aid of the long steel breasts pushes the land close and well packed, which gives the "Hareback" style so much admired by East Kent farmers.

The special advantages of this new double furrow balance plough over the famous old Kent turnwrist wood plough are:—

(1) It turns two furrows at the same time as a single one furrow by the old Kent plough, and can be worked with a team of four horses, with a man and a boy, the same as with the famous old Kent plough.

(2) The draught when ploughing two furrows in heavy land 6 in. deep with ten ends and one furrow to the rod is only 7 cwt., as against 5½ cwt. with the old Kent wood plough turning only one furrow.

(3) The double furrow balance plough will work equally well on both heavy and light soils, and two acres can be ploughed in the one yoke system (eight hours), as against 14 acres with the old Kent wood plough, the width of the furrow can be adjusted from 8½ in. to 10½ in.

(4) Breasts and shares for ordinary square work can be fitted on if required, instead of the Kentish long breasts. The weight of this new plough is 82½ lb. This new plough is very much taking the place of the single furrow ploughs in this part of East Kent.—Yours truly, H. H. SPANTON.  
Chislehurst Court, near Canterbury,  
December 6, 1906.

### Literature on Nitrogen.

SIR,—Can you tell us of any book published which contains any information on the treatment of crops with nitrogen or price and publisher of same. Any other first hand information on the subject that you can give us we shall be grateful for.—Yours truly, L.

December 3, 1903

[In last week's MARK LANE EXPRESS there is an advertisement of a book, "Artificial Manures," price post free 1s. 2½, which contains a good deal of information on the subject of fertilisers, including particulars of nitrogenous manures, the principal of which is, as our correspondent no doubt knows, nitrate of soda. The MARK LANE EXPRESS Annual, 1907, contains a section devoted to fertilisers and their use, including, of course, references to nitrate of soda as well as other nitrogenous substances.—Ed.]

### Soluble and Insoluble Phosphate.

SIR,—Can you give me any light in reference to phosphate, soluble and insoluble? Insoluble phosphate manure is about 50s. per ton, and contains 25 per cent. soluble phosphate, and basic slag contains 25 per cent. insoluble phosphate. Can you tell me how to make the phosphate soluble?

Again, would the insoluble phosphate in basic slag, if put on the land now, become soluble by say May, or the time common turnips want sowing. You see my point. Common phosphate manure with 26 per cent. soluble costs over 50s., while basic slag with 25 per cent. insoluble costs about 27s. 6d. Will it, by being put in now, answer the same purpose as the 50s. manure in May? If you would answer my question through

your MARK LANE EXPRESS, which I take every week, I should esteem it a great favour.—Yours faithfully, H. W. C.

[By common phosphate manure our correspondent no doubt means ordinary superphosphate of lime 26 per cent. soluble in water. He asks can we tell him how to make the so-called insoluble phosphate of basic slag soluble, meaning soluble in water as in superphosphate. There is no way of doing so. We may point out that the word insoluble applied to the phosphate in basic slag is misleading, because the greater part of the phosphate is soluble in a weak solution of acid, similar to acids in the soil, and so the acid is added by the fibres of roots, and is therefore available.]

The pith of the inquiry is whether basic slag, costing 27s. 6d. per ton and containing 26 per cent. phosphate, applied now will produce on the turnip crop as good results as superphosphate applied in the spring. As a general rule we should recommend in such a case superphosphate, but if the soil is at all deficient in lime, and especially if on previous occasions it has shown any sign of finger-and-toe, we should then strongly recommend basic slag instead of superphosphate. As regards date of application of basic slag, recent experiments show that application in spring is more effective than autumn application when applied to the turnip crop. On this point our correspondent might read the paragraph "Roots" in the special article on basic slag, which appeared in our issue of September 17. See page 300 of said issue.—Ed.]

### Feeding Questions.

SIR,—Being a new subscriber to your paper, and noting that you kindly offer to give information where required regarding feeding stuffs, &c., I shall be glad if you could give me information on the following:—Linsseed cake being very dear, and corn, &c., being cheap, I am wondering what is the cheapest and safest mixture, having regard to the albuminoid ratio, for giving to fattening sheep and bullocks and store cattle. I give you the prices of what the various feeding stuffs are worth on my farm, and have an engine and food-preparing plant fixed:—Linsseed cake (best English), 28 10s. per ton; cotton cake (uncorticated), 25 10s. per ton; linsseed oil, 422 10s. per ton; crushed wheat, barley, and maize, 26 per ton; crushed peas and beans, 26 15s. per ton.

Would you recommend linsseed oil to be used in conjunction with cotton cake and corn; if so, in what proportion ought they to be mixed, and what quantity of the mixture would you advise to give to thirty months old fattening bullocks that are having mangolds, a little hay, and oat straw chaff? Thanking you in anticipation, I remain, yours faithfully, A TENANT FARMER.  
Chislehurst, December 1, 1906.

[The subject of feeding of the sheep is one about which there is such a wide difference of opinion, and one that is governed so largely by local conditions, that hard-and-fast rules cannot be applied. As a matter of fact, there is a difference in the feeding value of roots grown under different conditions, and the same applies to straw and hay, so that in some districts more corn and cake has to be given than in others. Again, the amount of corn and cake required in fattening sheep and cattle is greater at the end of the period than at the beginning, so that one can only strike an average, which is subject to variations. I do not know whether you have read Leaflet No. 79, issued free by the Board of Agriculture, which deals with the rations for farm stock, but if not, I would advise you to get it, as it contains a good deal of information that you would find useful as a guide in feeding operations. You ask for a cheap and safe mixture, having regard to a proper albuminoid ratio, which, in the case of thirty months' old bullocks, would be of about 1 to 8, and there are several you might try. If you have plenty of roots and oat straw chaff, you could try about 56 lb. of the former with 20 lb. of the latter and add 4 lb. of crushed oats and 3 lb. of decorticated cotton cake. Another way would be to reduce the roots to about 40 lb., give 14 lb. oat straw, 7 lb. hay, 5 lb. or 6 lb. crushed barley or maize, and 2 lb. decorticated cotton cake. Other variations can be made, the amount of cake or corn being greater or less according to the quantity of roots, hay, and oat straw you have at hand. In the case of concentrated foods for sheep that are being fattened, crushed wheat and decorticated cotton cake in equal quantities are good mixtures to roots, hay, and straw, but some variation is generally desirable. I have had no actual experience in the advantages or otherwise of using linsseed oil with cotton cake and corn, but I should hardly look upon this as being a cheap form of ration.—RETRACTS.]

A farm labourer was charged at Crewe on Monday with cruelty to a cow. He was engaged in milking at Manor Farm, Leighton, when a cow struck him in the face with its tail. Next morning it was found injured, and the tail was on the ground. He admitted that he twisted the tail off in temper, and was fined £3 and costs.

### Wheat Fields v. Ironclads.

There is safety for the land  
Now the Deathblight can withstand  
All uninvited, like a rock,  
Of her guns the mighty shock.  
But will she as well behave  
To receive the shock she gave?  
And if lost with guns and crew,  
How in war could we renew  
Such a loss to save the soil  
From Invasion's fatal spoil?  
But if wheat fields we extend,  
There is nought on them to spend,  
Every year they yield return  
With the labour that would spurn  
With its millions, bold and stout,  
Foes that in, or all not get out!  
Taxes few were needed then;  
With our force of rustic men;  
If we raised our staple food,  
No invader would intrude,  
Certain ruin he would find,  
Vanquished, with the sea behind!  
Wheat fields are our greatest need,  
They would guard the land indeed,  
Make us rich our corn to reap,  
Thin defence were sure and cheap.  
If we grew as once our food,  
England could not be subdued.  
For without the bread we eat,  
What would profit us our fleet?  
Even if the fleet should win,  
Even if our food came in,  
Still the price would be too high  
For the masses bread to buy;  
And the State might then expire  
In a Democratic fire.  
Let us trust to growing wheat,  
Cheaper far than any fleet,  
Every man was then employed,  
England could not be destroyed,  
Taxing for the People's good.  
All our sea-borne cereal food,  
England ne'er could know defeat,  
Thus protected by her Wheat!  
PERRY RUSSELL.

### AGRICULTURAL LAW.

*Advice of a Legal character is offered to Readers entirely free of charge. Particulars of cases should be addressed to the Editor, "MARK LANE EXPRESS," 3, Wellington Street, Strand, London, W.C.*

### A Question of Damages.

SIR,—I should be glad of advice in the following case:—

Last July I sent a bitch to a man for the service of his dog. I packed her securely in a box and left the collar and chain on her the same as she had been wearing, and sent her carriage paid to his station. When she arrived (still in the box) the man sent to fetch her, and they took her out of the box at the station, when she pulled her head through the collar and got away, and they have not been able to find her since. Can I claim compensation?

FAIRPLAY.  
[I do not quite understand who the man is who was sent to fetch the bitch; was he in the company's employment or in the employment of the man to whom the bitch was sent? If in the latter, you can claim compensation against the employer of the man; if in the service of the Railway Company, it will depend upon the conditions of the contract, which I have not seen.—Ed.]

### Imports of Agricultural Produce.

The following account issued yesterday shows the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week which ended last Saturday. The quantities in the corresponding week of last year are given in parentheses:

Animals, living:—Oxen, bulls, cows, and calves (13,330), 11,054; sheep and lambs (1,923, 3,470); horses (351), 193.

Fresh meat:—Beef (67,105 cwt.), 85,074; mutton (33,540), 18,525; pork (14,757), 11,710.

Salted or preserved meat:—Bacon (101,631 cwt.), 83,954; beef (1,067), 3,289; hams (27,369), 17,557; pork (1,223), 3,404; meat, salted or fresh (9,229), 8,515; meat, preserved (26,069), 5,975.

Dairy produce and substitutes:—Butter (67,826 cwt.), 61,116; margarine (22,616), 19,121; cheese (58,448), 55,374; milk, fresh, mil. cream (105), 71; condensed (21,818), 15,274; preserved (132), 150.

Eggs (great hundreds) (114,657), 137,339; poultry (value £9,678), £10,223; game (value £3,305), £2,347; rabbits, dead, not tinned (23,767 cwt.), 7,543; laid (41,510 cwt.), 38,090.

Corn, grain, meal, and flour:—Wheat (1,812,000 cwt.), 1,615,889; whole meal and flour (341,500), 226,447; barley (453,889), 447,809; oats (204,000), 100,000; peas (41,880), 33,890; beans (15,100), 14,420; maize or Indian corn (188,300), 1,096,101.

Hens work overtime laying eggs if they are given a little Colman's Mustard in the morning food

See "The Field," Feb. 6, 1906.

Since the fact was discovered last February, hundreds of poultry keepers are increasing their egg production by giving a teaspoonful of Colman's Mustard, for every six fowls, mixed in the dry meal before adding the water. It invigorates the ovaries and keeps the hens in good condition.

The best Mustard for the purpose is

## POULTRY.

### Poultry-Keeping in America.

(Concluded from page 594.)

#### THE COST OF FEEDING.

Chapter V. deals with Incubation and Rearing, and Mr. Brown remarks that the adoption of incubators in the United States has proceeded at a much more accelerated pace in America, great as has been the increase in this country. The system of feeding will, we think, prove one of the most attractive chapters to English breeders. As regards the cost of feeding, Mr. Brown says:—

In the western sections both of the United States and Canada, especially within the great corn belts, food is abundant and cheap. These vast areas need not, however, concern us, as their distance from the consuming centres and the expense of transit, with loss of quality owing to the time occupied, more than balances any gain in that direction. In the eastern states where the large rearing and laying plants are found, the cost of food differs very little from England, and even in the case of Indian corn is not more than 1s. or 2s. per qr. less than with us. Where labour has to be employed, its cost much exceeds what we should pay, and much more than turns the scale in its favour.

From the evidence obtainable, I incline to the view that the dry mash and dry feeding system is more expensive than where soft food is employed, for in each case where figures were given me, except among the Rhode Island farmers, who, by the way, use wet mash, or "dough" as they call it, the cost was greater than with us in England. The lowest figures stated, with the exception just noted, was 1 dollar 45 cents, which is just 6s. per annum, and in some cases it was 1s. to 2s. higher.

This is, I believe, due to the fact that the absence of natural food, the small runs given to the fowls, and the heavy feeding, lead to the consumption of a greater amount of food supplied, instead of encouraging the birds to obtain as much as possible naturally, providing them with what is deficient. Here the common idea of lower cost of production in America is erroneous. The experience in Rhode Island confirms this view. I was unable to obtain any definite information as to the cost of producing a chicken either at killing or laying age, such as we have available at home.

Mr. Brown deals somewhat exhaustively with table poultry, and his remarks give one a good insight as to how they do these things in America. Methods of marketing, duck farming, and turkey raising are all dealt with interestingly, and there are also details of instruction of poultry-keeping given in the agricultural colleges, &c., and notes of the experimental stations.

In concluding, Mr. Brown gives several

#### POINTS FOR CONSIDERATION.

by those who are now or may be concerned in poultry breeding, and for these we must refer our readers to the book itself. We would, however, give the following, which appears in the summary chapter.

From the present report it will be realised that, while in many directions the British poultry industry occupies a more advanced stage of development than the kindred pursuit in Canada and the United States, our methods are better suited for the conditions under which we work, and there would be no advantage in attempting with present knowledge any modifications, there are others where we have something yet to learn.

It is important, therefore, that these should be carefully studied by farmers and poultry keepers with an open mind and a readiness to adopt such as would increase production, enabling us to meet the rapidly-growing demand for eggs and poultry, and be less dependent upon extraneous supplies of the higher grades of these articles of food.

We cannot hope to entirely meet our own needs, but the sale of first quality eggs and chickens is already very great and steadily increasing. It is the supply of these that should be the objects of British poultry-keepers. The cheap trade can be left to far-distant peoples, whether in Europe or America. They cannot compete with our own produce, and to compete with them would be fatal.

Messrs. John Wallace and Sons, Ltd., of Glasgow, have issued an effectively coloured poster, on which is depicted at work their "Standard" general purpose distributor, the "Thistle" and "City" mowers and reapers, and their "Champion" potato-digger.

The Dorset County Education Committee have approved of arrangements made for holding a winter's course of free instruction in agriculture for farmers and farmers' sons at Dorchester. The instruction is specially intended to be of a practical character, and such as to convey the results of scientific facts bearing upon agriculture which can immediately be turned to advantage by those who are actively engaged in farming. Should this course of instruction prove successful, it is proposed to conduct similar courses at a later date in other parts of the county.

## HEARSON'S CHAMPION INCUBATORS

During the years 1904 and 1905 Hearson's Incubators were tested at the University College, Reading, with other hot water and hot-air machines, the result being that each year Hearson's Incubators hatched the highest percentage of eggs recorded.

# Fertilisers and Feeding Stuffs.

## USEFUL INFORMATION FOR FARMERS WHEN BUYING.

### Approximate Unit Cost of Fertilising Constituents.

It is necessary for guidance in the economical use of fertilisers, and especially in the purchase of Complete and Special Manures that the relative unit cost of the principal fertilising constituents should be studied; the subjoined table affords information on the subject. By multiplying the guaranteed minimum percentages of a fertiliser by the unit costs given in the table, the buyer will get a good idea of the commercial value of any chemical manure offered to him. The unit values are subject to variations from time to time, and in this respect we shall endeavour to keep the table up to date, besides which, buyers living in remote districts may have to pay a little more for heavier cost of delivery. If credit is required, this will also add to the cost.

| „ assimilable ... ..                                 | 1 3                | 1 2          | 1 3                   | —                | —                    | 1 2        | —               | —           | 1 3              | 1 3              | —       | —                   | —                  |
| „ insoluble ... ..                                   | —                  | —            | —                     | —                | —                    | —          | —               | 1 3         | —                | —                | —       | —                   | —                  |
| Potash (pure) ... ..                                 | 4 0                | 4 0          | 4 0                   | —                | —                    | —          | —               | —           | —                | 4 0              | 3 10    | 4 0                 | —                  |

N.B.—The above table is based on the commercial cost of the fertilising constituents. Agricultural value is not always synonymous with the commercial cost, and every farmer must exercise his judgment, while considering the cost, which fertiliser may be expected to give the most profitable return on his soil and for his crops. This is the cheapest manure for him.

### Approximate Unit Cost of the Nutritive Constituents in Feeding Cakes and Meals.

June, 1906.

**Cakes and other Feeding Stuffs.**—In order to be able to form a correct opinion of their value, it is necessary to know the relative cost of the different nutritive constituents. The following note, by an eminent authority, supplies this information. By reference to it, a farmer can calculate out the approximate commercial value of a cake or meal, and then use his judgment as to which is most suitable for his special requirements,

**Note.**—Most authorities in England are agreed that the value of each per cent. or unit of albuminoids and of oil is at least 2½ times that of 1 per cent. or unit carbohydrates. If, therefore, the percentages of albuminoids and oil in a feeding stuff be respectively multiplied by 2½ and added to the percentage of carbohydrates, the total feeding units contained in the article are obtained. The cost of the feeding stuff divided by this total of feeding units gives the price per unit. Example: A cotton cake contained

|                      | Albuminoids | Oil or fat | Carbohydrates | Per cent. | Feeding units. |
|----------------------|-------------|------------|---------------|-----------|----------------|
| Albuminoids ... ..   | ...         | ...        | ...           | 22.1      | 55.2           |
| Oil ... ..           | ...         | ...        | ...           | 5.2       | 13.0           |
| Carbohydrates ... .. | ...         | ...        | ...           | 33.2      | 33.2           |
| Total feeding units  | ...         | ...        | ...           | ...       | 101.4          |

The price of the cake being £5 7s. 6d., the cost per feeding unit was just about 1s.

### Note to Regular Subscribers.

We may remind our readers that we are prepared to analyse free of cost for our regular subscribers, who are farmers, and not in trade as vendors of fertilisers or feeding stuffs, samples of minimum lots of 2 tons of either article, in cases where there is solid reason to suspect an attempt to defraud. The analyses are published, under a *nom de plume*, in the paper.

We are also willing to publish replies in these columns to inquiries relating to the quality and use of fertilisers and feeding stuffs.

### Best Method of Applying Nitrate of Soda to Root Crops.

The ordinary method of applying nitrate of soda is to topdress it, but from experiments conducted over several seasons this method is not the best. For the third year in succession nitrate applied wholly as a top dressing failed to produce so large a crop as nitrate given wholly in the drills, and also for the third time it was found that the largest crops were obtained when the dressing was divided, one half being given in the drills, while the other half was applied as a top dressing. The superiority of the latter method was very manifest during the three years.

The conclusion seems therefore inevitable that of the three possible methods of applying nitrate of soda to the turnip crop, the one most extensively practised of applying it wholly as a top dressing is distinctly the least effective, and that the application of the fertiliser wholly in the drills, though not the best method, is nevertheless more effective. The practice of applying nitrate on the surface has been recommended on the ground that soils have no power to retain the nitrogen, and that if it be put in the soil before the roots of the plants are ready to take it up, it will be in great part washed into the drains and lost. Yet the test of trials has now conclusively shown that better results are obtained from the drill application than from the top dressing.

### Cottoncakes—Egyptian and Indian.

The question of the relative value of different kinds of unde-oiled cottoncake is often raised. It cropped up in the correspondence columns of this paper in the issue of 26th ult., so that the following particulars may be interesting:—

A report was made in 1903 by Professor Gilchrist, of the Durham College of Science, on the comparative value of cakes made from Indian and Egyptian seed.

Under the professor's supervision trials were made during the summer of 1902 on the effects of feeding two kinds of unde-oiled cottoncake to cattle and to sheep while feeding on pasture. The two cakes were (a) Egyptian cost at that time £5 1s. 3d. per ton delivered, and Bombay costing then £3 10s. per ton delivered.

The latter cake is less palatable and contains more woody fibre, but when the difference in price is taken into account the results were in favour of the Bombay cake, although, it is added, that they must be considered as of a tentative character.

In connection with the report, the chemical composition of some samples of cotton cake is given, as shown in the following table:—

|                 | Egyptian Cotton-cake | Bombay Cotton-cake | Indian Cottonseed |
|-----------------|----------------------|--------------------|-------------------|
|                 | per cent.            | per cent.          | per cent.         |
| Moisture.....   | 14.13                | 12.41              | 10.5              |
| Oil .....       | 5.17                 | 5.35               | 14.7              |
| Albuminoids ..  | 24.19                | 21.19              | 16.6              |
| Carbo-hydrates  | 32.10                | 36.49              | 29.7              |
| Woody fibre ... | 19.31                | 18.65              | 23.3              |
| Mineral matter  | 5.10                 | 5.91               | 5.2               |
|                 | 100.00               | 100.00             | 100.00            |
| Nitrogen .....  | 3.87                 | 3.39               | 2.66              |
| Sand .....      | .05                  | 1.24               | 1.10              |

Judging from these figures, it may be seen that the Bombay cotton-cake has a distinctly lower flesh-forming value than the cake of Egyptian origin, an inferiority which is not quite made up by the greater percentage of fat-forming constituents. In no way, however, can the difference between the two cakes be considered of much importance as regards their chemical composition. The physical character of the fibre of the two cakes is, however, very different: the fibre of the

cotton-cake having an objectionable woolly nature. Considering the rather large amount of sand in the Bombay cake, as well as the points noted above, the Bombay cake will be seen to be slightly inferior, though this may be compensated for by the lower price.

### Manurial Value of Straw.

The straw of the cereal crops does not possess, according to Stephens, such high manurial value as is often imagined. The constituents of fresh straw are for the most part insoluble, so that straw is of little use in the soil unless it is well rotted. Indeed, the principal value of straw in the composition of farmyard manure is that it, in the first place, forms comfortable litter for animals, and afterwards is a suitable vehicle for absorbing and holding in a manageable condition the solid and liquid excreta. From this point of view it is apparent that the excessive use of straw as litter is wasteful, for while the bulk of the dung may be thereby greatly increased, there may be little more fertilising value than if less litter had been supplied to the animals.

It is an important fact that crops, while extracting from the soil a certain proportion of plant food, which can be replaced, enrich the soil in other elements of fertility. Plants draw nutritious ingredients from the sub soil; and some plants absorb nitrogen from the atmosphere. By the decay of their roots they leave the surface soil richer in organic fertilising material than it was before, and the larger the crop the more does it enrich the soil in those elements, because the greater is the residue of plant food derived from the roots which remain and gradually decompose in the soil.

### Pastures.

Phosphate and potassic dressings are the most important for pastures. When clover is not abundant in the pasture 3 to 4 cwt. superphosphate with 2 to 3 cwt. of kainit may be applied with advantage every three or four years. When it is desired to develop the clover in the pasture, then a liberal dressing of 10 cwt. basic slag with 4 to 5 cwt. of kainit will produce good results, lasting seven or eight years.

## Fertiliser and Feeding Stuffs Act, 1906.

### Regulations as to Sampling, &c.

The new Act will now soon come into force, as it takes effect on January 1. The full Act was given in our issue of September 10, and recently the Board of Agriculture have issued drafts of sampling, &c., instructions to supersede the old regulations. As it will be useful to our readers to have these regulations before them for reference, we print them below.

*Invoice, &c., to be sent to Analyst.*

4. Where a sample is, or parts of a sample are, under Section 3 of the Act, sent for analysis to the chief analyst or to an agricultural analyst, there shall be sent with the sample or parts the invoice (if any) relating to the article from which the sample was taken, or a copy of the invoice or of such part thereof as is hereinafter prescribed, and also any circular or advertisement of the seller descriptive of such article which the purchaser may wish the analyst to consider in making his analysis and giving his certificate.

*Prescribed Part of Invoice, s. 3 (7).*

5. Where a copy of an invoice is sent to the chief analyst or to an agricultural analyst in pursuance of the Act, there may be omitted from such copy the name and address of, and any other matter which would identify or disclose, the seller of the article to which the invoice relates. The prescribed part of the invoice shall be the whole thereof except such name, address, and other matter as aforesaid.

### Sampling.

6. Where, for the purposes of the Act, a sample is required to be taken in the prescribed manner, or in accordance with regulations made under the Act, the following provisions shall apply:—

(a) The person taking the sample shall give to the seller at least three days' notice in writing of his intention to take the sample, with particulars as to the place, day, and hour of sampling. If the seller does not attend, the sample shall be taken in the presence of a witness.

(b) The sample shall be taken in the following manner:—

(i.) When the fertiliser is delivered in bags or other packages, a number of bags or packages shall be selected as follows, viz.:—

Not less than two bags or packages where the quantity of the whole consignment does not exceed 1 ton.

Not less than three bags or packages where the quantity of the whole consignment exceeds 1 ton and does not exceed 2 tons.

Not less than 4 bags or packages where the quantity of the whole consignment exceeds 2 tons and does not exceed 3 tons; and, where the quantity exceeds 3 tons, one additional bag or package for every additional ton or part of a ton; provided that in no case need more than 10 bags or packages be selected. The selection shall be made from different parts of the whole consignment.

(ii.) The selected bags or packages shall be emptied separately on a clean and dry floor, worked up with a spade, and one spadeful from each set aside. The spadefuls so set aside shall then be thoroughly mixed together, and any lumps broken up by the hand or spade. From this mixture a sample, from about 2 lb. to 4 lb. in weight, shall be taken.

(iii.) When the fertiliser is delivered in bulk, a like number of portions, according to the quantity of the whole consignment, shall be taken from different parts of the whole consignment and thoroughly mixed together on a clean and dry floor, and a sample, from about 2 lb. to 4 lb. in weight, shall be taken from the mixture.

(iv.) When the fertiliser consists of bulky material, uneven in character and likely to get matted together, such as shoddy, wool refuse, hair, &c., portions are to be taken from the selected bags or packages, or from different parts of the fertiliser if in bulk, the matted portions torn up, and all the portions thoroughly mixed together. The sample shall be taken from the mixture and shall be not less than 3 lb. in weight.

v.) As an alternative method, where neither the seller nor the buyer signifies objection thereto, the sample of a fertiliser delivered in bags or other packages may be taken by a sampling paddle or spear or pipe or tube, which shall not be less than twenty-four inches in length, and two inches in diameter. The sampling instrument shall be pressed into the mouth of the bag or package so as to pass through the entire depth of the contents or to the extreme length of the sampling instrument. The several quantities thus taken from the selected bags or packages, which shall be at least double the number of bags or packages required to be selected under regulation (i), shall be thoroughly mixed together and a sample, from about 2 lb. to 4 lb. in weight, shall be taken from the mixture.

In the case of a feeding stuff:—

(vi.) When the feeding stuff is in the state of grain or meal, it shall be sampled in the same manner as prescribed for fertilisers. When the feeding stuff is in the state of cake a number of cakes shall be selected from different parts of the whole consignment, as follows:—

Not less than five cakes where the quantity of the consignment does not exceed 2 tons.

Not less than ten cakes where the quantity exceeds 2 tons and does not exceed 5 tons.

Not less than fifteen cakes where the quantity exceeds 5 tons and does not exceed 57 tons.

Not less than twenty-five cakes where the quantity exceeds 50 tons.

(vii.) The selected cakes shall either be passed through a cake-breaker or be broken into small pieces such as could be passed through a 13 inch sieve. The broken cakes or the pieces shall be thoroughly mixed, and from the mixture a sample, not less than 6 lb. in weight, shall be taken.

(viii.) As an alternative method, three strips shall be taken across the middle of each selected cake; and each of the three parts, into which (under Regulation 7) a sample is to be divided, shall contain one strip of each selected cake.

(ix.) Where, on delivery of the consignment, any appreciable portion of the feeding stuff is found to be mouldy, sour, or otherwise unsuitable for feeding purposes, separate samples are to be taken of the unsuitable portion and of the residue of the feeding stuff respectively; and, in the case of unsuitable cakes, the sample may consist of several large pieces fairly representative thereof. An estimate shall be made by the person taking the sample as to the proportion of the feeding stuff unsuitable for feeding purposes, and shall be communicated by him to the analyst.

(x.) When the feeding stuff is in a fluid or semi-fluid condition, three packages shall be selected, and, after the contents have been well stirred or shaken, a portion shall immediately be taken from each. The several portions shall then be thoroughly mixed together in a clean vessel, and from the mixture a sample, from about 2 lb. to 4 lb. in weight, shall be taken.

In the case of both fertilisers and feeding stuffs:—

(xi.) Where the quantity of the whole consignment does not exceed 2 cwt., the sample may consist of such a portion of the consignment as is fairly representative of the whole, and the sample shall be of such a quantity that each of the parts, into which (under Regulation 7) it is to be divided, will be sufficient to enable a proper analysis to be made thereof.

(c) General directions as to sampling:—

(xii.) In every case the sampling shall be done as quickly as is possible consistently with due care, and the material shall not be allowed to be exposed any longer than is absolutely necessary.

(xiii.) Each of the parts, into which (under Regulation 7) the sample is to be divided, shall be packed in a dry, clean bottle, or jar, or (except in the case of a fertiliser) in a dry, clean tin, or in some other suitable manner, so that the original composition of the fertiliser or feeding stuff may be preserved.

(xiv.) Each of the said parts of the sample shall be so packed and secured that it cannot be tampered with, and shall be sealed and initialed by the person taking the sample. It may also be sealed by the purchaser and the seller if present and so desiring. If the seller does not attend, the witness shall initial it. It shall be marked with the name of the article, the date and the place of the sampling, and with some distinguishing number, in such a manner that the portions so marked can be seen without breaking the seal or seals.

(xv.) Where a sample is taken in the presence of, and sealed by, the seller as well as the purchaser, it shall be deemed, as between the purchaser and the seller, to have been taken in accordance with these regulations.

*Division of Sample, &c.*

7. Where a sample has been taken, under s. 3 of the Act, with a view to the institution of any civil or criminal proceeding, the person taking the sample shall divide it into three parts, as nearly as possible equal, and shall cause each part to be marked, sealed, and fastened up, and shall forthwith deliver or send by post two parts to the agricultural analyst and one part to the seller.

The influence of the light from the early morning rays of the sun on plants has been found to be stronger than at other times of the day. This is assumed to be because the morning rays are more blue and yellow, while the afternoon rays are more violet.

## Farmers' Experiments.

Now is the time for farmers to consider what experiments they can conduct with advantage on their own farms. It may be thought that it does not fall within the scope of individual farmers to make experiments, and that such work had better be left to the experts of the experimental stations. It is true that there are some intricate and costly investigations which must be left to the station, but there are also simple experiments which furnish the farmer with a practical and useful knowledge of the character of the soil he has to manage, a knowledge which no experimental farm can impart to him. After all it is not a very difficult matter to conduct an experiment on the effect of different fertilisers if the plan is first carefully thought out and arranged. The trouble involved will be more than compensated by the information acquired; but when starting the experiment the farmer must make up his mind to carry it out with care and accuracy to the finish. The plans must be accurately measured, the fertilisers carefully weighed and mixed, and, finally, the crop must be gathered and weighed with scrupulous accuracy.

A farmer wants to find out what plant food, if any, his soil is deficient in, and to elicit information on this point he arranges plots.

1. Dressed with complete fertiliser containing ammonia, phosphate of lime, and potash.

2. Ditto, ammonia omitted.

3. Ditto, phosphate of lime omitted.

4. Ditto, potash omitted, and if he has time and inclination he can extend the experiment by trying one form of phosphate against another, such as basic slag against superphosphate, kainit against sulphate or muriate of potash, sulphate of ammonia against nitrate of soda, and so on.

A book should be kept and all details should be carefully recorded, and there is one more point: Definite conclusion cannot be drawn from the results of one season, and therefore the trials should be continued over a series of years in order to arrive at reliable average results, which is the only information to which a farmer can look for reliable guidance.

## Noxious Weeds.

It is not necessary to enumerate the numberless ways in which weeds are harmful, but attention may be directed to the following:—Experiments show that a crop of wild mustard will take from the soil as much phosphoric acid and potash and twice as much nitrogen as an ordinary crop of wheat. As these constituents represent money, this fact is worth remembering.

Keeping the soil of moisture is very important, especially in a dry summer. In this instance all controllable water should be retained in the soil. Where weeds are present, they compete for the supply and reduce very materially the amount available for the crop. From experiments conducted some years ago, it was estimated that by allowing ten plants of wild mustard per square yard, there would be drawn from the soil and transpired into the air more than 20 tons of water daily.

The last point to which attention is directed by Professor Millar, and one which is not often considered, tends to the economic side only. It is stated as a fundamental law of agriculture that the presence of noxious weeds in any community is a fair criterion of the industry and thrift of that community. This is a reasonable deduction, and it cannot be denied that the presence of even a few weedy and carelessly kept properties depreciates not only the profits and value of the farms on which they grow, but injures neighbouring farms.

No desirable prospective buyer will purchase a farm polluted with weeds, or that is likely to be from an adjoining farm. Thus merely to facilitate the ability to turn one's reidity into cash in time of necessity, it is better to keep the weeds out.

## Prices of Fertilisers.

As the season for the purchase of fertilisers is now at hand, we shall give weekly for the next few months the London prices of the principal articles.

| The following quotations are approximate and free-on-rail, London, cash payment. |                       | £  | s. | d. |
|----------------------------------------------------------------------------------|-----------------------|----|----|----|
| Nitrate of soda                                                                  | ..... prompt delivery | 11 | 12 | 0  |
| "                                                                                | ..... forward         | 12 | 2  | 6  |
| Sulphate of ammonia                                                              | .....                 | 12 | 15 | 0  |
| Superphosphate, 25 per cent.                                                     | .....                 | 2  | 10 | 0  |
| "                                                                                | 33 " "                | 3  | 6  | 3  |
| Pure dissolved bones                                                             | .....                 | 5  | 7  | 6  |
| Bone compound, ordinary                                                          | .....                 | 3  | 8  | 9  |
| Ground hoofs, 15 per cent.                                                       | .....                 | 9  | 10 | 0  |
| Fish guano, first quality, scarce & dear                                         | .....                 | 6  | 12 | 6  |
| Ditto, second quality                                                            | .....                 | 5  | 7  | 6  |
| Kainit                                                                           | .....                 | 2  | 5  | 0  |
| Sulphate of potash                                                               | .....                 | 10 | 0  | 0  |
| Muriate of potash                                                                | .....                 | 9  | 0  | 0  |
| Basic slag, 39 per cent. (ex works, Midlands)                                    | .....                 | 1  | 13 | 0  |
| Ditto, 38 per cent.                                                              | .....                 | 2  | 3  | 0  |

# Registered **"LIMPHOS"** Trade Mark.

## THE NEW PHOSPHATIC FERTILIZER,

Combining (with low price) the advantages of Superphosphate, Basic Slag, and Basic Superphosphate.

Guaranteed to contain 40/45 % Phosphates and 35/38 % Lime.

The Phosphates are readily soluble, being guaranteed 28 units soluble in Hughes' Standard Citric Acid Solution (1 in 1,000), of which not less than 10 units are guaranteed soluble in water.

**DANIEL DE PASS & CO., 1, FENCHURCH BUILDINGS, LONDON.**

## KAINIT,

SULPHATE OF POTASH,  
MURIATE OF POTASH,  
FOR ALL CROPS ON ALL SOILS.

**BIBBY'S** - - -  
**"CREAM"** - - -  
**EQUIVALENT**<sup>TM</sup>  
**MEAL** - - -  
 FOR  
**CALF-REARING.**

Our Agents are continually hearing some such remarks as: "I want you to send me two more bags of that 'Cream Equivalent' Meal. It is fine stuff, and I should like you to see my weanling calves; they are a splendid lot—a perfect show."

We like to hear talk like this, and do not wish for a better advertisement of this Meal than these "Cream Equivalent" reared calves are all over the country.

It is quite easy to prepare. It swells out into a fine creamy substance, the calves are fond of it, and there is no scour.

When the calves begin to eat, we recommend a little dry feeding—a mixture of "Bibby" Cake, Oats and Bran is particularly suitable, the former being at once nutritious and digestible; and calves so reared are always one of the sights of the farm, and make fine well-grown heifers with nice loose skins and plenty of good hair.

One cwt., costing 15/-, carriage paid, is enough for two calves. It costs about 1/3 more to rear a calf on "Cream Equivalent" than on the cheaper calf foods, while the difference in value of the grown animal is most marked, both as to condition, health, and growth.

It is the most soluble Calf Meal on the market, and can be made up simply by soaking the meal in cold water for six or seven hours, if this suits the feeder's convenience better than by making up with boiling water in the ordinary way.

If you are interested in this subject, write for our new circular, "How to Rear Calves for the Dairy." It will be sent free of cost to any address on receipt of postcard.

## PROGRESS OF THE SMITHFIELD CLUB SHOW.

The oldest of our agricultural national institutions, and for grazing farmers, the most important one will hold its 108th anniversary this week, and its 107th show opens to-day at the Royal Agricultural Hall, Islington, which was built specially for its accommodation.

Formed in the first instance as a close trust by thirty-seven of the leading agriculturists of the period, it had no other object than to offer premiums for cattle and sheep fed solely on

what was termed the natural food of the farm—grass, hay, roots, or cabbages—and those which, in addition, had received corn or oil-cake.

There were only two classes of cattle and two of sheep, no division of the breeds being made until the 1807 show. In those days steers were trained for the yoke, and were seldom grazed until they became old oxen. To convert a heifer to beef was regarded as almost as great a sin as to feed wheat to stock. Thus when cows were admitted to the annual shows heifers were rigorously excluded. The Smithfield Club Council have now for several years past entirely reversed this order of procedure.

Thus, when in 1821 John Duke of Bedford withdrew from the Presidency of the club on the ground that its original object had been accomplished, he was perfectly right in that assumption. The employment of what was termed artificial food in feeding animals was deemed a piece of extravagance at the beginning, and the popular notion that it could not be made to pay had to be dispelled. To do so animals fattened by the two systems were placed side by side on view at the early shows, and their exhibitors had to give a very exact statement as to how they had been fed, with particulars as to their ages and breeds, and everything calculated to bear on the principal point. The butchers refused to furnish the carcass weights of the prize beasts after killing them, otherwise everything would have been possible to advance the art of grazing as practised in those days.

But practical men in 1821 had learnt that other objects could be elucidated by the club's shows, especially as to the breeds and kinds of animals calculated to yield greatest profit for feeding and how far size and age contributed to that result. Thus the club had a renewed lease of progress, and the shows expanded in magnitude of stock so that the Baker Street Bazaar building had to be hired in 1839. But twenty years after the club was again distressed for space, and negotiations commenced, which were successfully carried out, for the erection of the Hall at Islington, in which the club held its show in 1862 for the first time.

Even during the forty years odd during which the shows have been held at Islington there has been a thorough revolution in the character of the cattle and sheep exhibited. There were no classes for steers under two years old nor any lamb classes for some years after the show was removed from Baker Street. They now form the most important of the entire series. Early maturity is now recognised as the leading object to be promoted. The giant oxen of olden times, which often pulled down the scales to a ton and a half weight, have disappeared, and along with them monstrosities in the shape of over-fed cows and ewes. Carcase prizes have been instituted also that it may be seen what kind of animals yield the best meat for utility. Consequently the show may be considered more educational than ever it has been.

So mild has the weather been in Cornwall that last week ripe blackberries could still be seen near Probus and in other parts.

## Notes and Jottings.

**A** SMITHFIELD SHOW without a Hampshire, Oxford, Shropshire, and Suffolk sheep would strike one as being strange in these days, when these breeds are familiar to everyone, yet for a good many years after the London Cattle Show was started, none of these breeds were represented. They could not be exhibited because they did not exist, and the evolution of the breeds had proceeded so little that only the very much advanced and most far-seeing men could have had even a glimmering of the breeds which were to be evolved.

**ALTHOUGH** it is little more than a century since the Woburn sheep shearings gave rise to what has become an extraordinary far-reaching system of shows, still there are those who can look back half a century and remember the breeds mentioned above as being in a well advanced condition, although not possessing anything like the powers of early maturity which are so evident to-day.

**EVEN** before then the Oxford had been evolved from the Hampshire and the Cotswold, which implies that the Hampshire had been sufficiently long developed to have been able to again be hybridised. When one thinks of the advance made in a short time by what we are inclined to regard as the older breeds, even though they were in reality derived from crossings with older breeds, it should be encouraging to those who are interested in the newest breeds, not long invested with the patent of a flock book, and genealogical record, for what has been done with the older breeds may be done with the newer. In fact, the work may be done more quickly, for a certain amount of improvement has been going on for a long while, and they have not to be started from the wild heath condition that the breeds we have mentioned were.

**WE** always regard the Suffolk as one of the most interesting breeds because it is within the memory of so many that this breed has advanced from a very rough condition to the front rank; and its progress has therefore been under the observation of the majority of those now farming. Its records at the Christmas shows, where carcass competitions are in vogue, during recent years have been exceptional, and must have a marked

influence in its wider adoption for crossing purposes.

**BUT** when all has been said, one cannot get away from the fact that the breed which stood pre-eminent for quality in the early days of the show still symbolises the highest quality and embodies the most complete collection of features desirable in a model sheep, and the fewest of those which are objectionable. A high-class Southdown is a vastly improved animal since Christmas shows were first organised, showing that the work of the sheep breeder must continue through many generations before perfection is attained.

**NOW** it is not so perfect as it most probably will become, though it is difficult to suggest where great opportunities for improvement lie; but that has been the position for very many years; yet improvements have been wrought by those whose lives are spent in trying to mould it to greater perfection. The Southdown has just reason to be proud of the other down breeds which have been developed from it, and which, in their respective districts, are quite as valuable as the Southdown in its own.

**WHEN** one notices some of the cross bred sheep at Christmas shows, where fixity of type has been obtained, one cannot resist the idea that there must lie the possibility of establishing a breed in which two or more breeds of long and short-woolled sheep are permanently amalgamated. There must be room for such a breed as this, which would possess features rendering them more valuable than a mere crossing, which, if persisted in, would be productive of mongrels.

**I**f there is a weak spot in the breeds, numerous as they are in this country, it is that we have not one in which the best features of the Down breeds and the Longwool breeds are brought together. We get the Oxford with a rather coarse wool as a result of the Hampshire and the Cotswold, but have nothing where the finer-

A specimen Stud Ram in the flock of Lincoln Longwool Sheep belonging to Mr. G. Hoyles, Skidby Manor, nr. Hull.

woolled Longwools have been associated with the Down, unless it be in a very distant degree. A longwool Down may seem to be a kind of anomaly, but the crossbreds shown at the fat shows prove that it is not an impossibility; moreover, that a very high-class animal can be raised.

Lincoln Longwool Shearing Rams from Mr. G. Hoyles's Skidby Manor Flock, which were sent to the Argentine on Monday. They are sired by Biscathorpe Skidby 2nd, Skidby Riby Prize, Skidby Quadrang, and Atwick Skidby.

**GRIMSDALE & SONS,**  
RABB'S MILL, LTD.,  
UXBRIDGE.

IN view of the large amount of crossing that goes on it is strange, in this sheep-loving country, that someone has not been tempted to originate a breed, and have persistency enough to carry it through. Some of those who have been breeding animals consistently for the shows must have a foundation stock on which to build up a breed that would be well suited to graze on the better pastures and be well placed on arable land.

THE fat stock shows miss their mark when the good examples shown yearly do not stimulate someone to take up breed-making on the lines which produce such good animals as are seen in the cross-bred classes.

A FEW very early breeding flocks have commenced lambing, and before the month is out quite a large number will be making a start, while a month hence, such breeds as the Hampshire will see most of the flocks in some districts well in the midst of lambing. With so little to suggest winter at present, it seems difficult to realise that the first stage of wintering is so nearly over, and all may congratulate themselves that, in spite of fears at an earlier period, the weather has favoured them so well. It is certain that at one time there seemed little prospect that the food would have held out so well up to Christmas, or that there would be so good a prospect for the New Year.

EWES which are soon coming into the lambing pen require extra attention. This year the autumn growth has been rapid, and that means not rich in feeding matter, consequently there is great likelihood of the ewes dropping their flesh very rapidly during the few weeks preceding lambing, unless special feeding is provided. It is during the last few weeks that the fetus makes specially heavy calls on the dam, and it is a critical period.

LAMBS frequently come away before full time, because when there is not sufficient nourishment for both, nature solves the situation by letting the lamb slip, and so saving one life. Should an ewe become very poor, the difficulties of lambing are greatly increased; moreover, if the lamb comes away at full time the milk supply is liable to be deficient, and those who have been through lambing seasons with a short supply of milk, know the loss that is sure to occur.

AS a rule, at this time, it is advisable to give muscle-making food, such as malt combs, bran, peas, beans, or cake. Clover or sainfoin hay are of special value at this time. Salt should always be available. Over-fat ewes do not lamb easily; but this is a condition in which ewes on an ordinary farm rarely are found. There is no doubt that the best success is met when the ewes are in a vigorous and well-fleshed condition.

### Shropshire Sheep Breeders' Association.

The report presented at the annual general meeting of the Shropshire Sheep Breeders' Association and Flock Book Society held at Birmingham on Monday showed that the total worth of the society on September 1st last was £1,467 1s. 7d., including investments valued at £1,207 6s. and cash in hand £259 15s. 7d. The increase on last year's statement was £51 2s. 10d.

The large and important shipments of Shropshire sheep had been, the report continued, a great feature of the year, and it was clear the breed was making considerable headway in the different countries, both as a pure breed and for crossing purposes. The total number of sheep exported during the year was 1,902, which was the largest aggregate in the history of the society. The increase over the previous year was 570, and compared with 1904 there was an advance of 109. Of the total 1,057 were exported to the United States, Canada, and Newfoundland, 657 went to Buenos Ayres, Uruguay, Montevideo, Chili, Peru, and Brazil, 82 to Australia, Tasmania, and New Zealand, 52 to South Africa, Algiers, Alcoa Bay, &c., and 54 to Russia, Germany, France, Spain, Denmark, Sweden, Hungary, Jamaica, Finland, &c.

It was further stated in the report that Sir R. P. Cooper, having offered £50 to sustain the selling class at the Royal Show at Lincoln, the council recommended that a sum not exceeding £150 to include £50 selling class for shearing rams, £30 for pens of five shearing rams, and £15 for two shear rams at Lincoln) be set apart in 1907 for the purpose of promoting the interests of Shropshire sheep-breeders, and making more widely known the special attributes of the breed.

Mr. J. Bowen Jones, who presided, in moving the adoption of the report, said the financial position of the society was very satisfactory. He alluded to the increasing volume of business done in the exportation of Shropshire sheep, remarking that the total number sent abroad during the past year was nearly double the number in any previous year. That result must be gratifying to every

member of the society, and it was still further satisfactory to find that since September 29, 436 sheep had been exported.

Sir R. P. Cooper in seconding the resolution, which was carried, observed that there was every probability that during the coming year the demand for Shropshire sheep for exportation would be quite as satisfactory as it was during the past year.

### Suffolk Sheep Society.

Before proceeding with the general business at the last meeting of the Council of the Suffolk Sheep Society, the chairman, Mr. S. R. Sherwood, remarked that he was sure they were all pleased to see Mr. Ernest Prentice with them on this occasion. That gentleman had not been at all well, but as this meeting marked the twenty-first year he had been their secretary, he felt that he must be present. All that time Mr. Prentice had conducted their meetings to the entire satisfaction of everyone connected with the society, and it was a remarkable fact that he had not missed a single meeting during all that time. That was a record of which Mr. Prentice might be justly proud, and they congratulated him upon it. (Applause.)

Several members were elected, and the awards from the judges in the flock competition (details of which were recently published) were received. The Ipswich and district branch of the Meat Traders' Federation enclosed a copy of the Public Slaughter Houses Bill, and asked the support of the society in opposing it, as they regarded it as a serious matter indeed to the graziers of the county if it was carried through. The council resolved to oppose the Bill.

It was agreed to give £30 to the Highland Society of Scotland to be allotted as follows:—£10 for Suffolk ewe lambs, £5 for shearing ewe lambs bred in Scotland, £5 for ewe lambs bred in Scotland; £5 for pen of lambs, Suffolk, Cheviot, or Mountain; and £5 for pen of Suffolk Border Leicester. It was further agreed that £10 and a silver medal be given to the Suffolk, £10 to the Essex, and £10 to the Norfolk Agricultural Associations.

Mr. T. G. Heatley, veterinary inspector, read a long report regarding diseases in sheep which had come under his notice during the year, and he offered much valuable advice on the subject—so much so that the council resolved to have the report printed in pamphlet form, and also to embrace it in the Flock Book.

It was agreed to hold the annual meeting on the second Friday in February, subject to it being convenient to the president.

### Transactions in Store Stock.

Reported to the Department of Agriculture and Technical Instruction for Ireland.)

At Clonmel fair, co. Tipperary, held December 5, there was an average supply of cattle, chiefly second class; demand moderate, a clearance not effected. Calves, 2nd class, £3 10s. to £4 10s.; 3rd class, £2 15s. to £3. Yearlings, 1st class, £3 10s. to £9; 2nd class, £7 to £8 5s.; 3rd class, £4 10s. to £6. Two-year-olds, 1st class, £12 to £14 2s. 6d.; 2nd class, £9 to £11 10s.; 3rd class, £7 10s. to £8. Three-year-olds, 2nd class, £13 10s. to £14 15s. Springers, 2nd class, £12 to £16. Very small supply of lambs; demand good; 2nd class, £1 5s. to £1 11s. Young pigs in good supply; demand moderate; 18s. to 21s. and 22s.

At the Mallow Fair, co. Cork, held on December 4, there was an average supply of cattle; demand good for those in condition. Calves, 2nd class, £3 12s. 6d. to £4 7s. 6d.; 3rd class, £2 15s. to £3 5s. Yearlings, 1st class, £8 2s. 6d. to £9 5s.; 2nd class, £6 15s. to £7 10s.; 3rd class, £5 10s. to £6 5s. Two-year-olds, 1st class, £10 15s. to £12 15s.; 2nd class, £8 10s. to £10; 3rd class, £7 7s. 6d. to £8. Springers, 1st class, £14 to £16 15s.; 2nd class, £11 15s. to £13 10s.; 3rd class, £10 to £10 10s. Large supply of sheep; demand good. Lambs, 1st class, £2 4s. to £2 10s.; 2nd class, £1 10s. 6d. to £1 14s. 6d.; over twelve months, 1st class, £2 6s. to £2 14s.; 2nd class, £2 2s. to £2 4s. Young pigs, eight to ten weeks, 20s. to 25s.

At Ballyshannon, co. Donegal, held on December 3, there was a small supply of store cattle; few buyers attended, and the demand was less brisk than in recent fairs. Springers were scarce and in good demand. Calves, 2nd class, £3 10s. 6d. to £4 2s. 6d.; 3rd class, £2 10s. to £3 1s. 3d. Yearlings, 2nd class, £7 to £8 15s.; 3rd class, £4 2s. 6d. to £5 5s. Two-year-olds, 2nd class, £8 to £10 10s.; 3rd class, £6 5s. to £7 4s. Springers, 1st class, £17; 2nd class, £12 to £13; 3rd class, £10 5s. to £11. Young pigs eight to ten weeks old sold at from 14s. to 18s. each.

The Ipswich Guardians, who have been paying 9½d. a gallon for milk, have decided to purchase at an export price of £1,500 to ensure a pure milk supply for the inmates of the workhouse.

# HORSES.

## Notes and Jottings.

"He doth nothing but talk of his horse."  
—"Morechant of Venice."

IT is a curious thing how the best judges, when they are going to buy a horse or to look at a horse with a view to purchase, will listen to anything that they can hear about the horse, and allow what is often simply neither more nor less than meaningless gossip and unfounded rumours to influence their decision. I am quite sure that if a man would go to look at a horse with his mind quite clear of prejudice caused by what he has heard about him, he would do much better in the long run than he does when he allows himself to be influenced by what he has heard. When a man wants to buy a horse he should look at him as he would look at a horse he is judging—i.e., as a stranger, and if he has not confidence in himself when it comes to passing him he should employ a good veterinary surgeon who is accustomed to examine horses for soundness. One thing he should be careful about, and that is not to take the advice of a friend who probably knows less about horses than he does himself.

THE foregoing remarks are caused by a transaction which I saw something of a little while ago, and they recall an experience of mine which, though rather a painful one in a way, I will relate as a warning to others. A friend of mine bought a very good looking weight-carrying

back to his stable. "Surely you are not going to buy that horse," said he. "I certainly am," was my reply. Then my friend told me a tale which would, I think, have kept any man from buying. He was an excellent judge himself and a veterinary surgeon, and he told me that the horse had been sold and examined by an eminent man whom he named, and whom I had the greatest confidence in, and that that eminent man had rejected him for his wind. I said that I could not hear him make a noise of any description, and then my friend entered into a disquisition about roaring and kindred diseases. Finally I said that the horse, even if a whistler, was worth £60 to ride to death, in which he agreed.

WHEN I took the horse back to the stables I asked the stud groom if his master was at home—he lived at some distance from the stables—and he told me that he was away for a couple of months, and that he had the selling of the horse. I then asked him if he was prepared to consider a lower bid, and he replied that he could not under the instructions he had received, and there all my interest in the horse ceased.

IN the meantime the "crabbing" went merrily on, and in a few weeks the unfortunate horse was not left clear of a single infirmity which a horse is liable to. About six weeks after I saw the horse a well-known dealer came into the neighbourhood to look at some harness horses,

then asked if he might have a ride. "Take him where you like," said Mr. A., "and if you can make him refuse, or he puts you down at any reasonable place, I'll give him to you." Mr. B. told me this part of the story himself, and he said in the view of the "crab" there was no horse. He gave him a very severe trial indeed. He brought him back, had luncheon, and then saw him out again. Then, for the first time, he asked the price. "£250," was the reply. "I'll have him," said him along to-morrow," was Mr. B.'s answer. But Mr. B. was never to have a day's hunting on him, for he sold him in a few days' time for £350, and he made a big mark in the Shires where he was going for several seasons.

I MAY be asked how it was that the eminent veterinary surgeon whom I mentioned rejected the horse for his wind. This is a question I cannot answer, and I never liked to ask him, as the whole affair was naturally very much talked about, and it was, I knew, a sore point. But I would point out that a horse may have a little cold on him or he may not be quite himself, and so may breathe in a manner which may cause a man to be suspicious, especially when he has been so well crabled as this horse was.

AND when one comes to consider it, a horse is not infrequently rejected for his wind when he is absolutely sound. I do not mean, of course, that this is of frequent occurrence, but it happens often enough for any man of wide experience to be able to recall a few instances which have come under his notice. And differences of opinion respecting other points of soundness are also occurring from time to time. One of the most extraordinary instances of this kind that ever came under my notice was that of a hunter which the late Mr. George Mulcaster bought in Ireland. He rode him for a season and sold him for £180. A very able veterinary surgeon came and examined him, and rejected him for spavin. Mr. Mulcaster was certain that there was no spavin, and when another customer came along he sold the horse for £200. This time he was rejected for his wind. Mr. Mulcaster did not lose faith in his horse, but "backed his own judgment," and in a few weeks' time he sold him again, this time for £250. Two veterinary surgeons came along to examine him, and Mr. Mulcaster wondered what they would reject him for this time; his eyes probably, he thought, as they began by asking for a candle, and examining him. When the examination was over and they went into the house, the elder of the veterinary surgeons asked the younger one, who was a pupil, to write out the report. When this was done he looked it over, and said, "Yes, you are quite right, this is one of the soundest horses I ever examined. If they were all like this there would be no trouble."

I HAVE called the last veterinary surgeon an eminent man, but I am not quite certain, though he has had some high appointments, that he stood any higher in the profession than the men who rejected the horse, and I would myself have employed one of the latter as soon as I would the man who passed the horse sound in such an exceptional manner. How, then, is it to be accounted for that men who have risen high in their profession should come to such different conclusions about a horse? Well, perhaps that is a question for professional men to decide, but it must be remembered that whilst a big blunder or fault is very palpable, the boundary between a slight one, and soundness is very slight, so slight that a difference of opinion as to the border line being overstepped may easily come about.

THERE is a subject on which I think there is a considerable amount of misconception, even amongst men who have had some experience. That is, that if a horse is offered at a certain price to one man it is not the right thing to raise the price to another. What men lose sight of is the circumstances of the case. I know a man who will nineteen times out of twenty take a clear ten pounds profit out of a horse if he can get it on the same day or on the day he is delivered. But if that man gets the horse home and finds out that he is better than he expected, he is not bound to ask the next man the same price or anything approximating it. Let me put a case. A gives £100 for a horse, no matter what his breed, and B, seeing him, asks his price. A offers to take £110, but for some reason or other B, either on his own initiative or acting on the advice of some friend, declines the horse. A forthright afterwards C, having heard of the horse, goes to see him, and is scandalised when he finds that A asks him 200 guineas for the horse, and will not take any less. He quite forgets that during the time which has elapsed since B refused to take the horse, the "nimble nincompo" profit A has had time to get thoroughly acquainted with the horse's qualities. If A should chance to be a dealer in a large way of business, he will not require to be told that in many cases the intimate knowledge he has of this satisfactory sequel, and as a business man he

The Hackney Colt, Copmanthorpe, is the subject of the above illustration. It was bred by Mr. T. Hall, Copmanthorpe Grange, York, who won with it a First Prize at the Hackney Horse Society's Show this year in the class for yearling entire colts. Copmanthorpe is by St. Thomas 7261 out of 5670 Lady Wymondham by Maywood 2181.

horse. He was six years old, was as clever as they make them, galloped a good pace, and indeed he was about a perfect Hunter. That my friend could not ride him was not the horse's fault. Well, he rode him a season, but did not like him, and so he determined to sell him. Now, like many good Hunters, this horse had a peculiar shuffling walk and trot. He was not uncomfortable to ride, but his shuffling gait was certainly against him. I believe, but of that I cannot be confident, that he cost £160 originally. I know he was first offered at £100. Rumour had it that he had been sold and would not pass. Then it was said that he had been sold at £90, and had been rejected for his wind; and another gossip had it that he had been rejected for spavin, whilst a fourth said he had navicular disease.

MET his owner one day and he told me he wanted to get rid of the horse, and that he would take £80 for him, and in reply to my inquiry as to whether he was all right, he said he had never been wrong in any way whilst he was in his possession so far as he knew. So when I had a little time I went to see him; and I liked him. I rode him on the stones, and though his peculiar gait was noticeable I thought him sound; and I galloped him for his wind and could hear nothing. Indeed I had made up my mind to buy when I met a friend as I was riding the horse

and heard about him, and that he was "hanging" in the market. He heard all the "crabbing" as well, but he was a man of wide experience, and always used his own judgment about the soundness of a horse, as a man who is passing two or three hundred horses through his hands in a year ought to do. So he went and saw the horse and rode him, and the first thing he said to the owner was, "He is sound in his wind." Then he told him that he could not find him lame at all, but that the horse was well known, and had been so much crabled that with his peculiar gait he would be bad to sell, and he ended by bidding £60 for him as he stood, an offer which was accepted.

NOW comes the sequel. The dealer got the horse home, rode him, and found out what a good one he was. He rode him out cub-hunting a few mornings, and when the opening day of the season came, the horse and he were on the best of terms. It so happened the hounds had a brilliant forty minutes, and the crabbed horse cut out the work and made a great impression on another dealer who was out, and who was, perhaps, one of the finest horsemen of his day. This opening day was on the Saturday, and on the Monday horse-dealer No. 2, whom I will call Mr. B., came to see Mr. A. with a view to buying the horse. He knew how the horse had been crabled, and he knew what he had cost. He saw him out, and

Main Gallery, Agricultural  
Hall, during above Show.

knows he must take advantage of this when he has the chance.

THERE is another phase of this question of "two prices" on which many mistaken notions are held. A man, perhaps a breeder, asks £150, or perhaps even more, from a customer who takes a fancy to a horse, and afterwards sells him to a dealer for £120, or perhaps less. Perhaps he may sell him so that the original customer gets him for about what he has asked for him - perhaps he may be able to sell him for less. Is the breeder treating his first customer unfairly? Many people with no experience of the horse trade will answer yes. But let them think carefully for a moment. The casual customer comes once in a way for the best, or what he thinks the best. The raw, irritable, nervous horse that requires handling is of no use to him; he cannot ride him, or would not if he could. Then there are the mis-fits. Obviously he does not want to have anything to do with them. But the dealer has a way for everything except the vilest screw, and he can perhaps put his breeder friend into the way of getting rid of that very undesirable article, so it is only natural that the breeder quotes a shorter price to him. Besides, the dealer comes again and again; the casual customer, even if a fairly regular one, only wants a horse now and then. The question, however, is one which it is as well not to generalise upon, each case depending so much on the circumstances which surround it. But, before giving an opinion, it is necessary to know all the circumstances.

THE LOOKER ON.

## VETERINARY.

Advice of a Veterinary character, by an M.R.C.V.S., is offered to Readers entirely free of charge. Particulars of cases should be addressed to the Editor, "MARK LANE EXPRESS," 3, Wellington Street, Strand, London, W.C.

### In-calf Cows.

SIR, - About this time last year my cows commenced casting their calves; I had four cast between now and the middle of the next month. The same thing seems to be happening this time, as one cast her calf yesterday, which is three months from her calving time. Could any reader of this paper, or your M.R.C.V.S., advise me what to do to prevent this? - T. H. Y.

Answer: Probably you do not want to know anything about what you ought to have done, but what to do now. At the same time we cannot help remarking that it was very negligent not to have paid the matter some attention when, a year ago, you had four cows cast their calves. Had this been done it is possible that the same thing would not be happening now, or you would have at least been a year nearer to getting rid of the scourge.

It is very evident that you have to face an outbreak of contagious abortion, and it is marvellous that, considering all that has appeared in this and other journals, and the wide circulation given to the investigations into its cause and character since 1888, you should have been content to let the disease take its course and give it every opportunity of extending. As to "what to do to prevent this," nothing can be done to prevent other cows in-calf that have already received the infection from aborting, and prevention is only possible so far as the future is concerned. With reference to this matter we cannot, in the limited space available here, to go into the details of the complicated prophylactic treatment devised by M. NoCARD, the discoverer of the infectious nature of the disease, in a manner to render it intelligible to one who appears to have never heard of epizootic abortion in cattle, and we can only recommend you to obtain from the Secretary, Board of Agriculture, 4, Whitehall Place, S.W., a copy of Leaflet 108, which deals very exhaustively with "Contagious Abortion in Cattle." This can be obtained free of charge and post free, and the letter of application need not be stamped. Failing this, and preferably, perhaps, in your case, consult the local veterinary surgeon, and arrange with him for carrying out the prophylactic treatment. M.R.C.V.S.

At Feltham last week a food and drugs inspector related that a sample of margarine taken from a local firm was found on analysis to be pure butter!

For selling margarine containing 13 per cent. of mashed potatoes as well as an excess of water, "which are entirely foreign to margarine," Henry Watkins, provision dealer, of Morning Lane, Hackney, was fined £10 and costs at North London Police-court on Wednesday. It was said that the margarine was manufactured in Holland, and intended for sale in Germany, but was sent by mistake to this country. The manufacturers were, it was added, willing to pay the fine.

Grimsley, Lincolnshire, has always for inspection and sale a large flock of pure LINCOLN LONGWOOL SHEEP, including many prize-winners, having taken the leading prizes for many years at the Royal and other shows for both rams and ewes, including champion medals at both the Paris Expositions, Vienna, Amsterdam, Canada, Australia, New Zealand, and all the leading prizes at Chicago; also the first for the best collection of Lincoln fleeces of wool at the Royal Windsor Show, which proves the character of this flock, which is most famous for their great size and 125 per cent. good breeding. Rams from this flock made the highest average on record last year. Rilly Grove is seven miles from Gt. Grimsley, and 3 from Stallingborough Station. Telegrams: "Dudding, Rilly."

#### HAMPSHIRE DOWNS.

**COLES, Cary**, Manor House, Winterbourne Stoke, Salisbury. Registered HAMPSHIRE DOWNS. Prize-winners Royal, leading English and foreign shows, Salisbury Fair, 1906, 1901, 1902, 1904 and 1905; twice challenge cup. Chicago, 1901, all Champions and firsts for rams and ram lambs. St. Louis Exhibition, 1904, 10 sheep exhibited—all won class prizes, besides grand champions, reserve grand and champions. Annual ram sale August, 1906.—Extraordinary records: Twin ram lambs let for 25 and 120 guineas. Ninety averaged 421 lbs. Selections always for Sale.

**REGISTERED HAMPSHIRE DOWNS.**—FLOWER, JAMES, Chilmark, Salisbury. Leading Flock in Prize Records, Champions at home and abroad. Since 1894, "The Salisbury Fair Challenge Cup" (the Blue Ribbon of Show Yard Contests).—Now eight times; twice second, out of ten Competing. Prizes taken yearly at the Royal past 12 years; Champions in 1901, 02, 03-05. Breed Cup and Reserve Champion Shortwools, Smithfield 1904 and 1905. Champions at Birmingham over all Breeds, 1905. Highest average past 12 years at Briford Fair, Aug. 12; for 100 Ram Lambs. Selections on Sale; apply to Owner.

**STEPHENS, H. C.**, Cholderton, Salisbury. Registered Hampshire Down Flock; purest and best blood; a leading flock in all prize competitions. True to type and character; hardy constitution, great size, and good wool. The Ewes are kept on the highlands of Salisbury Plain, and are thoroughly hardy. Wholeflock individually numbered, and full pedigrees of Rams and Ewes recorded. Rams and Ram Lambs always on Sale.—Apply, JAS. G. KERR, Estate Office, Cholderton, Salisbury.

**WINCHESTER**, the Most Hon. the Marquis of Amport St. Mary, Andover, Hants. Pure-bred flock of Hampshire Down Sheep; high-class Rams and Ewes always on Sale.

#### OXFORD DOWNS.

**COWLEY MANOR FLOCK**, property of James Horlick, Esq. Pedigree Oxford Downs of best and purest strains. Ewes and Rams for sale privately. Rams sold annually, Cirencestre. Prize-winners Royal, Bath and West, and leading flock at Hampshire Down Sheep, Cowley, near Cheltenham.

**WHITE, JOHN**, Ham Court Farm, Bampton, R.S.O., Oxon.—Pedigree Oxford Down Sheep of best and purest strains for sale. Foreign and home buyers invited to inspect.

### PIGS.

#### LARGE WHITES.

**ASHFORTH, JOSEPH**, Driffield, Sheffield. Large and Middle Whites from Royal Winners; unrivalled type, flesh, size, soundness.

**HOSKING, EDWIN**, Rosevidney, Ludgvan, Cornwall.—Breeder of pure pedigree Large Yorkshire White Pigs; good type with size and quality. This herd has won all the first prizes except one offered for Large Whites at the Royal Cornwall Shows for the last four years; also numerous other prizes. Young Boars and Sows for Sale at moderate prices, bred from winners at the Royal of England.

**HUGHES, ALFRED**, Packwood Grange, H. Knowle, near Birmingham. Select Herd of Pedigree, Large White Yorkshire Pigs, bred from prize-winners. Young Boars and Gilt for sale at moderate prices.

(Continued on next page.)

# Live Stock Record.

DIRECTORY OF BRITISH PEDIGREE

STOCK OWNERS.

## LARGE WHITES—(continued).

**KIRBY BEDON HERD** of Pedigree Large White Pigs of prize-winning strain. Grand young Boars and Gels for sale at moderate prices. Hardy constitution, size and bone a specialty.—For particulars apply W. MITCHELL, The Vale, Kirby Bedon, near Norwich. Two miles from Trowse station, G.E.R.

**LARGE WHITE PIGS.**—Boars and Gils eligible for Herd Book; also registered Oxford Down Sheep, descended from Prize-winners. At moderate prices.—J. PHIPPS SMITH, Salford Priors, Evesham.

**NOTTINGHAM CORPORATION, Stoke Farm** Herd Large White Pigs, estab. over 20 years. Boars and Gels at moderate prices. Inspection invited.—A. AVIS, Stoke Barrough, Nottingham.

**OWTRAM, HERBERT H., Newland Herd** Pedigree Large White Yorkshires, winners many prizes, Champion Cup and Medal; Boars, Gils, in-pig Sows for sale.—FARM BALIFF, Newland Hall, Bay Horse Station, Lancaster.

**THE NEWNHAM HALL HERD** of Large and Middle White Yorkshire Pigs is one of the largest and oldest herds of pure-bred pigs in the United Kingdom. Priced moderate. Inspection invited.—NEVILLE J. HINE, Newnham Hall, Baldoek, Herts.

**THE WATFORD HERD** of Large White Yorkshire Pedigree Pigs of the choicest breeding, 150 to choose from. Send for Illustrated Catalogue. Grand young breeding stock always on sale.—Apply, R. AYKE, Bushey Lodge Farm, Watford, Herts. (17 miles from London).

**WALTON HERD** of Pedigree PIGS, owned by Sir Gilbert Greenall, Bart., Walton Hall, Warrington. Large and Middle White Yorkshires, unsurpassed for purity of blood, size and general excellence, as proved by the numerous Championship and Class Prizes won at all the leading shows. A choice selection of Boars and Sows for sale; stock carefully shipped.—For particulars apply to the Manager, J. HALLAS, Higher Walton, Warrington.

## SUSSEX.

**SUSSEX PIGS, LARGE BLACK.** Pure bred and of finest quality, with very small bone and fine hair. Not to be equalled for prime meat.—FRANCIS N. HOBGEN, Manor House, Appleton, Chichester.

## LARGE BLACKS.

**CORNWOOD HERD** of High Class Pedigree Large Black Pigs.—Breeder and winner of numerous Prizes and Cup; Royal, Bath and West, and County Shows. Boars and Sows always on sale.—JOHN H. GLOVER, Cornwood, Devon.

**PEDIGREE LARGE BLACKS** of Choicest Strains, young Boars and Sows For Sale; prices moderate.—H. J. CLARKE, Norbury House, Newport, Shropshire.

## BERKSHIRES.

**DEVAN, C., Maplehurst, Reading.**—Pedigree Berkshire Pigs, pure bred Boars and Gils, of all ages, and at moderate prices.

**CORY, CLIFFORD J., M.P., Llantarnam Abbey, Monmouthshire.**—Pedigree Boars and Gels.

**CRIBB, ARTHUR LEWIS, Well End Lodge, Shenley, Bucks.** Breeder of PEDIGREE BERKSHIRE PIGS. Young stock from noted strains, and eligible for Herd B. ok, for sale at moderate prices.

## MIDDLE WHITES.

**DEWHIRST, A., Ryecroft Farm, Dudley Hill, Bradford.** Pedigree Large and Middle White Pigs, also a few Berkshires of the choicest breeding. The following prizes have been won in 1902 by pigs bred by myself: 2 champion prizes for the best pig in the show, 36 firsts, 25 seconds, and 3 thirds, with numerous reserves and V.L.C. Send 2 stamps for Illustrated Book.

## TAMWORTHS.

**THE Melton Constable celebrated Herd** of Pedigree Tamworth Pigs. Prize winners at Norfolk, Suffolk, and other shows. Champion Cups Smithfield. Several recently exported for Continental and Colonial herds.—Apply R. OWEN GODDARD, Estate Office, Melton Constable, Norfolk.

A deputation from the Central and Associated Chambers of Agriculture will wait upon the President of the Board of Agriculture, on the subject of the Sale of Milk Regulations, on Wednesday, December 12, at 3 p.m. The deputation will be received in one of the upstairs committee rooms of the House of Lords. Delegates attending will ascertain from the constables on duty the number of the committee room, as this cannot be decided for the present.

## Notes and Jottings.

THE mild weather and the cattle shows of Christmas fat stock are still with us, but as regards the latter the next ten days will make a clean breast of them. As regards the former there is no doubt, up to the time of writing, it is having a more or less depressing effect upon demand and prices for big beef, and is not helping the show cattle to stand their travelling and showing any too well, as the various halls in which the cattle are exhibited become very close and stuffy during the afternoons and evenings when the gaslights and large attendance of the public tend to prevent a free current of air. It has often struck one that the system of keeping these animals rugged so much in these halls is a mistake on the part of those caring for them.

WHILST bowing to the greater experience of the herdsman, who has perhaps had the care and management of Christmas cattle for very many years, and still adheres to this rugged system, we may be excused for mentioning that in the ordinary feeding of heavy fat cattle, fat cattle of very little or any less weight than many of the exhibitors' awards, such stock when left to their own devices of a warm shed or an open yard or a field, in nine nights out of ten, no matter how cold, will be found to have slept in the openest place available, more frequently than not the bleakest part of the field, scoring even the break that the hedges afford. The reason is very easily seen—namely, in the great amount of heating food that these animals are consuming, all of which tends, together with great covering of flesh and the great coats of hair that many of them possess, to cause them to be uncomfortably warm. It has been quite painful to witness the breathing of many of these animals during the evening of the show days, when the halls are rowded and the poor beasts rugged up for supposed comfort.

IN those admirably written pages of cattle breeding and feeding written many years ago by that cattle feeding king, the late William McCombie, of Tillyfour, reference is there made to this same thing, when the old herdsman received his orders to take such favourites as Black Prince and the like to the midland and southern shows. The old man replied in tones of deep sorrow, that he wished he "had na got to go for the sake of the pair beasties." Why," said the master, "don't you like Birmingham and London?" "Yes," was the reply, "the places are good enough, but it's the nasty gas and heat that perishes the beasties worst of aught." It is precisely the same to day, and the cattle show it.

AT Birmingham the great honours of the show fell to the Shorthorn breed in precisely the same order as at the Newport Show the previous week, the champion honours of the breeding classes were allotted to the same breed. It is really quite wonderful that this breed should be able to supply so many champions in spite of the enormous drain that is continually going on for breeding purposes from all its best heads and leading representatives of those herds. There is, however, some little reason for this in the fact that the Shorthorn breed far outnumbers all other breeds, and therefore has a much greater extent of stock to draw upon. Not only England, but Scotland, Ireland, and Wales have all their herds of Shorthorns in great numbers, capable of supplying cattle fit for exhibition purposes, and with such an extensive hunting ground, the chances must naturally be a little more in their favour than that of the other breeds, whose whereabouts and numbers are so much more limited.

SOME of the other pure breeds of cattle at Birmingham were scarcely of as good quality as upon some previous occasions—namely, the two great bred breeds of Hereford and Angus. On the other hand, Welsh cattle and West Highlands have probably never been so good in quality as this year. With regard to the Hereford breed, there were several of these in the butchers' and extra classes, which, though not decorated with wing labels, were upon the second day of the show labelled with the very satisfactory notice "Sold," and the prices appeared to have given general satisfaction. The cross bred cattle at Birmingham were in great excess numerically in

the butchers' classes. A great many ordinary feeders have of late years taken to feeding one or two cross-breds rather as a hobby, and these tend to swell up the ranks. Many of these return to their homes for exhibition and sale at the local auctions where prizes are given and so, where good judgment and management are brought to bear, the project frequently turns out well; if not greatly profitable, it at least, to use the old saying, "holds the money together."

THE Herford herd appears to have advanced very much in favour with the butcher all over the kingdom lately. In Ireland the leading feeders and salesmen have been heard to return their praises of the white-faced breed, being able to be marketed and eagerly sought for during the early summer months, whilst prices are as a rule at their best. Recently we have also heard that even in Scotland a good number of Herefords have been imported for feeding purposes, and with such satisfactory results that at the Edinburgh or Glasgow auction the highest price per cwt. was obtained for white-faced steers, butchers expressing themselves as being highly pleased with the dressing and sale of their beasts. There is no doubt a great deal of this improvement or more satisfactory results in the sale and dressing of these cattle is due to the fact that plentiful breeders have of late paid greater attention to size and are excluding the very short compact animals almost entirely, finding that such were giving a carcass possessed of little flesh and a superfluity of fat. From all time, and with all breeders of whatever breed of cattle, experience has always gone to prove that any reduction, or attempted reduction, in size has ended in a vastly increased preponderance of fat and a practically decreasing amount of muscle and lean flesh.

AT Smithfield Show the usual carcass competitions will take place once more, and we cannot but repeat how much more useful and instructive the lessons taught by these tests would be were the exhibitors to state upon what foods the animals had been got up, and not only upon what foods, but also what systems of management had been followed, whether close and warm housing, or whether the animals had been allowed liberty more freely, and a certain amount of what may be called open-air treatment.

IN these very inventive and scientific days with regard to foods and their effect upon the live stock of the farm, visitors to our shows are bewildered by the number of stands and invitation cards issued calling attention to various kinds of fattening foods, cakes, milk substitutes, and the like, but the experience of practically a hundred per cent. of the feeders of this country goes to prove that up to the present time pure bred milk stands at the head of all feeding experiments and this whether we refer to cattle (old or young) or to horses and pigs. Looking at a very young steer the other day in the showyard with rather a remarkable record of weight, its feeder says that it is new milk mainly that accounts for the development. Another feeder of more matured animals who lives in a mild district, and upon rich and warm soil, and has proved very successful in the ring with fat stock, says "I attribute much of my success to the milk, climate, and rich soil, which enables me to feed my stock upon green food throughout the year." Presumably the hardy kale plants filling up the gap that would occur in many places during the dead and frosty months. Thus rye and Italian rye grass get fit to cut in the locality named by February or early in March.

IT is not often that the export of pedigree cattle continues so active during the rough period of the year as is the case this season. No matter who one meets interested in the pedigree export business, one is met with the information that our friend has been shipping so many cattle to such a place, and has purchased others for shipment to such a country, and is still looking out for any specimens likely to make their mark in new homes beyond the sea. The weather at the present time is not altogether inviting to ship cattle—stormy and unsettled, with heavy gales at times; but the more newly fitted up cattle boats are made very comfortable, and the total loss or damage on the voyage, wherever it may be to are very insignificant when the numbers shipped are taken into consideration.

THE tuberculous question that we have been waiting long and patiently for, does not appear to have been settled in any decided form. It is surely high time something more was known or done by the commission entrusted with this important measure. The foreigner still objects to purchase unless the animals can pass the tuberculin test, whilst numbers that have been tested have proved by after results the unreliability of the test in many cases. The trend of all veterinary experience appears to point to a practically certain hereditary result, and many breeders also aver that

the disease is very super-hereditary. We may say, though varying considerably as to the period when it may assert itself, some animals remaining sound and breeding well for several years though eventually succumbing, whilst others suffer at a much earlier stage, probably the mode of keeping may affect this.

### Sale of Stock at Ipswich.

At Ipswich on Tuesday Messrs. Robert Bond and Sons brought under the hammer a number of the animals exhibited at the Suffolk Fat Cattle Club's Show. There was a large attendance and a sharp clearance throughout. The champion heifer was reserved for the Smithfield Show; and was, therefore, not put up, but many other prize winners were, including the reserve champion, Mr. Spencer Dawson's cross-bred. This weighed 15 cwt. 1 qr., and was knocked down to Mr. A. Mudd, Ipswich, for £35, but this was not the top price for cattle as Mr. J. C. Dawson's second prize cross-bred steer, whose weight was 15 cwt. 3 qr. 22 lb., realised £36, the purchaser being Mr. S. Warth. Mr. S. W. Vine's Shorthorn heifer, commended, and winner of Mr. A. Minter's special, was sold to Mr. C. Nash, Haldstead, for £35. Sir Cuthbert Quilter's third prize cross-bred heifer, weighing 14 cwt. 1 qr., went to Mr. W. Lay, Ipswich, for £34 10s.; and Sir Frederick Adair's cross-bred steer, second and reserve for Challenge Cup for best beef under two years, grazed in Suffolk (weight 16 cwt. 2 qr.), realised £33 from Mr. H. C. Chase, Bungay, and other cattle made up to £31 10s.

In the sheep sales the pen of three champion wethers shown by Mr. H. E. Smith sold respectively to Messrs. A. Mudd, Seaford, and T. Mudd for £5 2s. 6d., £5, and £1 17s. 6d. each. Mr. Smith's second prize pen went to Mr. Trenter, who took two at £4 5s. apiece, the other selling for £4 2s. 6d. to Mr. Aggiss. Mr. Kenneth M. Clark made £3 7s. 6d. and £3 (twice) for his pen of three pure-bred lambs, whilst the premier pen of pure-bred lambs, shown by Sir Thos. Gooch, realised £3 15s., £3 12s. 6d., and £3 10s.

The champion pig in the yard, a Berkshire just under twelve months old, and weighing a little over 4 cwt., was knocked down for £8 to Mr. A. Morse, Wrentham, Norwich, who was the purchaser of other lots as well. Mr. Kenneth M. Clark's (Sudborough Hall) Large Blacks made £7 17s. 6d. and £6 7s. 6d. each; the same exhibitor's second prize pen of three were sold separately, two going for £5 12s. 6d. and the other at £5 10s. The winning pen of Large Blacks owned by Mr. Gerald A. Smith, of Bealings, which also won a special, made £7 10s., £7 2s. 6d., and £6 17s. 6d. each.

### Fat Stock Sale at York.

The prize stock exhibited at the York Fat Stock Show, was sold by auction on Thursday, and some special prices were realised. Messrs. J. Walker and Sons sold two Highland cattle sent by the King, both of which took the first prize in their class. The first, a two years and eight months old yellow ox, weighing 113 stones, was knocked down to Mr. Joseph Demaine, of Leeds, for £54; whilst the other beast, a three years and ten months old red heifer, weighing 97 stones, was bought by Messrs. Wilkinson and Sons, Selby, for £48. Amongst the other cattle disposed of by the firm were the following:—Lord Wenlock's white Shorthorn ox, 127 stones, £39 15s.; Mr. John Whitford, Hull; Lord Wenlock's cross-bred ox, 147 stones, £37; Mr. Morris, Driffield; Mr. Brigham Carlton's blue-grey ox, 164 stone £40 15s.; Mr. J. W. Gould, Hull; Mr. D. Lund's (York) black heifer, 128 stone; £33 5s.; Mr. J. O. Whitford, Hull; Messrs. A. and C. McNeill's ox, 159 stone, £37, Messrs. Wilkinson and Sons, Selby.

Messrs. Walker also sold the King's pen of three Southdown sheep for £6 2s. 6d. each, to Messrs. Mills and Burrell, Newcastle-on-Tyne; two pens of Mr. Stanforth's Down sheep, for £5 each, to Mr. Stoddard; Mr. P. Goodwill's (Stithenham) three Scotch cross sheep (first cross), for £3 18s. each to Mr. Dowell, York; and Lord Wenlock's three Scotch cross sheep (second cross), for £3 18s. each, to Mr. W. Dowell.

The firm also sold several bacon pigs, the top price being £14, for an exhibit by Mr. F. Davison, York, the purchaser being Mr. Blades, Leeds; other bacon pigs made from £8 7s. 6d. to £11 12s. 6d. each, and pork pigs made from £2 4s. to £5 2s. 6d. each.

Messrs. Tomlinson and Sons also sold a number of head of exhibited stock, including the following:—A blue-grey spotted ox, the property of Mr. D. Lund, Flaxton, 155 stone, was sold to Mr. John Whitford, Hull, for £52; a red Irish heifer, the property of Mr. J. E. Jones, Eldridge Hill, Thirsk, 155 stone, Mr. John Whitford, Hull, £37 10s.; an Irish bullock, 152 stone, the property of Messrs. Tomlinson and Sons, Mr. J. V. Parsons, Tadcaster, £37 15s.; Irish bullock, belonging to the same owner, 151 stone, Mr. C. Wheldrick, Henningborough, £34 15s.; Three cross-bred sheep, the property of Mr. J. Bickley, Cattal, realised 96s. each, and three 92s. each; five cross-bred shearlings, the property of Mr. A.

Penty, Whixley, realised 88s. each; Mr. Thos. Burton, Knapton, sold three cross-bred shearlings for 78s., and three at 78s. each.

### English Jersey Cattle Society. Council Meeting.

Eight new members were elected at a council meeting of the English Jersey Cattle Society, held at 7, Princes Street, Hanover Square, London, on Monday.

The General Purposes Committee reported that they had considered the distribution of the £100 voted by the council at the last meeting for inspection prizes for 1907. They recommended that the sum of £20 each should be offered to the Royal Agricultural Society of England and the Bath and West Society for cows or heifers in milk, bred by exhibitor and sire in Great Britain or Ireland; that £60 be divided amongst the following societies:—Royal Counties Society, Tring Society, Oxfordshire Society, Essex Society, and Somersetshire Society. This report was adopted, subject to certain provisions.

A letter was read from Mr. H. S. J. Maas, Consul-General for the Netherlands, inviting the society to send delegates to the International Congress of Dairying to be held next year at The Hague. Dr. Watney and Mr. Joseph Carson, having expressed their willingness to attend the congress, were thereupon appointed to represent the society.

A proposition by Mr. Mathews, as to whether something could be done to bring before the public the excellence of Jersey butter and to further encourage members in its manufacture and sale, elicited an interesting discussion. Finally it was agreed to appoint a sub-committee to meet and further consider the matter.

### Sir Thomas Elliott at Ripon.

On Thursday Sir Thomas Elliott, K.C.B., Secretary of the Board of Agriculture, attended a conference at Ripon, arranged by the Ripon Agricultural Association, to hear the views of the members on the Lind Tenure Bill, the Sheep Dipping Order, and the Swine Fever Regulations. There was a large attendance, and the conference proved a most interesting one. Having heard the views of various members on the subjects mentioned, Sir Thomas Elliott said that he felt it would be a very serious disadvantage if anything was done by Parliament which would lead to friction and difficulty between landlord and tenant. Agriculture was having a very uphill struggle, and in every agricultural society he had visited—and they were many—there was a general desire that landlord and tenants should work together smoothly and for the common interest. "If," proceeded the speaker, "there is anything in the Bill which would bring about litigation, difficulty, and friction, no one would regret it more than myself. The Bill was picked up by the Government in a somewhat unusual fashion. It was unhelpful when it was introduced, and needed a great deal of motherly attention. That attention the Bill has undoubtedly received, and I think everyone will say that it is a much cleaner, a much brighter, and a much better child than it was.

The attention has not been given from one side of the House more than the other. As far as I can judge, the desire has been to find common points of agreement to make the Bill a workable and useful measure. I have no doubt some further amendments will be made to it. I have every hope the Bill will not give rise to friction and difficulty, but that it will do something to make the relations between landlord and tenant more harmonious."

Sir Thomas then went on to speak of the Diseases of Animals Acts. He said that the Board made the regulations as simple as possible. It was no pleasure for the Board to impose restrictions for the sake of imposing restrictions. At the present moment there was not a single disease affecting cattle in existence in the country. In regard to sheep, the speaker quoted figures showing the diminution which had taken place in the number of cases of sheep scab during the past few years. The country and the county were in a much better position in regard to this disease than was the case ten or fifteen years ago.

We are, added Sir Thomas, making progress, and there is a real hope that before very long we may get rid of sheep scab altogether in this country, and have a perfectly clean bill of health. The position in regard to swine fever was rather better than it was in regard to sheep scab.

In the evening, Sir Thomas Elliott was entertained to dinner, and in replying to a toast, said it was the desire of every official in the Board of Agriculture to do his level best for the agriculturist. During the last thirty years the value of the property of landlords had diminished by an amount exceeding the amount of the National Debt. Tenant farmers were now distinctly lower in the social status, and one agricultural labourer out of every three had left the countryside. He did not think that public

men sufficiently recognised this state of affairs. If the agricultural Rating Act had been passed fifteen years ago, the position of agriculture might have been much better to-day. During the last two or three years, however, some ground had been gained.

### Midland Notes.

VERY seldom does it happen that a Birmingham show week has come and gone before the advent of at least one or two sharp frosts. But we have had nothing this season of severity enough to leave any permanent effect upon the land, and our heavier soils especially are willy in need of the disintegrating influences of a few cold days.

IMPLEMENT makers are ingenious in devising new forms of harrows, all warranted to break up the most stubborn of clods, but nothing is likely to be invented capable of rivaling the expansive effects of frozen water. Following on the much too plentiful downpours of November, the renewed rains of the last morning and evening have left the surface of the land waterlogged once more, and even the subsoils are now wet a long way down. If only we could have a really sharp turn of frost now—such a one as came in the middle of November last year—it would have a wonderful effect in expediting the work of tillage later on.

WE need a touch of cold also to put life and keenness into the markets. The Christmas sales in the Midlands are close at hand; very soon now such fixtures as those at Wolverhampton, Stafford, Stratford-on-Avon, Leicester, Kettering, and a hundred more or less of more importance will be taking place, and what inducement is there to be paying well for Christmas beef so long as the season remains mild and muggy, as it has been of late? Not much, we fear; and the corn trade is hardly less adversely affected.

TO read the local cattle market reports is to be convinced afresh of the handicap excessive railway rates impose on farmers. Probably no trade of anything like equal importance is so curiously localised. Twenty miles away supplies may be small and prices a farthing higher than at home—no small difference when one has half a dozen ripe beasts to dispose of—yet the railways make it impossible to move the stock across the county without loss. Owners were better off in the old days, when they could send their beasts by road. But the railways have made that impossible. As it is, if a journey of any length had to be undertaken, how could one hope to house and feed the beasts by night?

IT is needless, I suppose, to expatiate in this manner on the inconvenience that follows scarcity of money in the villages. How many quarters of wheat and barley are hurriedly sold every year below their value because the farmer must have money to pay his extra men and meet the ordinary obligations of the season. Do we not, again, hear constantly of small lots of feeding stuffs and fertilisers being purchased because ready money sufficient to pay for a quantity and secure the lower rates allowed to buyers in bulk is not at hand. Let us hope that the new co-operative agricultural credit society, which has just been registered, will give the Midlands the benefit of its aid. From the fact that the Earl of Coventry is on the board of management, one may pretty safely assume that Worcestershire will not be overlooked; and the Earl of Stamford's association with the enterprise should be welcome news to the East Midlands.

THE Bingley Hall Show this week furnished striking evidence of the extent to which the swede and turnip crops improved during the late autumn. With such ample supplies as most of us now possess, there will be no occasion for hurry in starting on the mangels; and with the general abundance of all roots and the dearth of store sheep, which has induced many buyers to purchase less heavily than usual—we shall see, no doubt, another extension of the system of green manuring. Mustard and other crops which are suitable for ploughing down have made very rapid growth this season, and where stocks are more or less depleted much of this green stuff must necessarily enter its career underground. Considering its excellent effect upon the staple of the soil and the amount of nitrogen a leguminous crop like clover or vetches adds to the land, it is questionable whether the economic advantages of green manuring are sufficiently appreciated.

December 6, 1906.

At the Martinmas hirings at Dumfries on Wednesday young men were plentiful, but women servants were scarce. Young ploughmen received £8 to £10; tyre-women £9 10s. to £11; kitchen girls, £8 to £10; and £11 to those able to milk; boys, £7 to £8; all for the half-year, with board and lodging.

## Northern Notes.

THE Martinmas just past has been one of the finest within living memory; the agricultural servants have enjoyed their week's carnival, going from fair to fair, spending money liberally, and being all the time in the best of humours. Martinmas customs were almost similar to what they are now 200 or 300 years ago.

AN account of the proceedings at Martinmas, which appears in the journal of a farmer who lived in the East Riding, tells us how that "about a fortnight or ten days after Martynmasse the cheif constable of every division sendeth abroad his precepts to all pette constables, willinge them to give notice to all masters and servants within their severall constablies howe that hee intendeth to sitte att such a place on such a day, commandinge everie of them to bringe in a bill of the names of all the masters and servants within their severall constablies."

THE account describes how the "sittings" for living are to be held. There are usually two, and sometimes three, for every police division, the first taking place a week or more before Martinmas, and the next three or four days after that. The chief constable sent out his warrant to so many towns to meet him at a certain place on a given day, and the towns that were first called were the most privileged. The sittings for a particular place were not always held in one parish.

THE record goes on—"Our sittings were both att Kirkbrune this year; the cheif constable sate att Mr. Whippes, and the servants stood in the churchyard. There is allways a sittings at Kilham the morrow after All Saint's Day, and usually another at Sledmere two or three days after. A master cannot turn away his servant, nor a servant goe from his master, without a quarter's warning; servants will usually give their old masters a day, some two days, and some will stay three days with their old masters, and goe away on the fourth day after Martynmasse. They stay usually two or three days with their friends, and then aboute the fifth or sixth day after Martynmasse will they come to their new masters."

THE most remarkable thing in relation to agriculture is the continued mildness of the weather, though at the time of writing a cold snap is being experienced, and snow has actually fallen at Hull. Up to mid-week, however, there had not been, day or night, for a month a lower temperature (on the grass) than 30 deg. November rainfall was liberal, very nearly 4 in. Farming operations have made progress lately; stock on the hills have done well on herbage fresh and

palatable, and tenants are rejoicing in the prospect—almost an accomplished fact—that the lack of winter is broken. The wheat plant has come on wonderfully, and how it will fare with an outburst of severe weather to contend with is a matter of conjecture.

THE lately predominant atmospheric conditions are regarded by some as a weather breeder. Be that as it may, there is much to interest the eye out of doors. The holly trees are a mass of scarlet, and flowers (daisies, cowslips, and primroses) are blooming in exposed situations. Nobody is sighing for an old-fashioned winter, when hedges and gates used to be under a snowy mantle for weeks together. The violent changes one used to experience thirty or forty years ago are now only a memory; and it is just possible we may have a "green" Christmas.

A FEW lambs are still coming to market. The buyers are farmers desirous of putting them on turnips, to be sold off in the spring. The best lambs are selling at over two guineas per head. We saw over a thousand penned in a country cattle market this week, and their expositors had to stand nearly half a day before effecting sales. Then a few were turned back in the end. It is astonishing how hard are some of the Yorkshire men in making up their minds. They hang about a market for hours at this time of the year, and are like bees going from one salesman to another in the hope of picking up something cheap. In September the same men were almost running over each other's heads in their eagerness to purchase. The root crop being abundant, there is no prospect of hogs becoming cheaper until all the roots left to be "eaten on" are exhausted. It is quite problematical what will happen in the spring. Mutton may be cheap; it may be dear. Most probably the latter "may" will rule the market.

MENTION was made under the head of "Seasonable Topics" a short time back of the badly-kept state of wayside roads. There is an abundance of these in Yorkshire and further north, where the accommodation roads are what are called "soft," and the ruts are occasionally filled in—or should be—with chalk; but this material is very quickly ground down, and the last state of the road is worse than the first.

ON the Wolds there is an occupation known as flint-picking, and some few families are quite expert at the work. Women engage in it as well as men. The flint on some arable land in East Yorkshire yields an apparently inexhaustible supply of flint, and the wonder is that plant life thrives and brings forth thirty to fifty fold on such stony ground. The flints, gathered in early spring and summer and left on the field sides, are even-

tually used for filling-in the ruts. They are much more durable than a chalk filling.

ONE of the most prosperous and useful organisations in connection with agriculture in the North is the Darlington Farmers' Protection Association. Formed seven years ago to combat the then frequent throwing-up of barley samples, it has grown to a huge membership of 650, all either tenant farmers or their sons. This society is regarded as the parent of the North Eastern Farmers' Federation, which has already got the credit of awakening a more lively and intelligent interest in farming topics on the part of M.P.'s and would-be members, the latter's federation has no political object—its simple aim is to benefit agriculturists.

THE whole of the North Country farmers' organisations are gradually being affiliated, as tenants are clearly seeing the potentialities of combination—a thousand farmers banded together for a special purpose must be much more powerful than half a score putting their ideas together on a market day. Co-operation is also in the air at Northallerton, where a large meeting was held to consider the desirability of forming a branch of the A.O.S. The club has received the proposal most favourably.

December 6, 1906.

### Royal Agricultural Society.

The annual general meeting of governors and members of the Royal Agricultural Society will be held at the Hotel Russell (Bernard Street entrance), Russell Square, London, W.C., on Wednesday next, the 12th inst., at 12.30 p.m.

The report of the Council is, as usual, a lengthy one, dealing with the events of the society's year, and noted from time to time in our reports of the council meetings. As regards the position of the society, the report states that the following changes in the list of governors and members have taken place:—

Eighty-five governors and 838 members have been elected, and 4 members have been reinstated under bye law 12; whilst the deaths of 5 governors, 73 life members, 93 annual members, and 3 honorary members have been reported. A total of 2 governors and 250 members have resigned, whilst 27 have been struck off the books under bye-law 10, owing to absence of addresses, and 30 under bye-law 11, for arrears of subscriptions.

The above and other changes bring the total number of governors and members now on the register to 9,620, divided as follows:—1 foundation life governor, 154 annual governors, 92 life governors, 6,196 annual members, 3,147 life members, 30 honorary members—total, 9,620, as against a total of 9,170 members on the register on December 31, 1905.

# DAY·SON·&·HEWITT'S LAMBING & CALVING REMEDIES

### THE GASEOUS FLUID.

Cures Prostration in Cows and Ewes.  
Cures Low Condition, Debility, and Hoven.  
Cures Scour, Colic or Gripes, and Diarrhoea.  
Cures Coughs, Colds, and Loss of Appetite.

Price 1/9 per bottle; 20/- per doz.

### THE RED DRENCH.

For Cleansing after Lambing and Calving.  
For Hide Bound, Red Water and Yellowa.  
For Chills, Fever, and Loss of Cud.  
For Preventing Milk Fever and Quarter Ill.

Price 3/6 per doz. (Ewes); 13/- per doz. (Cows).

This chest contains every essential for the saving of life at the critical period of LAMBING and CALVING; it can be arranged for cows only, or ewes only, or both.

PRICE COMPLETE, £3 3 0;  
Half Size, 30/-.

### THE CHEMICAL EXTRACT

For Anointing after Calving and Lambing.  
For Straining and Preventing Gangrene.  
For all Sores, Wounds, and Swollen Udders.  
For Sore Throats, Strains and Rheumatism.

Price 2/6, 3/6, and 7/- per bottle.

### THE GASEODYNE.

Used as Laudanum for Deadening Pain.  
For Severe Diarrhoea and Influenza.  
For Severe Pains during Parturition.  
For Inflammatory Colic and Lung Disorders.

Price 3/6 per bottle.

ROYAL ANIMAL MEDICINE MANUFACTORY, 22, DORSET ST., LONDON, W.

## Seasonable Topics.

### The Consumption of Mangels.

A GLANCE at the returns of the Board of Agriculture relating to farm crops in 1906 shows that a greater area of land was devoted to mangels than heretofore, and in this fact we have evidence of the growing popularity of this crop. There can be no two opinions as to the value of mangels as a farm crop, the roots being almost equal to swedes for feeding purposes, with the advantage that they will keep considerably longer. Just so; but this is the point to which we would call attention. We know farmers who have been tempted to grow large quantities of mangels, and to do this they have had to utilise ground that would otherwise have been devoted to swedes and other feeding crops. The result is that they find themselves having to run on the mangels early in the winter, for the simple reason that they have got nothing else. We question the wisdom of this course, and though mangels are employed for feeding in the winter, it is in the spring and as long as they will last afterwards that they are in the best condition. The roots of mangels are not ripe when they are lifted from the ground, but they mature in the clump, and there undergo certain chemical changes, with the result that they arrive at the best conditions for feeding when there is naturally a scarcity of other succulent food. If a farmer relies too much on mangels—even admitting all their virtues—he is pushed to the necessity of using them before they are really fit, and stands a risk of finding himself short of roots at a time when they are in the best condition. We can grow mangels in bulk, and yet realise the value of swedes and other crops for early winter feeding.

### Larks and Sprouting Wheat.

DELIGHTFUL is the song of the lark on a spring morning, when the bird, rising from the grass at your feet, soars higher and higher, singing as he goes, till his form becomes a mere speck in the air, or is lost to view, and the sound of the song fades away in the distance. You feel no animosity against the bird under these circumstances, but, on the other hand, are drawn towards him by a feeling of sentiment that is easily understood. Your feelings change, however, if you happen to be a farmer and you find a whole flock of larks busily making a meal on a promising piece of springing corn. Remember, however, that these are not the birds that you saw soaring heavenwards in the spring, but immigrant larks which visit our shores in large flocks every winter and make raids on the fields of springing corn about Christmas time. There are no magic ways of dealing with them, though it has been observed that the use of very plump seed at the late sow-

ings is a means of attracting the thieves. Farmers suffer a good deal through the ravages of wild birds at different seasons, but the visitors are the biggest thieves, and if we had only the birds to deal with that are born and bred in our midst, we should have less need to complain.

### Fencing Orchard Fruit Trees.

IN those parts of the country where there are fruit orchards attached to every farmstead, and it is necessary to run cattle and horses in the said orchards, proper fencing of newly-planted trees is an item of considerable importance. And yet how often one sees it neglected. In more cases than we care to name, trees which cost half-a-crown or three shillings each are planted and bundles of thorns are tied round the stems or some primitive kind of a fence is fixed up to protect the specimens from damage. Theapology for a fence gets quickly broken, the trees are gnawed, rubbed, or damaged, and the time and money spent over the planting are lost. If a thing is worth doing at all it is worth doing well, and this applies to the fencing of a fruit tree as much as to anything else. Not only must the stem be guarded, but the tree must be looked to frequently, for the breaking of a tie will cause the trees to rub against the fence, which is the first step towards gaping canker wounds, caused in the beginning through damage to the bark. Which is actually the best device for fencing fruit trees in grass orchards is largely a matter of opinion, but wooden guards of any kind are all more or less cumbersome and expensive, and now it is easy to get collar-like guards formed of wire netting, strengthened by means of straight pieces of stout barbed wire attached to the sides. These guards are fastened to the stake which supports the tree, they close round the stem like a collar and are closed up by means of a pin which is inserted at the top. We have found this wire arrangement to be an effective means of protecting trees, besides being more sightly and less costly than wooden fences.

### Fruit as a Farm Crop.

WE have no intention of urging farmers to become commercial fruit growers, but we contend that in districts like the West of England, where apples and pears grow freely that there is no part of the farm more profitable than the orchard. In spite of this, in too many cases, it is the part that is the most neglected. What is the reason of it? It is simply because there are so many farmers who will not treat the orchard seriously. They look upon the fruit that is grown on the place in the light of a bye product which may give a return or it may not, just according to circumstances. This is entirely a wrong way of looking at it, and this is

the reason why the farm orchards of Great Britain do not contribute what they ought to the fruit supply of the nation. We emphatically contend that in favourable fruit-growing districts orchards are more profitable than many other parts of the farm, but if fruit is to pay it must be considered in the light of a crop and be treated accordingly, not merely as a bye product, as is the case in too many instances at the present time.

### Dry and Wet-handed Milking.

ONE of our correspondents raised an interesting point in a recent issue as to whether the hand of the milker should be wet or dry when the milk is being extracted from the cow. Here is a matter regarding which some of our readers might express their views in the correspondence columns. According to the contentions of certain professors—oh dear, those professors, what theories they do propound!—dry-handed milking is the proper thing on the grounds of cleanliness. Just so, but the writer of the note bearing on the subject deals with the matter from another standpoint—that of the "cow," and argues that wet-handed milking is easier both for the operator and the beast, while it is more natural. So far as we see it, the hand of a milker need not necessarily be dirty because it is wet, and the best method is that by which the milk is extracted from the udder with the least inconvenience to the cows, having in view also the importance of cleanliness. Our mind is quite open in the matter, and we invite the views of our readers as to the merits of dry and wet-handed milking.

### Farm and Stack Fires.

THOUGH the time when one naturally expects to hear of stack fires is over, we continue to read reports of both hay ricks and farm buildings being either damaged or ruined by fire, and in many cases it is not at all clear how the fires originate. In several instances of late, however, we have heard of ricks being deliberately set on fire by unscrupulous persons who have a grudge against the owner, and no words of ours are strong enough to condemn such proceedings. To burn a man's property, because one has a grudge against him, is worse than kicking him in the back, and a severe flogging is not too bad a punishment. But all fires are not intentional, though there is scarcely less excuse for the persons who originate some of them, and one can have no sympathy for the wandering tramp who seeks shelter under stacks and in buildings and uses matches in lighting his pipe (it is a surprising fact that most tramps can find money for tobacco), regardless of the inflammable material all about them. Tired Mike is a lughead to the farmer in more ways than one. Be the latter so busy

or badly in want of hands, Mike will have none of his labour, or he is off as soon as he has earned enough to pay for his next night's doss, and if he has not the wherewithal for this he seeks shelter on the farmer's premises, and the latter runs the risk of being burnt to death in his bed.

### Cow Clubs.

WE venture to draw further attention to an account which appeared in one of our recent issues of a very useful institution which is carried on in certain villages in the North, known as the cow club. By means of the cow club small holders are able to insure their cows without having to resort to any insurance society, and it strikes us as being an institution of mutual self-help the like of which might be established in many rural districts. We have had considerable experience with labourers and persons living on small places and owning one or two cows. Generally speaking, when a working man loses the one solitary cow he owns, it is a serious loss to him if it does not actually mean ruin to his farming prospects. We have known such cases in which well meaning and kind hearted persons have started subscriptions and collected money to replace the lost cow. The man who is benefited is grateful, but he feels that he owes his fresh cow to charity, and we strongly commend institutions such as the cow club referred to, into which small

holders could pay something and receive benefit in the event of being so unfortunate as to lose an animal.

### Christmas Beef.

WITH the famous Smithfield Meeting as the most important, the farming world has been busy during the past week or two with shows, sales, and markets all associated with Christmas beef. A few weeks ago we heard complaints about there being a shortage of beef, except very fat animals, which were mostly suet, and this report was not surprising, because then feeders were saving their best for the great climax—the Christmas markets. To the man who knows nothing about the practical side of farming, a fat stock show is merely an array of animals fed up to a point of preponderance, but to a farmer such a show is interesting in more ways than one. Ten to one he has a beast or two in competition, and he is more concerned as to how they will fare in the auctioneer's ring than when subjected to the criticism of the judges. How prices rule at the Christmas market is a matter of great concern because for weeks past the food bill has been mounting up while beasts have been putting on flesh, and the owner's anxiety is to see all that back with a substantial margin of profit. Generally speaking, the money for Christmas beef is welcome enough, for there is something else to be thought about now, i.e., Christmas bills.

by men who echoed in order to conceal their ignorance. What is more, they utilised the sentences to emphasise their antipathy—largely based upon borrowed scientific views, of whose justification they were, again, ignorant—to the extensive use of preservatives. It is well that the industry should comprehend this temper. "What use," exclaimed an unthinking urban M.P., "asking us to pass a Bill providing for the purity of butter, and then in the next breath asking us to degrade the character of milk?"

### The Unionist Agricultural Committee.

Well, we have again a Unionist agricultural committee in existence. Of course, we must be glad of the fact. Any organisation that helps to the disciplined consideration of rural problems is in itself an aid to the farming interest. Besides, I have now relinquished the hope, as a result of my experience, of the establishment of a Parliamentary Committee which shall be beyond and above mere partisanship. When Mr. Ailwyn Fellowes first called a Unionist agricultural committee into existence, I deplored his action. I believed then that a general Parliamentary Committee representative of both parties could have been evolved. This is impossible now. The Land Tenure Bill may not be very valuable in itself—its virtues may not be assertive; but it has at last sufficed clearly and distinctly to define the party boundaries. Liberals and Conservatives are on agrarian questions divided into camps. In securing the purity of an article of food—I am thinking of the Butter Bill, which Lord Carrington has resolved shall become law in the next session—there may be something like harmony of sentiment; but beyond that there will only be disharmony. The establishment of the Unionist agricultural committee is thus a wise act—all the wiser in that Mr. Walter Long is its chairman. Mr. Long silhouettes agriculture.

### The Farmers' Club Incident.

In the House there was a good deal of interest exhibited in the Farmers' Club dinner incident, which I have no doubt you report. Mr. O. W. Bowen, the chairman of the Warwickshire Chamber of Agriculture, who interrupted Mr. Chaplin, is a very popular lobbyist, and is known outside the circle of his own Parliamentary friends for his intelligent advocacy of the reform and extension of the purpose of the Board of Agriculture—a project, by the way, which has now a considerable significance. I am personally not going to say whether Mr. Chaplin was wise in referring to the tariff-reform investigations. At all events, they have protruded into a considerable eminence phases of the land problem which have a vital moment. Mr. Bowen had, of course, been impressed by the anxiety of both Mr. Ailwyn Fellowes and Sir Edward Strachey to eliminate every discordant issue from the festival. After all, however, where farmers mingle together in this fashion their own vital concerns ought not to be left out of consideration. To say that the tariff-reform inquiry was a more important matter than even the Disraeli or the Gladstone Commission is to me an egregious assertion; for that Mr. Chaplin is alone responsible. To assert, however, that at a farmers' festival a direct, close, apposite, and suggestive report should not be discussed is worse. Mr. Fellowes and Sir E. Strachey had, by their honeyed courtesy, created a Laocœan atmosphere. Mr. Chaplin banished its cloying sweetness. Mr. Bowen, however, has the sympathy of Liberal members, who distrust an agitation that would make agriculture its handmaiden. Mr. Bowen, too, has evoked a little gratitude from even Conservative M.P.s, who rejoiced that his piquant act induced Mr. Chaplin to the excellent confession that he hopes to return to the House of Commons. May that hope have an early fruition.

At Stockton County Court, on Tuesday, Isaac Johnson, farmer, Rift House, West Hartlepool, claimed £42 10s. from the North-Eastern Railway Company for damage to cattle. Plaintiff's case was that on October 19 last about a dozen of his cattle were being driven over a level-crossing at Eriay Nook, when a train dashed into them, killing three and maiming one. The gates were opened by a man in charge, who said that all was clear. Defendants pleaded that the crossing did not lead to a carriage way, but to a bridle path, and that the railway company took all the precautions that were necessary. Judgment was given for the plaintiff for the full amount claimed with costs. Notice of appeal was given.

# Agricultural Politics.

BY A LOBBYIST.

### Tenant-Right and Landlord-Right.

Now frankly, I am convinced, despite all that may be said to the contrary, and despite even the pessimistic assurances of Lord Carrington, that Lord Penrhyn's amendment to the Land Tenure Bill, which will restrict the tenant's freedom of cropping to practices recognised in the district as good husbandry, will not operate to the disadvantage of the farmers. After all, the custom of the country—and this amendment simply seeks that the custom of the country shall become the law of the land—is based upon experience, and experience is, after all, the best heritage of farmers. But, say the critics, such an amendment will prevent experiments. Well, let it be so—let progressive agriculture be unhappily affected. Ought the landlord, however, to be the victim of experiments? Ought he to have to bear the cost of departures in culture in connection with which he has never been consulted? If this were the law, then a worstment-clause ought to be included in the Bill. What is more, the tenant ought actually to give financial security—in other words, ought to reassure the landlord that if harm be done to the farm the landlord's property would be absolutely secure. We may, of course, laud the principle of tenant-right; but, after all, there is such a principle as landlord-right. It ought not at least to be banished to Saturn and Jupiter.

### The Four Years' Proposal.

What could have been the purpose of the Duke of Richmond in moving, and his hundred and eleven fellow peers in approving, that in the case of leaseholds the freedom of cropping and disposal of produce should not apply to the four years immediately preceding the termination of the tenancy? To me the amendment seems not only to be bad and unjustifiable in character, but a work of supererogation. After all, under the Bill the landlord can prevent the tenant depreciating the productive value of the land. Surely this should be sufficient? Besides this, if the principle of freedom be wise, it ought not to be excluded from the last four years' tenure of a farm. Of course, I can understand that there should be some restriction imposed in the expiring period of a lease, but four years is an extravagant term. The proposal vitiates one of the cardinal purposes of the measure for what may be actually more than one-half the period of occupation. Two years should be enough, and would be a sufficient guarantee of the inherent virtue of the soil being unhappily affected. This was the view in the House of Commons—a view expressed with a vigour of language that would have surprised some of the peers could they have heard it.

### Oaths Hurlled at the Lords.

As a fact, the Commons—or rather the Liberal

section of it—is by no means inclined to accept the purpose of the Lords. I have heard the tactics of the nobles described in a variety of fashions. "Mischievous," "wrecking," "discreditable," "selfish," "sordid"—these are only a few of the fevered adjectives which resounded in the lobby on Thursday night. The professional land reformers in particular were singularly splenetic. While the ordinary Radical regarded the matter as an evidence that the House of Lords possessed a double dose of original sin, the land reformers accepted the incident as an assurance that land reform on more drastic lines must be introduced. "The Bill was never strong; it has now been so emasculated as to be worse than innocuous"—this was their general reflection upon the method pursued by the peers. Will the Lords' amendments be rejected? Frankly, I do not think the land reformers are anxious for this. They would prefer that the Bill should be abandoned. They now comprehend that it will accomplish but little—that it means but a platonic affliction of the landlords, and they want something infinitely more punitive than a platonic enunciation of a design. Besides, the mere fact that the Bill has passed the Commons is in itself an affirmation of the principle they have espoused—in a word, is a justification for a more emphatic legislative expression. They roll their adjectives upon their tongues as though they were the daintiest morsels, and then let them fever themselves into the maledictory resolve to be remorseless in their future hate.

### The Milk Deputation.

I am bound to say that the majority of the House of Commons is not altogether in sympathy with the deputation which waited upon Sir Edward Strachey in reference to the milk standard. I will not say this majority is out of sympathy with the deputation. One M.P. put it to me: "Why should a farmer not be compelled to sell that which he professes to sell?" True, it was admitted freely that the farmer ought not to be held responsible for the condition of the milk once it had passed out of his control. It was, however, insisted that the vital importance of milk in the natural economy of the State imposes a direct duty on the farmer—the duty of complete purity. Of course, we live in what I will call a standardisation era. Every industry will soon have associated with it a standard of production. To suggest, therefore, that milk—an essential liquid and a necessary food—should have been permitted a reduced standard is regarded as something in the nature of half an offence against a national necessity. Said another M.P. to me—"this time a Conservative and an agriculturist": "After all, the quality of milk is entirely a matter of feeding." "A little extra oil cake in the case of deep-milking cows would," he declared, "bring the milk up to the requisite standard." This view was repeated again and again

PEN OF SOUTHDOWN SHEEP.

This pen of Southdown Sheep was Reserve for the Breed Cup, and First in the Class for a pen of Three Fat Wether Lambs of the Southdown Breed under 12 months old, at the Smithfield Show. They are the property of and were bred by H.M. the King, Sandringham. They are 9 months old, and weigh 4 cwt. 1 qr. 12 lbs.

## THE SMITHFIELD SHOW.

A Fine Exhibition—His Majesty's Shorthorn Repeats the Birmingham Victory—Scottish National Champion Reserve—Sheep Championship Goes to Sandringham—Messrs. Dean and Sons' Lincolns Winning Reserve.

### CRITICAL REPORT OF ALL SECTIONS.

The annual show of fat stock in connection with the Smithfield Club took place last week in the Agricultural Hall, Islington. The show was the 108th in connection with the club, and prizes amounting to £2,013 were offered for cattle, £1,154 for sheep, and £457 for pigs. So there was little wonder that once more the leading breeders of the United Kingdom were splendidly represented. Included in these awards were the magnificent challenge cups presented by His Majesty the King for cattle, by his Royal Highness the Prince of Wales for sheep, and by Prince Christian for pigs. Last year, it will be remembered, the challenge cup presented by the Heir-Apparent was finally won by his Royal father, and it was renewed by the Prince, who together with the King visited the show on Monday. Amongst the exhibits were the champion animals from Norwich, Birmingham, and Edinburgh Shows, and these came in for a good deal of attention.

The King was even more successful than he was at Birmingham, for he won seven first prizes and the breed cups (for Devons, Shorthorns, and Highland cattle), three second prizes, and three thirds. Three other animals were reserved, and one was highly commended. In addition to these honours, his Majesty also secured the £50 silver cup for the best steer, and the championship of the show (which carried with it the champion plate of 100 guineas and the King's challenge cup for the best animal bred by the exhibitor), with the Shorthorn steer which was champion at Birmingham. In the sheep section he won two first prizes, one third, the Breed Cup for Southdowns and the £50 Champion Plate, and the Prince of Wales's Challenge Cup for sheep; while he was marked reserve for a pen of pigs. Altogether his Majesty won money and trophies to the value of £416 for cattle and £100 for sheep, or a total of £516, in addition to the King's and Prince of Wales's challenge cups. Thus, with the £400 secured at Birmingham, the King has achieved a great triumph in less than a fortnight by winning at the two principal fat stock shows in the kingdom money and trophies to the value of more than £1,000.

#### THE CHAMPIONSHIPS.

The award of the champion prizes was looked forward to with intense interest, as there were so many candidates that were thought eligible for the distinction; and the results in a certain measure, it was thought, would hinge upon breed prejudices. However, the judges were very careful in making their selections, and in most respects gave satisfaction. The first honour to be decided was that for the best beast not exceeding

two years old, in which Mr. John Ross's first prize Shorthorn steer succeeded in coming out above Mr. T. S. Morgan's very choice Devon. The next Cup to be decided was that for the best ox or steer in the show, in which H.M. the King's Shorthorn made good and safe ground, as the judges chose as his closest competitor Mr. Peter Dunn's first prize Angus, which was lengths behind the Shorthorn in the opinion of the public. The next championship was that for the best female in the hall, and here the final contest lay between Miss A. de Rothschild's first prize cross-bred heifer and Lord Rosebery's Edinburgh champion Angus heifer, fates ruling that the Angus was best. The next event was the supreme championship of the show, which now was reduced to one Royal Shorthorn steer and one Angus heifer, the judges after considerable deliberation placing these two animals in the above order. It would have been more consistent with the general order of things had the cross-bred heifer triumphed in the female championship, as she would have made a much more fitting reserve than the under-sized Angus heifer which had eventually to fill this important place.

#### CATTLE. Devons.

The Rubies of the Western Hills made a good display with eight steers under two years, and the same number (two having been withdrawn from the original entry of ten) in the class under three years four heifers also appearing, this making just twenty. The awards were similar to those of Birmingham for the first prize animals, but different in regard to some of the other findings, partly attributable to some fresh blood coming into the lists. Thus among the eight younger steers there were three belonging to Mr. J. C. Williams, Mr. Charles Morris and Mr. J. P. Chissell, which were not at Birmingham. The exhibit of the first-named was of small bones and high quality, and was deemed worthy of being placed third, and Lord Rosebery obtained second prize for the steer, which was only reserve at Birmingham, to the disadvantage of H.M. the King's Bingley Hall second prize steer now put back into the position of reserve. This animal gave to view an excellent middle, with a broad table back, nicely covered, but possessed rather short binquarters, scaling at one year, eleven months, two weeks only 17 lb. over 10 cwt., while Lord Rosebery's steer, seven weeks younger, weighed 11 cwt. 23 lb. He had a good, well-covered top, and although a little wanting at the flanks and fore-euds, seemed a worthy second. As for the first winner, Mr. T. S. Morgan's Whimble Model, he seemed a long way

the best in the class, although there were three weightier ones in it.

In the senior steer class Lord Rosebery's Birmingham first winner held his own with a live-weight of 15 cwt. 3 qr. 8 lb. at two years, eleven months, and two weeks, and he carried flesh of the right sort on a broad, shapely form. Lord Rosebery's second Birmingham winner was not so successful, only reserve falling to him. Mr. T. Kidner's Curley, the third Bingley Hall winner, having now a set up to second place, while third prize was given to Mr. J. H. Cann's new-comer. Mr. Kidner's was an animal different judges might be expected to differ about. He scaled well according to age, and was well coated over a grand back and front, but his ill-shaped hind seemed to spoil all. Mr. Cann's steer was noteworthy for good quality. The Earl of Cawdor's Starkpole Klondyke was the heaviest in the class, but the judges sought after quality rather than substance. The keeping over of Viscount Portman's Reggie, which was in the prize list last year, has not proved a success. His lordship's Gay Lad, however, received barren honours. The four heifers which competed were a very prime lot indeed. As at Birmingham, H.M. the King's Caroline was the prima donna, and her shapely, nice character, affluent in rich flesh, secured for her the Breed Cup. Second to her came, as at Birmingham, Mr. Morgan's Whimble Beauty 5th. Viscount Portman's Coronet getting reserve, and Mr. Clatworthy's Cutsey Zenobia 2nd a ticket, the entire quartette being heifers that would have been valuable for breeding had they not lost the function through being trained for the summer shows.

#### South Devon.

A good upstanding steer belonging to Mr. Ben Luscombe represented alone this favourite variety of the butchers, with the exception of another solitary animal in one of the carcass classes sent by Mr. J. S. Wroth. There were four steers in the class last year, and if the breed is to be continued in the Smithfield list greater pains should be taken to have it better represented.

#### Sussex.

The entry of animals of this breed was originally twenty-eight, but two withdrawals and two absences brought the number down to twenty-four. Ten of these were yearling steers, which were of such merit that a fourth prize was added, and there were four others to get barren honours afterwards. The leading animal was found in Earl Winterton's steer by President, of good shape and nice quality, flesh 12 lb. over 13 cwt. The Earl of Derby's Dragoon steer, which came second, was 54 lb. heavier, but Mr. Gerald Wardle's third steer was much younger and not so weighty. The extra prize was given to Mr. W. W. Berry's steer bred by Colonel Hammond, the heaviest in the class, its live-weight being 14 cwt. 1 qr. 25 lb.

The animal which won the Breed Cup as best Sussex was, however, the first winner in the senior steer class, Mr. W. Levett's Spimo Dick, whose weight was 10 lb. over 17 cwt., although only two days over two years eight and three-quarter months old. The second winner of Mr. J. Augier was almost as good, and, indeed, scaled rather heavier. The heaviest in the class was Mr. W. G. Fladgate's r steer, whose live scaling was 18 cwt. 1 qr. 7 lb. Mr. Braby's Buxom Jim was

selected for third prize for good shape and quality of flesh. Mrs. Montefiore's Spring Flower was first heifer, a heavy-fleshed one, 8 lb. over 16 cwt. Mr. Joseph Godson's Bonette 28th was placed next, a very neat, shapely one. Mr. H. H. Hubble's Sardonie getting third premium for another level, nice-fleshed one. The Earl of Derby's Honey Dew could only obtain 4, although of excellent character.

#### Herefords.

This breed would have been much better represented if the whole of those originally entered had turned up, but when out of twenty-two as many as eight are either withdrawn or absent, the residue of fourteen is scarcely what might have been expected for the representation of a breed which, at the period the Smithfield Show was first held, was deemed the chief grazing sort. The general merit of the exhibited Herefords was, however, decidedly above par. Although only three yearling steers appeared, they had at their front the Birmingham first winner, Mr. James Edwards' Twyford Magnum, which at one year ten months two weeks four days old scaled 14 cwt. 1 qr. 6 lb. His fine stature and good form was much admired at Birmingham, and should he have another year's feeding and do well he will make a topper at next Smithfield Show. H.M. the King's steer by Fire King, the reserve at Birmingham yearling, placed next those which were second and third in Bingley Hall, not having been entered for this show. At about three weeks from the age limit, this Royal steer is 7 lb. over 12 cwt., and neatness of character seems his chief characteristic. The third steer, a much younger one belonging to Mr. Faber, M.P., and named Worcester Sauce, seemed very shapely and likely to make ample return for another year's feeding.

The six steers which came together in the senior class seemed a very prime collection, having at the front Mr. W. H. Cooke's level, evenly-fleshed Bull, which was also first at Birmingham. At about 2 years 10½ months he weighs 16 cwt. 10 lb., his merit lying in evenly-laid good quality flesh. Second to him was placed Mr. Lawton Moore's Bonanza steer, which was a reversal of the Birmingham ruling, by which H.M. the King's steer by Iron Duke had the second premium.

The Royal steer has a slight droop in the back which might possibly have caused this, but in quality surpassed by any competitor. The two heaviest were the third winner, Mr. A. E. Hughes' Peace, which at rather under two years ten months weighed 17 cwt. 2 qr. 20 lb., and Mr. E. T. Learner's Sirlin, which, although a prize-winner at Norwich, was now only he. At two years ten months he gave a live weight of 17 cwt. 2 qr. 7 lb. The judges therefore appreciated quality rather than size and substance.

There were five animals in the female class, with H.M. the King's Camilla at their head, a fine well-shaped heifer well grazed, scaling 15 cwt. 1 qr. 20 lb. Next to her came Mr. T. Morris's Symbol, the greatest in substance of the remaining ones with the flesh evenly laid on, and after her came the Bromsgrove champion Brampton Agnes 33rd, belonging to Mr. Lawton Moore, which was only reserve at Birmingham, where the yearling Gavel of the Earl of Coventry was placed above her. These heifers were made to exchange places here, and Mr. G. D. Smith's Rachael was he, a shapely, well-grazed heifer, which was not at Birmingham. The Breed Cup was awarded to Mr. Cooke's steer, as at Birmingham, the King's Camilla being reserve for it.

#### Reserve Cows.

A dozen of these East Anglian-breed were originally entered, but one of the younger steers was an absentee. Sir W. Corbett won both first prizes in the steer classes. His winner in the junior one had laid on the flesh evenly on a larger, more lengthy form than any of the others had. Acrobat, belonging to the Right Hon. A. E. Fellowes, was noteworthy for nice quality. Mr. G. D. Smith had also two nice ones, one of which was selected for third prize. Sir Thomas V. S. Gooch's Benacre Bobs seemed quite of the same character, very neat in outline and of prime quality. In the senior steer class Sir Walter had

only one competitor, that of Sir Richard Cooper's steer by Felix, which, however, was nothing like the weight of the Acton Reynold, whose grand span of rib, deep shape, and well-covered flesh gave him the cup as well as first prize. The heifers were a very nice lot, having the Right Hon. A. E. Fellowes' Appendix at the front, a heifer of good length and depth of form, carrying good flesh. Mr. J. B. Dimmock obtained both the other prizes with two heifers by the same sire of very like character. The high merit of the class will be at once understood by the fact of Sir W. Corbett's Acton Butterfly being only able to get reserve.

#### Shorthorns.

The Shorthorn classes at Islington were not quite as great a success as could have been desired in spite of the fact that these classes provided the best ox or steer, and also the champion of the entire show, in the shape of H.M. the King's steer that had been similarly honoured at Birmingham the previous week. The class containing this steer, however, was the main strength of the breed, as the younger steer class had but four entries. One of these, however, was good enough to carry off the cup for best animal in the show under two years old, and females had a couple of representatives, so that the Shorthorns great cry was quality rather than quantity, and it was a great credit to the breed, in the face of such keen competition for breeding purposes, to be able to bring together so good a collection, for the older steer class contained five or six other remarkably good animals besides the two champions alluded to.

Judging commenced with the younger class of steers under two years old, of which four were in their places. Mr. John Ross had a practically easy victory in these with the steer, but later on carried off the under two years old cup, and that had also been successful at Edinburgh previously. This was bred by his owner and sired by Ajax out of a dam by Champion. The live weight of the steer is 12 cwt. 2 qrs. 8 lb. at a year and eight months, which is very creditable, and he is symmetrical and good in his flesh, with enough breeding and a good coat of hair on top, which is a very important matter in a show beast. Sir Oswald Mosley's steer that had headed the class at the Midland show came next, and was looking none the worse for his trip to town; a good quality, square steer by Beauty's Pride, the second entry from this herd, which was rather small, could not get higher than reserve, being beaten for the third place by another entry of Mr. Ross's with level outline and plenty of quality about him to go on with.

Steers above two and not exceeding three years were altogether a bonny class, and gave the judges considerable trouble to place them, the Royal steer having a rather formidable opponent in Captain Townsend's rare-backed and big bullock of Mr. Finlay Munro's breeding that stood second at Birmingham, and a year ago was placed above his now far famed opponent. The Windsor steer, however, has a quality of handling that is very hard to get over, and he is well filled down his thighs, as well as in all his best roasting parts, and carries his weight of 17 cwt. 3 qr. 20 lb., which is a little less than he scaled in the Midlands, in very small compass, and walks away without any burden at all; there was no doubt as to the correctness of the decision which eventually gave him the preference. The Caldecote steer pulls up a bigger weight, being 18 cwt. 1 qr. 18 lb. in London, and he stands up a noble, eye-filling bullock with very fine top and bottom lines, and carries himself well; behind the shoulder, however, he is a little weak, and in handling was not quite as good as the Windsor beast. This bullock was sired by Maxwell, and the winner by the famous bull Royal Duke. Changes were the rule lower down the class, as compared with the two previous shows of Norwich and Birmingham, as Mr. Learner's well-finished, weighty, and good-quality steer bred by Mr. John Cross, which had been first at Norwich and was lowered to a card in the Midlands, was now reinstated so far as the third best. He is undoubtedly a capital stamp of steer, and should

give a good account of himself when killed. Miss Alice de Rothschild follows on with her very good quality, active, and well-bred steer by Waldesdon Youth that handles nicely and was given the reserve and he, whilst Mr. R. W. Hudson's steer third at Norwich and third at Birmingham, was he. This was bred by the Marquis of Exeter, and in appearance had improved whilst on his showing tour. Sir John Swinburne obtained a card for another good bullock, which concluded the class. The two females were H.M. the King's sweet heifer by Royal Chieftain, which is full of quality, breeding, and style, though not big, as she is at a disadvantage in age; and Mr. E. T. Learner's Lackadaisical, that had been first at Norwich, a sappy, useful heifer. The judges gave the public the impression that the contest here was very close, but these views were not endorsed, and the final placing, which was as above, was entirely satisfactory. The champion bullock was accounted best of the breed, and his herd companion the reserve best.

#### Cross-bred Cattle.

Taken all round the Cross-bred section was one of the best seen at Islington for some time. The quality was of a very high order, weights on the whole satisfactory, and there was more uniformity than is frequently the case. The section certainly did not provide the champion or champion class this year, which it has done upon many previous occasions, but the various classes formed, without doubt, one of the great features of the show. Commencing with the steers not exceeding two years old there was a very good entry of twelve catalogued, of which, however, some were absent, having been sold in the meantime probably. The first prize steer was of a comparatively new cross as regards prize winning, being by a Shorthorn bull from a West Highland cow, and was bred and exhibited by Mr. Robert Turner, he is a steer with great substance and muscular flesh, well put together, and feeding close to the ground; his very good coat of hair, too, is quite in his favour, and he handles well, and his weight record is 13 cwt. 2 qr. 20 lb. A very severe opponent to this steer was found in Mr. George Bruce's second prize one of Angus and Shorthorn crosses, a well-ribbed, good topped steer, symmetrical, and good in his quality; he scales well, too, being 13 cwt. 1 qr. 3 lb. Mr. John Ross followed with a blue-grey of similar cross to the second prizewinner, out of a dam by Ringleader Rich in his day, was probably the best sire of show fat stock that ever lived; this steer is also very straight, and pulls up the beam at the very good record of 14 cwt. 1 qr. 9 lb. A Devon and Angus cross of Mr. J. C. Williams' came in for reserve, and a steer full of flesh and good shaped. Miss A. de Rothschild and the Earl of Durham were also honoured with minor carls. Steers above two and not exceeding three years old followed, and these were altogether a capital lot, several animals being left outside in the field that were well fit for substantial honours. The first prize was awarded to Mr. R. W. Hudson's Danesfield Blue Boy, a big steer, one of the heaviest in the hall, and very good along his back, shapely, too, though possibly a little too much on the fat side, he is of Angus and Shorthorn cross; second honours was accorded to Mr. J. R. Sim for a roan of similar cross to the first prize one, and a good muscular butcher's beast, scaling over 18 cwt. Third prize was given to the Earl of Durham for an Angus and Shorthorn of exceptional quality and very pleasing in his outline. A fourth prize was awarded to Mr. C. Emmerson for a good cross-bred with famous top of beef and handling well, though a little light on the scales. Mr. Wildman Cattle obtained the reserve card, and Sir John Swinburne and one or two other exhibitors received minor honours for good entries.

Heifers not exceeding two years followed, and this class was perhaps a little weak, though a good number received honours at the hands of the judges. Mr. John Ross was placed first with a very nice blue-grey from a Ringleader dam, Miss Alice de Rothschild followed with a particularly symmetrical heifer of the Angus

### THE CARCASE CLASSES—CATTLE.

#### Class 90. STEER not exceeding 2 years old.

| Name.                             | Live Weight.     | Carcase Weight. | Suet, Cant, Head Fat, Trimmings. | Tongue, Tail. | Heart, Liver, Tripe, Feck, Reod. | Hide. | Intestines. | Placed by Judges alive. | Carcase Award. |

| Mr. J. D. Fletcher's Crossbred .. | .. 12 0 7 117 7  | 32 | 36 | 8  | 47 | 37 | 94  | 77 | 17 |
| Mr. J. S. Wroth's South Devon ..  | .. 16 0 23 147 8 | 31 | 47 | 14 | 60 | 50 | 148 | 55 | 80 |

and Shorthorn cross, Mr. Robert Turner had a big heifer with capital top line and flesh that was placed third, she appears also to be of Shorthorn and Polled cross. Mr. J. C. Williams came in for the fourth time with another of his very neat and nice quality Devon and Angus crosses, and more honours were given to a second entry of Miss Rothschild's, one of Mr. C. Emerson's, one of Mr. C. F. Raphael's, and one of Mr. John Ross's. Heifers above two and not exceeding three years old were the class of the section, as it contained three heifers that were quite fit to champion a good show. These were Miss A. de Rothschild's heifer, a roan, taking somewhat of Shorthorn character; Mr. R. W. Hudson's Angus and Dexter cross that was champion of the Birmingham Show, and Mr. E. T. Learner's heifer that was champion of the Norwich Show recently, the former and the latter one of Angus and Shorthorn Cross. The weights of three heifers stand in London at: The winner, Miss Rothschild's, 16 cwt. 0 qr. 14 lb., Mr. R. W. Hudson's, 15 cwt. 2 qr. 7 lb., and Mr. Learner's, 13 cwt. 1 qr. 11 lb. In quality there is not much to choose, but three are good in symmetry, too, and are capitally brought out, finished in the best possible manner. It will be seen that the first and second honours are a reverse of Birmingham, where Mr. Hudson's stood first and Mrs. de Rothschild's second, whilst Mr. Learner's was third in both instances, her weight being against her considerably. Mr. J. J. Criddle was reserve, and he cards awarded to Mr. R. J. Thomson and Mr. Alexander Smith. The first of those heifers also secured the cross bred breed cup, and was reserve for the best female in the show.

#### Aberdeen-Angus.

There was a total catalogue entry of something over twenty animals of this breed, and though it may be correctly said that there was nothing of outstanding merit in them when we carry our memories back to the splendid heifers of years gone by that brought such honour to the breed, yet the collection was altogether a fairly satisfactory one, both in breeding and beef, and the majority of the animals were very fitly brought out. The reserve champion of the show, too, as well as champion female, was found in this section.

Commencing with the steers not exceeding two years old, the entry consisted of eight in the catalogue, of which the judges made choice of Barbarina, a steer bred and exhibited by Mr. J. H. Bridges, sired by Lepanto of Careston out of Barbarina 2nd, a daughter of the famous sire in his day, Equerry of Ballindalloch. This steer is very satisfactory on the machine, recording 12 cwt. 3 qr. 5 lb., and he is of very symmetrical build, with good rib and depth, plenty of mellow flesh, and an altogether pleasing steer for the feeder. Next in order was placed Mr. R. W. Hudson's very nicely built steer, bred at Danesfield, and sired by Danesfield Jester; he has very good quality and wealth of flesh on his best parts, but is considerably lighter than the winner, though the difference in ages fully accounts for this, still it is to his disadvantage at the time; the third steer was Mr. James McWilliams's very fine quality and all round fine steer by Alick of Aberlour, that was so highly honoured at the Birmingham show, and he scales 14 cwt. 0 qr. 4 lb., so that he appeared a little hardly used, looking at these lines. Mr. Robert Turner was reserve with a good fleshed and good back steer by Proprietor of Preston. Mr. J. J. Criddle second and he for his good level, thick steer by Wizard of Misemore; and an entry of Sir James Duke's was also c. Steers above two and not exceeding three years, with seven entries, made up a good beef class. Mr. Peter Dunn came to the front in them with a blocky, thick-fleshed steer bred by Mr. J. H. Bridges, sired by Lepanto of Careston, with 16 cwt. 1 qr. 14 lb. to his credit at two years and nine months old, and he handles ripe. The reserve for best steer was also accorded this animal, Mr. R. W. Hudson's Danesfield Negro, that had been first at Norwich, and is very ripe and well brought out, made a very close second; he is in the hands of his breeder, and was sired by Kelgraston. Third honour was accorded to Captain Townshend's bullock that stood first at Birmingham, and was bred by H. M. the King at Abergeldie, and sired by Elandslaagte, whose weight in London is 17 cwt. 1 qr. 16 lb., and with a splendid back of beef and ripeness. As a butcher's beast he appeared very badly used, though he was rather at a discount owing to a big knee that rather hindered his carriage, Mr. David Annot was reserve with a good backed, heavy fleshed bullock, and Mr. James McWilliams's, that did so well in the Midlands, came down to an he.

Some half dozen heifers made up a very nice class headed by the Earl of Rosebery's Ida of Dalmeny 3rd, bred in the herd sired by Ebbero out of Coronel 2nd by Fitzsimon, a heifer that had headed her class and secured the championship of the Edinburgh Show the previous week, and was later in the day honoured with the female championship at Edington, and rival H. M. the King's Shorthorn for the supreme champion of the show. In symmetry this heifer is well high faultless, and her style and breeding are very sweet,

HIS MAJESTY INSPECTING THE CATTLE.

JUDGING THE CHAMPIONSHIPS.

#### HIGHLAND HEIFER, SHEILA 2nd OF GARTH.

The Highland Heifer, Sheila 2nd of Garth, owned by H. M. the King, but bred by Sir Donald Currie, Garth Forthingall, won the Breed Cup, and was First in the Class for a Highland Heifer not exceeding 4 years old, at the Smithfield Show. She is three years, 10 months 5 days old, and weighs 12 cwt. 3 qr. 22 lbs. Her sire was Donnach n' Sheanchan 1507, dam Sheila of Garth 4885, sire of dam Buachaille Buidhe, 1172

but when we come to the more practical and necessary points, that the score found 13 cwt. 3 qrs. 17 lb. is just upon three years old, is decidedly too light for the winner when of a breed that runs to the good average size usually reached by this breed of cattle. Colonel C. McNroy was placed second with Bourn Beauty, bred by exhibitor, and some 2 cwt. heavier than the winner at the same age, and a thick-fleshed, capital heifer all round. She was sired by Ben Frackie out of a dam by Melville Castle. The Countess Dowager of Seafield came third with Kind Shade, by Portman of Aberdeen, a very firm hander and capital on the score being over 16 cwt. Mr. David Arnot obtained the reserve with Fickle Polly, a neat, rather small heifer; he was all that Mr. J. J. Cridland could get for his capital-fleshed and well-brought-out heifer, Princess Hebe, and a card to Mr. J. H. Bridges for [Laurel of Langshott 5th] concluded the honours of the class, the breed cup naturally going to Lord Rosebery's heifer, whilst the reserve was accorded to Mr. Peter Dunn's first-prize steer.

#### Galloway.

This Scotch breed had a very good representation in four steers under two years, six older ones, and four heifers. Messrs. Thomas Biggar and Sons had their usual good fortune in winning the whole of the three first prizes. Their younger steer Challenger was a very shapely one and had three excellent competitors in Mr. Robert Graham's Andy, which was placed second, and Mr. Alfred Palmer's Dick and Gowanlea, which were third and reserve. Glensman, belonging to Messrs. Biggar, which headed the two-year steers, carried a nice body of beef, and Mr. Robert Graham obtained second prize again with Sam, nicely fleshed, but not of the weight of the first winner. Mr. Alfred Palmer's Peter came into third position. He had two in the class, but the judges selected Peter as being of better quality than Jack. The heaviest was Mr. T. V. Earle's reserve steer, which scaled 15 cwt. 3 qrs. 2 lb. Nellie 6th of Hensol, from Messrs. Biggar's herd, not only came first in the heifer class, but won the cup, and was of very first-class character. Mr. Robert Graham's Esme 11, of Stepford was a very worthy second winner, and Mr. Alfred Palmer's two heifers Joan and Lally 4th did honour to their respective positions for third prize and reserve.

#### Welsh.

Three very excellent classes of the Black cattle of Wales competed. There were eight in the class under two years, eleven older steers, and seven heifers. Mr. R. M. Greaves came to the front of the younger steers with Wern Dog Rose, scaling 14 cwt. 2 qrs. 4 lb., with about a week within the limit age, and carrying very nice flesh. The University College of North Wales came next for second and third prizes, their second prize steer being the heaviest in the class. Mr. G. Greaves had a second steer called Trowg, which did honour for reserve, and the steer of Mr. Robert Hughes was he, the class being certainly a superior one. But the steers above two years old were much better, and the first winner, Gwilym, belonging to the Coed Coch trustees, not only won first prize, but the Breed Cup. This steer scaled 24 lb. over 17 cwt., being exactly the weight of Mr. Robert Hughes' third prize one. The last-mentioned exhibitor also won second prize with a lighter, but very nice steer, which was so much merit still remaining behind that the judges were allowed to award a fourth prize to Towyne, one of two steers belonging to Mr. R. M. Greaves, the other getting r. Two others in the class got barren honours, Mr. D. R. Jones' Cellar Boy and the exhibit of the University College of North Wales. Three prizes and two heifers were awarded to the Welsh heifers, Mr. R. Roberts getting both first and second prizes with Laura and Jenny, while Mr. Robert Hughes gained a third prize with Polly, and the barren honours went to Mr. R. M. Greaves' Abbess 5th, which was r and he to Nancy, belonging to Mr. J. Wynford Phillips, M.P.

#### Highland.

These roads of the Scotch mountains were also in good display, and with their handsome heads and shaggy coats made as usual quite a feature in the general display. There were six steers not above three years old, and eight oxen over that limit, besides four heifers. In the younger of the steer classes, the Earl of Durham's Ross was first and reserve for the cup, admired by butchers for his good flesh down to the very heels. Both the other premiums were won by H.M. the King, and they were both rather weightier than the first winner, and handsome in their yellow coats. The heaviest in the class was Sir W. Ogilvy Dalglish's Errol Chieftain, which was 14 cwt. 2 qrs. 27 lb. The reserve went to Mr. W. J. Nimmo's steer by Carrington. H.M. the King led in the next class with a handsome brindled steer, bred by the Marquis of Breadalbane, and he was second with another brindled one, of which the Countess Dowager of Seafield was the breeder. These two steers scaled respectively 17 cwt. 1 qrs. 25 lb., and 16 cwt. 2 qrs. 7 lb. Sir W. O. Dalglish won the third premium with Errol Candidate 4th, the Earl of Durham getting reserve

with Willie of the Yellow Hue, and the Countess Dowager of Seafield being c with Prince Chimes a black and brown. H.M. the King again led in the heifer class with Sheila 2d of Garth, quite a yellow beauty, which won the cup, as best of the breed. The Earl of Durham and Sir John Swinburne coming second and third with two handsome heifers, both bearing the name of Nellie. The King had a second exhibit in the class which was r.

#### Kerry and Dexter.

These two breeds were shown together and had ten entries in the class for steers not above two years old and eleven in the steer class above two years, these classes being only added to by one heifer. H.M. the King won first prize with Robin Hood and third prize with Cock Robin in the junior steer class, both being Dexters, of a size and character to make the mouths of butchers water. The animal that divided the Royal pair belonged to Mr. R. M. Greaves, and was also a Dexter rather weightier than either of the King's animals. Mr. Martin J. Sutton obtained reserve, and the Duchess of Devonshire was he with two other Dexters. In the Senior Steer class the King was not so successful, his Dexter being only decorated with an hc. Mr. R. W. Hudson carried off both first and third premiums with Danesfield Good Friday and Danesfield Sweep, the former taking the Cup as well. The Duchess of Newcastle won second prize with Rycroft Model, and Mr. R. G. Nash obtained reserve. The King's steer was the heaviest in the class, scaling 10 cwt. 3 qrs. 11 lb. The first winner of Mr. Hudson was the next heaviest, his live weight being exactly 10 cwt. The heifer which stood alone was Sir Walter Gilbey's La Mancha Ruby, of very nice quality, fully deserving the first prize awarded her.

#### Small cross-bred Cattle.

There were three classes of these, and there were five steers not above two years, the same number of two-year-old ones, and eight heifers, which altogether made a goodly collection. In the junior class for steers, Mr. R. W. Hudson was first with Sweet William, of a shapely form nicely covered, Mr. R. G. Nash bringing from Finntown the rather weighty one for his age to take the second premium, both these being of the Aberdeen-Angus Dexter cross. Sir Walter Gilbey won the third premium with a white steer, whose sire was a Shorthorn and dam a Dexter, and the three winners in the older steer class were of the Aberdeen-Angus Dexter cross, and the first and third prize takers belonged to H.M. the King, Sir Walter Gilbey's very nice steer dividing the Royal ones. The reserve went to Mr. Norman Cookson's Daniel Jack, which was from a Shorthorn dam by a Dexter sire. The small cross heifers formed a nice class headed by Mr. R. W. Hudson's Danesfield Forget-Me-Not, which carried off the cup likewise. Mr. Hudson also won the second prize with Sincere, leaving the third to the Duchess of Newcastle's Little Dot, and barren honours to Mr. J. D. Fletcher's Lady Dixie and Mr. Cookson's Daniel Beauty.

Below we give a table showing the average daily gain of the prize-winning animals:—

| Exhibitor and Breed.                        | Age, Days. | Weight, lbs. | Average Daily Gain, lbs. |
|---------------------------------------------|------------|--------------|--------------------------|
| <b>DEVON.</b>                               |            |              |                          |
| 1 Mr T S Morgan (Whimble Model).....        | 719        | 1,172        | 1.63                     |
| 2 Lord Rosebery.....                        | 659        | 1,255        | 1.90                     |
| 3 Mr J C Williams.....                      | 583        | 1,054        | 1.81                     |

#### SHEEP.

##### The Championships.

The first of these to be decided was that for the best pen of long-wooled sheep. Messrs. Dean and Sons, for the fourth time in succession, won it with their Lincoln pen, a grand pen on this was, and worthily deserving their distinction. They were run, however, close for this honor by Mr. E. F. Jordan's Leicester pen; the intervention of the

umpire being necessary before the decision could be arrived at.

The Short Woolled Championship was another of those notable close contests, and the umpire here again had to decide between the great merit of the Southdown sheep from Sandringham and those of the Hampshire Down breed from Mr. James Flower. The award was given in the order named, resulting in the King being winner of this prize for the third year in succession, and Mr. James Flower being runner for the honour for the fourth successive year.

The Prince of Wales' Challenge Cup, as in the two previous years, went to H.M. the King for Southdown wethers, and Messrs. S. E. Dean and Sons had to be content with the runner for their Lincoln wethers, which makes the fourth time in succession they have occupied that position.

#### The Leicester.

The competition in these two classes was a limited one, two exhibitors only being represented. Mr. E. F. Jordan taking first and second in both, together with the Breed Cup and its runner, and Mrs. Perry Herriek the other awards. Better representatives of the breed have seldom been under hand than those with which Mr. Jordan won. His Breed Cup pen of wethers were an exceptionally good pen.

#### Cotswolds.

Only two pens represented this well-known breed, both of which were wethers owned by Mr. W. T. Garne. They won without question, and it is a matter of regret that more competition was not present, for they would have won in any competition, we think.

#### The Lincoln.

The number of competitors was smaller than it has been for some few years. The absence of any entries from Mr. Henry Dudding was a loss so far as the representative character of the exhibition is concerned. To him it doubtless meant a wrench after having competed regularly for so many years, but the specially high prices that he is making of his rams naturally prevents any being made wethers for exhibition.

An outstanding pen of very typical lambs won first honours for Mr. W. B. Swallow. They were a grand lot, ripe in the flesh and typical of their breed. Runner for Breed Cup was also secured for this pen, which might have also been made winners of the cup, and they would probably have been so, but owing to the fact that Messrs. S. E. Dean and Sons' pen of wethers were so extraordinary a weighty pen, in fact the heaviest pen exhibited at Smithfield, naturally inclined the judges to for once forgo early maturity and recognise weight. This pen of wethers, of which no word of praise can be too great so far as regard-

their flesh and type, was quite one of the section. Mr. F. Ward was second with a first-class pen of wethers, thoroughly representative of his high-class flock, but close at their heels with the narrowest of margins, came Mr. W. B. Swallow's typical pen of very choice and very ripe sheep. A small class this was it is true, but of excellent merit.

#### Kent or Romney Marsh.

The strength and quality of this exhibit is clearly shown by the fact that the two judges were unanimous in their decision all through, and that they included in the award list every exhibit present.

In the lamb class the first award went to a grand pen of lambs. They were evenly matched and most carefully drawn. With this pen Mr. C. Gordon Neame also won the Breed Cup, an honour that recognised the early maturity and ripeness of these fine lambs. Second honours went to Mr. T. Wotton, for a more weighty pen of lambs, and a pen that would have been far more dangerous competitors for first honours had they been more uniform in size, &c. Mr. C. Gordon Neame took third honours. Some exception was taken to the correctness of this award, to which we agreed, for the reserve number pen, from Mr. J. Egerton Quested was decidedly the better pen of wethers, and more typical of its breed. The second pen from Mr. T. Wotton's, together with those that represented Messrs. F. Neame and H. Rigden, were he.

In the wether class the winning pen was easily found. It came from Mr. F. Neame's well-known flock. They were three first wethers, of high-class merit, handling firm and well. They were made runner for the Breed Cup. Second and third honours went to Messrs. C. File and J. Egerton Quested in the order named. Very typical and well-fed pens they were, and Mr. C. Gordon Neame came in for runner.

#### Devon Longwool.

This breed has a single class for wether lambs. Mr. F. White was the only competitor, but his entries were of excellent merit and of very good quality. The winning pen took runner for the Breed Cup given for this breed and the South Devon breed, in conjunction. The cup-winning pen was of the latter breed, owned by Mr. A. C. Hall. A remarkable pen of excellent sheep, and it is a thousand pities that the South Devon breeders have not pluck or energy enough to send up a full exhibition of their sheep. They would do so if they could have only heard the number of inquiries made as to what breed of sheep these were. More than one export buyer was looking at them, for these lambs had size, early maturity, coupled with firm and distinctly good flesh.

#### Cheviots.

About the usual entry represented this breed, but Mr. John McDowall, who for many years has taken the bulk of the prizes, met this year with keener competition. First and third honours in the lamb class went to two very fine pens that handled well, from Mr. J. B. Clarke, leaving second and runner for the first-mentioned exhibitor.

In the wether class, Mr. McDowall held his own. His two pens won first and second, together with the Breed Cup and its reserve number. They were grand pens of their breed, and the third prize, which went to Messrs. Denny for some sheep of this breed fed in Kent, indicated that even out of its own district the breed will thrive and do well.

#### Mountain Breeds, other than Welsh.

The remarkable advance that has been made towards the early development of the Scotch Mountain breeds was fully emphasised by the excellent exhibits found in these classes. Sir John Gilmour's lambs first and reserve, and also runner for the Breed Cup, were a notable example of this. Equally also were those exhibits that first and third for Messrs. John McDowall and Mr. J. Howison. Mr. McDowall's two entries in the wether class responded in a most satisfactory manner to the touch, and indicated choice carcasses of high quality mutton. The leading pen won first and Breed Cup, and the other third. A pen from Mr. A. Smith divided them.

#### Welsh Mountain Breed.

For an initial breed that which represented this breed at Smithfield was thoroughly satisfactory. The high reputation that Welsh mutton holds is well known, and so far as could be judged from the examination of these entries, those that won first honours for Mr. J. G. Gratton, and second and third for the University College of Wales, were fully able to uphold that reputation.

#### Southdowns.

No breed in the British Islands, nor in the world has a higher reputation for the quality of its mutton, and the saleability of its carcasses than this. Small in size, but great in value is the description thoroughly typical with the best ideal of the breed. It would be well for its future reputation if all who judged the breed would bear this in mind. It may be that those who adjudicated at Smithfield thoroughly believed in this, and that it was owing to a momentary slip that this ideal escaped from the mind when that grand pen of the Exors. of Col. McCalmont was relegated to the third place. Their compact carcasses, short legs, neat joints, and typical character far more than compensated for any defect that might have been urged against them by reason of want of touch.

ABERDEEN-ANGUS HEIFER, IDA OF DALMENY 3rd.

The Aberdeen Angus Heifer, Ida of Dalmeny 3rd, owned and bred by The Earl of Rosebery, Dalmeny Park, Edinburgh, won at the Smithfield Show, the Silver Cup for the best Heifer, and was Reserve for the Champion Plate for the best beast, Reserve for the King's Challenge Cup, won the Breed Cup, and First in the class for Aberdeen-Angus Heifers not exceeding 8 years old. She is 2 years 10 months 6 days old, and weighs 18 cwt. 3 qrs 17 lbs. Her sire was Ebbero 26399, dam Coronet 2nd 29254, sire of dam Fitzsimmon 14403.

The winning pen, placed in the position by the decision of the referee, came from Sandringham. They were grand lambs, but they did not match, neither had one of them the width and symmetrical proportions one looks for in the first prize pen. Mr. C. Adeane was second. No exception could be taken to the high merit and quality of the flesh of these lambs. It was worthy of the high reputation of the breed they represent, and they might have gone first, particularly when the pen alluded to above was placed third. The Earl of Ellesmere came in for rn with a pen of very well-fleshed lambs, and several others were noticed.

For the third year in succession H.M. the King won first honours in the wether class. This year's winners fully deserved their position. They were splendid sheep, and full of good sound flesh. They won the Breed Cup, and their flock mates, the second entry from Sandringham, took third honours, the Duke of Richmond's fine pen just managing to secure preference, largely owing, we think, to their grand touch and good flesh. Sir T. V. S. Gooch was rn, and the Exors. of Col. McAlmont were he.

#### Hampshire Downs.

The high merit and quality of the Hampshire Down exhibit, particularly in the pens that won the Breed Cup and its rn, has seldom been exceeded, but although the lambs were an excellent class, these have been better taken as a whole. Dealing with this class first, no exception could be taken to the high degree of perfection and

development obtained by the two pens that were at the top of the class. In securing first honours with so good a pen Sir W. G. Pearce is to be congratulated, particularly so because the merit of this pen has to be compared with that fine pen that followed it from Mr. James Flower's flock. This pen was one that experts declare to be thoroughly typical of all the best characteristics of its breed. Mr. T. F. Buxton was third with a real good fleshed pen, deep in carcase, and good on the top. A couple of very fine pens from Mr. S. Darling were rn and he.

Allusion has already been made to the two grand pens of wethers that won first and second honours, &c., for Mr. J. Flower. These were of superlative merit. Third honours went to Mr. T. F. Buxton, whose pen was a good one, and would probably in some former years have been easy winners. Sir W. G. Pearce took rn, with a pen of creditable merit and nice type.

#### Suffolks.

The competition in these classes was not a large one, but no exception could be taken to the grand flesh and thoroughly good touch found in the four pens sent by Mr. A. C. Smith, two in either class. First and second honours were their class awards, and the two leading pens were made Breed Cup winners and rn for the same, the wethers securing the preference. Mr. R. Barclay was third for lambs and rn for wethers, with pens that were of high merit and good flesh. Sir A. G. Hazlerigg taking the rn for rams.

### THE CARCASE CLASSES—SHEEP.

### Shropshires.

The lamb class was a small one, but Sir Richard Cooper's first prize pen was of fine quality, with good flesh. Mrs. W. F. Inge and Lady de Rothschild owned the other winners.

In the wether class Sir Richard Cooper had two pens. They went first and second, and also took the Breed Cup and its rn. The winning pen were lengthy, wide and good close to the ground; under hand the loin, twist, and leg were found to be full and deep in flesh. They were an excellent pen of their breed, and the same remarks are applicable to the excellent pen that came in second. It is pleasing to note that the third prize pen that came from Mr. Victor Cavendish, M.P., is of high merit, because it indicates that this flock is rapidly approaching the front rank. Mr. F. Bibby was rn.

### The Oxford Downs.

One of the best classes of lambs that has represented this breed for some time past at the Smithfield Show was found there this year. A better pen, more ripe in flesh and typical of their breed than that which won from Mr. W. H. Stilgoe, is not often seen. He won with plenty to spare. Mr. J. A. Preece came in second. These were wide and good topped lambs, but not so full in the twist or leg as the winner. Third honours went to Mr. J. T. Hobbs was a grand pen from the third pen, too, owned by Miss Alice de Rothschild, was another real good pen of wethers, ripe and fit.

### Ryelanders.

There were only two pens of this breed entered, both from Mr. W. T. Barnely. The quality of their flesh, together with the symmetrical form of their carcase, was very noticeable indeed, and those who examined them will readily admit that they were of high merit. First and second honours were awarded.

### Dorset Horns.

The lamb class of this breed, although a small one, contained two of the grandest pens of lambs exhibited in it for some considerable time. They were both bred by Mr. C. Scott, and exhibited by Mr. James Toop, the leading pen taking the Breed Cup, a well-deserved distinction.

The Wether class was equally good in point of quality. There were only two entries, but the winning pen, owned by Mr. S. Kidner, was a first class pen in every respect. They were made rn for the Breed Cup. Mr. E. Troyte Chafyn Grove, came in second. This was an excellent pen, and, as we trust, the forerunner of many more of equal merit from the same exhibitor, who is, we think, a fresh one at Smithfield Show.

### Cross Bred.

These classes are full of interest and instruction to the observant man. They afford opportunity for the breeders of commercial sheep to see the result of the different crosses between pure breeds. In the winning pen superior quality was found. Mr. James Toop was first and reserve with two pens of the Southdown Hampshire cross. The winning pen was a particularly good fleshed pen, handling firm and good, whilst one lamb in the reserve number pen was probably one of the best lambs in the show. Mr. T. Rush was second and third with the Oxford Down Hampshire cross. These two pens were of very fine merit indeed. They were ripe and handled well, but not quite to that degree of perfection found in the winning pen. In that excellent class of wethers Mr. Rush was first and second with two pens of the same cross as mentioned above. They were a grand lot of sheep, and the high merit of the winning pen that won the breed cup was distinctly shown by the fact that in the champion contest it was one of the last left in.

The two classes for Scotch cross-bred sheep were rather above the average in quality and number. Mr. W. M. Cazlett's rams were a superlative pen. These were a cross between the Southdown and Cheviot, and easily led in their class. Mr. J. McDowall took second and rn, with Scotch sheep, and the same exhibition was first and third in the wether class, with sheep of similar breeding. These two pens being divided by another one owned by Mr. A. Smith, which like them, indicated high quality of flesh.

Below we give our usual tables showing the average daily gain of the prize-winning sheep—

|                            | Average daily gain. | Age. | Weight. | Gain. |
|----------------------------|---------------------|------|---------|-------|
| Breed and Owner.           | Days.               | lb.  | lb.     | lb.   |
| 1 Mr. E. F. Jordan ..      | 242                 | 589  | 2-22    |       |
| 2 Mr. E. F. Jordan ..      | 242                 | 484  | 2-90    |       |

## Pigs.

This year there was a very fine display of pigs for those who were enabled to see them outside

first, although they would have stood well with other competitors. However, there was an excellent class for the more mature specimens, Mr. R. A. Ayre was first and secured the breed cup with a very even pair, not overheavy in shoulder and jaw, but deep in the sides and hams; Mr. Alfred Brown was second prize and reserve for the breed cup with a heavy, well-fleshed pair, but they scarcely showed the bloom of the others; Messrs. Wherry were third with fine bacon pigs, such as the bacon curers desire; reserve went to Mr. R. E. Rothwell, one of whose pair was not quite so evenly finished as the other.

There was no mistaking the fact that the Large Black were entered to win, and that a strong rivalry exists between the breeders on the east and west coasts of England; and there is somewhat of a distinction between the two types which can quite easily be discerned when contrasted side by side. In the young class Mr. Henry J. Knigswell, South Brent, Devonshire, was placed first with a pair of leathers, deep, even pigs, by Prescome Pride, which, though only eight months old, constituted the heaviest pen of young pigs in the show. Mr. William Townsend, Stroud, was second with an even-matching pair, with good backs. Mr. Kenneth M. Clark fought for Suffolk with a more compact pair, scarcely showing the length of loin of the others, and he was highly commended with another pair, Mr. John Goddard, Suffolk, being reserve. In the older class the battle was more keenly fought still, but Messrs. John Bastard and Sons, Cornwall, sent forward such a pair by Whulkeborough Chief, dam Tinten Black Bess 5th, that they not only constituted a record for the breed, but for the show as regards weight. At eleven months three weeks one day old they depressed the weight-bridge to the extent of 11 ewt. 0 qr. 22 lb. They were tremendous pigs, and by many were esteemed worthy of the championship, but their weight was too much for their feet, and thus they were not quite so active as the champion pen of crossbreds. Second prize went to Mr. William Townsend with his pair of E. R. and W. winners at Swindon, they were full of meat and were placed reserve for the Breed Cup. Mr. John Goddard was put third with the pair with which he won at the Suffolk County Show. Mr. Kenneth Clark was reserve with a fat pair by Sudbourne Start 13th, his highly commended pair by Sudbourne Sam being scarcely so matching or so good in coat and hams when stood up.

The Berkshires constituted far and away the largest classes amongst the pure breeds, but still they were not quite so even as has been seen at Smithfield on some previous occasions. The prize went to the Visiting Committee of the Middlesex County Asylum, with as typical specimens of the breed as any breeder could desire, and they were accordingly awarded the Breed Cup, the second prize also went to the same institution. Mr. Laurence Currie was third and reserve with matching pens nearly as level as though they came from the same litter, but this was apparently due to their both being by the same sire, Polegate Dandy. His Royal Highness Prince Christian was highly commended, but his pair were lacking in bloom. The older class was remarkable for its general evenness and excellence. There was no other class so notable in this respect in the whole show, and though there were a dozen entries all received mention. H.R.H. Prince Christian was here to the fore with a couple of very level profit-making pigs, but with these, as with the others in the younger class, they were somewhat deficient in bloom, and so they were only reserved for the breed cup, instead of taking it second went to a very matching pair with nice hams, sent by Mr. Julius Fricker. Third went to H.R.H. the Prince of Wales. This pen of pigs were deep and weighty, but scarcely so even on the back as the others. Reserve went to the Visiting Committee Middlesex Asylum, whose pigs were just passing over their prime. All the others in the class were either highly commended or else commended.

The Tamworths made one of the most meagre displays of this breed seen at Islington in recent years there were the three exhibits of Mr. Robert Ibbotson, and that was all. These three pigs were full of quality and had grand coats, they were most meritorious. The cross-breeds, as they usually do, constituted some really excellent classes, they were not bad bacon pigs. In the younger class, Mr. Nathaniel Benjafield was first for long, even, deep pigs obtained from a Berkshire boar on Small White and Small Black cross; these pigs were very even and yet weighty. Second to him was the Earl of Carnarvon with Middle White Berkshire cross. The pigs here were not quite so compact, and there was but little difference between these and the same exhibitor's third prize lot of the same breeding. Mr. John Neverson who was reserved, secured his reliance on Berkshire sires, and his Middle White Berkshire cross. As usual, the first cross was best. But the betterment pigs were seen in the more mature class here. Mr. Alfred Brown secured the Breed Cup, and subsequently the Champion Plate and Prince Christian's

SMALL CROSS-BRED HEIFER, DANESFIELD FORGET-ME-NOT.

This small Cross-Bred Heifer won the Breed Cup, and was First in the class for a small Cross-Bred Heifer not exceeding 3 years' old, at the Smithfield Show. She is the property of and was bred by Mr. R. W. Hudson, Danesfield, Marlow, Bucks, and is 1 year 10 months 3 days' old, and weighs 8 cwt. 0 qrs. 12 lbs. Her sire was Principal of Danesfield 20519, dam Gort Magpie, cross-sire Aberdeen-Angus, dam Dexter.

their pens. The judges and the herdsmen as visitors and exhibitors were rigorously excluded whilst the decisions were being made. This is apparently the only section of the show where the judging is conducted in camera, and it is not so easy for one to describe a fat pig when it snuggles down into its straw in the pen as when it stands on its feet before the judge outside it comparisons cannot be so accurately made. The long expected has come to pass in these new utility classes, the Small Whites and Small Blacks, the latter first dwindled down to vanishing point, and now Small Whites have vanished also. In the class for pen of Middle Whites under nine months there was rather a large entry, but the quality was most decidedly at the top of the class than throughout it. Mr. Julius Fricker was first with his very typical animals with long even loins and very even, and took the Breed Cup. Mr. E. Henry Lloyd was second and third with two rather even pens, the second prize lot being very evidently the weightiest of the two. The reserve pigs of Mr. Charles Spencer was scarcely so matching. The class for Middle Whites over nine months and under twelve, did not constitute a large class by any means, only three being out before the judges. Mr. Alfred Brown was first with a capital pair by Southampton King. They were scarcely so fine as the younger pair, else they might have been otherwise than reserve for the Breed Cup. Mr. Charles Spencer was second with a very matchy pair by Holywell Middleton, Mr. E. H. Lloyd's reserve being rather on the plain side.

It nearly appears ridiculous with a well-established breed like the Large Whites that there should be a walk over in the young class, where Messrs. W. H. and E. Wherry's pair were given

Challenge Cup, the Middlesex Asylum Committee's Berkshires being shown to them on both occasions. The cross was Middle White sire, dam Berkshire; they were very level, had nice hams, were not too heavy forward, and constituted a fine exhibition pair, as they were in the pink of condition and large. Mr. George Atkins was second with a Large White sire, dam Berkshire, throwing rather coarser pigs, and he was also put third with the same cross. Mr. Alfred Brown was reserved with a Middle White sire, dam Berkshire, which, though well fed, were not so even. There was a fine entry of porkers, some exceedingly choice quality pigs being shown, some of these had, however, been forced off their feet. Mr. Alfred Brown was first with Middle Whites with splendid loins; second went to Mr. George Atkins with a Middle White dam Berkshire cross, the Earl of Carnarvon's Berkshire being third. Mr. Charles Spencer's Middle White being reserved; the highly commended car went to Mr. W. A. Dix with a Berkshire Large White cross, Mr. N. Benjafield's commended being by a Berkshire sire and a Large White cross. Single pigs made a good display in the class for specimens of any White Breed. Mr. Alfred Brown was first with a very typical Middle White, and placed reserve for the Champion Plate for the best single pig. Mr. Arthur Hiscock was placed second with the same breed, whilst reserve went to the Sandringham herd of His Majesty the King.

Mr. John Bastard was placed first for specimens of black breeds with a Cornish Black; the challenge cup went to Mr. Julius A Fricker's Berkshire. As a whole the pig classes were noticeable for general merit rather than outstanding excellence.

#### CHAMPION AND SPECIAL PRIZES.

**CATTLE.**  
Champion Plate, value 100 guineas, for the best beast in the show.—H.M. the King, Windsor, Shorthorn steer; r, the Earl of Rosbery, Dalmy Park, Edinburgh, Aberdeen Angus heifer, Ida of Dalmy 3rd.  
The King's Challenge Cup for the best steer in the show, bred by exhibitor.—H.M. the King, Windsor, Shorthorn steer; r, the Earl of Rosbery, Dalmy Park, Edinburgh, Aberdeen Angus heifer, Ida of Dalmy 3rd.  
Best beef not exceeding two years old, £25 silver cup.—Mr. John Ross, Melkie Tarral, Farn, Shorthorn steer; r, Mr. T. Morgan, Whimble House, Whimble, Exeter, Devon, steer Whimble Model.

Best steer or ox.—Silver cup, value £50, H.M. the King, Windsor, Shorthorn steer; r, Mr. Peter Dunn, Pasture House, Shorthorn, H.M. the King, Aberdeen Angus steer Sylvanus.  
Best heifer, Silver cup value £20.—the Earl of Rosbery, Dalmy Park, Edinburgh, Aberdeen Angus heifer Ida of Dalmy 3rd; r, Miss Alice de Rothschild, Waddesdon Manor, Aylesbury, cross-bred heifer Waddesdon Primrose.

**BRED CUPS.**  
Devon.—H.M. the King, Windsor, heifer, Caroline; r, Mr. T. S. Morgan, Whimble House, Whimble, Exeter, steer, Whimble Model.

Hereford.—Mr. W. H. Cooke, The Green, Stamford Bridge, Hereford, steer, Best; r, H.M. the King, Windsor, heifer, Camilla.

Sussex.—H.M. the King, Windsor, steer; H.M. the King, Windsor, steer; r, Mr. William Levet, 79, Queen's Road, Tunbridge Wells, steer, Spimo Dick; r, Mr. John Augier, Lynwick, Redgwick, steer.

H. Poll.—Sir Walter C. Rethel, Bart, Acton Reynold, Shrewsbury, steer; r, ditto, steer.

Aberdeen Angus.—The Earl of Rosbery, Dalmy Park, Edinburgh, heifer, Ida of Dalmy 3rd; r, Mr. Peter Dunn, Pasture House, Singles, H.M. the King, steer, Sylvanus.

Galloway.—Messrs Thomas Biggar and Sons, Chapleton, Dalbeattie, heifer, Nelly 5th of Hensel; r, ditto, steer Chalmers.

Welsh.—The Coad Coch Trustees of Llanyewydd Farm, Abergele, steer Gwilym; r, Mr. R. Roberts, Brynogydd, Pen-y-bont, Llanidloes, heifer, Nelly 5th of Hensel.

Highland.—H.M. the King, Sandringham, heifer Sheila 2nd of Garth; r, the Earl of Dalhousie, Lambton Castle, Fence House, Durham, steer Rosa.

Westminster.—Mr. John D. Richmond, Waddesdon Manor, Aylesbury, heifer Waddesdon Primrose; r, Mr. R. W. Hudson-Danesfield, Marlow, Bucks, heifer Danesfield Honey Bee.

Kerry or Dexter.—Mr. W. H. Hudson, Danesfield, Marlow, Bucks, steer Danesfield Good Friday; r, H.M. the King, Sandringham, steer Robin Hood.

Small Cross-bred.—Mr. R. W. Hudson, Danesfield, Marlow, Bucks, heifer Danesfield Forget-me-not; r, ditto, steer Danesfield Sweet William.

**SHEEP.**  
**PLATE AND CUPS.**  
The Prince of Wales Challenge Cup for the best pen of three sheep or lambs, bred by exhibitor.—H.M. the King, Sandringham, Shetland sheep; r, Messrs. E. Dean and Sons, Dowsley Hall, Bourne, Lincolnshire, Lincoln Sheep.

Plate value £50 for the best pen of three Long-Wooled sheep or lambs.—Messrs. E. Dean and Sons, Dowsley Hall, Bourne, Lincolnshire, Lincoln Sheep; r, Mr. E. F. Jordan, Eastburn, Driffield, Leicester Sheep.

Plate value £50 for the best pen of three Short-Wooled sheep or lambs.—H.M. the King, Sandringham, Southdown sheep; r, Mr. J. Flower, Chilmarnock, Salisbury, Hampshire Down sheep.

**BRED CUPS.**  
Leicesters.—Mr. E. F. Jordan, Eastburn, Driffield, sheep; r, ditto, lambs.

Lincolns.—Messrs. E. Dean and Sons, Dowsley Hall, Bourne, Lincolnshire, sheep; r, Mr. W. B. Swallow, Wootton Bassett, Leicestershire, lambs.

Kent or Romney Marsh.—Mr. C. Gordon Neame, Copton Manor, Faversham, lambs; r, Mr. F. Neame, Macknade, Faverham, sheep.

Devon and South Devon.—Mr. A. C. Hall, Stanton Barton Manor, Paignton, Devonshire, lambs; r, Mr. F. White, Norton, Wiltshire, lambs.

Cheviots.—Mr. J. McDowall, Grinsteadwood, Kirkcubright; sheep; r, ditto, sheep.

Mountain.—Mr. J. McDowall, Grinsteadwood, Kirkcubright, sheep; r, Sir John Gilmore, Bart, Landon and Montevale, Leven, Fife.

Southdown.—H.M. the King, Sandringham, sheep; r, ditto, lambs.

Hampshire Down.—Mr. J. Flower, Chilmarnock, Salisbury, sheep; r, ditto, sheep.

Shropshire.—Mr. J. Flower, Chilmarnock, Salisbury, sheep; r, ditto, lambs.

Shropshire.—Sir Richard Cooper, Bart., Ashlyns, Berkhamsted, Herts, sheep; r, ditto, sheep.

Oxford Downs.—Mr. J. T. Hobbs, Maisey Hampton, Fairford, Glos, sheep; r, Mr. H. W. Sillgoe, The Grounds, Adderbury, Banbury, lambs.

Dorset.—Mr. J. Toop, Bosham, Chichester, lambs; r, Mr. S. Kidner, Bickley, Milborne, Somerset, sheep.

North Devon.—Mr. T. Toop, Bosham, Chichester, lambs; sheep; r, Mr. J. Toop, Bosham, Chichester, lambs.

**CUPS AND PLATES.**  
Prince Christian's Challenge Cup for the best pen of two pigs bred by exhibitor.—Mr. Alfred Brown, Hill Farm, Southampton, cross-bred pigs; r, the Visiting Committee of the Middlesex County Asylum, Tooting, S.W., Berkshire pigs.

Plate value £20 for the best pen of two pigs.—Mr. Alfred Brown, Hill Farm, Southampton, cross-bred pigs; r, the Visiting Committee of the Middlesex County Asylum, Tooting, S.W., Berkshire pigs.

Plate value £5 for the best single pig.—Mr. J. A. Fricker, Burton, Mere, Wiltshire, Berkshire pig; r, Mr. A. Brown, Hill Farm, Southampton, Middle White pig.

**BRED CUPS.**  
Middle White.—Mr. J. A. Fricker, Burton, Mere; r, Mr. A. Brown, Hill Farm, Southampton.

Lavender White.—Mr. R. A. Ayre, Bushey Lodge Farm, Watford; r, Mr. A. Brown, Hill Farm, Southampton.

Large Black.—Messrs John Bastard and Sons, Tinten Manor, St. Turley, S.O., Cornwall; r, Mr. W. Towassend, The Manse, Stroud, Glos.

Berkshire.—The Visiting Committee of the Middlesex County Asylum, Tooting, S.W.; r, Prince Christian, Cumberland, Glos, Windsor.

Lawforth.—Mr. R. Ibbotson, The Hawthorns, Knowle, Warwickshire; r, ditto.

Oxford District or Cross-Bred.—Mr. A. Brown, Hill Farm, Southampton; r, Mr. G. Atkins, High Street, Highbury, N.

**JUDGES.**  
**CATTLE.**  
Devons, South Devon, and Sussex.—Mr. C. N. Skinner, Shortlands, Kent; Mr. Daniel Swaffer, Mumford, Kingsnorth, Asford, Kent.

Herefords and Red-Faced.—Mr. John H. Yeomans, Withington, Hereford; Mr. Fred Smith, Woodbridge, Suffolk.

Shorthorns and Cross-Breds.—Mr. Arthur S. Gibson, The Elms, Ruddington, Nottingham; Mr. John Wortley, Shipdham, Norfolk.

Aberdeen-Angus and Galloways.—Mr. C. W. Schroeter, Bell's Vista, Haywards Heath; r, Mr. A. B. Matthews, Newton St. B.

Devon and Highland.—Mr. R. W. Pritchard, Coednamor, Carnarvon; Mr. J. R. Campbell, Shinness, by Laing, Sutherland.

Kerry, Dexter, and Small Cross-Bred Cattle.—Mr. H. D. Betheridge, "Drayton," Woodstock Road, Summertown, Oxford; Mr. Henry C. Webb, Audley End, Suffolk, Walsden.

£25 Cup, £50 Cup, Champion Plate, and King's Challenge Cup.—Mr. John Ross, Melkie Tarral, Farn, Shorthorn steer; r, Mr. William Reid, 160, Central Meat Market, E.C.

**SHEEP.**  
Leicesters, Border Leicester, Shetlands, and Lincolns.—Mr. George Harrison, Gainford Hall, Darlington; Mr. Robert Wright, Nooton Heath, Lincoln.

Kentish or Romney Marsh, Devons, and South Devons.—Mr. P. Austin Bengel, The Lawn, Sittingbourne, Kent; Mr. J. G. Pedler, The Barton, Sampford Peverell, Tiverton, Devon.

Highland and Mountain.—Mr. S. M. McKerron, Boreland of Northwick, Dunfermline; Mr. James Moffat, Craik, Hawick, N.B.

Southdowns and Shropshires.—Mr. George F. Henson, Estate Office, Gatton Park, Reigate; Mr. Matthew Williams, Whiston Hall, Altringham, Wolverhampton.

Hampshire-Downs and Suffolks.—Mr. Cary Cole, Manor House, Wimburn, St. Albans; Mr. D. Abbott Green, Fingringhoe Hall, Colchester.

Oxford Downs and Cross-Breds.—Mr. John White, Ham Court Farm, Bampton, Hants, S.O.; Mr. George Stimpson, 71, Central Meat Market, E.C.

Ryeland and Dorset.—Mr. P. H. Hawkins, Sugwas, Szaalish, Herefordshire; Mr. L. C. Attrill, Bowcaine Farm, Carlisle.

Champion Plates for Long and Short-Wooled Sheep, and Prince of Wales's Challenge Cup.—Mr. Henry Smith, jun., The Cottage, Cropwell Butler, Nottingham; Mr. James P. Case, Binkam, Wighton, E.C. Norfolk.

**PIGS.**  
Small White or Small Black, Middle and Large White Breeds.—Mr. H. H. Heston, Heston, Hants; Mr. John Augier, Lynwick, Redgwick, Morpeth.

Large Blacks and Berkshire s.—Mr. A. H. Cobbold, Eldo House, Bury St. Edmunds; Mr. William A. Barnes, Hasluck's Green, Shirley, Birmingham.

Tanworths and Cross-Breds.—Mr. D. W. Philip, The Redlands, Whitacre, Birmingham; Mr. Robert Wallace, Acton, Wiltshire, Wiltshire.

Champion Plate and Prince Christian's Challenge Cup.—Col. F. A. Walker-Jones, The Manor House, Burton, Westmorland; Mr. S. R. Sherwood, Playford, Ipswich.

**CARCASE COMPETITION.**  
Cattle and Sheep.—Mr. William Coggan, Braemar, 58, Thimble Park Road, Dulwich, S.E.; Mr. G. H. Walker, Abbey Gate, Dulwich, S.E.

Pigs.—Mr. J. F. Bowyer, 250, Central Meat Market, E.C.; Mr. W. E. Hoare, 220, Central Meat Market, E.C.

**Sale of the Carcasses.**  
Unfortunately for sellers of the carcasses entered in the Carcase competition the wintry weather had given way to a somewhat warmer temperature and rain while the sales were on, and the result was that buyers were able to purchase much cheaper than if cold weather had continued.

The champion carcase made 6s. 2d. per stone, the best price of the day, but last year 7s. was the highest figure, and the general run of prices seemed to be somewhat lower, about 4s. 6d. being the average for ordinary lots.

In the case of mutton, however, trade was very good, and two carcasses—the champion and reserve champion—reached 11s. per stone, against 9s. 6d. last year.

Still, the general level of prices for good carcasses was little better than last year, and, apart from first prize-winners, from 4s. 10d. to 5s. 6d. per stone would cover the majority of good lots.

Pigs met a fairly good demand at prices up to 8s. given for the Earl of Carnarvon's winner, whilst the Middlesex Asylum first prize-winner made 7s. 6d., but the general rate was 2d. to 5s. 8d.

A table giving full details as to how the animals killed, together with the prize-winners, will be found on another page.

**Annual Meeting of Members.**  
Lord Coventry presided at the annual meeting of the club on Tuesday.

The council, in presenting the annual report, congratulated the members upon the great honour conferred on the club by the acceptance of the Presidency for the present year by His Royal Highness the Prince of Wales, and the further honour in the presentation by His Royal Highness of the magnificent challenge cup for sheep, to replace the cup won outright at the last show. The club's invested funds had been increased by the purchases of Consols to the amount of £400. The statement of accounts to October 31 showed the club's invested funds to be £1,860 Consols (valued at 90), and the balance of the current account at the banker's, and in the secretary's hands, to be £246 0s. 7d. and £2,000 on deposit at bankers.

The Chairman, in opening the meeting, said he was commanded by H.R.H. the Prince of Wales to express regret at being unable, in consequence of another engagement, from presiding at that meeting. They probably did not forget that the Prince of Wales spent several hours at the show on the previous day, and it was evident to all that he took a great interest in the stock, and also the implements and other displays on the galleries. (Applause.) During the time he was in the hall the Prince went entirely through the show. His lordship concluded his observations by moving the adoption of the report.

Mr. W. Tindall moved, when it came to the election of a president, to succeed the Prince of Wales, that Mr. R. Hornsby, the oldest member of the Smithfield Club, should take that office. (Applause.) He represented the implement section of the club, and he was sure it would be a compliment if Mr. Hornsby, as the president-elect, was chosen.

Mr. J. W. Treadwell seconded, and the motion was carried unanimously.

Mr. Hornsby, in returning thanks for the honour conferred upon him, said he would have to claim their indulgence in that he had the misfortune of old age to combat with. (Laughter.)

Mr. R. H. Prince Christian, in moving the election of the Duke of Richmond and Gordon as president-elect, mentioned that the Duke had been a member of the club for forty years, besides being a regular exhibitor. As such he had followed in the footsteps of his father, who was such a good friend to the club. (Hear, hear.)

The Duke of Richmond, in expressing thanks, said when the time came for him to fulfil the duties of the chair, he hoped he might justify their expectations. He noticed that the new president became a member of the club in 1845; that was when he was ushered into this troubled world. (Laughter.) He hoped Mr. Hornsby would prepare him for the onerous duties that were expected of him.

The election of eleven gentlemen to serve on the council in place of those retiring resulted in the following gentlemen being chosen.—Messrs. W. Coggan, J. D. Fletcher, D. Abbott Green, W. Hayden, J. T. Hobb, J. Harold Howard, S. Kidner, T. Latham, E. C. Ransome, Martin J. Sutton, and Christopher Williams.

The chairman, in expressing the thanks of the members for the kindness of the Prince of Wales in accepting the presidency of the Club, said members of the Royal Family had always shown a great interest in the welfare of that society. Their interest in agriculture had not been entirely confined to the club, but had always been great supporters of agriculture wherever it was well and conscientiously carried out.

#### The Herdsmen's Smithfield Club.

Few visitors to Smithfield are aware of the fact that the herdsmen at Smithfield have established a club of their own to recognise the merits of the herdsmen who prepares the various first prize winning animals at the show, and also to render a little pecuniary assistance to herdsmen who are sick or fall out of the club. The club gained its membership early; it now totals 200 members, and an endeavour is to be made to introduce more of the friendly society and less of the prize winning element into it. During the last year the receipts and balance brought forward amounted to £163 3s. 1d. Out of this £34 was paid in prize-money to herdsmen, £22 to herdsmen on account of sickness and death in amounts vary from £1 to £2 10s., whilst necessary expenses absorb £14 8s. 3d., thus leaving a balance in hand of £92 14s. 10d. The annual dinner was held at the Grosvenor Restaurant on Monday evening last under the presidency of Mr. W. T. Hall, of Highclere, and he was supported by Messrs. Arthur Hiscock, N. Benjafield, James Macdonald, secretary of the Highland and Agricultural Society of Scotland, Messrs. Snatchell, and others. A vote of thanks was accorded to Mr. Clement Stephenson, the retiring president, and Mr. J. Hallas Warrington was proposed as president elect. It was mentioned that the Highland and Agricultural Society of Scotland had forwarded a donation of £25 towards the funds of the club, a capital entertainment was provided by Messrs. Thorley, the proceedings being kept well up to the closing hour, Mr. Fred Snatchell acting as conductor.

## FAT STOCK SHOWS.

### West of England.

The thirty-sixth annual show of the West of England Fat Stock Society, held at Plymouth on Wednesday and Thursday, was undoubtedly one of the best of the long series, for the entries were more numerous than ever, and the quality the highest all round. The total entry of cattle, sheep, roots, dairy produce, pigeons, and poultry classes was 1,100, nearly 100 more than last year, which up to then held the record. As the "Smithfield of the West," as it has been aptly termed, the West of England show attracts to itself most of the prize winners from the local fat stock shows of Devon and Cornwall, and in the poultry section exhibits from all parts of the country, and the visitor to the show can view, as he did last week, within its limited compass the pick of the fat stock of the south-western counties, as well as some of the choicest birds that the country can produce.

Cattle numbered 63, or three fewer than last year, but the quality was better than ever. North Devons, as usual, were in strong force, and a feature of this section was the remarkably close competition between two animals in the older class of oxen and steers—namely, Mr. Dyer's Tenecreek Model and Mr. May's Lord Roberts. Though of the Devon breed, neither belongs to Devon county, the former coming from Cornwall, and the latter from Somerset. Bred by the exhibitor, Tenecreek Model had had an unbroken record of successes at the Cornish shows, winning the championship prizes at Bodmin, Lostwithiel, Liskeard, and Callington, whilst Lord Roberts had also swept everything before it in the up-country shows. Both animals were magnificent specimens, and so difficult did the judges find the task of discriminating between them that they debated it for over an hour before finally awarding the prize to Lord Roberts, who later was given the cup presented by the president for the best animal in the exhibition and North Devon. Sir Massey Lopes's cup for the best ox or steer in the show, Lord Roberts, was subsequently bought by Mr. S. Morgan, of Whimple, for £150, which is believed to be the highest price ever paid for a North Devon steer. Vanquished in its class, Mr. Dyer's fine steer Tenecreek Model later on received substantial consolation by winning the silver cup presented by Mr. F. J. W. Nicholls for the best beast in the show exhibited by a tenant farmer, and also the special prize given by Hoyle and Son for the best beast in the show exhibited and bred by a tenant farmer.

The North Devon cows also formed an excellent lot, the chief award going to a shapely three-year-old, also hailing from Somerset. South Devons, though not so numerous as might be expected, so near the home of the breed, occupied three fairly well-filled classes. The young steers were of exceptional excellence, the first prize going to Mr. T. W. Luscombe, of Totnes, for a remarkably well-developed two-year-old steer, weighing over 18 cwt., which also secured the silver cup of the Plymouth Co-operative Society for the best South Devon beast in the show.

Cross-bred cattle were not numerous, but Mr. Alexander's Polled steer, which secured the chief award, excited general admiration. The dairy classes included several cows remarkable for their milk-giving qualities, whilst the class for butchers' beasts was well filled, and the animals were all of the type which butchers with an eye to profitable joints greatly esteem.

The five classes of sheep produced only eleven entries, but the whole were of exceptional quality. Long-wooled wethers (not Dartmoors) made a splendid couple of pens, and although the Earl of Mount Edgcombe showed some choice sheep, they were beaten by Mr. A. C. Hall's extraordinary sheep of massive size and great weight. The Dartmoors were strong and weighty, but the Exmoors only fair, the whole of the prizes going to one exhibitor. The governors of Dartmoor Prison had two pens of the very hardy breed sheep, and they secured first and third prizes. Mr. A. C. Hall won the champion prize of £5 5s., given by Mortimer Bros., of Plymouth, for the best pen of sheep.

Roots, dairy produce and poultry, as before mentioned, made highly creditable displays, and the whole show was a most interesting one.

### Leeds.

The Leeds Smithfield show, held last week, suffered by clashing with the Smithfield Club's Show; but although the entries were not so numerous as at previous shows, there was a good, all-round display of stock, &c., and the show was a highly creditable one. The cattle championship went to a cross-bred, a blue and grey polled ox, named Linton, shown by Mr. Brigham Carlton, of York, and which was second at the York show. The cockney lay between Mr. Carlton's cross-bred steer and a short-horn steer, Santa Claus, sent by

Mr. W. T. Gibson, of Darlington. The winner was a butcher's beast all over—a fine, level-backed beast, of good bulk, and very fleshy. He took not only the two principal trophies, but also the Leeds butchers' challenge trophy for the best beast in the show most suitable for butchers' purposes, and the ex-Lord Mayor's special prize, and along with a black-polled ox, his byre companion, secured the Leeds tradesmen's plate for the best pen of Scotch or Welsh cross-breeds. Mr. Gibson's short horn, which is just under three years old, is also an animal of great weight and good butchering quality; as at the Scottish National Show at Edinburgh, he headed the class for oxen under three years old, besides which he got the Leeds licensed victuallers' cup as the best Shorthorn. Mr. Peter Dunn's Shorthorn, which was second in the male class, looked heavier, but was not considered to be so much of a butcher's beast. Here the King was taken with a rather younger steer of nice quality.

In the female Shorthorn class the King was in the front rank with a two-year-old grand cow, well adapted for the milking strain, beating an animal sent from Easingwold by Mr. J. M. Strickland, which perhaps did not show quite so much milk.

A good class of cross bred or Irish oxen under three years old was headed by a very useful blue-grey, the property of Messrs. R. and J. Davison, of Malton, a Darlington animal, shown by Mr. Earle, coming next. The winning female came from Scotland, was a level-backed heifer, full of quality. Mr. Earle's second prize cow appeared to have more scale, but was hardly so neat as the winner.

Once more there was cause to regret a paucity in the Scottish breeds. Fairs was the biggest entry in any class—the polled cows and heifers, in which a Yorkshireman, Mr. Robert Stubbs, of Baldersby, beat two Scotsmen, with a very useful three-year-old beast that might have won even in a larger class; but in the male class of the same breed Mr. Peter Dunn had a walk over, while Lord Durham enjoyed a similar privilege at the show in the Highland ox class and had only one entry against him in the cow or heifer section. A very good muster was seen of oxen of any breed. Here Mr. E. W. Stanforth, of York, won with a black Angus-Shorthorn cross—one of the heaviest beasts in the show—a blue-grey, the property of the owner of the champion, being put second, probably because he lacked the weight of the winner. Mr. Carlton wins well all round, his victories also including the premier prize in the any breed female class. A York decision was upset in the class for pairs of horned Irish cross-bred bullocks. The keenest competition of the day was witnessed here, and it was only after long deliberation that the judges gave the first prize to Messrs. M. Tomlinson and Son's animals from Tadcaster, and the second to a pair of bullocks exhibited by Mr. Arthur Barker, of York, while Mr. H. Knowles's pair from Wetherby, which were first at York, were here relegated to third position.

There was a creditable display of sheep, the leading exhibitors being Captain Bphrens, Major Willey, and Mr. T. Preston. In the pig classes, the Leeds Industrial Co-operative Society and Messrs. Dracup and Hodgson, of Shipley, exhibited. The champion cup for the best pig in the show fell to Mr. Leopold C. Paget (Harewood), who also won the Tradesmen's Plate. Mr. Dewhurst, of Dudley Hill, Mr. Matthew Bishworth, of Cowling, and Messrs. Dracup and Hodgson also won premier honours. Messrs. R. and J. Davison, of Malton, secured, for the second time, the Yorkshire Relish Cup, and also won the cup given by Mr. M. H. Schunck for the best pen of sheep.

### King's Lynn.

The entries at the seventeenth annual show of the King's Lynn Christmas Fat Stock Society, held on Monday, contained, numbering 107, as compared with 107 last year. H. M. the King made four entries in the cattle classes, two in the sheep, and one in the pig class. In the class for the best steer bred and fed by the exhibitor, the King won easily with a very fine white Shorthorn, from the Sandringham herd, two years ten months old, and weighing 18 cwt. 2 gr. The same animal was awarded the King's special champion prize of £10 10s., Mr. G. Heading's (Thornham) red-and-white steer being reserved for the honour. The King's roan Shorthorn was first in the heifer class, and his Majesty also led the way in the class for the best pair of steers with a brace of very superior animals. In the class for the best fat beast (open to Norfolk), Mr. Alfred Rowell secured the premier honour with a grand black, weighing 14 cwt. 7 lb. This was undoubtedly the best animal in the show, and would have taken the champion prize if it had been eligible. The sheep classes were well filled, the King taking the first prize for lambs and the second for wethers. Some very good pigs were exhibited.

## SHOW GOSSIP.

The show of the Sussex County Agricultural Society at Brighton this year was not a financial success, a fact which was made perfectly plain at the annual meeting of the society, by the chairman (Mr. W. F. Ingram). He said that there was a balance brought forward on the show at Brighton in 1904 of £28 3s. 6d. Comparing the two shows, taking this year's show first, they found members' subscriptions totalled £360 and the money prizes £158, as against £316 and £151 in 1904. Therefore they would see that they had not an increase of £20 on subscriptions and £4 on money prizes. Having made other comparisons on the receipt and payment side, he said that the position they were left in was that, notwithstanding that they brought a balance forward of over £28 in 1904, there was now a balance to the lad of £33 12s. as a result of the year's working. This was rather a serious state of things, seeing that it had arisen through holding the show at Brighton. Brighton was a place in which one would have thought the show would have gone well. The balance-sheet showed an overdraft of £33 12s., and the profit and loss account a loss of £61 15s.

Regret was generally expressed at the unfavourable result of the show, and one member raised the question of the desirability of not holding a show for one year. If they missed one year it would, he said, enable them to get upon their feet again. This, however, did not meet with much approval, and subsequently it was decided to appoint a sub-committee to consider whether it was possible to increase the subscription list and cut down the prize list. It was decided to hold the 1907 show at Hastings, provided that an invitation is received from that town, and that the necessary preliminaries can be arranged.

At a meeting of delegates from the Inverness-shire Farmers' Society and the three Ross-shire farmers' societies, held at Inverness, to consider as to the future holding of joint shows, it was unanimously agreed that a joint show should be held every second year, the centres to be Dingwall and Inverness, and it was resolved to hold a meeting in Dingwall in the third week of January to forward arrangements.

A discussion as to the method of selecting judges for their show took place at the last council meeting of the Royal Cornwall Agricultural Association. The subject was raised by the Hon. John Boscawen, who, when the election of a committee to select judges for 1907 came before the meeting, spoke against the election of a committee on which there were exhibitors. He thought it would be a good thing to leave the matter to the secretaries and president, who could select the judges from lists submitted by the Herd-book Societies. He did not intend to reproach any of the council; far from it. He had been on a committee for the selection of judges, and he had also shown. Outside people thought they chose their own judges. It was an unfair and nasty thing for it to be thought one did that, and the more they brought it to the eyes of the public that the judges were not selected for certain people only the better it would be. That was his reason for mentioning the subject. He did not raise it to cast any slur on any person or body.

Mr. Rowe thought it better that the judges should be appointed by the whole council, and he urged that instead of having single judges, as in the past, there should be two judges in each department. A discussion then ensued on this new point, and it was finally agreed that there should be two judges in each department except in the dairy and horse-shoeing sections, but that to save expense their duties should be extended, as, for instance, the two judges for South Devon cattle should also be charged of the South Devon sheep and large black pigs, those for North Devon cattle should also judge long-wool sheep; the Channel Island cattle men should decide the prizes of the white pigs; and the Shorthorn cattle judges should deal with the Down sheep as well. In addition, there should be two judges for Shire horses and two for hacks and Hunters. However, this latter arrangement was left to the Judges' Selection Committee, which, as on other occasions, will include breeders. Mr. Boscawen's proposal not being accepted.

The date of next year's show of the Royal Cornwall Agricultural Association at Liskeard has been fixed for Wednesday and Thursday, June 12 and 13, it being deemed inadvisable to have it on the Tuesday and Wednesday, as the Bath and West of England exhibition does not close until June 10.

At the last meeting of the council of the Royal Ulster Agricultural Society it was agreed to hold shows of Shorthorn and Aberdeen Angus bulls in (Continued on page 652)

conjunction with those held by Messrs. John Robson, Ltd., on March 20 and 28 respectively, for the purpose of provisionally selecting animals for premiums under the scheme promoted by the Department of Agriculture and Technical Instruction for encouraging improvement in the breeding of cattle in 1907. The spring show will be held on May 22 and two following dates, and the horse and sheep shows on July 24 and two following dates; the dog and flower shows to be held on July 25 and 26.

At the above meeting a draft prize list of the spring show was submitted by the various sectional show committees and adopted. The principal alterations and additions are as follows:—In the cattle section an additional class will be provided for Shorthorn bulls, any age, awarded a premium in 1907 by County Antrim or County Down Committees of Agriculture. Classes for Herefords to be deleted, and three classes provided for Ayrshires. The classification for Kerry and Dexter cattle was slightly altered, an additional class for Kerry bulls to be provided. Competition in the majority of the dairy and general purposes cattle to be open to all, and with a view to affording greater facilities to farmers to exhibit, animals entered therein will only be required to be showy on last day of show. The Dudley Cup, value 100 guineas, to be offered next year for the best group of Shorthorn cattle, and the Queen Victoria Cup, value fifty guineas, for the best yearling Aberdeen-Angus bull, bred in Ireland, and the property of an Irish exhibitor.

Competition in all classes for harness horses will be open to the United Kingdom, and a class will be provided for fast trotting horses, one mile record, whilst the jumping competition on first

Association have decided to hold their next year's show at Devizes on Monday 22 and 23, instead of May 29 and 30 as previously arranged, the alteration being consequent upon the Royal Counties Society having altered its show dates to May 28 to 31 inclusive.

The Somerset Agricultural Instruction Committee were applied to by the Somerset County Agricultural Association for a grant of £35 towards the expenses of dairy demonstrations at the Wells Show next year, and for Miss Stubbs's services as dairy lecturer. The application was not only granted, but it was decided to make the sum of £45, the additional £10 to be awarded, if possible, in prizes to students.

## POULTRY.

### Scholarships in Poultry Keeping.

One scholarship of the value of £10 is offered to students taking the short course in aviculture at University College, Reading, commencing February 21, 1907, tenable at the terminal course commencing April 27, 1907. Students must enter in the usual way for the short course referred to above, and the scholarship will be awarded to the student who obtains the highest marks in the examinations on March 28 and 27.

Another scholarship of the value of £22 10s. is also offered, this being for students taking the terminal course in aviculture commencing April 25, 1907. The scholarship will include two terms' instruction in general aviculture, commencing October 3, 1907, and three months' practical work on the College Poultry Farm, Theale, and enable the successful students to take the final examinations qualifying for the certificate in aviculture.

A BUFF ORPINGTON COCKEREL AND PULLET.

day of show will be omitted, and a champion wall jump competition will be provided on the second day. In the pig section four classes will be provided for Large Whites, and two classes for the first time for Large Blacks. It was decided to confine competition in the poultry classes to exhibitors resident in Ireland. In the dairy section an additional class will be provided for cured butter exhibited in any marketable package not less than 5 lb., and a class for sweet cream. It was proposed to hold butter-making and trussing competitions as at last show. Numerous and valuable offers of prizes were announced and accepted with thanks.

The Royal Dublin Society's annual show and sale of pure bred bulls (open to competition from all parts of the United Kingdom) will take place on Thursday, February 7, when prizes ranging in value up to £5 will be offered for Shorthorns, Aberdeen-Angus, and Herefords. The first two breeds have three classes—viz., for bulls calved in 1906 or on after September 1, bulls calved in 1906, and bulls calved on or before August 31, 1905, whilst Herefords are given two classes, one for bulls calved in 1906, and one for bulls calved prior to 1906. Entries close Tuesday, January 8, and applications for entry forms should be made to the Agricultural Superintendent, Leinster House, Dublin, stating the number of forms required, and in which class the exhibitor desires to enter.

The council of the Wiltshire Agricultural

Applications should be made to the Tutorial Secretary, University College, Reading.

**Successful Co-operation.**—A highly satisfactory report for 1906 has been presented by the directors of the Western Counties Agricultural Co-operative Association, Limited, for it shows that during the year 550 new shareholders and members were enrolled, whilst the sales increased by £41,628. The total turnover for the year was £524,505, with a net profit of £11,234 17s. 8d. During the eighteen years in which the business has been successfully conducted on a profit-sharing basis, the sum of £105,373 has been earned for distribution to shareholders and members pro-rata on their purchases. In addition to this, a regular dividend of 5 per cent. per annum has been paid on capital account, and ample reserves have been set aside for the financial security of the business. This maintains an unbroken record of success in agricultural co-operation. The directors propose that the net profit for the year shall be divided as follows:—Dividend of 5 per cent. on share capital, £1,326 3s. 11d.; reserve fund (making with premiums on shares, £1,000), £302 4s. 7d.; bonus to shareholders and members on net purchases at 4d. per £, equal to over 30 per cent. on share capital, or from 1s. 9d. to 3s. 6d. per ton allowance on feeding stuffs and manures, £8,361 13s. 8d.; bonus to employees, £300; balance to general revenue account, £353 15s. 6d. The annual meeting of the association will be held at Salisbury to-morrow (Tuesday).

A well-known gamekeeper has discovered that Mustard, given to hens in the morning food, wonderfully stimulates their egg-laying capacity.

See "The Field," Feb. 6, 1906

Since then hundreds have tried the following plan with excellent results. For every six fowls take one teaspoonful of Colman's Mustard and mix with the dry meal prior to the addition of water.

The best Mustard for the purpose is

# Fertilisers and Feeding Stuffs.

## USEFUL INFORMATION FOR FARMERS WHEN BUYING.

### Approximate Unit Cost of Fertilising Constituents.

It is necessary for guidance in the economical use of fertilisers, and especially in the purchase of Complete and Special Manures that the relative unit cost of the principal fertilising constituents should be studied; the subjoined table affords information on the subject. By multiplying the guaranteed minimum percentages of a fertiliser by the unit costs given in the table, the buyer will get a good idea of the commercial value of any chemical manure offered to him. The unit values are subject to variations from time to time, and in this respect we shall endeavour to keep the table up to date, besides which, buyers living in remote districts may have to pay a little more for heavier cost of delivery. If credit is required, this will also add to the cost.

| Potash (pure) ...                                 | 4 0                 | 4 0          | 4 0                   | —                | —                    | —          | —                | —           | —                | 4 0              | 3 10    | 4 0                  | 3 10               |

N.B.—The above table is based on the commercial cost of the fertilising constituents. Agricultural value is not always synonymous with the commercial cost, and every farmer must exercise his judgment, while considering the cost, which fertiliser may be expected to give the most profitable return on his soil and for his crops. This is the cheapest manure for him.

### Approximate Unit Cost of the Nutritive Constituents in Feeding Cakes and Meals.

June, 1906.

**Cakes and other Feeding Stuffs.**—In order to be able to form a correct opinion of their value, it is necessary to know the relative cost of the different nutritive constituents. The following note, by an eminent authority, supplies this information. By reference to it, a farmer can calculate out the approximate commercial value of a cake or meal, and then use his judgment as to which is most suitable for his special requirements.

**NOTE.**—Most authorities in England are agreed that the value of each per cent. or unit of albuminoids and of oil is at least  $2\frac{1}{2}$  times that of 1 per cent. or unit carbhydrates. If, therefore, the percentages of albuminoids and oil in a feeding stuff be respectively multiplied by  $2\frac{1}{2}$  and added to the percentage of carbhydrates, the total feeding units contained in the article are obtained. The cost of the feeding stuff divided by this total of feeding units gives the price per unit. Example: A cotton cake contained

|  | Albuminoids ... | Oil or fat ... | Carbhydrates ... | Per cent. | Feeding units. |
|--|-----------------|----------------|------------------|-----------|----------------|
|  | ...             | ...            | ...              | 22.1      | 55.2           |
|  | ...             | ...            | ...              | 5.2       | 13.0           |
|  | ...             | ...            | ...              | 33.2      | 33.2           |
|  | ...             | ...            | ...              | 101.4     |                |

The price of the cake being £5 7s. 6d., the cost per feeding unit was just about 1s.

### Note to Regular Subscribers.

We may remind our readers that we are prepared to analyse free of cost for our regular subscribers, who are farmers, and not in trade as vendors of fertilisers or feeding stuffs, samples of minimum lots of 2 tons of either article, in cases where there is solid reason to suspect an attempt to defraud. The analyses are published, under a *nom de plume*, in the paper.

We are also willing to publish replies in these columns to inquiries relating to the quality and use of fertilisers and feeding stuffs.

### Fertilisers and Feeding Stuffs.

The spaces allotted in the Agricultural Hall for the display of samples is not of a character to tempt many exhibitors, but some well-known manufacturers availed themselves of the opportunity afforded by the show to meet their old customers and to attract new buyers.

As usual at this show the manufacturers of fertilisers from the Eastern Counties were well to the fore, and the samples of special barley fertilisers and other chemical manures displayed by Messrs. Joseph Eison and Co., of Ipswich, Messrs. Prentice, of Stowmarket, and Messrs. William Colchester and Co., of Ipswich, seemed to interest many of the visitors. Messrs. Edward Cook and Co., of London, also had an effective display.

Among the sellers of cakes and feeding stuffs, the exhibit of the Waterloo Cake Co. occupied a prominent position, and we noticed also that Messrs. Simmonds, Hunt and Co., and the well-known London Mark Lane brokers, Messrs. O'Brien and Butcher and Pincock Bros., also were among the exhibitors.

### Imports of Fertiliser Material during November.

|                                      | Tons   | tons   | tons   | tons   |
|--------------------------------------|--------|--------|--------|--------|
| Bones, whether burnt or not          | 3,177  | 4,699  | 14,876 | 10,268 |
| Guano                                | 2,928  | 276    | 18,448 | 2,458  |
| Nitrate of soda (cubic nitro).       | 3,266  | 7,883  | 45,115 | 52,275 |
| Phosphate of lime and rock phosphate | 44,013 | 34,814 | 76,129 | 65,602 |

### Wire Worm.

Wire-worms, the larvæ of click beetles or skip jacks, are probably the worst pest against which the farmer has to contend. They attack every kind of crop, cereal, roots, or grass land, and as they live for several years before developing into the quiescent pupa stage, their mischievous stage is of long duration. Various measures have been tried of exterminating the pest, but no successful means practicable on a large scale.

Bisulphide of carbon appears the most certain remedy, but it is too expensive to be used in ordinary farming practice. For market gardens and in horticulture it should certainly be tried in the following way:—Pour a quarter of an ounce of the bisulphide into a small hole made in the ground, and at once cover over with a piece of tile with earth on the top, care being taken not to let the chemical come into contact with the roots of any plants, as it is poisonous. The above quantity would be sufficient for a square yard. It should also be mentioned that the bisulphide is of a highly inflammable nature, so care must be taken in manipulating it; the use of pipes and matches should be avoided when handling it. This remedy is best applicable in the early spring.

In ordinary farming the farmers' best allies against the enemy are the birds—rooks, starlings, and especially peewees—which should be encouraged in every possible way.

Constant ploughing and cultivating the soil enables the birds to get at the insects, and heavy rolling of the young wheat crops has been found efficacious, as, by consolidating the soil, it prevents the wireworms from moving about in the soil.

Gas lime spread over the soil in the autumn is sometimes very useful. It should be left on the surface of the soil about a month or six weeks before being ploughed in.

Soot has a good effect, and besides keeping the pest in check has the further advantage of supplying ammonia to the soil. Seaweed, when easily obtainable, is useful, probably on account of the salt in it. Rape-cake dust is often employed, and it is believed by some farmers that the wireworms are so fond of it that they overfeed themselves until they burst. There is probably no foundation for this idea, but the wireworms eat it greedily, and

while doing so leave the young plants alone. In the end, however, the cake increases and develops the nuisance. When a young crop is badly infested, a dressing of nitrate of soda will help it to tide over the attack.

### Higher Prices of Fertiliser.

In the observations on Fertilisers and Feeding Stuffs in 1906 which appears in the MARK LANE EXPRESS ANNUAL just issued, attention is drawn to the advance in prices which have occurred during the year, especially in the case of nitrate of soda. The price of this important fertilising substance was £10 15s. per ton at the beginning of the year, and is now about £11 15s. Superphosphate and dissolved bones have also been advanced in price in consequence of the supply not being equal to the increasing demand all over the world. It is truly stated that in these times of intensive agriculture farmers cannot dispense with artificial fertilisers, and it is with equal truth added that in view of the higher prices, it is necessary to use fertilisers with great care and to make sure that good quality is obtained.

### Prices of Fertilisers.

As the season for the purchase of fertilisers is now at hand, we shall give weekly for the next few months the London prices of the principal articles.

|                                                     | £  | s. d. |
|-----------------------------------------------------|----|-------|
| Nitrate of soda ..... prompt delivery               | 11 | 12 0  |
| „ „ „ forward .....                                 | 12 | 2 6   |

| Muriate of potash .....                             | 9  | 0 0   |
| Basic slag, 30 per cent. (ex works, Mk-Lands) ..... | 1  | 13 0  |
| „ „ „ 40 per cent. ....                             | 2  | 3 0   |

### Relative Advantage of Nitrate of Soda and Sulphate of Ammonia.

During the coming fertiliser season, if nitrate of soda maintains, as is probable, its present high price, and sulphate of ammonia continues to be offered at the moderate price now quoted, there will be a disposition on the part of farmers to employ more largely the latter fertiliser, and to limit the use of nitrate as much as possible.

With crops requiring liberal dressings of nitrogen, such as cereals and mangolds, the best plan will probably be found to apply half the requisite nitrogen in the form of sulphate of ammonia at the time of sowing, and the other half as nitrate of soda, as a top-dressing if the young crop should appear to require the stimulant. If the season is a favourable one for the growth of the young plant, it may be possible to dispense altogether with the application of the nitrate.

But with turnips and swedes for which the quantity of nitrogen required, if any, is very small, it is scarcely practicable to divide the dressing, and therefore it will be better for the grower to use a bone compound which contains sufficient nitrogen combined with the soluble phosphate.

If he, however, prefers superphosphate with a separate nitrogenous fertiliser, he will have to consider whether it is not more advantageous, in view of the relative cost of the two fertilisers, to apply sulphate of ammonia. On this point attention may be directed to some experiments made by Mr. Patrick Wright, professor of agriculture in the West of Scotland Agricultural College. The nitrate of soda was applied at the rate of 1 cwt. per acre as a top-dressing after the plants had been thinned, while the sulphate of ammonia was applied in the drills along with the superphosphate just before the sowing of the seed, in quantity containing the same amount of nitrogen as was supplied in the 1 cwt. nitrate, which was approximately  $\frac{3}{4}$  cwt. sulphate of ammonia.

The average result of the three years was as follows:—

|                                                                                                              | Roots per Acre. | tous cwt. qr. |
|--------------------------------------------------------------------------------------------------------------|-----------------|---------------|
| 6 cwt. superphosphate.....                                                                                   | 19              | 9 0           |
| 6 cwt. superphosphate...<br>1 cwt. nitrate of soda...<br>6 cwt. superphosphate...<br>¾ cwt. sulphate ammonia | 20              | 5 0<br>2 3    |

When this average result is taken into account, it appears that nitrate of soda and sulphate of ammonia exercised an almost equal effect and produced very nearly the same increase of crop. If the returns of each year are examined separately, it is noticed that nitrate proved considerably better in one year, and that the advantage lay with the sulphate for the other two years. It is thus apparent that the comparative fertilising efficacy of the two forms of nitrogen varies each year according to the character of the season.

Thus it may be concluded that the application of  $\frac{3}{4}$  cwt. of sulphate of ammonia, applied in the drill, affords as good a chance of a satisfactory turnip crop as would be obtained from 1 cwt. nitrate of soda applied as a top dressing.

### Varieties of Oats.

In some experiments carried out in Scotland with the co-operation of the Department of Agriculture of the University of Aberdeen, the object was to afford guidance as to the most suitable variety to be cultivated in the locality of the Moray Firth, where oats of fine quality, much in demand for seeds and milling are grown. The table below shows the respective yields of grain:—

| Variety        | Total grain, bushel of 42 lb. | Dressed grain, bushels. | Percentage of light grain, per cent. |
|----------------|-------------------------------|-------------------------|--------------------------------------|
| Banner ...     | 88                            | 83                      | 5                                    |
| Goldfinger ... | 85½                           | 81                      | 5                                    |
| Siberian ...   | 81½                           | 79½                     | 4                                    |
| Newmarket ...  | 81½                           | 77½                     | 4                                    |
| Waverley ...   | 80½                           | 75½                     | 6                                    |
| Storm King ... | 76½                           | 72½                     | 5                                    |
| Potato ...     | 72                            | 68½                     | 12                                   |
| Sandy ...      | 63½                           | 50½                     | 19                                   |

Banner variety produced 32 bushels more of first quality grain than sandy and 20 bushels more than potato. The superiority of the "new" varieties, according to the report, is clear, and even better when the dressed grain only is considered. In other words, the new varieties yielded a larger proportion of good grain, as well as a heavier total yield.

The trials were carried on at a good many farms, and although the differences of the soil at the different farms had, apparently, little effect on the results as far as grain was concerned, it was not so with the straw, which showed striking variations.

In considering the combined yield of grain and straw, three points were apparent. (1) Potato variety produced the greatest weight of straw. (2) Siberian proved to be a good general variety, and the same may be said of Newmarket. (3) Banner, the best grain producer, was by no means the worst as regards straw.

The following is an estimate of the comparative total money yields, calculating the dressed grain at 18s. per quarter and the straw at 40s. per ton for feeding purposes:—

|                | £. | s. | d. |
|----------------|----|----|----|
| Goldfinger ... | 14 | 8  | 7  |
| Banner ...     | 13 | 8  | 4  |
| Newmarket ...  | 13 | 4  | 5  |
| Siberian ...   | 13 | 3  | 6  |
| Waverley ...   | 12 | 12 | 10 |
| Storm King ... | 12 | 8  | 10 |
| Potato ...     | 12 | 3  | 2  |
| Sandy ...      | 10 | 13 | 10 |

### Manures for Pasture Land.

Professor Gilchrist has recently issued Bulletin N8 of the Cocker Park Experimental Station, recording the results obtained in the series of years up to 1905, during which the experiments have been conducted.

The report deals with the complete results of the Tree Field experiments for the nine years 1897-1905, being the period for which Dr. Somerville's original scheme has been carried out. The soil is a poor, stiff clay lying on Boulder clay.

Basic Slag shows up wonderfully well all through the experiments. On plot 3 a dressing of 10 cwt. slag, costing 23s. 6d., has given an average annual gain of 22s. 3d. per acre over the whole period of nine years, a really excellent return for the single dressing. The greatest effect was shown in the third season after application.

It should be noted that when the quantity of 10 cwt., instead of being applied all at one dressing, was divided into two applications, half being given in 1897 and half in 1900, the result was not quite so favourable, being reduced to 18s. per acre.

Another important point which appears to have been demonstrated is that it is not judicious to increase the quantity applied beyond 10 cwt. per acre. An experiment was made with 15 cwt. per acre versus 10 cwt. for six years, the result being in favour of the lesser quantity, which gave an average increase of 96 lb. live-weight increase per acre against 80½ lb. for the 15 cwt. applied per acre.

This unexpected result, according to the report, may be partly accounted for by the fact that while 10 cwt. slag developed 20 per cent. of clover two years after its application, 15 cwt. increased it to over 35 per cent., but Yorkshire fog was developed to the extent of nearly 50 per cent. four years after the heavier dressing of slag, whereas it increased in the same time to less than 20 per cent. by the lighter dressing.

The summary of the full results is given as follows:—

The tables contain what is probably the best summary of these experiments. To endeavour to sum up such elaborate trials in a few paragraphs would be almost certain to give misleading information to the practical farmer who reads this report. The matter in bolder type has been condensed to as near as possible the limit within which a clear idea of the objects and results can be contained. The scientific reader will understand that the body of the report has been written for the practical farmer, with as little use as possible of scientific terms. An endeavour has been made to reduce all the tables to a convenient size, and to make each of them as complete for their own purposes as possible. In a few cases, however, the manures applied to the various plots are given on only one of a group of tables.

The following main points, however, stand out as general results of all these trials:

1. For improving the extensive areas of poor boulder clay pasture in Northumberland, the best start can be made with a dressing of 10 cwt. an acre of basic slag. A judicious combination of superphosphate and lime will probably have the same effect, but at a considerably greater cost. Other phosphatic manures than slag are all useful for this purpose, but are not so profitable. It is probable that this initial treatment may be effectually followed by dressings of 5 cwt. slag per acre about every three years, and the judicious feeding of cake to the grazing stock. (See 3.)

2. For poor old pasture on sandy soils slag may also be exceedingly effective, if a potash manure is also used.

3. The feeding of cake on poor pasture will probably prove a most effectual assistance to slag in effecting improvement. The larger amount of stock carried when cake is fed entails closer grazing, and aids greatly in the development of sweet clover herbage. When a pasture becomes rather coarse the removal of the rough herbage by mowing at the end of the season is most desirable.

4. Liming of pasture is an expensive operation, and the returns may be most disappointing. It is only under special circumstances that this is likely to be profitable.

5. Judicious applications of slag and dung have provided a remarkably good combination at Cocker Park for developing sweet clover herbage on thin land and pasture land. When dung is used, potash manure is not needed, even on sandy soil, and a nitrogenous manure should not be used. The results on plot 1 of Palace Leas show

the disastrous effects of using complete artificials in combination with dung.

6. It is hardly necessary to state that the now well known rules as to the times and methods of applying the dressings, the making certain of the quality of the manures and the judicious stocking of pasture and managing of hay land, must all be followed, if the best chances of success are to be secured.

### Soil Suitable for Lucerne.

The experimental section of Kansas Agricultural College have issued an instructive bulletin on the cultivation of lucerne. It would appear that lucerne will succeed on a variety of soils, grading from sandy to heavy clay, although with unfavourable soil conditions it becomes more difficult to establish a good stand. The crop, however does not thrive alike on all soils; perhaps a deep, fertile loam or clayey loam, well supplied with the mineral elements of plant food, is the most favourable soil for the plant. The crop needs a deep, well-drained soil; on wet land with water too near the surface lucerne will often produce poorly, and the plants roots of the lucerne will thrive on a soil deficient in lime, which shows an acid reaction. Some old lands, after years of cropping, have become deficient in humus and organic matter, and so deficient in lime that they will hardly produce lucerne successfully until the soil is fertilised by manuring and the acid condition is corrected by applications of lime and land plaster.

In order that lucerne may make a good stand and continue to produce large crops the land must be supplied with the nitrogen gathering bacteria which live on the roots of the lucerne plants and supply a part of the plant's food. Lands which have never grown lucerne may not contain these bacteria, and before the plant will grow well it is necessary to supply the bacteria by inoculating the new lands with soil from an old lucerne field. From 200 to 500 lb. of infected soil, carefully spread and mixed with the soil by cultivation before the lucerne is planted, is sufficient to inoculate the new land and infect most of the crop plants within a year or so after seeding.

The nitro-culture preparations for treating the seed before sowing, now manufactured and sold, also give good results when used carefully according to directions. The average farmer will secure better results by using the infected soil, when it can be secured at a reasonable cost, rather than to treat the seed with nitro-culture preparations.

In discussing the question of seed, it states that the first requisite in getting a stand of any crop is good seed. Not only should the seed be of good quality and strong in vitality and germination, but it should be clean and free from weed seeds. It seems hardly necessary to enlarge on this point, yet many farmers are careless, much poor seed is sold and sown, and many costly failures result. Lucerne seed costs so much, and the expense of a failure to get a stand is so great, that many farmers are discouraged by an unsuccessful trial, while others hesitate to make the venture. Those who are familiar with lucerne seed can usually recognise seed of low vitality. New seed of good quality has a characteristic bright, clear colour, while old seed or seed which has received injury from wetting has a dingy, dull, dead colour, indicating it is impaired vitality. Seed which is badly shrunken is also apt to contain a large percentage of seeds of low vitality which will not germinate and grow under ordinary soil conditions.

The only reliable way to determine the vitality of seed is to test its germination. This can be done in several ways. A simple and handy method is to use a cigar box; place several folds of wet paper in the bottom of the box, or it will sprinkle the seed, and cover with several folds of wet paper; close the box and set it in a warm place for five days and count the germinations, remoistening the paper if necessary. At the end of eight or ten days the test may be discontinued and the percentage of germination calculated. A large percentage of germination the first three to five days indicates a strong, vigorous seed, while a slow, weak germination indicates seed low in vitality, which may not germinate when planted except under the most favourable soil conditions. For the best test the percentage of germination should be set at 90 per cent. A low percentage of germination, and fairly quick and strong indications a mixture of good and poor seed, and such seed may be sown, but more seed will be required per acre to ensure a stand.

Carefully examine the seed for impurities, and if weed seeds are present the lucerne should be carefully cleaned before seeding. The parasite "dodder" is a most dangerous pest, and it is usually unsafe to sow seed infected with dodder, even after thorough cleaning; but dodder is only about one-third of the seed of lucerne seed, and by careful cleaning, using a "dodder" sieve, which will also remove many of the smaller lucerne seeds, the dodder may be removed, leaving only the choice, plump, clean, pure seed to sow.

# Is it better to supply Nitrogen to the Potato Crop as Nitrate of Soda, or in the Form of Sulphate of Ammonia?

The Potato crop is able to utilise with advantage a large supply of nitrogen, and it is generally considered that it is better to supply this ingredient in the form of guano or sulphate of ammonia than as nitrate of soda. To test the relative advantages of sulphate and nitrate the following trial was made in Lincolnshire by the Midland Agricultural and Dairy Institute:—

| Gr. No. of plot.                                                                                          | Difference in the Dressings. | Total yield per acre. Average of six centres. | Value of the excess over the manured plot. | Cost of the manures. | Profit per acre. |
|-----------------------------------------------------------------------------------------------------------|------------------------------|-----------------------------------------------|--------------------------------------------|----------------------|------------------|
| 2 cwt. of nitrate of soda along with phosphate and potash .....                                           | T. C.                        | S. D.                                         | S. D.                                      | S. D.                |                  |
| 6 Same amount of nitrogen as No. 5, supplied as sulphate of ammonia along with phosphate and potash ..... | 7 19½                        | 129 11                                        | 46 0                                       | 83 11                |                  |
|                                                                                                           | 8 1                          | 132 6                                         | 44 10                                      | 87 8                 |                  |

10 2 cwt. of nitrate of soda, together with a large dressing of phosphate and potash ... 7 17½ 127 8 66 6 61 2

11 Same Nitrogen as No. 10, part supplied as nitrate of soda, and part as sulphate of ammonia, with large dressing of phosphate and potash ... 8 5½ 113 9 65 3 78 6

Let Plots 5 and 6 be taken first for comparison. By substituting the 2 cwt. of nitrate of soda on Plot 5 by an equivalent amount of nitrogen as sulphate of ammonia on Plot 6 the profit per acre is increased 3s. 5d. Again, in Plot 11, where a portion of the nitrogen was supplied as sulphate of ammonia, the increase in the profit over Plot 11, where all the nitrogen was supplied as nitrate of soda, was 17s. 4d. Although the amounts of the various manures were different in Plots 5 and 6 from the amounts in Plots 10 and 11, the odds in the profits were in both cases decidedly in favour of sulphate of ammonia. Comparison of the plots brings out the fact that it is better to supply the whole, or better still

part, of the nitrogen to the potato crop in the form of sulphate of ammonia.

## Winter Spraying of Fruit Trees.

The winter spraying of fruit trees with caustic alkali wash has been found to be very effective. Mr. Theobald, the expert of the South-Eastern Agricultural College, recommends the process for two purposes:—(1) to remove moss, lichen, and rough bark from trees; (2) as a means of destroying the aerial form of woolly aphis, and the hibernating quarters of such insects as codling maggot, thrips, apple blossom weevil, sawflies, &c.

At one time it was thought to have an injurious effect upon the eggs of the apple-reeker, mussel scale, aphid, and red spider eggs, &c. It is now known not to affect them.

This wash need not be employed in an orchard every year, once in every three years will suffice.

It must only be used on dormant wood, and is best sprayed over the trees about the middle of February, and not later than the first week in March. As soon as the buds show signs of bursting it is too late to spray.

The two main constituents—namely, caustic soda, and carbonate of potash vary in strength. The former ranges from 60 to 98 per cent.; carbonate of potash from 40 to 85 per cent.

Experiments extending over some seven years have shown that the lower percentage is sufficient to make the wash effective.

THE

"BIBBY" CAKE

IN THE FORM OF

"CAKETTES."

"Send me two tons o' they nobbs same as Mr. Brown is a using," was the colloquial way in which a new customer gave us an order the other day through our Market Representative.

This buyer had often thought he would like to try the "Bibby" Cake, but he belonged to the old school of farmers who are not easily led along untrodden paths.

He had, the previous week, been paying a visit to his neighbour, Mr. Brown, who had often spoken favourably to him of our Cake, and on looking over his Stock and noting the extreme handiness of the "Cakettes" for Summer Feeding, he at last resolved to give us a trial order, and did so in the words just quoted.

It was doubtless the good condition of Mr. Brown's Cattle and the manifest handiness of the "Cakettes" which had finally broken down this buyer's conservatism; and now we have received a trial order we shall take good care to retain his business. Our method is a simple one: We put such value into all our Cakes and Meals as will insure the best results obtainable.

THIS IS THE TRUE SECRET

OF OUR SUCCESS.

It is, perhaps, hardly needful to point out in this place that the "Bibby" Cake is the most popular brand of Cake that has yet been made, and no other explanation but the one above mentioned will explain this fact.

It is not well, therefore, for buyers to be put off with a Cake which is offered as something "just as good"; it is much better to say to the Cake merchant: "I must have 'Bibby,' and will not take a substitute."

The "Bibby" Cake has steadily won its way to

THE PREMIER POSITION

IN THE PUBLIC FAVOUR.

and of all the Cakes on the market is admittedly the best. In the form of "Cakettes" it is also the handiest; there is this further to be said about it:—the more carefully it is tested against other competing Cakes, the more certainly and with increasing emphasis will be the reply to those who offer a substitute:—"I MUST HAVE 'BIBBY,' PLEASE; THAT IS THE CAKE I WANT, AND I WILL TAKE NO OTHER."

**A FARMERS' WEEK.**

Last week was one of exceptional interest to breeders and feeders of cattle, sheep, and pigs throughout the whole of the country. The Smithfield Club Show is dealt with at length elsewhere, but, in passing, we may say that in some respects it was not equal to past exhibitions, but as regards the attendance, it maintained the high position reached in the estimation of the public.

The Farmers' Club dinner, which took place on Tuesday, was responsible for a number of speeches from Members of Parliament and others interested in the world of agricultural politics. The pronouncement by Sir Edward Strachey, who was present as deputy for the Minister of Agriculture, unfortunately prevented by illness from being present, to the effect that the Government intended to maintain the barrier against Canadian cattle, was welcomed. It is satisfactory to find that the Government has made up its mind upon this question, for, after all, it is one which is essentially an agricultural one. Possibly this will allay, if not actually put a stop to, the movement on foot in

some of the boroughs which has for its purpose the removal of the embargo.

On Monday, Sir Gilbert Greenall, Bart., entertained the representatives of the Breed Societies of the country, together with other well-wishers of the Royal Agricultural Society. Our Breed Societies have come to the aid of the Royal Agricultural Society's Show at Lincoln in a remarkable manner, and it is doubtful whether a more complete and comprehensive schedule of prizes has ever been placed before breeders of stock. It is expected that the Royal Show at Lincoln in June next will be of a remarkably successful character. That the classes of live stock will be representative is already assured, and, judging from the enthusiasm in Lincolnshire, the financial result of the show is already assured.

The annual meeting of the Royal Agricultural Society was held on Wednesday, when the yearly report of the council was submitted to members. This document disclosed no particular points of importance, and the very complete success of the show at Derby effectually disposed of criticism. Lord Yarborough was elected president for 1907, when it is expected that the Royal Show at Lincoln will meet with as great an amount of success as at Derby.

Other societies which have held meetings during the week are almost countless, practically all of the principal bodies taking advantage of their members' presence in London. Of these a great many will be found recorded in our columns, although, in consequence of our lengthy report of the Smithfield Show, some will not appear until our next issue.

**THE BLOCK TEST.**

The great national fat-stock shows of the season, which commenced at Norwich and afterwards had their annual festivals at Birmingham and Edinburgh, to be still more grandly displayed at the Smithfield Club Carnival, have brought under the public eye the first-fruits of the grazing industry.

Now, all but some of the younger steers, whose lives are prolonged that they may be

shown again, are doomed for slaughtering. Melancholy is the thought that these animals which appeared so beautiful in life are being doomed to death that their carcasses may make another grand display in butchers' shops and their best joints afterwards become roasts for Christmas tables. This is the fate at least of those which won the principal prizes, the fate of others being very various, and, as a rule, not very profitable to their graziers. Butchers who buy the beasts or sheep over-fattened for show purposes usually expect to lose money by them, which they debit to advertisement account; but those who do this look out for the animals which have distinguished themselves, or those which belonged to Royalty.

Not only will a great many people go long distances and put themselves to great pains and penalties to catch sight of the king or a prince of the blood, but eagerly crave for the smallest cut of beef or a bit of the fattest mutton from an animal of one of the Royal herds. Butchers know this perfectly well, and consequently only offer high prices for such animals, the joints of which will have a fancy value in the eyes of the public when exposed on their stalls.

But there are many misfits in grazing yearling steers thought to be likely animals to pay for another year's feeding. The block tests of last year proved that those which had the marbled beef in most notable appearance were not often those which had won the highest prizes, but usually the commended ones, or those which had remained unnoticed in the competition of the animals alive. In fact, the majority of two-year steers fed for show are over-larded with fat to such a degree that butchers could not afford to give high prices for them unless they had a fancy value such as above mentioned to cause consumers to seek after their meat.

When the carcass classes were established it was stated by the London butchers and their organs that they would prove educational object-lessons to show graziers the kinds of animals the Knights of the Cleaver like best. None of the animals which appear in them are fattened to anything like the high degree those

in the old ordinary classes are, and much smaller and lesser weight animals were entered for this year's competition. So far as can be seen, the carcass classes have not affected the old legitimate show classes one whit.

Consequently, if it leads London butchers to buy these results of the block test instead of going to Deptford for foreign dead meat, home graziers will be well satisfied. But these carcass classes have a sphere of their own, and would seem to have not the slightest connection with the older fat stock displays for

Christmas, nor in all probability will they ever have that destiny. Ever since Royalty made it fashionable to fatten for the big Christmas shows the lists of exhibitors have been filled with titled names. This tends to the advantage of many a tenant-farmer breeder, whose yearling steers are readily purchased by those notables who desire to follow the King's lead. Some turn out highly successful, others the reverse, but all have to go to the shambles at the end of their second show season if not earlier, and the block test reveals their true utility.

## Notes of the Week.

The Smithfield Fat Stock Show has come and gone once more. The event of the show this year has been the great success of the King.

His Majesty's good fortune is welcomed heartily by everyone, as he may be said to be the most popular farmer in the British dominions.

"Oh, what a surprise" was felt by one inquisitive individual who, when examining one of the King's Highland heifers, received a knock down blow from the hind legs of the animal, and was sent sprawling on the ground.

The young lady artist working in the centre avenue was a great attraction. She accomplished the difficult task of doing two things at one time, for while she was drawing the animal, she was also drawing an admiring circle round her.

The annual dinner of the Farmers' Club and the Central and Associated Chambers of Agriculture, which took place last Tuesday at the Trocadero Restaurant, was a most enjoyable function.

From North and South and East and West, farmers were gathered together round the festive board for social intercourse and to become better acquainted with one another.

Great sympathy was felt for Lord Carrington, compelled, by his doctor's orders, to be absent.

His place was ally occupied by Sir Edward Strachey, and it was pleasant to see by his side the late President of the Board of Agriculture, the Right Hon. Ailwyn E. Fellows.

The honour of proposing the toast of the evening, "Success to Agriculture," was assigned to Mr. Fellows, who acquitted himself of the task right manfully.

Sir Edward Strachey, in the course of his response, made a couple of welcome announcements. It is the intention of the Government, said he, to introduce a Bill at an early date for the purpose of stopping fraudulent competition with pure butter.

This promise was received with applause, as well as his assertion that the Government was determined to maintain the attitude taken by their predecessors upon the question of importations of live stock.

The Right Hon. Henry Chaplin proposed success to the Farmers' Club and the Chambers of Agriculture. On rising he was accorded a great ovation. The hearts of the audience evidently went out to the veteran agricultural statesman.

His speech was extremely interesting, partly historical, partly personal, and tinged in some passages with a political tendency.

This gave rise to the sensation of the evening. Mr. Oscar Bowen, chairman of the Warwickshire Chamber of Agriculture, rose and appealed to the chairman on a point of order.

He evidently took exception to some of the remarks of the right hon. speaker, and was understood to say, "this is degenerating into a political meeting."

The protest, however, did not meet with the views of many of those present, and finally Mr. Bowen left the room. It was an unfortunate and regrettable incident.

The predominating note of several of the speakers was the necessity of more combination among all those who gain a living from the land.

Farmers' Clubs and Chambers of Agriculture do much good in promoting agriculture, and are very properly kept free from politics.

But farmers want something more; political union, free from party, and constituted with the sole purpose of promoting agricultural interests, is necessary.

Then, and not till then, will farmers in this country make their power felt and be able to enforce respect for their legitimate rights and necessary legislation.

We should not omit to mention the happy little speech of Mr. Cornwallis, President of the Royal Agricultural Society of England.

Alluding to the improved position of the Royal, and the advantage of publicity to attract public attention to it, he said—

There's no good in "Early to bed and early to rise"  
Unless at the same time you "advertise."

Lord Carrington's "at home" at the offices of the Board of Agriculture proved a great success. The visitors were numerous, and such an informal exchange of views cannot fail to be helpful to all concerned.

We are pleased to see that the noble Lord was in his place in the House of Lords on Thursday evening to pilot the Land Tenure Bill through the House.

England expects that the Board of Agriculture will do its (mil-) dewty to repulse from our shores the insidious pest.

Mr. Haldane, the Minister for War, is carrying out experiments to provide our troops with different ammunition. He might try the effect of British-bred beef on the troops. It would do them more good.

Last week 12,747 tins of preserved food were condemned at one time; we understand it was afterwards bought by a chemical manure manufacturer. That is the only purpose it is fit for.

The Prussian Chamber of Agriculture have passed a resolution urging their Government to permit the importation of Chinese labourers to work on German farms!

In promoting Irish interests the Irish M.P.'s set the English members an example. They do not mind making themselves a nuisance, and they advance the interests entrusted to their care.

The indefatigable Mr. Yerburch was re-elected president of the Agricultural Organisation Society at their annual meeting held on the 11th. With all respect, we may say that the society knows how to beat the big "drum," and it is now considering whether it cannot have an official "organ" to assist in forwarding the movement.

Wife: "Was that man over a farmer?"  
Husband: "No." Wife: "But he's always talking about the delights of living in the country." Husband: "Exactly. That's what shows he never was a farmer."

The report presented at the annual meeting of the Scottish National Fat Stock Club mentioned that the accounts were in a satisfactory state. The balance at the credit of the club, exclusive of outstanding annual subscriptions valued at £50, was £206 2s. 3d. The members on the roll numbered 683 at September last, as against 686 at September, 1905. The chairman remarked that the report was satisfactory, and the show continued to prosper. It was agreed that next year's show be held on December 4 and 5, 1907, which is the week before the Smithfield Show, it having been fixed for December 9 to 13.

## THE FARMERS' DIARY.

**TUESDAY, DECEMBER 18.**—Grantham Stock Fair—Macclesfield Horse and Cattle Fair—Carmarthen Fair—Thirsk Cattle and Sheep Fair.

**WEDNESDAY, DECEMBER 19.**—Basingstoke Great Fat Stock Sale—Bedford Cattle Fair—Hereford Horse Fair—Malmesbury Cattle and Sheep Fair—York Agricultural Fair—Live Poultry; Hereford Great Market.

**THURSDAY, DECEMBER 20.**—Cheltenham Agricultural Fair—Kettering Cattle and Sheep Fair—Chester Horse Fair—Special Horse Sale, York, first day.

**FRIDAY, DECEMBER 21.**—Yeovil Live Stock Sale—Special Horse Sale, York, second day—Nottingham Horse Fair—Penrhyn Cattle Fair—Dressed Poultry; Hereford Great Market.

**SATURDAY, DECEMBER 22.**—Newport Pagnell Fair—Brecon Asylum: Farms and Dairy Tenders to be sent in—Dressed Poultry: Wolverhampton Great Market.

**MONDAY, DECEMBER 24.**—Christmas Eve—Mark Lane, the Baltic, and the Term Market Closed—Newtown Agricultural Fair—Pickering Cattle, Sheep, and Pig Fair—Newcastle Special Cattle Market (transferred from the Tuesday).

**TUESDAY, DECEMBER 25.**—Christmas Day. All English markets closed.

### A Pure Milk Supply.

On the 5th inst. Sir Edward Strachey, M.P., received at the Board of Agriculture, on behalf of Earl Carrington, who was unable to be present, a deputation from the Royal Institute of Public Health, who urged the carrying out of a variety of precautions recommended by their committee, which was appointed to consider the best means to ensure a clean milk supply to the consumer.

Sir E. Strachey, in reply, said that the Board of Agriculture was anxious that every possible precaution should be taken to protect the public and to secure a pure supply of milk. At the same time they were anxious that nothing unreasonable should be done to hamper an industry which was not in an altogether prosperous condition. What was wanted was a Public Health Act Amendment Bill on the lines of the Scotch Act of 1897. As regarded contagious diseases contributed to milk by human beings or transmitted by cows, agriculturists generally would welcome the most stringent precautions, as it was to their interests that the demand should be maintained and increased. The whole of the questions raised would be carefully considered. The Board was anxious to do everything necessary to encourage agriculturists, and at the same time to protect the public.

### Imports of Agricultural Produce.

The following account issued yesterday shows the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week which ended last Saturday. The quantities in the corresponding week of last year are given in parentheses—

Animals, living:—Oxen, bulls, cows, and calves (10,731), 11,740; sheep and lambs (1,931), 927; horses (176), 219.

Fresh meat:—Beef (100,826 cwt.), 106,775; mutton (69,563), 92,905; pork (14,866), 14,397.

Salted or preserved meat:—Bacon (110,344 cwt.), 99,905; beef (2,302), 1,015; hams (24,090), 20,546; pork (1,809), 1,989; meat, salted or fresh (14,482), 11,823; meat, preserved (30,482), 3,134.

Dairy produce and substitutes:—Butter (76,100 cwt.), 73,789; margarine (23,470), 19,265; cheese (47,943), 32,841; milk, fresh (4), nil; cream (89), 104; condensed (17,267), 11,855; preserved (323), 591.

Eggs (great hundreds):—(449,482), 372,005; poultry (value £14,654), £14,546; game (value £2,261), £1,567; rabbits, dead, not tinned (21,025 cwt.), 4,421; lard (49,022 cwt.), 43,492.

Corn, grain, meal, and flour:—Wheat (1,516,100 cwt.), 1,636,100; wheat meal and flour (367,600), 321,000; barley (593,400), 318,000; oats (389,900), 209,900; peas (26,830), 29,740; beans (5,020), 10,890; maize or Indian corn (313,800), 849,500.

Fruit, Raw:—Apples (133,860 cwt.), 130,450; pears (5,290), 2,042.

Hay (2,073 tons), 2,209; straw (1,345), 482; moss litter (1,793), 1,514; hops (8,997 cwt.), 9,153; locust beans (39,800), 11,778.

Vegetables, raw:—Onions (168,110 bushels), 186,391; potatoes (29,030 cwt.), 33,075; tomatoes (9,488), 4,165.

The Elenchum Sparrow Club, of which Sir Walter Gilbey is president, has closed its record for the season with 2,400 sparrows killed, making 47,266 destroyed in the sixteen years of the club's existence. The members have decided to raise standard of killing from one bird to one and a-half birds per acre.

# CATTLE.

## Notes and Jottings.

THE Christmas season, as regards its fat stock shows and markets, has been so far (and the events named are now nearly over) attended by very satisfactory results. A glance at the various first prizes gives us the very satisfactory result of a Shorthorn winning the championships of both the Birmingham and Smithfield shows, and this result is the more gratifying because this Shorthorn carries very considerable weight alive, and will, if appearances and handling go for anything, be a fair representative of a fat show animal when dressed, as he seems likely not only to yield a heavy dressed percentage, but he should cut without an excess of fat beyond what is inevitable with high-pressure feeding carried to such an extent.

THEN another cause for satisfaction is the fact that most of the other breeds and crosses came very near to the championship. In the contest for supremacy at Islington when the best beast in the hall under two years old was sought for, a very fine Devon succeeded in getting the reserve, and was a very close runner-up of the winner. When the best female was being sought for, a cross-bred heifer was the chief opponent of an Aberdeen-Angus that had championed all breeds of the Edinburgh show. So that cross-breeds, Shorthorns, Aberdeen-Angus, and North Devons all shared in the championships of the great Smithfield meeting. Some of our breeds are not show cattle in the sense in which a good deal of showing is now followed, nevertheless, these said breeds are more or less prohibited as practical cattle.

THE tendency to day with many judges in the fat-stock rings is to set symmetry right away before any other property, and this has not proved itself to be the correct theory. Small, symmetrical cattle almost invariably give detestable results when killed, being simply rolls of fat. The question of live-weight undoubtedly ought to enter much more largely than it does into the making up of the awards in these classes. Watching closely the proceedings of a good judge at one of these shows, we noticed that when he had arranged according to the eye and the hand, or, as it is more generally called, by inspection, before marking off the honours, asked for the weight of each animal, and one or two changes were made in the position in consequence.

A LIMIT as to this weight should be set forward in the conditions of each class scaling the limit according to breed and age, just as is done, and has been done for some years past, in the small breed classes, except that in the case of the bigger kinds the wording should be "not under so much live weight" instead of as is the case with the small breeds "not to exceed so much live weight." Some such arrangement as the above would tend very much to keep our breeds of cattle up to a much more profitable standard to the producer, and would give in many cases much more edible meat to the consumer, for, as already intimated, a small animal fed thoroughly ripe in nine cases out of ten kills far too fat for the average of families.

COMING to the breeds that prove themselves practically good and profitable, but fail to reach the showyard standard as set by some of the more generally shown breeds when in open competition, the Welsh and Sussex breeds have had for years to endure rather hard lines. Welsh cattle at Smithfield last week were a very large show numerically, and some very fine shaped and truly bred specimens were seen in the ranks, whilst their weight was also most encouraging to the breeder, yet the best of this breed were quickly dismissed from the competition for the open championships. In proof, too, of the great practical value of these cattle, London and other butchers were very anxious purchasers as soon as the show was opened to them.

LIKE the Welsh the Sussex breed also gave very good weights, and these cattle make excellent feeding beasts for the general market, yet in the pen championships they seldom remain long in the ring. A little plain generally in their build, they fail to fill the eye like the more symmetrical breeds that have so long held sway over the champion prizes, for the great honours have for several years past been practically left in the hands of the Shorthorns, Herefords, Aberdeen-Angus, and Crosses. At one time of day the North Devon breed were frequent winners of the higher honours, but latterly they too appear to have been left behind in the champion races, though we must say it has many times appeared as though their outside position was due to the judging more than to the lack of qualification.

THE Galloway and West Highland breeds and also the small cattle have upon several occasions during recent years brought out specimens that were well worthy champion honours, yet, like the Devons for some reason or other, their supporters have failed to get them at the top. The award of the champion prizes at the leading shows where all breeds are concerned has ever been beset with difficulties, and as years go on there does not appear any likelihood of such difficulties being removed. Whether the whole bunch of judges acting in concert and giving in their votes by ballot as to the champions would have the effect of giving greater satisfaction, or whether another change could be made that would remedy the system is hard to say.

THE system we would rather suggest would be that of giving the champion honours to be competed for one year by the first breeds mentioned as being so continually successful, and alternate years to the other breeds, excluding these greater favourites. Years ago the awarding of the first Challenger Plate of the Dublin spring show, which was generally done by voting from the whole bunch of some ten or eleven judges, was attended with anything but satisfying results, the ring in those days usually voting in the smart tact and diplomacy displayed by some one or two judges over the rest of the community, and these smart men were frequently influenced very considerably by breed prejudices rather than by actual discussion of the merits of the individual animals.

TRADE in the fat-stock markets generally, as well as in the shows, has been fairly brisk, and few exhibitors have had cause to complain of the prices realised, though it may fairly be said without contradiction that there is not a solitary instance in which an animal of the highest section has been profitable, that is, paid for feeding. This, however, is not and ought not to be expected, feeding of these cattle up to show condition is intended, or it appears to be so, to let the public see to what a pitch of weight and quality the animals can be raised, so that those who wish to be educated in the results of the different breeds may assume that the one that has given best results under high pressure would give correspondingly better results with ordinary feeding, that is, feeding for profit and commerce.

THAT the show season is likely to continue in as great perfection in the future as it has done in the past appears highly probable indeed. There has probably never before been so much energy displayed in searching for and purchasing young animals for exhibition purposes as has been the case during the last month, and the prices

HEREFORD HEIFER, CAMILLA.

The Hereford Heifer, Camilla, owned and bred by H.M. The King, at Windsor, was Reserve for the Bred Cup, and First in the Class for Hereford Heifers not exceeding 3 years old, at the Smithfield Show. She is 2 years 10 months 4 days old, and weighs 15 cwt. 1 qr. 20 lbs. Her sire was Earlsfield 19387, dam Cherry Blossom, sire of dam Bourton 11005.

## THE 'INKOOS' MILL

Designed  
and  
Constructed  
in 1895.

Has taken **FIRST PRIZE** wherever entered in competition, defeating the Leading Makers of England and the Continent.

The Plates are Reversible, are More Durable, and Grind Finer than any other Plates on the Market.

Send for Lists and Samples to the Makers—  
**E. R. & F. TURNER, LTD.**  
(147) IPSWICH.

## FIELD GATES.

**BEST RED DEAL THROUGHOUT.**  
In Lots of Six, at 8/6 each, delivered.  
" 12 8/3  
" 24 8/-

If with English Oak-head and Artree, 2/- each extra.

CRESOTED FENCING OF EVERY DESCRIPTION  
**PATRICK'S PATENT GATE HANGINGS**  
IN MALLEABLE IRON AT 5/- PER SET.

Field and Entrance Gate Catalogues free.

**PETER PATRICK & SON,**  
**OTLEY, YORKS.**  
Contractors to the Yorkshire Agricultural Society.

## JOHN TISDALL, Practical Gun Maker,

8, SOUTH ST.,  
CHICHESTER  
AND  
High St., Arundel.

Manufacturer of best and medium quality hammer and hammerless Guns, maker of the celebrated Chichester Cartridge, loaded with any kind of nitro powder to order, at 8/6 per 100. Carriage pad on orders of 1,000 to any Railway Station in England and Wales. Repairs a speciality.

## AUCTION SALES.

Auctioneers will favour us by sending in their advertisements as early in the week as possible.  
Charges for announcements under this heading, Six Shillings an inch.

By **HENRY DUKE & SON.**

Notice of an important Two-Days' Auction Sale at ANSTY FARM, HILTON, DORSET (eight miles from Blandford and ten from Dorchester), comprising 150 CROSS-BRED DAIRY COWS (being three distinct Herds), a DORSET DOWN FLOCK of 600 BREEDING EWES and EWE TEES, Teams of Cart Horses, several Hunters, 100 Pigs, and Farm Implements.

**M**ESSRS. HENRY DUKE & SON (by instructions from the Trustees of the late Mr. J. P. Norton) beg to give notice of SALE by AUCTION on THURSDAY, DECEMBER 20, and following day.

Catalogues of the Auctioneers, Dorchester, Dorset.

paid for young steers and heifers of promise have been such as to leave these quite clear of loss, but then they are not quite the finished article. The art of feeding and exhibiting fat show cattle possesses a fascination that is not easily set aside, and there is another point to mention whilst upon this subject—viz., how the fascination coupled with the difficulty of purchasing suitable subjects, has tended to cause greater attention to be paid to the breeding of first-class.

**F**ROM this latter argument it must be inferred that the fat stock shows have had as great and beneficial influence upon the breeding of cattle, or more properly, the improved breeding of cattle, as have the breeding classes at our great exhibitions. The catalogues at all the shows this year strike one as being very much fuller of entries where the very gratifying words "bred by exhibitor" appear than has been the case before. If this is so, then there is further cause to hope that the show system, as regards its Christmas shows of fat stock, will continue to be carried on with the same enthusiasm and energy in the future as has been the case in the past, and all sections of the stock-breeding community will benefit thereby.

**W**E cannot conclude these notes, which have some especial reference to the Christmas shows, without pointing out the great successes achieved by the Royal herds, a circumstance that every breeder of livestock the world over ought to be thankful for, as by no other means could our splendid breeds of cattle be put before the world with so great effect and benefit to British breeders. H.M. the King has certainly been most successful, and the awards have passed without question in nearly every instance, so fairly were the animals worthy of their distinctions. Shorthorns, Herefords, and Devons were very prominent, whilst Highlanders and Aberdeen-Angus also shared in the spoil, and another notable case was the Angus bullock bred by his Majesty and exhibited by Captain Townshend, which was placed at the head of his class in Birmingham and third at Smithfield, all these fine animals bred in the Royal herd have but the one important lesson to teach us—namely, that if breeding is carried on with skill its results are certain.

### Sale of the King's Fat Stock.

A large consignment of fat stock belonging to H.M. the King, comprising 31 Devon and Hereford bullocks and heifers, 220 sheep, and 83 bacon hogs and porkers, bred and fed at the Royal Farms, Windsor, was included in Messrs. Buckland and Sons' Christmas sale at Slough on Tuesday. A large attendance of buyers was present from all parts of the kingdom, many of whom were anxious to purchase attractions for their Christmas stock. The pigs were disposed of first, the 83 animals realising a total of £485 9s. 6d., an average of £5 17s. each, the highest price for a single pig being £12, given by Mr. Waseley of Aldershot. The King's bullocks made a total of £1,166, an average of £35 6s. 8d. per beast. Mr. Willis, Sheffield, gave the highest price of £45 for a single beast, and Mr. Waseley of Aldershot, two at £43 each. The sheep realised a total of £935 7s. 6d., the average price per sheep being £3 5s. 10d.; the highest price was £5 for a Hampshire. The total sum realised for the King's stock was £2,586 17s.

In the show classes connected with Messrs. Buckland and Sons' sale, for which prizes were offered by the Duke of Leeds, Lord Desborough, Lieutenant-Colonel Davis, the Eton College Beagles, and others, a black ox, from Mr. R. W. Hudson, of Great Marlow, secured the champion prize presented by the auctioneers, and was sold for £47, the highest price in the sale, and a Devon ox, shown by Mr. Jason Wilsin, of Hayes, won the prize given to tenant farmers, and was sold for £35. High prices were also realised in the general show and sale, the prize-winning exhibits being principally sought after, for which there was a keen competition among the buyers. The total day's sale realised, including the King's stock:—Pigs, £1,749 5s.; sheep, £2,764 2s.; calves, £153; beasts, £5,518 15s.; making a total of £10,185 2s.

### Gooseberry Mildew in Worcestershire.

—On Monday's meeting of the Worcestershire County Council, the Agricultural Committee reported an outbreak of American gooseberry mildew at two places in Worcestershire—one a nursery—and also reported that the Board of Agriculture expert believed the outbreak was not confined to one nursery. It was decided to petition the Board of Agriculture to take steps to obtain powers to deal with diseases of plants such as existed in the cases of diseased animals, and to prevent the importation of the plant. It was further decided to carry out the inspection of nurseries and gardens in the county to detect any further cases.

## PIGS.

### Tuberculous Pigs at Birmingham.

In the House of Commons last week, Mr. French, the Nationalist member for South Wexford, asked the President of the Local Government Board whether he is aware that the value of pigs seized and destroyed weekly in Birmingham for tuberculosis has been estimated at £100, and that it has been admitted by the town clerk of Birmingham that the approximate value of pigs destroyed each week for the four weeks ended November 17 was £31 18s.; and whether he will take steps to have those dealers recompensed whose pigs have been destroyed in the interests of the public.

Mr. John Burns (President of the Local Government Board) said he was not aware of any authority for the first statement. Its accuracy was denied by the Town Clerk on behalf of the Corporation. He was informed that the value of pigs destroyed for the four weeks ended Nov. 17 was as stated, but that the number was considerably above the average of the year. He had no authority to cause the dealers to be recompensed. Mr. Burns added that he hoped by means of a Bill he had before the House to ensure that these pigs were not sold as food for human consumption.

### Contagious Diseases of Animals.

Summary of Returns issued by the Board of Agriculture for the week ending Dec. 11, 1906:—

|  | Swine Fever. | Swine Slaughtered as Diseased or Exposed to Infection. |       | Outbreaks. | Sheep Scab. | Outbreaks Reported. | Rabbits. Cases Confirmed. | Other Animals. |       | Glanders (including Farcy). | Animals Attacked. | Outbreaks. | Foot-and-Mouth Disease. | Animals Attacked. | Outbreaks. | Anthrax. | Animals Attacked. | Outbreaks. | Period.                        |
|--|--------------|--------------------------------------------------------|-------|------------|-------------|---------------------|---------------------------|----------------|-------|-----------------------------|-------------------|------------|-------------------------|-------------------|------------|----------|-------------------|------------|--------------------------------|
|  |              | No.                                                    | 100   |            | No.         |                     | No.                       | No.            | No.   |                             |                   |            |                         |                   |            |          |                   |            |                                |
|  |              | No.                                                    | 100   |            | No.         |                     | No.                       | No.            | No.   | No.                         |                   |            | No.                     |                   |            | No.      |                   |            |                                |
|  |              | 25                                                     | 35    |            | 22          | 25                  | 25                        | 25             | 25    | 16                          | 20                | 16         | No.                     | No.               |            | 12       | 16                |            | Dec-ember 8, 1906              |
|  |              | 35                                                     | 35    |            | 25          | 35                  | 25                        | 25             | 25    | 18                          | 22                | 18         | No.                     | No.               |            | 26       | 26                |            | Correspond- ing week-          |

NOTE.—The figures for the current year are approximate only.

**A**t the annual meeting of the Poulton-le-Fylde and District Agricultural Society it was decided to hold the next show on August 14, 1907, at Poulton-le-Fylde.

The Prescot Agricultural Society, according to the annual report just issued, sustained a loss of £9 2s. 2d., on their show this year, this small deficit being entirely owing to the inclement weather on the day of the show, the receipts from the gate and stands being only £233 5s. 3d., as against £409 19s. in 1905. In all other respects the exhibition was the best yet held by the society, the number of entries exceeding the previous year by 163, and the amount received from entry fees being £34 2s. 6d. in excess of last year, which was the largest amount received in any one year up to that time; the increase exactly corresponding with the additional prize-money paid this year. The committee having invited a portion of the Society's funds in the Mersey Docks and Harbour Board, the interest received from such investment and the bank has amounted to £16 10s. 2d., as against £4 1s. 8d. received from the bank in 1905. The subscriptions received also show a slight increase, and the committee thank subscribers for their support, and trust that by their help in the future the exhibition will continue to maintain the reputation it now enjoys.

### Notes and Jottings.

THE meat show at the Cattle Show was a fine exhibition, in which the mutton section was very commendable. A few carcasses were fatter than one desires to see them, but the freshness of the meat showed that the feeding had been skilfully managed, as ill-feeding would have been noticeable in such a climate or atmosphere as that to which it was subjected, though it must be admitted that there was a freshness in the air of the carcass hall that compared favourably with that in other parts of the building.

THE Suffolks added to their laurels by again taking the championship of the carcasses, more noticeable because it was secured by a lamb.

breed shows so much difference in this respect, and the type of head is indicative of much that is reflected in the meat and wool. It is suggestive that the future of the breed is to be made in the direction of wool improvement rather than meat improvement, which may be instigated by the increasing demand the breed has acquired for transportation to the wool-growing countries.

INTER breed competitions offer anomalies, and though the perfection of the pen of Down which won the championship of the breeds rendered them almost unbeatable, still the size and quality of the Hampshire Downs which were placed next to them must have found many supporters to their claim for the first position. The reversion of position of the two animals, which came up top in the competition for the cattle championship at Norwich, where quality or perfection of points superseded the daily increase in weight, to find the judges at Smithfield placing the greater value on weight; and the sheep championship going to the lighter weight in the case of sheep, suggests that there is very considerable lottery in fat stock competitions. It has always been somewhat a mystery to us that quality should be judged on perfection of appearance on the lines of breeding animals rather than of profitable meat. Feeding to perfection is often regarded as fattening to a point which shall obliterate faults in make; and provided this has been suc-

cessful, the breed is good. During the last few months we have spent a considerable time in these countries in districts with which we were familiar a few years ago, when it was quite exceptional to meet with them; whereas now, provided the pasturage is good, one constantly meets with them, keeping up their character very closely as pure breeds, or doing well crossed with native stocks. Breeders in these far lying districts are little affected by the higher priced animals which the wealthy foreigner is able to secure, but they can get a well bred animal for a comparatively small sum, and there is no doubt that the mutton output has been improved, both in quality and quantity.

### The Sheep Dipping Orders: Yorkshire Breeders' Difficulties.

Mr. J. T. Hedley, of Gnosmoth, Yorkshire, secretary of the Blackfaced Sheep Breeders' Association, has sent to the President of the Board of Agriculture a resolution passed by the association condemning the Compulsory Sheep Dipping Order. In an accompanying letter of protest Mr. Hedley draws attention, on behalf of the association, to the difficulties which sheep-breeders on the North Yorkshire moors experienced in carrying out the Order.

In the district covered by the association, he says, there is a kind of stray for sheep attached to every farm, and the Marks Book of the association contains the record marks of sheep on about 500 different farms, the moors or common extending from near Scarborough nearly to Northallerton, without a fence.

It is, says Mr. Hedley, well known that, though the sheep are kept as much as possible on the common allotted to each particular farm, there are, and always have been, sheep in every flock of wandering propensities. Some may be on their own common six days, and not the seventh, or may be at home one day and away for months. There are also so many that may be on the common to-day, and are never seen or heard of more—at least by their rightful owner.

The wandering sheep just make compulsory dipping impossible—at any rate under the present regulations. The origin of the greatest number of sheep scab outbreaks may be traced to the roughest and most inaccessible hills in England and Scotland—places where the sheep, endowed with a wonderful amount of cunning, managed to elude the most careful shepherd and the cleverest dogs. Odd sheep are missed when gathering, and the hill having been infected with scab previously, these sheep keep the contagion going.

While away out on the hill some old ewe may be lying in shelter or in shade lazily chewing her cud, her eyes half shut, innocently defying the legion of shepherds' dogs, "persons appointed," and the whole machinery of the Board of Agriculture and Fisheries, backed up by all the might of what stands for the time being as the Government of the British Empire. It would be quite an easy matter dipping that old ewe, if only you had her at the tub.

It is also quite an easy matter for farmers of enclosed land to dip their sheep, and be in favour of compulsory dipping for the whole British Isles. It would also be probably no great hardship on these farmers holding half a score of grazing farms to buy £20 worth of approved dip and send it out to their shepherds with orders to get the sheep dipped without delay. It is those who have the carrying out of the Order who, without exception as far as I know, condemn it as an unmitigated nuisance.

Mr. Hedley adds that there have only been three cases of sheep scab on these moors in forty years. Government, he says, did not invent dipping; it has been regularly carried out by stockmen for over half a century; it is against what are considered to be the impracticable conditions of the Order that his association protests.

### Sheep Breeding and Rearing.

An interesting paper on "Sheep Breeding and Rearing" was read by Mr. J. A. Preece, Thrapston, the well-known breeder and exhibitor, at a recent meeting of the Hunts Chamber of Agriculture. His remarks applied more particularly to half-bred sheep, and for the purpose of his illustration he took a farmer starting at Michaelmas with a mixed flock of 200 ewes picked up at various sales, such a one as he had when he commenced farming thirty years ago.

Although a farmer might have been obliged to purchase ewes he did not altogether like, yet, said Mr. Preece, he should not grudge £10 or £20 in the purchase of his rams. If he (Mr. Preece) had had a measure of success, it had been due to the fact that he had never stopped at £10 or £20 in the purchase of a good ram. He did not necessarily mean fat ewes, but dark in colour, with a good scrag and dock.

F. F. F. F. F.

For the first five months little expense need be gone to, for if the farm was fairly good the sheep would act as scavengers and would keep their con-

### PEN OF SOUTHDOWN SHEEP.

This pen of Southdown Sheep, owned and bred by H. M. The King, Sandringham, won, at the Smithfield Show, the Prince of Wales's Challenge Cup for the Best Pen of Three Sheep or Lambs, a Piece of Plate value £50 for the Best Pen of Three Short-wooled Sheep or Lambs, the Breed Cup, and also First in the class for a Pen of Three Fat Wether Sheep above 12 and under 24 months old, of the Southdown Breed. Their age was given as 21 months, and their weight 5 ewts. 2 qrs. 22 lbs.

In lamb classes one would naturally look to the breeds which have longest been subjected to the development of the features of early maturing, but the newest Down breed has again secured first honours, which must be encouraging to those interested in the breed. The success of the Suffolks, both pure and as crosses, must be regarded as the most striking feature of the carcass show.

CHEVIOTS hold a good position among the prize-winning breeds in the carcass competitions, being successful as pure-bred Long Wools and also crossed. The Cheviot met showed up well, but on the whole the breed may be considered fortunate in being classed among the Long Wools, for the Cheviot is not a Long Wool in the sense that a Lincoln, Leicester, or Kentish is; for it is a hill sheep, and not of the same origin as the lowland breeds in which it is brought into competition. It is not a Down, but it belongs to the heath breeds, all of which have a mutton quality superior to the lowland breeds. It was these heath breeds crossed with the Southdown which made our other Down breeds.

THE Cheviot gave the point of advantage the Kentish sheep possesses over the other Long Wool breeds which had no cross with heath sheep; and when one looked through the pens of Kentish sheep in the live classes one could not fail to notice how different in type about the heads some of the Kentish are from others. While many retain the clean head and frilled neck of the Cheviot, others have been developed so that the heads are almost as much covered as are Shropshires, while almost all stages of covering between these are represented. No

cessfully accomplished, although the weak points in the more marketable animal may not have been essential from the butcher's point of view, the lighter weight very frequently is more highly regarded by judges. It is thus open to much contention how far the points accepted as best in a breeding competition should hold in a fat stock show.

THE types of sheep shown in the Welsh Mountain classes had considerable variation. However, a good many of the sheep had never been on the mountains, but were valley raised and fed; they included some very sweet animals, and showed many points which would be admirable in the most improved breeds. The question, however, which naturally arises is how far they would be maintained were they allowed to range the hills in the ordinary manner. Another striking fact was the wide season of lambing. Many that were shown were bred in January, while some were dropped as late as August, if the ages were correctly given, as doubtless they were.

THE Shropshire breeders have reason to congratulate themselves on the good exporting season they have experienced, having eclipsed anything accomplished in the past. South America is their great stronghold, and there is every reason to suppose that the prognostications of even a better year to come will not be belied. It is, however, perhaps more satisfactory that the home trade is so constant. The Shropshire can fairly claim to be the Down breed of the richer pastures, for it has a great hold on them in England, Ireland and Wales. It is only when going about in comparatively out of the way districts in the two last countries that one realises

diction without much assistance until they commenced to lamb, except in snowy weather, when some chaff and chaffings, a few roots, and perhaps a little hay might be given. Care should, however, be taken that they did not get too low. A few beans in the straw would prevent this.

The pinch began with lambing, say the middle of March, and he would want them against false economy at that critical period. He would for a month at least after lambing give 1½ lb. of corn (peas and oats for preference) per day, also a little sainfoin or clover, but mangolds should be used sparingly, not more than two or three per ewe per day.

When, however, the weather got warmer, mangolds, if plentiful, could take the place of corn, and, in fact, none should be used after the middle of May, and the sheep should have the run of old seeds or sainfoin, the latter for preference. Personally he knew of nothing that would do sheep so well as sainfoin, and it was a crop which would grow well on clay land if well drained.

#### Foot-Rot.

Dealing with the foot-rot, Mr. Preece declared, although he said he knew many would not agree with him, that no farmer need have his flock suffer from foot-rot if he would persevere and once get rid of it. Foot-rot would never be produced spontaneously, no matter how wet the land, unless by contagion and infection. He farmed a thousand acres of poor clay land and had not had for some years any lame sheep upon his farms. A friend of his, Mr. Rowland Wood, would tell them that once foot-rot was got rid of it would never occur again if fresh sheep were not introduced, although great care was necessary.

The disease could easily be cured by putting 4 lb. of blue vitriol in a stone jar and pouring upon it one gallon of boiling vinegar. The hoof should be pared well and each foot dipped into the liquid. For a large number of sheep they should be run through a trough containing several gallons of liquid, the lame ones being weeded out and kept by themselves.

#### DIPPING.

Touching on the importance of dipping, Mr. Preece said where a flock of 400 or 500 were kept, it would always pay to have a spring bath. He could easily pass through such a bath 1,000 sheep per day, but if there was one thing essential more than another, it was that the master should be there to pass them through himself. Fly would give no trouble if sheep were dipped three times—say, in June, July, and August—and if the lambs were to be sold, the dipping would improve their coats and give them a splendid bloom.

For the prevention of husking he always made a rule as soon as the lambs were taken from the ewes to drench them, but this should always be done when the lambs were fasted. Formerly he used to feed his lambs on roots, but it was difficult to do all things well, more particularly when turnips had to be taken and the master's eye was not always on the look out.

There were, however, four things he always insisted upon: plenty of trough room, a top rail to prevent sheep getting into the troughs, separate troughs for corn and roots, and always to turn the corn troughs over every day and keep a lump of rock-salt in the pen.

Perhaps they might ask him what he meant by corn. If he had a preference, it was peas; but, like everything else, a mixture was best.

#### SHEEP V. HORSES.

He believed nothing paid so well on a cold clay farm as a flock of ewes, and if anyone doubted this let him spend £100 on forty ewes and £100 on a mare or two. He knew he was treading on tender ground, but this he did know, that with sheep they had always something to sell, and something they could sell any day of the week.

He could not, added Mr. Preece, understand their Agricultural Society. It seemed to believe that horses were the things for tenant farmers to breed, and the result was that £400 was given in prizes for horses, and the magnificent sum of £21 only was offered for sheep. He had heard it stated that Huntingdonshire was not suitable for sheep. If his cold clay land was suitable for sheep that country must be also.

Past and present students of Cirencester Agricultural College held a most successful dinner at the "Brookside" on Wednesday, December 12. The attendance was good, and the gathering of the most agreeable description.

At a meeting of the council of the Royal Cornwall Agricultural Association last week it was reported that Lord Falmouth had indicated that he would be pleased again to offer the special prizes for the best Devon bull belonging to a Cornish tenant farmer, for the best cow so owned, for the best ram in the sheep classes, and for the best pig—£22 altogether. The secretary stated that his lordship and his father had given these prizes for thirty years without intermission, and a special vote of thanks was given Lord Falmouth for his generosity.

#### Notes and Jottings.

"He doth nothing but talk of his horse."  
—"Merchant of Venice."

It has long been the opinion of men who look a little farther than the mere surface of things that the breed societies of this country do not receive sufficient encouragement from the outside. That these societies contain all the machinery for advancing the breeding of various domestic animals past experience proves. It is with horse breeding that I have to deal in this column, and if the Government were to subsidise the various breed societies which look after the interests of horses, it would get a much better result from the expenditure of less money than by adopting any other plan.

It is not intended to convey the idea that breed societies are faultless, that they never spend money foolishly, that they are never actuated in their policy by the mere trade considerations of the moment. I have had occasion to point out some glaring inconsistencies on the part of the councils of breed societies, and probably I may have again, though I am of opinion that the day for these has practically departed. But the breed societies consist for the most part of practical men, who elect practical men to represent them on the council. And, speaking broadly, every man on the councils of these societies has the breed which he represents and its best interests at heart. He does not go down to the council meetings merely to register his vote for this policy or that, he has something to initiate or something to say about what others initiate, and his interest in the society is a perpetual interest, occupying his thoughts from day to day and week to week. This is the secret of the great success which the breed societies have had.

It may fairly be said that, notwithstanding the proved benefits which have been derived from the action of the various breed societies, they have not been supported as they ought to have been. It is true that many of them are in a very prosperous condition financially—it is a very true thing that there are many of them which find themselves crippled for want of funds. It may be said that these societies are of comparatively small importance, but this is begging the question with a vengeance. There is not a breed of horses in the United Kingdom from the New Forest pony and Shetland to the Thoroughbred and Shire which it is not a matter of national importance to maintain and improve on the lines of the breed itself. This is a first principle, and as such it must ever be kept in view.

It would be absurd to deny that many men in joining the breed societies and in registering their stock have been actuated entirely by trade considerations, but I think a strict examination would prove that these men are after all comparatively few. It was pointed out at the dinner which Sir Gilbert Greenall gave to the secretaries of the breed societies last Monday that those men did the best who regularly registered their stock whether trade was good or bad, and whose support of the society to which they belonged was systematic instead of spasmodic. In the first place it may be said that there was never any doubt about the pedigrees of their horses. They had bred them with the purpose of breeding the best possible of the breed so far as the materials to their hand permitted them. Therefore when the boom arrives they are prepared for it, and as a natural consequence they get the cream of the market. Whereas the man who waits till the boom comes before he registers his stock is not infrequently a careless breeder. He is the man you will hear laughing at pedigree stallions when the trade in pedigree horses is languishing. "There! Thistlewhipper, he's good enough for me," he will argue, with a laugh. "Look at his stock, and he's close at hand, and costs 20s. less than your fine pedigree stallion. I sold a three-year-old by him the other day for quite as much money as Jim Smith sold his pedigree horse for. It is the horse I want, not the pedigree." So our friend continues to use Thistlewhipper, and then when the boom does come, and it comes periodically, mark that! he finds his Thistlewhipper stock, of which he is so

proud, will not register, and so he has to wait to grade it up, by which time, perhaps, the tide is on the ebb again.

Mr. McNeillage, in his speech on Monday night, mentioned a very interesting fact, and one which shows in a remarkable manner the benefit which the breed societies are to the agricultural community. During the present year he told us that he has issued 1,200 export certificates for Clydesdales. Now, as he put it, assuming that the average value of these horses was £50, we have a sum of £60,000 coming into the hands of British farmers from abroad. But £50 is a very moderate average indeed, and I should have been inclined to put the average at least double that if the question had been put to me. It is needless to insist on what a wide margin there is left for distribution in either case when horses are sold for £400 and £500 and more. I have no means of ascertaining whether any foals were exported, but I fancy not many of any breed are, and even yearlings would bring up to £50, and many of them would bring more.

NOW if we add to the Clydesdale Society, which is the oldest of the breed societies, the Shire Horse Society, the Hunters' Improvement Society, the Hackney Horse Society, the Suffolk Horse Society, the Polo Pony Society, the Cleveland Bay Horse Society, the Yorkshire Coach Horse Society, and the Shetland Pony Society, we shall see that by these means an immense annual income from foreign sources is distributed amongst the farmers of Great Britain and Ireland. Leaving out the Thoroughbred which I have purposely omitted from the calculations, it is, I think, not too much to estimate the revenue of farmers from these sources at £200,000 per annum. The Shires will amount to quite as much as the Clydesdales, perhaps a little more; and the Hackneys will add a substantial amount to the total. The Hunters Improvement Society will add its quota of registered mares or mares bred from registered stocks, and that exports of the other breeds have not, perhaps, been very numerous during the present year, they, at all events, help to swell the bill.

NOW, taking into consideration that this is part of the material wealth of the country, the societies which have done so much in establishing it on a firm basis certainly should receive more support from the outside public than they do. A few far-sighted and enterprising men are to be found supporting them with purse and working hard to promote their object; but the general view is that they are merely trade associations, got up for the benefit of the trade in certain breeds of horses, and as such they should be self-supporting or go under. That they are trade associations is true up to a certain extent, but they are to a certain extent only. It is manifest that it would be useless to breed horses unless there was a profitable market for them. But the breed societies are much more than this. They foster and encourage breeding to type. They do more, they make breeding to type possible; and it is in breeding to type that the future prosperity of British agriculture has to depend upon. And, after all, the agricultural industry is the largest and most important of any in the country.

"WHY don't the Cleveland Bay and Yorkshire Coach Horse breeders bring themselves more in evidence?" asked a friend the other day; "there is no disputing the fact that they are amongst the finest harness horses of the world. See what the Hackney men have done by keeping themselves constantly before the public." Well here is perhaps one reason why they have not done so. The societies are principally composed of small breeders, and save from one or two enthusiasts they have received no support from the general public. That, when so much is talked about our getting our harness horses from abroad, these societies should receive more general support than they do is manifest. And here is a reason. My friend told me that he was at one of the meetings of the Four-in-hand Club last summer, and he was particularly struck with the style and elegance of a leader in one of the teams. He knew the owner, and asked what the horse was. He was told that it was a Cleveland bay stallion, who was registered in the Stud Book, and who had been "added to the list" in February! My friend, who is a Hackney man, told me he was the best-looking harness horse there.

THE LOOKER-ON.

#### A Racehorse Owner on Horse Breeding in England.

Colonel Hall Walker, M.P., who was the chief guest at the annual dinner of the famous Gimcrack Club, in the course of a speech said that the Jockey Club might include in their duties the preservation of the horse breeding industry, as the Government authorities had failed to realise the fact that we were losing annually many of our

best stallions, and what was an even greater loss, many of our best half-bred mares.

The maintenance and improvement of Thoroughbred horses was the avowed object of horse-racing; hence the necessity for the association of the Jockey Club and the Royal Commission on Horse Breeding. At the present moment the Commission possessed no income, no stallions, no mares, no land; surely a poor state of affairs in the case of a horse-breeding nation like ours, and in comparison with the fostering care bestowed upon horse breeding by other European countries. The one thing lacking, before progress could be made, was money.

In this country of so-called freedom we could not adopt that simple French remedy the pari-mutuel. Our protective laws were all for our morals and not for our pockets. By the time State aid was forthcoming it would be another case of locking the stable-door when the steed had gone, but a time would come when horses were urgently required for necessities of war, and then the State would search for them in vain.

## VETERINARY.

Advice of a Veterinary character, by an M.R.C.V.S., is offered to Readers entirely free of charge. Particulars of cases should be addressed to the Editor, "MARK LANE EXPRESS," 3, Wellington Street, Strand, London, W.C.

### Contagious Abortion.

SIR,—As a constant reader of the MARK LANE EXPRESS I should be glad if you could, in your next issue, give me some idea and cause of the following inquiry. Since June last my cows—about twenty-four to twenty-seven in all—have constantly been turning to the bull at three weeks, some at six, and even at three and four months. Several have warped their calves about six weeks before calving or due to be calved. These we have kept apart, and have disposed of some as barreners. We have bought fresh stock heifers and calves and also bull, and even now still get the same trouble. The cattle milk and also look well when on the grass, and we have fed no cake whatever this past summer. The pasture is chiefly sand, and has recently been laid down to permanent pasture—about three years. There is a great amount of cookfoot grass about same. My taking of above farm was September 29, 1905, and my predecessor kept a small pack of hounds, which he hunted over same, and used a lot of rough dead stock to feed same. And oblige yours truly, B. FOORD.  
December 5, 1906.

[Answer: That you have isolated some of the aborting animals, and disposed of others as "barreners," looks as though you had some better idea of the cause and character of your trouble than would appear from the general tone of your letter. It is very obvious that you have to face an outbreak of epizootic or contagious abortion, and we fear you are rather ill-equipped in point of experience to combat it. You may dismiss all your theories as to the influence of the character of the grasses, the use made of the ground by your predecessor, &c., for infectious abortion is due to a specific micro-organism which causes disease of the foetal envelopes and premature delivery of the calf.—M.R.C.V.S.]

### Offal for Pigs.

SIR,—Would you kindly tell me if good from slaughter-house washed and boiled is good for feeding pigs? I have been using this for some months, but I am told the meat is not so good as that fed in the ordinary way.—J. W.

Answer: A great number of pigs are fattened in this country on butchers' offal, and I might say some are so fattened on almost every butcher's establishment where slaughtering is done. In fact, there is scarcely anything else to do with offal. And the pork and bacon so made is sold in the usual way, and is no doubt quite wholesome. But one can hardly fancy the meat so well as such as is made on meals and milk. Still, it appears a case of what the eye never sees the heart never grieves at, because it is impossible to tell what your pork or bacon is fed on unless you feed it yourself, and not quite then. You, however, it appears, are fattening your own pigs. And it does not appear that you are running the slaughter-house, but are buying the offal. In such a case, if I were you, I would drop the offal feeding and buy some other and sweeter victuals. It is different with the butcher. He has his living to get, and he has to make the best of his waste. This much, too, should be borne in mind. The pig is omnivorous and a foul feeder; is to a certain extent a scavenger, and whether you supply such food as offal or not, the animal will pick up and root about to find undesirable diet, so to a more or less degree takes it,

# ROYAL AGRICULTURAL SOCIETY

Annual Meeting of Members—Lord Yarborough President, 1907—

Council Meeting—Election of Members—Total Prizes at Lincoln £8,000.

## Annual Meeting.

The annual general meeting of the governors and members of the Royal Agricultural Society of England was held at the Hotel Russell, W.C., on Wednesday, there being a satisfactory attendance, under the chairmanship of Mr. F. S. W. Cornwallis, the retiring president. The company included—Duke of Richmond, Lord Jersey, Lord Yarborough, Lord Derby, Lord Middleton, Lord Moreton, Sir Edmund Verney, Mr. Victor Cavendish, Mr. Ailwyn Fellows, and Sir John Thordell.

The President, in opening the proceedings, expressed regret that he was not able to welcome the members in the new premises of the Society that had been acquired in Bedford Square. He should like to remind members there was a room at the disposal of members on any occasion they wished to visit the headquarters. Speaking of the report, the president said it contained a detailed account of the work of the past year. It was in reality based upon the recommendations of the special committee which was appointed to deal with the re-organisation of the society. Practically all the recommendations had been carried except that relating to the conference of secretaries of agricultural societies, which it was hoped to hold in the spring; also the actual sale of Harewood House, the society's former headquarters in Hanover Square, had not been completed. It was hoped by the end of the year that that valuable property would have been sold, but unfortunately at the last moment the negotiations broke down. The council was using every endeavour to dispose of that property at as early a date as possible. In spite of the fact that at the present moment they were the owners of two houses, they were living more cheaply than when the owners of only one house. (Hear, hear.) They might congratulate themselves that the financial position of the society was more hopeful than what it was when he took office seventeen months ago. Thanks to the administrative work of Sir Gilbert Greenall, they had such a successful show at Derby that they were able to considerably increase their finances. (Applause.) An encouraging feature was the increase in membership; he said that because the strength of the society depended upon it. They were now approximately 10,000 strong, but that was not sufficiently large for a society representing England, and having a little Scotch representation as well. There were a few acknowledgments he must make; the society owed a deep debt of gratitude to the Mayor and Corporation of Derby, to the Lord-Lieutenant of Derby, and to the local agricultural societies for the way they co-operated in making the success of the first of the revived provincial shows. It was necessary, too, to extend very hearty thanks to the breed societies for the handsome and generous way they contributed to the prize fund. With regard to the financial position of the society at the close of the current year, he could gladly tell them that they were £5,000 better off at the close of the current year than at the end of last year. (Applause.) The financial results of the Derby Show meant a profit of over £2,000. (Applause.) The number of members on the society's book was 9,639 against 9,200 in December; the increase was not greater because of the large number of resignations of members living in the neighbourhood of Park Royal, and the loss of many members by death. During his terms of office no less than 1,023 new governors and members had been elected. (Applause.)

## Adoption of the Report.

Sir John Swinburne moved the adoption of the annual report, which stated that the council had decided to hold their sixtieth annual show at Lincoln in 1907. The prize sheet for the show was now under the consideration of the council. Prizes amounting to £300 had been accepted by the council for farm prize competitions. Sir J. Swinburne suggested that improved facilities should be given to visitors to the shows to go round the showyards. It would be a great convenience if a single tramway line were constructed right round the yard, and if the visitors were permitted, at a small charge, to ride in the cars, which should make frequent stops on the journey. Mr. W. A. Prout seconded the motion, observing that the report was the most successful one which had been presented to the society for many years. The motion was adopted.

## Election of President.

Mr. F. S. Foljambe, who proposed the election of Lord Yarborough as the new president, said that gentleman was a man of business, and one who possessed more acres of land than were contained in many counties of England. That land was cultivated by the finest lot of tenantry to be found in England; they were men who carried on

agriculture on scientific principles, and, likewise, bred successfully.

Mr. C. W. Tindall, who seconded the motion, said it would be source of a great satisfaction to the tenant farmers of Lincolnshire to know that Lord Yarborough had been selected as the new President.

The proposal was accepted with acclamation. Lord Yarborough acknowledging the compliment paid him.

The trustees of the society were elected for the ensuing year, the list of names being headed by those of the Prince of Wales and the Duke of Bedford. The vice-presidents were also elected, the list including Prince Christian, Lord Jersey, Lord Faversham, Lord Northbrook, Mr. Victor Cavendish, M.P., and Mr. Henry Chaplin.

## Members' Observation.

Mr. Walker, on behalf of the elder makers of the West of England urged the council to deal with a grievance which they had. At present they were suffering under two great disabilities. One was the gross faking of cider by the use of sulphuric acid to the extent of 60 to 70 grains. That was very injurious to health. The other was colouring a fictitious beverage, and selling it as cider. They were asking the Board of Agriculture to define what was cider, and they hoped the council would support them in the deputation to the Board about February.

Mr. James Watt, Carlisle, complained that the railway companies on the occasion of the show made no reduction of fares on behalf of either exhibitors or their assistants. The Highland and Agricultural Society of Scotland were able to get cheap fares, and he thought the Royal could also if they used sufficient pressure.

The chairman said the question of reduced railway fares had not been lost sight of, and the council were working in hearty co-operation with the committee of which Mr. Cavendish was chairman. The question raised by Mr. Walker in regard to cider would be referred to the council in due course.

Mr. R. P. Elliot, Clifton Park, expressed the hope that the council would urge upon the Government the need for establishing a seed-testing station. It was only what every civilised Government had done—even Ireland had a seed-testing station. The chairman promised that the Council would consider the matter.

The Rev. Dr. Gillespie, Mousewold, Dumfriesshire, proposed a vote of thanks to the retiring president, and in acknowledging the vote. Mr. Cornwallis said that under the able guidance of Lord Yarborough the society was sure to prosper.

## Council Meeting.

A monthly council was held at the Hotel Russell on Wednesday, Dec. 12, 1906, Mr. F. S. W. Cornwallis (president) in the chair. Present:—

Trustees.—The Earl of Coventry, the Earl of Derby, K.G., Lord Middleton, Lord Moreton, Sir J. H. Thordell, Bart.

Vice-Presidents.—H.R.H. Prince Christian, K.G., the Right Hon. Victor Cavendish, M.P., Mr. Percy Cratchley, Mr. J. Marshall Dugdale, the Right Hon. A. E. Fellowes, the Earl of Jersey, G.C.B., the Earl of Northbrook.

Other Members of the Council.—Mr. George Adams, Mr. Charles R. W. Adenre, Mr. T. L. Aveling, Mr. S. N. Bankart, Mr. T. A. Buttar, Mr. Richardson Carr, Sir Richard P. Cooper, Bart., Sir H. F. de Trafford, Bart., Mr. H. Dudding, Mr. J. T. C. Eadie, Mr. James Falconer, Mr. R. Forrest, Mr. J. W. Glover, Mr. R. M. Greaves, Sir Gilbert Greenall, Bart., Mr. J. Harris, Mr. W. Harrison, Mr. J. H. Hine, Mr. R. W. Hobbs, Mr. J. Howard Howard, Sir Charles V. Knightley, Bart., Mr. George Lobb, Mr. Ernest Mather, Mr. W. A. May, Mr. C. Middleton, the Earl of Onslow, G.C.M.G., Mr. Ralph Palmer, Mr. C. M. S. Pilkington, Mr. G. G. Rea, Mr. F. Reynard, Mr. C. C. Rogers, Mr. John Rowell, Mr. W. Seoby, Mr. R. Stratton, Mr. H. Tallent, Mr. George Taylor, and Mr. E. V. V. Wheeler.

The following members of the Lincoln local committee were also present:—Mr. A. H. Clark, Mr. C. W. Pennell, Mr. C. W. Tindall, and Mr. E. E. Tweed (local secretary).

The minutes of the last meeting of the council, held on November 7, 1906, having been taken as read and approved, the election of two governors and thirty-two members was proceeded with. Mr. Adenre (chairman) reported that the accounts for the month ended November 30, 1906, as certified by the society's accountants, had been submitted. The balances at the bank on October 31, 1906, were:—Reserve fund, £1,123, 15s.; ordinary account, £4,391 3s. 3d. The total receipts for the month had been £1,175 3s., and the expenditure £1,059 12s. 11d. The balances then standing to the credit of the Society's

accounts were:—Reserve Fund, £3,294 15s. and the ordinary account £4,373 17s. 4d., making a total credit balance of £7,668 12s. 4d., accounts amounting in all to £10,078 12s. 11d (including the repayment to Sir Walter Gilbey of the loan of £7,785) had been passed and recommended for payment. The committee had recommended the transference from the ordinary account to the reserve fund of the sum of £4,028 3s. 4d., being £2,028 8s. 4d. the credit balance on the Derby show, and £2,000 the contribution from the ordinary funds of the society to the Show Fund. The secretary had reported the following additional donations to the society's funds amounting to £57 4s. :—

|                                                                           | £   | s. | d. |
|---------------------------------------------------------------------------|-----|----|----|
| Clement Stephenson (£1 ls. for each year he has been a life member) ..... | 35  | 14 | 0  |
| Worshipful Company of Merchant Taylors .....                              | 21  | 0  | 0  |
| T. A. Coward .....                                                        | 0   | 10 | 0  |
|                                                                           | £57 | 4  | 0  |

The secretary had laid upon the table the final balance-sheet of the Derby Show, which had been approved and certified by the auditors on the 5th inst. Various questions which had arisen in connection with the winding-up of Park Royal, Ltd., had been considered, and the committee recommended that the seven shareholders be requested to authorise the liquidator to account for and pay over their shares of the assets of the Park Royal, Ltd., to the society.

And further, that the Liquidator of Park Royal, Ltd., be requested to pay over the surplus assets of the company (after discharging or providing for its liabilities) to a special account at the London and Westminster Bank, St. James's Square, in the name of the society, earmarked at Park Royal Proceeds.

The work at the society's new offices being now practically completed, the committee recommended that the seal of the society be affixed to the counterpart of the lease from the Duke of Bedford of the society's premises, and that the lease be taken up in due course.

In presenting the report Mr. Adeane said that the committee laid before the council that day a balance-sheet of the Derby Show, and they asked the council to approve it. The only remark that he had to make was that it was extremely satisfactory. Financially it showed an actual profit to the society of £2,028, which, together with the contribution of £2,000 from the ordinary funds of the society, gave a gross profit of £4,028, which they would ask the council to authorise them to put to the Reserve Fund, thereby increasing the general security of the society. He thought they would all wish to acknowledge on that occasion that these results could not have been obtained had it not been for the energy and enthusiasm of their honorary director, Sir Gilbert Greenall. They also asked the council to authorise the repayment of Sir Walter Gilbey's loan amounting to £7,785, and they were glad to be able to announce that Lord Rothschild had kindly consented to take over that loan bodily, thus giving great help to the society at the present time, because with the bank rate at 6 per cent. they would have to pay 6½ per cent. for the money if they went to the bank, whereas they would now only have to pay 4 per cent. With regard to Park Royal, as the questions were of a technical character, he would ask Mr. Clarke, of Messrs. Goward, James and Wolfe, the society's solicitors, to explain them to the meeting.

Mr. Clarke thereupon explained the position of affairs, and more particularly that portion of the Report which recommended that the liquidator should be requested to assign the benefits of certain Covenants of Indemnity to the Society, and to distribute the assets of the company without regard to the company's liabilities to the society.

#### Farm Prizes in Lincolnshire.

Lord Middleton reported that the forms of entry for the Farm Prize Competitions had been issued, and the particulars of the classes and prizes had been fully advertised throughout the county of Lincoln. An inquiry as to the eligibility for entry of a farm which had been in the occupier's occupation since April 6, 1905, had been considered, and the committee recommended that under the circumstances the farm should be considered to comply with the condition that the land must have been in the competitor's occupation for not less than two years.

It was decided to open the showyard to the public on each day of the show from 8 a.m. to 7 p.m., the yard being cleared each evening at 8 o'clock.

#### Prizes at Lincoln, £8,000.

Mr. Reynard (chairman) reported that the prize-sheet had now been settled, and the various offers of champion and other prizes which had been received included therein.

The ages of the "old" bull classes had been increased by one year, making the classes for bulls calved in 1902, 1903, or 1904, instead of bulls calved in 1903 or 1904. The fees to non-members

for the entry of poultry and produce had been reduced to 3s. 6d. per entry.

The committee had again considered the question of the date from which the ages of Welsh cattle were to be calculated, and recommended that the request of the Welsh Black Cattle Society that the ages of Welsh cattle be reckoned from December 1, instead of from January 1 as heretofore, be acceded to.

A sub-committee consisting of the chairman (Mr. Reynard), Sir Gilbert Greenall, Sir Richard Cooper, Mr. Crutchley, and Mr. Rowell, had been appointed to consider the arrangements for the annual sales in the showyard, and the committee recommended the adoption of their suggestion that the sales of sheep should be held on Wednesday, June 26th, and of cattle, horses, and pigs on Thursday, June 27.

Mr. Reynard, in presenting the report, mentioned that through the generosity of the breed societies, the Lincolnshire Agricultural Society, the Local Committee, and other friends of the society, they had been able to prepare a very comprehensive prize-sheet. The total value of the prizes to be offered in connection with the Lincoln Show, including the prizes for farms, would approximate the sum of £8,000.

#### Election to the Council.

Sir John Thorold (chairman), reported that the Earl of Yarborough had expressed his willingness to be nominated as president for the year 1907, and the committee recommended that his lordship's name would therefore be suggested to the general meeting of members, to be held on that day, for election as president of the society, to hold office until the next ensuing annual general meeting.

The president had submitted to the committee the following results of the election to the council for the divisions of Group C:—

#### UNCONTESTED ELECTIONS.

Cumberland.—Mr Joseph Harris, Brackenbrough Tower, Carlisle.  
West-derland.—Mr C W Wilson, Rigmaden Park, Kirkby Lonsdale.  
York, East Riding.—Mr Fredk Reynard, Sunderlandwick, Driffield.

North Wal.—Mr R M Graves, Wern, Portmadoc.  
Lincoln.—Mr Henry Dudling, Rigby Grove, Grimsby.  
Huntingdon.—Mr John Russell, Bury, Huntingdon.  
Cambridge.—Mr C R W Adeane, Babraham Hall, Cambridge.  
Oxf. Rnt.—Mr Robert W Hobbs, Kelmscott, Lechlade.  
Kent.—Mr T L Aveling, Boley Hill House, Rochester.  
Mr H. Ellis, after Hutton, Woodstone, Dorset.  
Glamorgan.—Mr Robert Forrest, St. Fagan's, near Cardiff.  
Somerset.—Mr R J Baynton Hippeley, Stone-Eaton Park, Bath.  
Berkshire.—Mr George Adams, Ryall Prize Farm, Wadley House, Faringdon.  
Sussex.—The Duke of Richmond and Gordon, K.G., Goodwood, Chichester; Mr Walter F Ingram, 2, St Andrew's Place, Lewes.  
Ireland.—Mr R G Carden, Fishmoine, Boroisello, Co. Tipperary.

#### CONTESTED ELECTIONS.

Gloucester.—Mr H Dent Brocklehurst, of Sidney Castle, Whitechapel, R.S.O., 161 votes; Mr W T Garne, of Abchurch, 159 votes.  
Warwick.—Mr James W Glover, of Jury St oct, Warwick, 133 votes; Mr W Hanson, of Arden Hill, Atherton, 61 votes.

#### Standing Committees for 1907.

The following standing committees were appointed for 1907:—Finance, House, Journal, Chemical and Woburn, Botanical and Zoological, Veterinary, Stock Prizes, Judges' Selection, Implement, Showyard Works, Selection, Education, and Dairy and Produce.

The present members of the various standing committees were (with some exceptions) reappointed to those committees. Mr. Cornwallis was added to the Finance, House, and Selection Committees; Mr. Hippisley to the Journal and Implement Committees; Mr. Rogers to the Journal, Chemical, Botanical, and Veterinary Committees; Major Brocklehurst to the Chemical and Education Committees; Mr. Hiscock to the Veterinary and Dairy Committees; Mr. Buttar, Mr. Carden, Sir Humphrey de Trafford, and Mr. Dudding to the Stock Prizes Committee; Mr. Falconer and Mr. Glover to the Implement Committee; the Right Hon. Alwyn E. Fellowes and Mr. Carr to the Committee of Selection; the Earl of Jersey and Mr. May to the Education Committee; and Mr. Plumpton to the Dairy and Produce Committee.

#### Thanks to President.

The Earl of Onslow said he thought it would be the unanimous feeling of the society that they should not separate without passing a hearty vote of thanks to their president. (Cheers.) Many distinguished men had filled the office of president of the society, many of them had been liberal donors to its funds, but he did not think that any president had ever had to face a condition of affairs of the society so difficult as that which had confronted Mr. Cornwallis, and he thought it must have been a matter of very great congratulation to him to see the society during the past year emerge from that cloud of darkness which had overshadowed it in the few years preceding his term of office.

The Hon. Alwyn E. Fellowes said that he had the very greatest pleasure in seconding the vote of thanks proposed by Lord Onslow.

Mr. Cornwallis felt that they had done him far too much honour for any little work that he had

been able to do during the past seventeen months. He had only been one ear in the boat, perhaps the stroke ear for the time being, but every member of that boat had rowed with equal vigour and determination to see that the race should be won, and he only hoped that the prophecy which Lord Onslow had made that the society saw before it a good sound future might be fulfilled, and if this should be the case it would be because every member of the council had put his back into the work, and had loyally supported the president in anything that had been necessary for carrying on what certainly had been arduous work during his period of office. He could not say down that occasion without saying how much the society owed to Mr. McRow and the staff, who, in spite of great difficulties in moving into their new house, had carried on without hitch the work of the society during that time.

Other business having been transacted, the council adjourned until Wednesday, January 30, 1907.

## The Agricultural Annual and "Mark Lane Express" Almanac, 1907.

The 1907 edition of the "Agricultural Annual and MARK LANE EXPRESS Almanac," popularly known as the "Farmers' Red Book," eclipses all its predecessors as regards size, and we think it will be generally agreed that the contents are even better than other years. They are certainly more numerous and deal with all branches of farming; cattle breeders will find useful articles for them, sheep breeders are provided for, and the pig-keeper also receives attention, whilst general agriculture is dealt with. All the articles are by writers foremost in the agricultural world, so that the remarks and suggestions are made by those well qualified to give them.

The Fertiliser and Feeding Stuffs section, introduced last year, has been enlarged and made even more useful, and the same remark will apply to the tables' section, in which farmers have found a veritable mine of useful information; in fact these, with the other contents, make the Farmers' Red Book a source of reference which buyers of previous years have found indispensable throughout the whole of the year, and with the 1907 edition we feel sure they will not be disappointed, but on the other hand, declare it to be of greater value than ever.

The illustrations, an always prominent and distinctive feature of this Annual, are again on a very extensive scale, and executed in the high class style for which they are justly renowned. That they are up to date is proved by the fact that several full-page illustrations of winners at this year's fat stock shows at Norwich and Birmingham. These include the King's Shorthorn steer, which was champion at the Smithfield Club Show, as well as at Birmingham.

A few words as regards the articles may now be given. As usual, the first deals with the weather, season, and crops of 1906, by Joseph Darby, who also contributes some notes on Stock Breeding and Feeding in 1906; whilst W. W. Chapman contributes his usual exhaustive and interesting record of pedigree live stock sales, so that the articles mentioned give a complete record of how agriculturists fared this year. A bit of humour, but containing many striking facts, is "The Agricultural Candidates, an Electioneering Dialogue," and there is a lot of truth in "Civilities, Sentiments and Otherisms" by W. A. Brown. Then we come to what might almost be termed the live-stock section, for in addition to the pedigree stock sales, we have "The Breeding of Harness Horses," by W. Scarth Dixon; "The Broken Winded Horse," by M.R.C.V.S.; "Judging and its Results," by Breeder and Exhibitor; "Systems of Calf Rearing"; "How to Ascertain the Weight of Cattle by Measurement"; "Winter in the Sheep Pens," by W. J. Malden; and "Bacon and Pork Pigs," by that authority on pigs, Sanders Spence. The time sometimes seems the uselessness and interest of the articles, so that they need no description, but it may be pointed out that they appeal to breeders of all classes of stock.

Other articles include a consideration of Milk as a Powder, by C. W. Walker-Tisdale; an interesting article on "Midland Folk Lore and Superstition," by L. C. Hadley; "Clover Dodder," accompanied by several interesting illustrations by D. Finlayson; and a thoughtful article by E. J. E. Walker on "The Rural Child."

The sole aim of the Annual is to be useful to those to whom it appeals, and we think it will be generally agreed that it fulfils its aim. It is published at 1s. net, and can be had of all booksellers or direct from the publishers, the MARK LANE EXPRESS, 3, Wellington Street, Strand, W.C., price 1s. 4d., post free.

For selling margarine as butter, John Morgan Williams, of Camberwell, was fined £100 at Lambeth on Friday. There were previous convictions,

## THE FARMERS' DINNER.

The Government and Canadian  
Cattle—Contagious Abortion  
in Cows.

There was a large company at the Trocadero on Tuesday evening, under the chairmanship of Mr. F. E. Muntz, of the Farmers' Club. Those present numbered about 250, and included Sir Edward Strachey, Bart., M.P., Hon. Ailwyn E. Fellowes, Right Hon. H. Chaplin, Mr. F. S. Cornwallis (president of the R.A.S.E.), Mr. T. Courtney Warner (chairman of the Central Chamber), Mr. Jesse Collings, M.P., Sir Thomas Elliott, &c.

Earl Carrington, the President of the Board of Agriculture, who was to have been present, sent a letter apologising for his absence, saying that it was only caused by the imperative orders of the doctor.

After the loyal toasts had been honoured, Mr. Ailwyn Fellowes, the late President of the Board of Agriculture, gave "Success to Agriculture," declaring that as agriculturists they knew no politics. "Our farmers had had hard times, but never knew when they were beaten, although prices fell and rates were ever higher. (Hear, hear.) Their industry was one on which the life-blood of the country depended, and he welcomed certain combinations, particularly in the North, which promised better co-operation. He congratulated the Board of Agriculture on its work this year, and expressed the hope that a Butter Bill was not far distant. As to the importation of cattle, he would like the question settled once for all, and trusted the Board would take a firm line on the point, and not leave it to the House of Commons. (Hear, hear.)

Sir E. Strachey, who responded, remarked that while the strict regulations in force against cattle disease had been eminently successful in some directions, there had, on the other hand, been outbreaks of anthrax and glanders. The latter disease was virulent in London, but the president was hopeful of obtaining a grant from the Treasury to assist him in stamping it out. (Hear, hear.) The committee appointed by Mr. Fellowes to study the causes of abortion in cattle had ascertained that it was caused by bacillus, and was contagious, and they were now endeavouring to discover whether it was possible to make cattle immune by means of inoculation. There had been renewed agitation for a removal of the embargo against the importation of live stock, but he had Lord Carrington's authority to say that the Board were determined to maintain the attitude taken up by his predecessors. (Cheers.) It was the intention of the Government to introduce a Bill at an early date founded upon the report of the Butter Committee for the purpose of stopping fraudulent competition with pure butter. (Cheers.)

Mr. Henry Chaplin next proposed "The Farmers' Club, and the Central and Associated Chambers of Commerce." In doing so, he remarked that the Land Tenure Bill had been divided on in the Commons. He was sorry to say that the condition of agriculture in this country was not all that they had a right to expect, and it was of no use pretending it was. In speaking of the agricultural report of the Tariff Commission, he said he was sorry to be able to announce that only the other day he received a message dictated by Mr. Chamberlain, in which the right hon. gentleman said he had every hope and expectation of being in his place in the House of Commons next session. (Loud cheers.) Mr. Chaplin proceeded to quote the report of the Commission, advocating a change in fiscal policy of this country as the remedy for the present state of agriculture, when a gentleman rose to a point of order. He was greeted with cries of "Sit down!" and "Turn him out!" and, sticking to his point, was eventually shown the door.

Mr. Chaplin then read the recommendations of the Commissioner, and said it was upon the broad lines laid down in the report that he thought remedial measures ought to be framed, and within the four corners of that report was the basis on which a great and united agricultural party might be formed. If they adopted the recommendations of that report it would, he felt certain, result in the creation of an absolutely united agricultural party to give effect to their proposals, and through them give new life and bring new prosperity to the fortunes of what had always been an ancient and noble cause. (Cheers.)

The chairman, Mr. F. E. Muntz, replied on behalf of the Farmers' Club, and Mr. Courtney Warner, M.P., for the Central and Associated Chambers of Agriculture. Other toasts were those of the "Agricultural Societies of the United Kingdom," given by Mr. F. L. Courthouse, M.P., and responded to by Mr. F. S. W. Cornwallis.

"The Visitors" was proposed by Dr. J. A. Voelcker, who fittingly alluded to the large number of distinguished guests, and Mr. James Macdonald replying on their behalf brought a successful evening to a close.

## CENTRAL CHAMBER.

The annual general meeting of the Central Chamber of Agriculture was held at the Society of Arts, John Street, on Wednesday, Mr. T. Courtney Warner, M.P., presiding.

The annual report stated that the number of outbreaks of glanders in the country had increased, while the number in London had decreased. The council, therefore, deplored the refusal of Treasury to grant the £25,000 asked for by the President of the Board of Agriculture, and trusted that, for the sake of future economy and the prevention of further danger to human life, the Treasury would make the necessary grant at the earliest possible date.

Mr. Middleton said that the spread of the disease in the country had been largely increased by the substitution of motor-car for horse traffic on London streets, and the consequent removal of London horses to the provinces. Glanders had previously been confined to London.

Sir F. A. Channing, M.P., said the spread of the disease constituted a grave danger to human life, and was really a very serious matter.

Mr. Thomas Davies (Horsheam) moved a resolution urging the Government to deal with the question of local taxation, and to bring in measures dealing with the whole question on the lines of the King's Speech. He expressed strong objection to the education rates and the feeling of school children being placed on the local rates, and urged that land should be treated by the local authorities on the basis of raw material. Mr. Priddy (Gloucester) seconded.

Mr. Nunnerly (Northampton) proposed, as an amendment, to add to the resolution: "But that all national services, including elementary and secondary education, should be paid for from national funds to the extent of three-fourths instead of one-half, and that agriculture should be exempt from lighting, sanitary, baths, library, and other special rates from which they receive no benefit, and from any rates imposed in the future." (Laughter.) Mr. West seconded the amendment.

Mr. Kidner (Taunton) said that the chamber should do something instead of continuing to discuss this vexed question, which had been before them for years. They had voted upon the matter time after time, and had made up their minds what they wanted.

Mr. Henry Chaplin urged that they should have a clear issue before them, and asked Mr. Nunnerly to withdraw his amendment. His views were in entire and hearty accord with the resolution.

Mr. Nunnerly moved to withdraw the amendment, and it was put to the meeting and defeated by a large majority.

The resolution was carried unanimously, and it was agreed that the Local Taxation Committee should arrange for a deputation to wait upon the Government and urge the views of the chamber on the matter.

Mr. Latham (Berks and Oxon) moved a resolution approving the report of the Royal Commission on motors subject to their being no relaxation with regard to the speed limit and the extra cost of roads incurred by heavy motor traffic being defrayed by further taxes on motors. An amendment was moved to secure that lights carried on motor-cars should be strictly regulated, this, with the resolution, being carried.

Mr. Goulder (Norfolk) moved a resolution urging that army meat contracts should be limited to home-bred and fed meat, and that foreign-bred and fed meat should bear a distinctive mark.

Mr. Brunxton Randall (Leicester), seconding, said Mr. Haltham had been asked to receive a deputation on this question, but he made a rather authoritative refusal to their request.

The motion was carried. The meeting also approved the Land Purchase Bill of Mr. Jesse Collings, and urged that the Government should take up the Bill as a Government measure.

Mr. Collings, explaining the Bill, said that it enabled a tenant farmer to become the owner of his land on easier terms than when he was the tenant. It was designed to prevent the unfair rising of rent when an estate changed hands, and the ominous statement appeared in the advertisement, "Those rents are capable of improvement." It is also proposed to give power to the local authority to purchase land for small holdings. Farming had no force behind it in the House of Commons, and every Government knew that a farmer's question could be ignored with impunity. He had come to the conclusion that the Bill was the only hope for the farmer.

## Highland.

At a meeting of the directors of the Highland and Agricultural Society, held in Edinburgh on the 5th inst., Mr. Macdonald, secretary, reported that a committee, appointed two years ago for considering the matter, had recommended that the Edinburgh Show next year should be held on the same ground as in 1890—namely, at Prestonfield. This was agreed to, whilst sanction was

given for the erection of a pavilion for the accommodation of the Prince and Princess of Wales.

Mr. Macdonald intimated that the committee appointed to make trials of machines exhibited had decided to give the large silver medal of the society to Mr. Wilson, East Linton, for a machine for sorting and dressing potatoes. The committee were authorised to continue their operations.

Mr. Middleton reported the result of an inquiry into the objections which exhibitors of implements had expressed in regard to the proposed increase in the rates. The following resolution on the subject was approved:—"The committee are compelled to adhere to their opinion that the society is unable to carry out the desired reorganising of the implement yard without some slight increase in the rates, to which the implement exhibitors are strongly opposed. The committee regret that the implement exhibitors do not see their way to in any way meet the directors in this matter, but under the circumstances the committee recommend that no further action be taken in the matter."

The agenda paper contained the following motion by Mr. Andrew Hutcheson, who was unable to be present:—"That the directors of the Highland and Agricultural Society of Scotland, having observed that in the Small Landholders (Scotland) Bill there is a proposal which would have the effect of transferring part of the work of the Board of Agriculture to the Department of the Secretary of State for Scotland, desire to record their opinion that this step would be detrimental to the interests of Scottish agriculture, and that it is important that all the branches of the work of the Board of Agriculture should remain under the special care of the Minister of Agriculture for Great Britain."

The Rev. Dr. Gillespie said he was prepared to move the adoption of the resolution, and after a short speech it was adopted.

## OBITUARY.

### Mr. J. Bolam.

We regret to learn of the death of Mr. Bolam, of Bilton House, Lishbury, R.S.O., which took place on Friday, the 7th inst., after a brief illness. The deceased was in his 82nd year, and has been connected with the farming industry for a period of sixty years. During that time he held the farms of West Fleetham, Chathill, Tynely, Ellingham (Glebe, and Bilton, the last named since 1882. He was also in business in Henwick as a corn miller, seedsmen, and dealer in feeding stuffs, &c., in which departments his sons took an active part.

In addition to the above he found time for other work, for he was the oldest member of the Northumberland Agricultural Society, and at one time was a regular contributor of reports to the MARK LANE EXPRESS. In addition he was a member of the Northumberland County Council, the rural district council (of which body he was chairman for several years), and of the Alnwick Urban District Council for some time. His familiar figure will be greatly missed in the county, throughout which he was highly esteemed.

### Mr. W. M. Harris.

We regret to announce the death of Mr. W. H. Harris, of Long Sutton, Hants, one of the leading agriculturists of the county. He was for some years a member of the Council of the Royal Counties Agricultural Society, and had frequently officiated as judge at shows in Hampshire and elsewhere.

### Mr. T. Fearnall.

Mr. Thomas Fearnall, of Royton, of Wrexham, who died on Thursday, was one of the most experienced agriculturists in the country, and his farm, which occupies nearly the whole of the township of Royton, is considered a model farm, and has been visited by the leading agriculturists in the kingdom.

The Barnstaple Agricultural Association has decided not to abandon their show next year on account of the visit of the Devon County Agricultural Association to Bideford, but to postpone it from July 3 to August Bank Holiday.

The English Guernsey Cattle Society has given a cup value £3 for competition at the Devon County Agricultural Association's show next year, which will be held at Bideford on the site where the Bideford Horse Show has customarily been held—viz., on the north side of the town.

The attention of the Home Secretary has been called to the danger of anthrax which appears to attend the use of East Indian wool, and he has under consideration the question of bringing it under the regulations—so far as they are applicable—which have already been made for other classes of dangerous wool. Before coming to any decision the Home Secretary will be glad to consider any observations which manufacturers may wish to bring to his notice.

# LINCOLNSHIRE FARMERS' UNION.

## CENTRAL COMMITTEE MEETING.

A meeting of the Central Committee of this union was held at the Albion Hotel, Lincoln, on Friday, when Mr. Colin Campbell presided. The secretary stated that he had received a letter from Mr. A. W. Dean enclosing a copy of the resolution to be submitted to the various branches asking them to discuss the Land Tenure Bill as amended, and to express their views on the matter.

Mr. Wood thought it was no good discussing the question again, and moved they proceed with the business. (Hear, hear.) This was carried unanimously.

### Increased Burdens on the Land.

The secretary stated he was at the annual general meeting of the Sleaford branch, and the chairman of the meeting, Mr. Seth Ellis Dean, had sent him the following copy of resolution, and asked him to put it on the agenda for that day. The resolution was as follows:—"In view of the ever-increasing burdens upon land, a readjustment of the incidence of local taxation is of paramount importance, and this branch urge the central committee to take up the question at an early date." One member thought they ought to back this resolution up. The Secretary: Mr. Dean's idea in sending the resolution to the Central Committee was to appoint a sub-committee to see if they could take any action at an early date.—Mr. Featherstone declared that the only thing they could do was to go to the Chancellor of the Exchequer.—Mr. Bellwood moved that the matter be left in the hands of the General Purposes Committee to see if any action could be taken and the committee report to the branches.—This was unanimously agreed to.

### Pure Beer.

The secretary read another resolution with regard to the Pure Beer Bill, which was unanimously carried at the annual meeting of the Sleaford Branch. It stated that in the interests of the consuming public and the cause of temperance and growers of barley in this country that the word "beer" should be defined and a standard should be established for its manufacture, and that it should contain not less than 75 per cent. of barley malt.

The chairman reminded those present that they had already supported the resolution.

Mr. Bellwood suggested they leave it to the General Purposes Committee, and this was agreed to.

### A Farmer's M.P.

The chairman brought up the subject of Parliamentary representation, and said what a good thing it would be if they could get a Parliamentary representative. He thought it would be judicious if they asked some member of Parliament to their annual meeting.—Mr. Bellwood said it seemed funny to him that other trades and professions could be represented. Joiners and men who earned from £1 to £2 per week could have their members of Parliament, and yet there was not one tenant farmers' representative on whom rested the burden of caring for the interests of agriculture in its present condition.—Mr. Blanshard said working men had learned the art of combination, and they had to learn it.—Mr. Featherstone stated that it was impossible to be heard in the House of Commons as they should be unless they had direct representation there. He thought it would be a good thing to get a Labour member down to their annual meeting. The chairman, interposing, said: "Not necessarily Labour." Mr. Featherstone (continuing): Or if you want something more refined you can get another member to give you his ideas on the whole matter. It was decided to refer the matter to the Parliamentary Committee. The chairman thought if Lord Carrington was able to go anywhere he would come to their annual dinner.

It was decided to form a small committee to inquire into the possibility of having a pavilion at next year's Royal Show.

## ANNUAL MEETING OF THE SLEAFORD BRANCH.

The annual meeting of the Sleaford Branch was held on Monday, the 10th inst.

It was resolved, amidst applause, on the proposition of Mr. Barber, seconded by Mr. Wilson, that Mr. S. E. Dean be reappointed chairman.

The chairman remarked that it was with some diffidence he took the chair for a second year, as he did not look upon that position as a free-

hold. By having a fresh chairman each year they received new ideas and fresh blood, which must prove of great advantage to the union. A slight difference of opinion had arisen between them, but his sole object and idea was to do everything he possibly could to further the true interests of that union.

### Incidence of Local Taxation and Pure Beer.

The Chairman urged that these two subjects were of paramount importance to each member of that union, and every agriculturist throughout the country irrespective of party or creed. The incidence of local taxation pressed unduly and very unjustly upon every occupier of land in the country, being based upon a system which could not be defended by any impartial individual or tribunal. It had been laid down that property was the basis of taxation, and they accepted that principle, and did not expect land to be excluded from taxes, but were prepared to pay a fair and just taxation side by side with other owners of property. Of late years the wealth of the country had considerably shifted, and though it had vastly increased from commercial and mercantile sources, the value of land had greatly decreased. At the present time, although only £160,000,000 was taxable for local burdens, property assessable for income-tax amounted to 600 millions sterling, which showed that two-thirds of the wealth of this country did not contribute a brass farthing towards local burdens. (Applause.) The relief afforded by the Agricultural Rates Act had been altogether swamped by increasing rates for education and the repair of highways, their rates now being as high as they were before the Act was passed. (Applause.)

Mr. T. Jones seconded this resolution, being convinced that what they had just heard was a step in the right direction.

The chairman in dealing with the Pure Beer Bill, proceeded to say that up to the year 1901 they were under the impression that the principal ingredients of beer was barley, malt, and hops, but when the poison scare arose they found this was not the case. They had also ascertained that though the consumption of beer had enormously increased on the one hand, the demand for barley had diminished on the other. What they now required was a definition of beer, for at present it could be made of anything the brewer liked.

Mr. Dean appealed to the temperance party to help them on this matter, and proposed that the Central Committee be also asked to take it up and press it forward.

Mr. Powell advised those present to drink only those beers guaranteed made from malt and hops.

Mr. G. Tomlinson said if they had pure beer in the country it would shut up half the asylums.

Mr. Sardsen thought the Liberal Government had a fine opportunity of winning the gratitude of agriculturists, considering how the late Government had disappointed them in regard to a Pure Beer Bill.

The following resolutions were unanimously adopted and ordered to be forwarded to the Central Committee:—

"That in view of the ever-increasing burdens on land, a readjustment of the incidents of local taxation is of paramount importance, and this branch urges the central committee to take up the question at an early date."

"In the opinion of this branch it is desirable in the interests of the consuming public, the cause of temperance, no less than the growers of barley in this country, that the word beer should be defined, and that a standard should be established for its manufacture which should be from not less than 75 per cent. of barley malt."

A vote of thanks to the chairman concluded the business.

### NEWARK BRANCH.

A meeting of the Newark branch of the Lincolnshire Farmers' Union was held on Wednesday. The retiring chairman (Mr. A. Stretton) had given notice that he would be unable to accept office again owing to business engagements, and after explaining his reasons he proposed that Mr. Storm be raised from the vice-chair to the chairmanship.

Mr. Allen seconded, and it was carried.

Several names were submitted for the vice-

chairmanship, and Mr. J. Pennington was elected.

Mr. Hopkinson was re-elected secretary, and a committee was also appointed.

Mr. J. Pennington proposed that the branch support the Central Committee in their view that the Tenant-right Valuers' Association should make no changes in the rules of their business without the full consent of the Union, and that all inventories be given with full details, and that they be notified of this at once.

It was contended that such a resolution should not be moved without notice being given, and on the proposition of the chairman it was referred to the committee for consideration.

Mr. Everitt Brown proposed "That this union, having supported Mr. Starkey's candidature as member for his division, request him to present a Bill in Parliament that all butchers and poultry dealers selling foreign meat or poultry shall be licensed, and have notices in their shops showing that they deal in foreign goods."

Mr. W. S. Brown seconded.

Mr. Bullen proposed that the resolution be sent to the Central Committee, who would then submit it to all the members in the divisions covered by the union.

Mr. Clarke seconded, and it was carried.

Mr. Hopkinson proposed "that this union considers that, owing to the condemnation of large quantities of tinned food, steps should be taken to advertise the fact by posting notices in order to encourage the public to eat home-fried meat, and thus improve trade at home."

Mr. Boddy seconded, and this resolution was also ordered to be submitted to the Central Committee.

### Farmers and the Milk Standard.

Sir Edward Strachey, in the absence of Lord Carrington through ill-health, received, on Wednesday, a deputation from the Central and Associated Chambers of Agriculture and the Association of Dairy Farmers with reference to the sale of milk. The deputation urged the department to take steps to obtain powers to alter the regulations in the direction of safeguarding the producer against prosecution, if the milk is genuine, even if it is below the standard, but when the fluctuation is due to natural causes. The deputation was introduced by Mr. T. Courtenay Warner, chairman of the Chambers of Agriculture.

Mr. C. Middleton urged that one of the causes for the milk falling below the standard fixed by the Board of Agriculture was the seasonal cause, and sometimes the quality was below that required. Another difficulty was with regard to milking periods. These two were beyond the control of the farmers to alter, as the hours of milking had to coincide with the hours at which they supplied their customers. The time had come when the Board of Agriculture should either prohibit or permit within reasonable limits the use of preservatives in milk.

Mr. J. Sadler, of the Cheshire Dairy Farmers' Association, supported the deputation's views.

Sir Edward Strachey, in reply, said, considering all their premises, the deputation had made out a good case that very great hardship had been inflicted in certain districts upon agriculturists in regard to this question, though he thought there were very great difficulties in the "appeal to the cow" which they suggested, and there was little probability of being able to carry legislation at the present moment upon this point. He thought that, in any legislation on this point, it would be desirable to stipulate that a farmer ought not to be responsible as regards criminal proceedings for the condition of the milk after it had once left his control. That seemed to him only a matter of ordinary justice and fair play. He hoped that the outcome of this deputation might be that the Board might be able to devise some means by which they might alter the present unsatisfactory condition of affairs. Referring to preservatives, Sir Edward Strachey said that at the present moment it was not illegal to add preservatives in such quantities that they should not be injurious to health and in circumstances that they were necessary for purposes of conveyance or carriage to consumers.

At the annual meeting of the Agricultural Organisation Society last week it was stated that during the five years of the society's existence the number of affiliated agricultural co-operative societies had increased from twelve to 134, and their turnover had grown from £9,467 in 1901 to £221,524 in 1905, while in the present year it was estimated that it would reach £350,000. Mr. Yorburgh stated that the only bounds to the usefulness of the society were those imposed by the smallness of its income. It was hoped that before long the Government might give them a grant.

## CORRESPONDENCE.

### A Calving Curiosity.

SIR.—Your correspondent who signs his letter "S. R.," and headed "A Calving Curiosity," and writes to know if any of your readers have experienced a similar case to the one he mentioned, I for one can say I have. When at home with my father we had a Shorthorn dairy cow served to a Shorthorn bull, and about one month after she turned again, and then we put her to a Hereford bull. At calving time, to our great surprise, she brought a calf which apparently was a month before its time, and in a very short time after she brought another calf, which was quite developed and appeared to be to its time. The first calf had all the makings, with white face, &c., of a Hereford, and the last calf the colour and appearance of a Shorthorn.

Both the calves were dead at time of birth, and we nearly lost the cow. I think it occurred about May, and we fed her that summer and sold her the following February for £32 10s.

While writing about calves and their many freaks, perhaps it will be interesting to know what I witnessed this autumn with one of my milking cows. She was down calving, and I saw her turn her head along her side and with the greatest ease suck her own teats, which she did before and after calving.

You are at liberty to make use of my name in which way you like, as I can vouch to the truth of all I have stated.—Yours respectfully,

SAMUEL DREW.

Wallcroft House, Bromyard,  
December 6, 1906.

### The Tomato a Fruit.

SIR.—I observe in your notes in the issue of November 26, that you remark that the tomato is not a fruit but a vegetable.

Now, if you will allow me the privilege of contradicting you, I must state that the tomato is a true fruit for the reason that it is the product of the ovary after fertilisation and consists of the pericarp, mesocarp, endocarp, and seeds.

You would probably have no hesitation in calling an apple a fruit, and yet the apple is not botanically a true fruit, although the tomato certainly is.—Yours truly,

O. R. THORNTON.

The University, Leeds, December 7, 1906.

### The Weights and Measures Muddle.

SIR.—In recent issue of the MARK LANE EXPRESS there appeared a note urging the desirability of adopting a general standard of weights and measures in the different markets throughout the country. I quite agree with all that was said in the note referred to about the whole thing being in a glorious state of confusion and muddle, and I contend that it would be better both for buyers and sellers if the imperial standard of weights and measures were adopted throughout the country. And why is it not done? Simply because certain districts have certain customs, which people in the particular locality have got used to, and no change is made for the want of an organ to begin with. But how absurd it is! Here we have an imperial standard of weights and measures which every child at school learns in his tables, and when he wants to make use of the information he finds that it is no good to him, and he has to begin again and learn about the standards adopted in the local market. The whole thing is just as puzzling to those who study the prices given in your Market Supplement week by week. Take potatoes as an example in point. Wishing to know something about the price of potatoes in various markets, I glanced at the list given in the MARK LANE EXPRESS for December 3. In the Borough potatoes were quoted by the ton, which was plain enough, except Dutch potatoes, which were offered at 2s. 9d. per bag. How many pounds of potatoes are there in a Borough market bag? At Carlisle the return was given at 6d. per stone, which I take it is 14 lb., but they may have their own special stones up at Carlisle. From Doncaster the return came at 6s. to 7s. 6d. per load of 18 stone. If there is 14 lb. to a stone, a load would represent 252 lb., but at Preston potatoes were selling at from 5s. 6d. to 6s. 6d. per load of 240 lb. Again I see at Lancaster potatoes were quoted by the stone, at Manchester by the load, and at Malton by the bag. If one could be sure of the actual weight in a bag, a stone, or a load, there would be no need to complain, but it would take a lifetime to become acquainted with all the local weights and measures used in different parts of the country, and where is the sense in all this muddle? Would it not be just as easy to sell and quote all potatoes in the country by the ton or cwt., instead of being mixed up with bags, stones, loads, and so on. But potatoes are only one item, for when you come to fruit the muddle is worse, with the mystifying terms about pots, kips, sieves, strikes, &c., each one representing a

different weight, according to the nature of the fruit and the locality. It is said that two English languages is the most difficult one for a foreigner to learn owing to our absurdities in the way of pronunciation and spelling, but I am sorry for any foreigners who attempt to master our methods of buying and selling, because to do this is sufficient to turn the hair of any native-born Briton grey. To say that we are conservative in the way we stick to local weights and measures is putting the thing very much too mildly. The whole thing is absurd, and if there are any of your readers who can bring forward arguments in defence of the system, or rather want of system, I should like to hear them.

December 6, 1906.

### The New Fertilisers Act.

SIR.—In publishing in your issue of the 10th the official regulations for drawing samples and obtaining analyses, you omitted to point out that these regulations applied only to samples officially taken with a view to the institution of civil or criminal proceedings.

Fortunately the Act provides for a class of unofficial analyses under section 3 (1), so that a purchaser can within ten days of the delivery, take a sample himself without giving notice to the seller of his intention of so doing, and under section 3 (4) (a) having sent the sample to the agricultural analyst for the county or borough, the analysis is to be sent to the purchaser, and apparently no copy of such analysis is to be sent to the Board of Agriculture as is required in the case of the officially drawn samples.

It is very important that this provision in the Act for obtaining analyses in such a simple manner should be recognised not only by farmers but also by merchants, for according to section 10 (2) the Act applies to wholesale as well as retail sales. County councils will have to arrange for the two classes of analyses, and as they have the power of fixing the fees to be charged respectively, it will be desirable to insist that, if a portion of the fee is paid out of the county rates, the results of such analyses shall be published in the local papers for public information. Further, that the invoice itself, and not a Partial copy omitting the sellers' names, shall in all such cases be sent to the analyst, for the production of the invoice is the only proof of actual purchase. Under the existing Act, farmers occasionally attempt to obtain analyses of samples sent on approval, and are only prevented from obtaining them by their inability to produce the invoice.

It is probable that these unofficial analyses, which are intended for the purchasers own information, will constitute the most useful and practical feature of the new Act, and it is very desirable that such analyses should be encouraged by the fees being arranged on a moderate scale.

JOHN HUGHES,

Agricultural Analyst for Herefordshire.

79, Mark Lane, London, E.C., December 14.

### The Farmers' Club.

MR. F. E. Muntz (Birmingham), the retiring chairman of the Farmers' Club, presided at the sixty-fourth annual meeting of the club, held at the Whitehall Rooms, Hotel Metropole, on Monday. The annual report referred to the satisfactory condition of the affairs of the club, mentioning that the membership was now 915, 184 new members having been elected during the year. The accounts showed the year's receipts as £1,085 5s. 7d., as against £935 13s. in 1905. The ordinary expenditure was £1,015 9s. 3d., being £277 5s. 7d. in excess of that of last year.

After the vote of thanks to the chairman, it was announced that the committee had appointed Mr. Harold Howard, of Bedford, to be chairman, and Dr. J. A. Voelcker to be vice-chairman of the club for the ensuing year.

Mr. H. Trustram Eve, secretary of the club, then read a paper on "Freedom in Farming, with Special Reference to Selling of the Produce," of which we gave extracts in our last issue. A discussion followed, in the course of which

Mr. T. Latham said he thought an agreement between landlord and tenant was quite unnecessary, but, at the same time, it was essential that the tenant should be a competent farmer. Farmers needed fuller information as to the value of artificial manures used to replace the hay and straw sold.

Dr. J. A. Voelcker agreed that restrictive covenants were practically useless, for a bad farmer would grow all crops badly, and the best thing to do would be to get rid of him. But while not inclined to give the tenant absolute freedom, he considered that a landlord would be very short-sighted to impose restrictions on a good tenant and good farmer.

Mr. T. Christian was not inclined to the opinion that agreements were unnecessary, but he thought

they should be so framed as to induce the tenant to keep the farm in good heart and condition to the very end of the term.

Mr. Amos considered that the only way a tenant could be assured of receiving full value for improvements effected by him was allowing him to sell his tenant-right or goodwill to the incoming tenant.

A vote of thanks to Mr. Eve concluded the meeting.

### Borough Notes.

The uncertainty of human affairs is frequently exemplified in the hop trade. We predict that this or that will surely come to pass, and the opposite of predictions happens. We argue from accepted premises, and our arguments are falsified by unforeseen results. We must, therefore, always qualify our expectations by the recollection that "one never knows what may occur." An illustration of the difficulty of any ideas making a reliable forecast is before me to-day.

During the last few weeks clouds have hung heavily over the Borough, and even as recently as the beginning of this week, there seemed to be no hope of any revival of business. We had all settled down to wait for the new year, having almost abandoned any ideas of earlier improvement. But now a different aspect is presented. Without any apparent cause, a certain demand has set in, merchants are buying, and I am happy to report that values have advanced by 5s. to 10s. per cwt.

I cannot ascertain that this movement originated with the consumers, therefore we may safely conclude that merchants are convinced that soon after Christmas brewers will be compelled to replenish their stocks, and that it is well for traders to take advantage of the low rates to which prices have fallen, in order to be prepared for the expected business.

Whatever may be the influences that are working, it is very satisfactory to know that the results are thus far favourable. From this better tone which undoubtedly governs the market to-day we may hopefully anticipate further progress, and I earnestly trust that such anticipations may be realised. Although some holders are not unwilling to sell at current figures, there is no general pressure in this direction, the majority having made up their minds to wait for the new year. This is wise policy under present circumstances, as it is generally considered that values cannot go lower, and the present tendency seems to suggest the probability that profit will accrue from a continuance of firmness.

It will be interesting to watch the course of events next week, usually the most quiet week of the season. If it should reverse our previous experience, it will add zest to our holiday, and impart brightness to many a family gathering.

### Our Foreign Trade.

We are beginning to feel the force of the flood of increased imports, as according to the returns last issued by the Board of Trade we have received during last month from the United States 26,903 cwt., and from other countries 23,944 cwt. The total, 50,847 cwt., adds a heavy weight to our depressed market, and creates fear lest we shall be burdened still further, and if so, what the results will be.

Our imports since the beginning of the season also give rise to thought as to our future prospects, as we have received from all sources, since September 1, no less than 82,971 cwt. of foreign hops, which is rather more than double the weight of our imports during the same period of last year.

Unfortunately we have very little to set off in our exports, as they only total this season to 4,010 cwt., leaving the balance against us of 78,961 cwt., whereas last year at this time the

balance was only 30,629 cwt. Of course we cannot forget the exceptionally large English crop of 1905, and it may therefore be argued that the increase of imports this year is proportionally unimportant, when our present limited native supplies are taken into account.

This argument would be sound if we had as strong a market as might be reasonably expected as the result of our small yield. But, unhappily, our planters have been grievously disappointed, and under present conditions the increase of imports can only be looked at with apprehension.

There is, however, some consolation to be found in the fact that the manufacturing trade of the country is rapidly improving, and that consequently artisans are generally well employed, and are earning good wages.

There is therefore room for hope that the consumption of beer will increase without any detrimental effects, and that for the excessive supplies of hops an outlet will be found.

In such case our enlarged imports will not hurt us to any material extent, although there is little doubt that they must act as checks upon the advancement of values that, in their absence, would almost certainly be brought about.

### The Proposed Memorial to the late Dr. Fream.

A meeting of the General Committee of the Dr. Fream Memorial was held on Wednesday last in the Prince's Saloon of the Agricultural Hall, Islington. The Earl of Jersey, P.C., President of the Committee, was unavoidably prevented from attending.

In the regrettable absence of the Hon. Treasurer, Sir George Barham, the Hon. Secretary, Mr. G. F. Strawson, reported that since the last meeting a very considerable advance had been made, and that many subscriptions and promises of support had been received. Amongst these was a subscription of 10 guineas from the Royal Counties Agricultural Society and 25 guineas promised from the Surveyors' Institution.

Upon the motion of Mr. Martin John Sutton, it was resolved that the subscription list should be kept open meanwhile, as there are still many old friends of the late Dr. Fream and others in sympathy with the movement who have not yet had an opportunity of contributing towards the fund. Mr. Strawson reported that the General Committee now numbers 143, and he would be glad to receive early intimation of any further contributions towards a Memorial for the perpetuation of the name of one whose life's work was devoted to the cause of agriculture.

All subscriptions and communications should be addressed to Mr. G. F. Strawson, Hon. Secretary to the Dr. Fream Memorial, 71A, Queen Victoria Street, London, E.C.

### Messrs. Prentice's Barley Competition.

The eighteenth yearly barley competition, arranged by Messrs. Prentice Bros., of the Great Eastern Chemical Works, Stowmarket, and Great Yarmouth, for the best samples of barleys grown in the Eastern Counties during the season with the aid of "Prentices' Champion Barley Fertiliser," proved as popular as any of its predecessors.

The conditions of this competition are such that any farmer can compete who has used not less than 2 tons of this fertiliser on any given acreage; no stipulations are made as to the seed barley, but every competitor must have at least twenty coombs, from which samples had been taken, if the judges need to verify the original samples sent in for the awards. Messrs. Prentice set aside about £100 per annum for these competitions, and they claim a large amount of credit for the increased interest in the preparation and tilling of this valuable crop. Improvements are manifest everywhere, owing to more careful seeding, harvesting, and threshing, than was the case generally a few years back.

It is not the actual money value of the prizes won by the successful growers that is of so much consequence as an outcome of these annual competitions, but the impetus given to barley growers generally to see that the soil is so carefully prepared and manured that the very best results are obtainable. Year by year the samples exhibited at Messrs. Prentice's exhibition show a steadily improving quality, and this year's competition was said by the judges to contain samples of excellent grain far above those of former years.

The judges were Mr. W. W. Pallett, of North Walsham, and Mr. Ernest Cross, of Norwich, two of the largest buyers of malting barley in the Eastern Counties. These gentlemen had a somewhat difficult task in adjudicating the eventual winners. They spoke in very flattering terms of the excellent assortment of samples, and Messrs. Prentice were congratulated on having received so marked a testimony of the value of their champion fertiliser, from which all the samples were grown.

The leading prizes were awarded as follows:—First prize, Messrs. T. and C. Bickmore, Flories Farm, Great Tey, Kelvedon, Essex; second prize, Mr. George Horrex, jun., Brettenham; third prize, Mr. George P. Watkins, Culpho Hall. The seed of the first prize sample was Hallett's Pedigree Chevalier; date of sowing, March 10; date of harvesting, August 28; soil, heavy loam; preceding crop, wheat. The second prize sample: Seed barley, Page's; date of sowing, April 3; date of harvesting, August 28; soil, heavy; preceding crop, mangolds. The third prize sample: Seed barley, Chevalier; date of sowing, March 31; date of harvesting, August 20; soil, mixed; preceding crop, mangolds and cabbages.

The judging was followed by a *recherche*

luncheon under the presidency of Mr. Harry Prentice, and the judges in response to the toast of their health referred in terms of the highest praise to the all-round excellence of the samples, so much so that the task of selecting the prize-winners was anything but an easy one. The prize-winning samples were regarded by them as exceptionally good, and so evenly matched that there was little to choose between them.

Mr. Pallett, in the course of some remarks on the quality of the barley grown this year in East Anglia, alluded to the great value of competitions of this kind in encouraging agriculturists to give closer attention to the production of fine quality barley of the character which had come into competition by the use of high-class barley fertilisers, and suggested that the Messrs. Prentice might with advantage introduce an annual competition of the kind in Norfolk in connection with their Great Yarmouth branch.

### National Potato Show.

The third annual show of the National Potato Society, held at the Horticultural Hall, Westminster, last Thursday and Friday, furnished gratifying evidence that growers this year have had little disease to contend with in their crops. Over 400 entries were received from all parts of the country, and although the average of success was highest with the southern growers, the chief prizes, including the President's Challenge Cup, were deservedly awarded to a Lancashire grower, Mr. B. Ashton, gardener to the Earl of Lathom, of Lathom House, Ormskirk. The silver medal for the best dish of white potatoes, went to Mr. S. Cole, Earl Spencer's gardener, for the variety Duchess of Norfolk, and the silver medal for the best dish of coloured potatoes to Mr. A. Lawson, Kingskettle, Fife, for the variety King Edward VII.

An interesting and useful feature was the competitions in cooking. There are, it is asserted, no fewer than 250 different methods of cooking the tuber, but the conditions governing the competitions did not permit of much diversity of method. The society provided gas stoves, saucepans, and the potatoes to be cooked, and seven representative popular varieties were selected—What's Wanted, Duchess of Cornwall, Factor, Highlander, Peacemaker, Up-to-Date, and Warrior.

The Cheshire Agricultural Society have decided to hold their 1907 show at Chester on Wednesday, August 28, entries closing on August 7. The secretary is Mr. T. A. Beckett, St. Werburgh's Chambers, Chester.

Over £1,100 was subscribed last night at the thirty-second anniversary dinner of the Metropolitan Dairymen's Benevolent Institution, held in London.

## S. M. WILMOT & CO., BRISTOL.

IMPROVED GALVANIZED STEEL SHEEP DIPPING APPARATUS.

Hand-dipping Tubs from £2 2s.

The most complete, thoroughly practical, economical, and cleanly dipping arrangement in the market. Always ready, not as wooden tubs—always saking. The best Sheep Rack made, £3 10s. Improved Lamb Rack and Troughs, £2 2s. Largest Makers of Galvanized Sheep Troughs.

## THE "HUNTER" BUGGY.

National Telephone—1533 South. Telegrams—"Buggies," Glasgow.

Also GOVERNESS CARS.

Portwilliam, Wigtownshire.

DEAR SIR,—It is with great pleasure I write you to say a word about your famous Buggies. Having been practically out every day driving in summer and winter, and in all sorts of roads, I cannot find a more suitable gig, they being light and durable, warm and very comfortable, and I can recommend them to anyone who has a bit of driving to do.—Yours truly, Manure Merchant.

# PRACTICE WITH SCIENCE

It will be generally admitted that unless the findings of science are carefully tested by the experience of actual practice, that science is more likely to hinder than to help the farmer. This is particularly true in relation to the question of the analysis of Feeding Cakes and Meals, although the

Proposed amendments in the Fertilisers and Feeding Stuffs Act of 1893 will tend to give greater protection to the farmer and improve the position of the honest manufacturer. We do not under-rate the value of the chemist's certificate, for we have always insisted on the importance of a good analysis, and have had our guarantee printed on every bag, as well as on the invoice, which, so far as we are aware, has not been done by any other manufacturer. Moreover, we have always asked our customers to have the goods analysed regularly, and in the event of any deficiency being found, we bind ourselves to pay the analyst's fee and three times the value of the deficiency.

The following letter from an esteemed customer, who is a very extensive feeder of stock, is typical of many others received:—

[Copy.]

Dear Sirs,

Greengill, Penrith.  
25 11/05.

Having used a quantity of your Fattening Cake, averaging up to 100 tons per annum, for the last 13 years, I have much pleasure in stating it has given me every satisfaction.

Previous to using your Cake I was a stout believer in pure linseed, but find your quality of Cake gives better results at considerably less cost. Being both a Winter and Summer Feeder, I also see telling results on my grass land, it being both earlier and sweeter where the Cake has been used.

I might say I have used other Compound Cakes costing less money, but find yours the most satisfactory and always analysing according to guarantee.

—Yours truly,

(Signed) THOS. MITCHELL.

Messrs. R. Silcock & Sons, Liverpool.

fed; but, as we have often pointed out, it is possible to show a high analysis and yet leave the cake or meal at very low feeding value, and it is here that science must be confirmed by practice. It is no secret that unsound materials (unless absolutely perished) will in most cases analyse as well as sound ingredients, although the former may be of very little value for feeding; while in the case of oil, it may also show a high analysis, and yet prove to be of a kind altogether unsuitable for fattening purposes. You must test the analysis at the feeding trough, you must combine

## PRACTICE WITH SCIENCE

if you are to buy to the best advantage as regards price and quality. The feeder's interests are fully protected by our system of doing business, as we not only give a guarantee, but penalise ourselves in the event of any deficiency. Hundreds of farmers bear testimony to the excellence and value of Silcocks' Cakes and Meals for Cattle and Sheep.

## Seasonable Topics.

**The Spirit of Christmas.** CHIEF attention for a few weeks past has been centred on fat stock shows and Christmas markets, but they are now all over, the prize beasts have been turned into beef, and we hail once more the Yule tide feast. A merry Christmas to you! As we write the old, old wish is being passed from lip to lip, also, we hope, from heart to heart, just as it has been throughout the generations that have passed. And why should not the world make merry at Christmas time! In these rushing, pell-mell days when keen competition makes life's race a hard one to run there is little enough room for sentiment and relaxation, and we have reason to be thankful for the spirit of Christmas, which takes possession of men at this time of the year. Of course, there are Scrooges now, just as there were in Dickens's time, who wrap themselves in their wet blankets of discontent and vote the whole thing to be humbug. Let them think so, and enjoy the thought if they can, so long as they keep themselves aloof from those who believe in Christmas and honour its traditions. We have nothing in common with the Scrooges and the grumbler, but wish every one of our readers—a right merry Christmas!

**Christmas Boxes.** IN penning this paragraph a vision of recent legislation dealing with secret commissions rises before us, and wonder how far in the future it will affect the giving and taking of Christmas-boxes. The question is, of course, what is a genuine Christmas-box and what is a bribe? As we travel on the railway at this time of the year we notice hamper and boxes, turkeys and game being sent from business houses of all kinds to various customers, but it is no business of ours to ask whether the giving of the same is prompted by a natural outburst of Christmas generosity or whether it is merely a bait to catch orders. Apart from this, however, it is characteristic of men to be more free-handed than usual at Christmas time, and the boy who brings you your daily paper, his Majesty's servant who hands in your letters every morning, and the fellow who clears your dustbin, all look to you for their Christmas-box with an expectation that has grown natural through long custom. For our own part we see nothing wrong about the genuine Christmas box, and grudge not the little trifles once a year which are given to those who minister in one way or another to our

daily wants. We are taught to believe that it is better to give than to receive; just so, but human nature likes receiving all the same, and there are few of us who do not grow excited over the Christmas boxes that drop in from friends at this season of the year.

### The Mistletoe Trade.

The weeks that precede Christmas, to see carts and waggons journeying to the railway stations, and laden with mistletoe. One may gather from this that the parasitic plant, which is associated with Christmas in every British home, is a means of bringing some grist to the mill of those farmers who cut it in their orchards and send it to market. Such, indeed, is the case, and we know men who look forward every year to making something tangible out of the mistletoe which grows on their holdings. Mistletoe is not everybody's plant—perhaps some of our

ing on the limb of an apple tree, and the mind wanders back over the pages of history to the days of the Druids, when the cutting of mistletoe was a great occasion, accompanied by feasting and the sacrifice of a white bull. There is no sentiment in the mistletoe cutting of to-day—it is all a question of money—but the sentiment comes in when, after passing through various hands, the mistletoe is suspended in some English home on Christmas Eve.

### Christmas Bills.

IT seems unfair to mix up a sordid matter-of-fact thing like bills with Christmas sentiment, but there is no getting away from them, and when one section of humanity is sending out its cards of greetings and good wishes the business element is preparing and posting its lists of glaring figures, which remind you of your liabilities, and also of the fact that Christmas is the time when you must pay, pay, pay. Of course there is one way of dispensing with Christmas bills—pay as you go on, which is an excellent principle for those good people who have a certain income coming in at a certain time, but the farmer does not belong to this class, and he has to sell what he produces before he can discharge his debts to other people. Very often, unfortunately, he has to sell in a bad market in order to get the money that is necessary to meet current expenses; but if Christmas bills are unavoidable one piece of good advice may be accepted—keep a strict account of what you owe. Christmas bills have no terrors if one knows what is owing and there is a balance at the bank to meet the liabilities.

PLOUGHING.

readers have never seen it growing—but it flourishes on the cider apple trees in the West of England, and is treated as a source of income. Of course the plant is a parasite, and its presence on apple trees is not an indication of high-class fruit culture, but we are afraid many farmers in the western counties are far from being up to date in the way they treat their fruit trees, and trouble not as to whether the mistletoe growing on the branches is injurious or otherwise. From a sentimental point of view there is something fascinating in the sight of a big bunch of mistletoe grow-

there has passed away a farmer friend of ours of the good old school, who to the very last took a delight in keeping up the old yuletide custom of his forefathers, and we think now of early boyhood's days spent near the manor farm, which was liberty hall at Christmas time. We can see now the roaring log fire in the old kitchen, where master and mistress, friends and relatives, nonservants and manservants made merry altogether once a year. We can taste still the "posset" that was sent round hot and steaming, hear the singing of the wails, the rattling of

**Christmas Customs.** OLD customs die hard in rural Britain, and to the agricultural community may be given credit for attempts at keeping them alive. Since last Christmas

the sticks of the "Morris" dancers, and the jargon of the lads who bedecked with coloured paper, went through some extraordinary dramatic performance in the kitchen, and then gorged themselves with mince pies as a reward. It sounds somehow old-worldly to be writing of these things, as many old Christmases had died away, and with them, we are afraid, some of that spirit of hospitality, sociability and good fellowship, which was characteristic of the yuletides of long ago.

### The Passing Year.

THE year 1906 is growing old, in another week it will have reached its end and be gathered to its fathers, leaving nothing behind but its memories and its records. In looking back over the months that have rolled away since we wished 1905 adieu, we can mark many changes, and make a summing up as to the way we have fared in the year now passing to its close. There were figures and faces round us last Christmas that are not here now, and the farming world mourns the loss of good men who, though dead, live as examples for the rising generation to follow. When we think of some years in the past we have reasons to regret the departure of 1906, for farmers have been favoured in it. A good season and good harvests are things to be thankful for, and though farmers have still many grievances, and there is room for much improvement in their affairs, still they may enter on the coming new year with hope and satisfaction that they have not fared amiss in 1906.

### The Holiday Week.

IN some of the dairy farming districts in the Midlands it is customary for the single men and maidservants to leave their places on Christmas morning, and enter on another year's engagement either with the same employer or a fresh one on New Year's Day. In the old days, of course, cheese was made at every farmhouse, and consequently Christmas, when cheese-making was at a standstill, was a convenient time for changing servants. Now that milk selling has taken the place of cheese-making farmers are put to more incon-

venience, but the old custom must be kept up, and the farm lads swing away on Christmas morning with their bundles under their arms to enjoy their one week of freedom in the year. They do enjoy it too in their way, for hiring fairs are still held at the various local market towns during the week—"Gauby's Market" is the name given to them—and though there does not seem to be much actual hiring done now, the show men, and the cheap jack, and the purse trick swindlers are in attendance, and as alert as ever in relieving the farm lads of their superfluous cash. After all, one can hardly wonder at the youths letting themselves go a bit in Christmas week, because apart from the time being one of general festivity they know that New Year's Day begins another round of toil which has little break Sundays and week-days for a long twelve months—and farm lads are human like the rest of us.

### The Social Life of Farmers.

THERE is a considerable amount of whole-hearted freemasonry amongst farmers. Their lives are spent for the most part in quiet places, and there is a spirit of neighbourliness amongst them that one does not find in other walks of life. From time immemorial it has been customary for farmers to pursue a spirit of borrowing and lending, to help one another, and take a mutual share in the troubles and pleasures of each other. This spirit displays itself in the direction of mutual hospitality, and about Christmas time it is customary for farmer Giles and his family to spend a social evening with farmer Brown, and the former in due course returns the compliment. This kind of thing is doubtless a relic of the customs which existed when farming flourished, but when rural districts were much more isolated than they are now, and when country people had to make their own amusements or go without them. Nevertheless, the custom is a commendable one, for it is not good to have one's nose always on the grindstone, and people who are obliged to live in towns miss that neighbourly spirit which is still a living thing among farmers.

at the annual dinner which had been received from the Liberal M.P. for the division, Sir Robert Hobart. 'This, said the right hon. gentleman, is a non-political organisation, and this letter is of a political character! Well, the Romsey Society is of the same type of organisation as the Farmers' Club. The letter simply referred to the fact that the Liberal party had passed through the Commons a Bill giving compensation for damage done by winged game, giving freedom of cropping and disposal of produce, and yielding compensation for unreasonable disturbance. These remarks belonged to the same category as those made by Mr. Chaplin. If the Right Hon. Evelyn Ashley was right the Right Hon. Henry Chaplin was wrong. You can't have two standards of conduct. Now, do you denounce Mr. Evelyn Ashley's conduct as arbitrary and unfair?' Well, frankly, I shall refuse to answer; I prefer a Sphinx-like silence.

### A Wise Inquiry.

The appointment by the Government of a committee to inquire into agricultural education should revive interest in the Bill of Mr. Jessie Collings dealing with the subject. Mr. Collings—confessedly the precursor in this matter—would associate with each school not merely what I may describe as minor museums of practical and physical interest, but actual gardens and a definite training in farm-life. With him in this purpose have been associated so many distinctive politicians that, frankly, I find it difficult to explain his failure to crystallise his Bill into an Act. I can only account for it, in fact, by reason of Mr. Balfour's ineradicable lack of sympathy with the agricultural interest. If Earl Carrington's committee proceeds upon the lines indicated by Mr. Collings it will have in itself evolved a method of dealing with the problem on sane lines. It is at least of moment that the political mind has now been wrought to such a height of sympathy that it is willing to deliberately consider this matter, and is anxious that it should be rescued from the mere partisan interest and intention. Mr. Collings—who certainly has not been over-friendly to the present administration of the Board of Agriculture—should not be ungrateful to Earl Carrington for this attitude. He could not have done better himself, and he was able to achieve less when his own friends were in power. I pray he does not denounce the Government—he is really full to repletion with denunciation—for its kindness and sympathy.

### What Radical Land Reformers Want.

I see that the National Liberal Club has reprinted the lecture which Mr. James Rowlands, M.P., the secretary of the Land Law Reform Association, delivered at the club on the tenure question. I am glad of this, for the lecture gives us a view of the internal mind of Radical land-reformers. Mr. Rowlands is, frankly and avowedly, a Channingsite. He would reproduce in this country the agrarian economy of Denmark, with, I must confess, the intention of supplying ourselves with our own necessities. He is, too, in a sense—heavens, how he will exorcise me as he reads—a Chamberlainite. "Why," exclaims he, in effect, "go to Denmark for what we can produce ourselves." He takes butter, cheese, eggs, and—he dwells with almost unctuous affection on the quadruped—pigs. All that we require could be produced in this country. The pig is to him no Gadarene swine that runs down the hill to destruction; it is a source of profit and pleasure—he would produce him at home, season him with sage and onions, and serve him up at a financial advantage. And how would Mr. Rowlands accomplish this? Would he mathematically parcel out the land? Well, he and his friends do not entirely believe that the big farmer is an ex-rescence—they would not divide the land into pound plots. They would, however, establish a tenure system far beyond that suggested in the present Land Tenure Bill. They would have the State step down and create a disciplined system of small holdings. They would have the State establish a system of cheap transit. They would have the State encourage a wise method—even to the establishment of depots of co-operative distribution. They would resist (more power to 'em) the transportation of our best bone and sinew, and encourage it to stay at home. They would practise our system of rural education. They would ask the State by financial means to aid in the voluntary dispossession of landlordism.

## Agricultural Politics.

BY A LOBBYIST.

### The Bill in the Lords.

What was the ameliorative influence upon the House of Lords it is unnecessary now to speculate. A fortnight ago its temper towards the Land Tenure Bill was almost fevered, certainly splenetic. A fortnight ago no observer would have dared prophesy that the Bill would have gone through with the celerity that it has. As a fact, I myself, with my twenty years' experience of Parliament, would have prophesied that it would emerge from the noble crucible as a mangled, mutilated *tertium quid* (Mr. Birrell, I thank thee for the phrase). At this moment (I write, unfortunately, early) it is in a large measure a reflection of what I will describe as the chamber-of-agriculture mind. It passed back to the House of Commons having this guise. Of course, I make one particular exception to the Duke of Richmond's amendment forbidding freedom of cropping and free disposal of produce (in the case of leaseholds) in the four years immediately preceding the termination of the tenancy—an ostracism which, I am compelled to say, deprives the measure of more than half its effectiveness. Still, despite the benison which the Bill in its original shape received from the Central Chambers (and Earl Carrington is quite right in making the most he could of this benison), I aver that it now more deliberately reflects the farmers' anxiety. "Farmers' anxiety!" A pretty phrase this, which has no justification. If anything has been apparent in the debates over this Bill it is—to use the assertion of a glib lordling who has a seat in the Lower House—that farmers do not individually care a tinker's curse about the measure. Had it been an urban Bill, and as directly affected one of the supreme urban interests, we should have had the very stones in the streets in clamorous rebellion against its opponents. Now, Arcadia has seemed to be afflicted with a double-dose of its inherent stupor.

### Lord Carrington's 'Cute Plea.

After all, Earl Carrington—whom, by the way, his colleagues ought to dub "Mr. Worldly-Wise," for his conduct of this measure in the Lords was marked by astuteness, conciliatoriness, and grant sagacity—was entirely right in

the reasons which he urged for refusing to accept Earl Wemyss's antagonism to compensation for unreasonable disturbance. His suggestion, urged with racy, refreshing, unconventionality, came to many of the peers as in the nature of a revelation. Who would suffer if this proposal were eliminated from the Bill? Why, primarily, the leaseholder; and the leaseholder is the best of all tenants. The Act—for that it will become an Act is now indisputable—would thus become an instrument for the advantage of the yearly tenant; hence the landlord would be subjected (if the amendment were carried) to ever-recurring resorts to the officialdom established under the measure. I noted the House as the Minister for Agriculture expounded this practical plea, and I perceived that it was at once possessed of that physical restlessness which bespeaks mental disquietude. Noble lords looked at the author in amazement, and when the calm, icy-level accents of Lord St. Aldwyn enforced the point they were convinced. Lord Carrington's worldly-wisdom had avoided the supreme menace of the Bill. By the way, I wonder how his lordship's logic commends itself to Parliamentarians, say, of the type of Col. Kenyon-Slaney, Lord Turnour, and Lord Helmsley?

### On the Horns of a Dilemma.

I have been placed on the horns of a dilemma—and that, too, with deliberate intent by a well-known Hampshire farmer. This act of his is anent my justification of Mr. Chaplin's conduct in introducing the subject of the agricultural report of the Tariff Reform Commission at the Farmers' Club dinner. "Now," writes this correspondent of mine, "don't you, I beg, be among those who say that what in the captain is but a choleric word, in the seaman is sheer blasphemy. Mr. Oscar Bowen, in protesting against Mr. Chaplin's action, simply did what a friend and political ally of Mr. Chaplin's has done. The Right Hon. Evelyn Ashley—who, like Mr. Chaplin, is a Unionist, and who, like Mr. Chaplin, is an ex-Minister of the Crown—refused, as president of the Romsey Agricultural Society, to present a letter to be read

### Ashford Fat Stock Show.

Amongst Kent fat stock shows none is senior to the above. This year's show was its forty-ninth annual exhibition, and in all its sections there was no sign other than that of progress. The two features of this show, so far as regards the live stock section, were the Sussex cattle and the Kent or Romney Marsh sheep. Taking the former first, we found it to be one of the best of the year, and when the special merit of its principal entries be considered, there are good grounds to term it a first-class exhibit of this grand old pure breed of beef cattle, the antiquity and purity of which exceeds many of the present-day more widely-known breeds.

Mr. W. Levett's grand steer, bred cup winner at Smithfield, won similar honours here and also the champion honours of the show, a grand animal in all respects second; and third winners in the senior class were from Messrs. W. F. Winch and F. S. W. Cornwallis. The two year old class was a large one, many of its exhibits showing superior merit, notably that proudly fleshed steer of the Earl of Derby's, the winner, and the almost equally good one that won second honours for Mr. L. Hardy, M.P. The heifer classes were not so well filled as the steers, and the winners in these came from the herds owned by the Earl of Derby and Mr. W. Ford. The Earl of Derby's success at this show was completed by the first prize in the

The calf class proved to be a good one, and its winner, Messrs. F. A. and E. H. M. Denny's grand young Shorthorn steer, was one of the best of its age seen in the South for some time; Messrs. Berry and Sir H. E. Dering were respectively second and third.

Reference was made in our introduction to the general excellency of the Kent or Romney Marsh sheep classes, and from the comments heard around the pens it was evident so high an average degree of merit was not anticipated, when the large number of entries was taken into consideration. The wether class had all its six pens present. Mr. C. Gordon Neame was first and second, Mr. J. E. Quessted second, and Mr. C. Fife third, with a further prize for Mr. H. Rigden's capital pen. This was the order of awards, but except to the expert but little difference could be noticed between the three leading pens, so close were the respective merits. The fifteen entries in the lamb class made up one of the strongest representing this breed seen for some long while. Here Mr. T. Wotton was well to the fore. First and champion honours went to his excellent pen, with the first to a second entry. Second and third honours went to the share of Mr. C. Gordon Neame, the better pen of which were splendidly matched and of excellent merit. Sir H. E. Dering, Bart., owned the fourth prize pen, a pen in which were many qualities fully sufficient to have secured

### Royal Dublin Society's Winter Show.

The above Society held its annual show in the halls of the Society at Ball's Bridge on the 12th and 13th inst. The weather was comparatively reasonable, being very cold, though rather unpleasant in the way of gusty wind and occasional sleet upon the first day. The attendance was again somewhat disappointing, the winter show of the Society failing to attract visitors beyond those immediately interested either as exhibitors or purchasers of the stock exhibited with perhaps some breeders and farmers added.

The prize schedule was considerably altered from previous years and the number of classes very considerably reduced. This had the effect of reducing the number of entries, which gave the show rather the appearance of being a very small one. The general quality of the stock was in most cases, notably the in-fed and small cattle classes, very superior to last year's exhibition, and as regards the out-fed section, though there were a good number of specimens that could not be considered show stock, yet there was a great quantity of first-rate beef here, and beef which, though older, had cost less money per lb. to produce than much of the early-matured, milk-fed article.

A very large proportion of the cattle were cross-breeds in one shape or other, pure breeds being shown in very few instances. The crosses gener-

SHORTHORN STEER.

This Steer won First Prize for Shorthorn Steers not exceeding 2 years old and the Cup for the best Shorthorn, at the recent Smithfield Club Show. It was bred and exhibited by Mr. J. Ross, Melkley Tarrle, Fearn, N.B., and at time of exhibition was 1 year 8 months 3 weeks 2 days old, and weighed 12 cwt. 2 qrs 8 lbs.

calf class, won by a notably evenly fed and well-grown young steer just under twelve months of age.

The other section of the cattle classes was for cattle of any other pure breed or cross-bred. Here again there were many fine exhibits, none of which could excel Mr. W. Levett's typical Aberteen-Angus steer bred by Mr. T. Wotton. This animal was first in its class and first for champion honours, being quite one of the best of its breed seen out this season. Two others of the same breed won second and third for Mr. W. W. Berry, whose herd also supplied the winner in the younger steer class, in which two locally bred and fed exhibits, owned by Messrs. R. W. Wood and J. E. Quessted, were second and third; an heifer of fine symmetry, but somewhat soft to the hand, from Mr. W. Catley's herd, bred by Mr. C. Stephenson, was winner in a very good class of older heifers. Mr. W. W. Berry with a Scotch-bred crossbred took second honours.

In the winner of the younger heifer class, Mr. R. J. Bilston owns a remarkably good fleshed and typical exhibit that handled well, Sir H. E. Dering's entry taking second honours.

them a higher place in the class. Many, indeed most of the other entries, came in for some notice of higher or lower degree.

The Southdown classes were of good merit; a capital pen won first honours for the South-Eastern Agricultural College at Wye, Mr. W. W. Berry taking second and third with two pens bred by Colonel W. W. Hammond. The College pen won also champion honours.

The lamb class was a capital one; the three leading pens, two from Mr. W. M. Cazalet and one from Lord Northbourne, were of first-class merit; the former took first and third and the latter second award. A capital class of crossbred lambs finished this section; the winners were Mr. W. M. Cazalet, Captain S. Webb, and Sir H. E. Dering.

The pig section was not a large one, but its quality was very good, and that section of the show given over to the classes for roots, corn, hops, wool, butter, and bread was one of the best we have seen here for some considerable time, making one of the most interesting features of this well-managed and popular show.

rally were Herefords and Shorthorns, Angus and Shorthorn, Shorthorn and common cows, or Angus and Hereford, also a good number of the small crosses were produced by Dexter or Kerry blood, intermixed with the above larger breeds. The stock generally, as intimated, were superior to last year, and this may be taken to mean better in quality and shape as well as in the manner in which they were brought out. The bulk of the awards in the past have been cross-breeds more or less, but on inquiring why some few names that had been very successful in past years were not to be found in the present catalogue, the answers received were to the effect that some of them were finding it more profitable to breed pure-bred stock now that the export demand is so good, and were accordingly devoting their energies and abilities in that direction. For all this, however, the feelers' spirit of fascination still clings to many Irish graziers whose names were yet to be found in the catalogue, and the animals exhibited by them possessed the same capital finish as regards feeding and with an improved appearance as regards breeding. The weights of the cattle were generally fairly satisfactory, and the breed-

ing, as intimated, of an important character. It was simply a triumph for the purely-bred stock that though so few of these were exhibited the championship of the entire show fell to one of the number. This was a purely-bred Aberdeen-Angus bullock, bred and exhibited by Mr. R. G. Nash, sired by Jumper 2nd out of a cow by Wilfred 22nd, which at two years and ten months old scaled 16 cwt. 2 qrs., and presented admirable breeding, shape, and quality. It had been intended to exhibit this bullock at the English shows, but a little lameness developing it was not deemed prudent to risk the long and trying journey across the water, otherwise his chance of success would have been more than a good one. Following upon this animal, the reserve champion was also practically purely bred, being by a Shorthorn bull out of what is termed a common cow, the other was bred and exhibited by Viscount de Vesci and sired by Baptou Jehu out of a common dairy cow. At a year and about seven months old this steer weighs 11 cwt. 2 qr. 12 lb., and is very perfect in his build and outline, with good quality of flesh and plenty of it. There were also some, indeed rather a number, of very superior Hereford and Shorthorn crosses exhibited, Colonel Everard's entries providing some admirable ones, including the first prize steer under three years old and over two. This steer was very shapely and scaled close upon 16 cwt., and was full of quality without excess of feeding. Miss Staples, as usual, also contributed some very good crosses of Angus and Shorthorn crosses, with which prizes were won. The Earl of Bessborough was also a successful exhibitor in these classes with good Angus crosses. Mr. Matthew Franks, Mr. M. Farrell, Mr. E. J. Beaumont Nesbitt, and Mr. H. De Stevenson were also well represented.

Coming to the Kerry, Dexter, and small cattle classes, which were well filled with very fine quality stock, the championship for the best of the section was awarded to Mr. M. H. Franks for an Angus and Dexter of 10 cwt. live weight, very level in symmetry, and nicely finished, altogether a very nice heifer. Mr. R. J. Nash was also successful in winning one of the prizes with very neat Dexters or crosses, so was Mr. L. F. Ball, Mr. A. Alexander, Mr. Farrell, the Marquis of Waterford, Mr. Griffin, Mr. Woods, Mr. Williams, and one or two others.

The outfed section was filled generally with older cattle that had been more lightly fed in their younger days, and allowed to develop gradually upon natural food, many of these were of Shorthorn blood, and had grown into 16 cwt. to 19 cwt. without being in any way excessively fat, and a good number of them were well shaped and short legged. The same may be said of a number of very big grown Angus Cross bullocks that ran into 16 or 17 cwt. each. The chief winners in these were Mr. Nicholson from Co. Meath, Mr. Markey, Mr. Molloy, Mr. Kelly, Mr. Portman, Mr. M. Farrell, the Earl of Bessborough, Mr. E. J. Beaumont Nesbitt, and one or two others. A very satisfactory feature of the exhibition was the capital trade that prevailed for practically all classes, many animals being sold on the eve of the show, while by the time judging was concluded very few had failed to change owners, and very good prices were the rule.

#### Sheep.

There was not by any means a large show of these, and the best features of the classes were the fine exhibit of Scotch Black-faced sheep, which appear to be gaining very much in favour in Ireland of late, and the capital lot of cross-bred tegs, the latter being all shown in untrimmed condition and strong good sheep with valuable skins. These latter are in appearance crossed of Border, Leicester, or Roscommon and Oxford or other Downs. Mr. M. H. Franks was the most successful exhibitor, his pens scaling just upon 4½ cwt. The Black-faced sheep were mostly shown by Mr. Arthur Alexander and the Marquis of Waterford.

The Champion pen of the section were a splendid entry of three Roscommon ewes bred and exhibited by Mr. J. R. Acheson, with fine fleeces and weighing 8 cwt. 10 lb.

**York Horse Fair** has for many years been on the decline and this year's showed a still further decrease. A walk round the principal hotel yards which provide stabling accommodation, revealed the fact that the supply of really good animals for hunting, riding, and driving work was smaller than ever, and that many of the foreign buyers failed to find what they were in search of. The best Hunters made up to 80 guineas, while roadsters and other light horses fetched up to about 50 guineas, and for one good bred saddle horse, Herr Woltman, of Berlin, who supplies the German Empire with horses, gave more the average for such horses, 120 guineas, but this was an exceptional case. The carriage-horse trade was practically gone from the fair, very few animals of this type being on offer. In agricultural animals, young, upstanding horses commanded prices ranging up to 65 guineas. Carting horses for colliery, brewery, and railway purposes made similar rates, and a few clean-limbed, active young horses fit for town work made from 25 to 50 guineas.

## SOCIETIES.

### Essex.

At the annual meeting of the Essex Agricultural Society, held at the Shire Hall, Chelmsford, Mr. Christopher W. Parker proposed the election of Sir Walter Gilbey as President of the Society for 1907, remarking that in spite of advancing years Sir Walter has yielded to the unanimous wish of the Council that he should accept the position, and he would be supported in it by his two sons.—Col. Tufnell seconded, observing that Sir Walter was undoubtedly the right man in the right place for their jubilee show.—The retiring President agreed that they could not possibly get a better President if they searched England through.

The election was unanimous, and hearty thanks were accorded to the retiring president (Mr. Horton), who, in acknowledging the compliment, said his duties had been very congenial, and he had been assisted by a most courteous committee, and an energetic and capable secretary in Mr. Taylor.

The financial statement to October 31 last showed total receipts £3,746 3s. 9d., against £3,654 13s. 3d. in 1905, and a balance at bank of £507 8s., against £409 13s. 4d. The principal items on the receipt side were:—Subscriptions, £795 3s. 6d.; donations, special prizes, and grants, £392 4s.; from the Brentwood Local Committee in connection with the last show, £450; entry and shedding fees, £510 13s. 4d.; and gate money, £1,019 13s. (against £1,203 in 1905). The expenditure side of the account showed that prizes and goods cost £1,325 10s. (against £1,355 12s. 6d. in 1905); show ground expenses £912 6s. 8d.; advertising, printing, and stationery £236 15s. 8d.; hire of ground, £61; judges', analysts', and veterinarians' expenses, £47 15s. 4d.; and military display expenses, £47 15s. 4d.; subscriptions and grants to various societies, £43 3s.; police, £30 9s. 7d.; secretary's salary, £150, and the usual other incidental expenses.

The accounts were approved.

Prior to the annual meeting there was a meeting of the council, at which a letter was read from Mr. F. Thomas Goodchild, suggesting that all the members should be written to, asking them to double their subscriptions for 1907 to enable the society to celebrate the fiftieth anniversary with an extended prize list, and making the show as great a success as possible.

Mr. Percy Reid thought the suggestion a good one, but thought it would be best to simply ask for an increase, and he proposed a resolution to this effect.

The chairman (Colonel W. N. Tufnell) thought it might interfere with the subscriptions to the local fund.

Mr. Reid said they could earmark the extra subscriptions from local people, and hand them over to the local committee.

Mr. Walter Whitlock seconded the proposal to ask all the members to increase their subscriptions, and this was agreed to.

A letter was read from Mr. D. Abbott Green, suggesting that as the Bath and West of England Society had altered their dates, they should alter the dates of the Essex Show.

The Secretary (Mr. Fred Taylor) said that the Bath and West of England Show would start on June 10, and last five days.

Eventually it was decided to alter the dates of the Essex Show, and hold it on Tuesday and Wednesday the 11th and 12th, in the event of the International Horse Show at the Olympia being held on June 13.

### Norfolk.

The annual meeting of the Norfolk Agricultural Association was held at Norwich on the 15th inst., Mr. Sancerft Holmes presiding. Mr. Hervey Mason, in moving the adoption of the report and balance-sheet, which were carried, observed that the balance showed very satisfactory results. The association had an income of £2,555, out of which they spent 60 per cent. in prizes, and 40 per cent. in expenses, and they gained 2½ to 2½ per cent. on the year's working, the amount being £129 18s. 2d. This satisfactory result was due to the success of the show at Harleston, which was well attended, being favoured with fine weather. As would be seen from the figures submitted, it required very careful management on the part of their secretaries to reach a financial balance on the right side. They had a fair reserve fund, to which the small balance would be added, and as a net result they had a capital sum of £3,550 well invested, and which would avail them for a rainy or bad day. The association was now stronger in membership, and the subscriptions amounted to £798, being £24 above the average for the past ten years.

A communication was read from the local committee, at Fakenham, inviting the association to hold the show for 1907 in that town, a donation of £150 being guaranteed. Viscount Coke had consented to act as president for the year. The invitation was accepted, and subsequently the date of the show was fixed for June 19 and 20, and the Spring Horse Show, at Norwich, for March 23.

Viscount Coke, Lord-Lieutenant of the county, was elected president for the ensuing year, and a vote of thanks passed to the retiring president, Mr. Sancerft Holmes, who in reply said that the people of Harleston were extremely gratified that the association had had a successful visit, and, on their behalf, he assured the association that if the time came when the association thought it desirable to again visit that part of the county, they would have another warm invitation.

Mr. Holmes subsequently dealt with the question of the establishment of an agricultural bureau for the county.

The object of which, he said, would be to make known to the farming community generally scientific and expert knowledge. He maintained that the time had come, if they were to successfully fight the battle against the whole world, and especially against America, when they should try and make scientific and expert knowledge more generally known. He had consulted various gentlemen with regard to the question and had received very warm support from many quarters. He only asked them, however, that day to appoint a small committee in conjunction with the representatives from the Norfolk Chamber of Agriculture to consider the advisability of forming an agricultural bureau of the county, and report to a future meeting.

Mr. Collinson seconded the motion.

Mr. Hervey Mason, as vice-chairman of the Council of the Association, pointed out that, if anything of the sort suggested were carried out, involving the expenditure of money, the constitution and rules of the Association would have to be altered. They had no power to spend any money outside their legitimate business of holding the show. With regard to the £129 gained on the year's working of the show, he could not see that such a sum would go very far in support of the suggested bureau; and, besides, he did not think it would be sound finance to allocate any portion of such a fund for the purpose suggested. He admitted the value of expert and scientific knowledge to the agriculturist, but there was the difficulty of dealing with the matter, so far as that Association was concerned, by reason of the limited funds at their disposal.

The motion was carried by nine votes to three, and a small committee was then appointed to inquire into the matter, in conjunction with a committee of the Norfolk Chamber of Agriculture.

### Yorkshire.

The members of the council of the Yorkshire Agricultural Society met at York on Thursday, when in response to a letter from the Royal Agricultural Society, delegates were appointed to meet the council of the Royal with a view to discuss questions affecting the future organisation of agricultural societies. The council also decided, at the request of the Federation of Lancashire Agricultural Societies, to sign a petition to the Railway Clearing House asking the railway companies to grant lower rates to exhibitors attending shows. The election of president was deferred to the next meeting of the council. The retiring president, the Marquis of Zetland, was placed on the list of vice-presidents.

The draft prize list of the Barnsley show of 1907 was presented and passed, the amount of prize money being approximately £2,000. The list has been slightly varied. All the committees were re-elected, and Professor Dewar, of the Royal (Dick) College, Edinburgh, was appointed a veterinary inspector in the place of the late Professor Cope. The other officers were re-appointed.

At the annual meeting of members of the society subsequently held, the proceedings of the council were confirmed, and on the motion of the Hon. G. E. Lascelles, seconded by Lieutenant-Colonel H. F. Dent, a cordial vote of thanks was accorded the Marquess of Zetland for his services as president during the past year.

Sir Reginald Graham, Bart., moved a vote of thanks to the Mayor, Corporation, and burgesses of Middlesbrough, and remarked that they had done everything in their power, financially and otherwise, to make this year's show a success. The attendance of 42,000, in view of the unfavourable weather, was most satisfactory.

Col. W. Scooby seconded the motion.

Mr. Thos. Curry, in responding, said Middlesbrough considered the visit of the society a great honour, and they hoped at some future time to be able to welcome them again.

### British Dairy Farmers.

At the meeting of the council of the British Dairy Farmers' Association held on the 11th inst. the General Purposes Committee reported that in the four weeks ended December 1, there were no imports of fresh milk into the United Kingdom, the total for the corresponding weeks of last year being 75 cwt. Of cream the imports were 348 compared with 396 cwt.; of preserved milk, 1,908 against 524 cwt.; and of condensed milk 59,037 compared with 79,214 cwt.

The show committee submitted a series of proposals with regard to the details of conducting the milking trials in future. These were discussed and agreed to, it being left to a sub-committee to bring up further suggestions before the schedule of prizes was issued for the 1907 show. Notice was given by Mr. J. F. Spencer and Mr. A. L. Alexander that at the next meeting they would propose and second a motion in favour of abolishing the points for lactation in the milking trials.

The council proceeded to consider the question of appointing a consulting veterinary surgeon in succession to Professor J. Wortley Ays, who, after holding the office for many years has been obliged to resign owing to ill-health. It was decided to appoint Mr. Sidney Villar, F.R.C.V.S., of Harrow-on-the-Hill.

A letter was read from the Royal Agricultural Society of England inviting the association to appoint representatives to attend a conference of the secretaries and delegates of the principal agricultural societies throughout the country next spring to discuss various questions relating to the management of shows and the general well-being of such societies. It was agreed to send delegates to the conference.

The various standing committees for 1907 were appointed as well as delegates on the British Dairy Institute Joint Committee, and delegates to the Central Chamber of Agriculture.

It was resolved to join in a deputation to the President of the Board of Trade with the object of endeavouring to obtain the support of the Government for Mr. Hooper's Bill to amend the law relating to Railway and Canal Companies' Rates and Conditions of Conveyance, and facilities for its passage through Parliament. Mr. S. J. Pocock was asked to represent the society.

In reply to a letter from the Free Importation Canadian Cattle Association of Great Britain, the secretary was instructed to say that as the council had no sympathy whatever with the objects of the said association it could not appoint delegates to attend the conference convened by them.

The council adjourned until the first Wednesday in February.

### Smithfield Club.

A meeting of the council of the Smithfield Club was held on the second day of the Club's show, at the Royal Agricultural Hall, Mr. James Hornsby, president-elect, in the chair, when the award of the judges was laid on the table, and the stewards' report on detention cases at the present show was read.

On the motion of Mr. T. A. Edney Hayter, seconded by Mr. T. Goodchild, a unanimous vote of thanks was passed to the Rev. C. J. Proctor, Vicar of Ilington and Rural Dean, for holding divine service for the herdsmen and shepherds in the Hall on Sunday, December 9.

Mr. J. Bowen-Jones presented the report of the finance committee, and recommending that cheques be drawn in payment of the prizes awarded at the present show and the usual accounts.

This report was adopted and seventeen new members elected.

The next meeting of the council was fixed for February 6, 1907.

The value of the wheat and flour exported from Australia to overseas destinations in the year 1905-6 shows an approximate increase of £660,000 compared with the previous year. The total amount exported was 37,513,550 bushels, equivalent to 1,004,827 tons, valued at £5,960,000. Victoria exported 16,135,251 bushels, of which about 1,000,000 bushels were from New South Wales. The export from South Australia amounted to 14,968,453 bushels and from New South Wales 6,402,615 bushels.

The Warrington and District Agricultural Society at their annual meeting on Wednesday, decided to increase the society's area on the Cheshire side to within a radius of sixteen miles of Market Gate, excluding that part lying east of the railway from Broadheath to Manchester and north of the railway from Broadheath to Stockport. On the Lancashire side the radius is twelve miles. The society will now, said Sir Gilbert Greenall, who made the proposition, cover a larger cheese and butter making area of Cheshire than hitherto, and at the same time it will have a good effect on the light horse section of the show. The treasurer's statement showed that the receipts for the year amounted to £747 and the expenditure to £927. The deficit of £180 was generously made up by a special donation from Sir Gilbert Greenall. A member, however, said the society should be made self-supporting; it was a wrong principle to look to Sir Gilbert Greenall every year to make up the deficit. Had it not been for his financial assistance they would have been in a state of bankruptcy.

## SHOW GOSSIP.

The Royal Jersey Agricultural and Horticultural Society's 1907 shows will take place as follows:—Bull show, April 4; spring show of cows and heifers, May 16; summer show of horses, cattle, &c., August 21 and 22.

His Majesty the King has been pleased to grant his Royal licence to Mr. Frank F. Euron, secretary of the Hackney Horse Society, to accept and wear the cross of officer of the Royal Order of Orange Nassau, which Her Majesty the Queen of the Netherlands has conferred upon him in recognition of services rendered in connection with the annual International Horse Show at the Hague.

It having been represented to the authorities at Dorchester that the Bath and West Society would be prepared to entertain an invitation to visit Dorchester in 1908, a county meeting to consider the proposal was held at Dorchester on the 8th inst., and was very largely attended. The Mayor of Dorchester (Mr. E. W. Young) presided, and he had the support of the High Sheriff (Mr. H. Stilwell), Mr. T. T. L. Scarsbrick (member for South Dorset), the Mayor of Weymouth (Mr. J. Templeman), Captain Gerald Digby, Mr. A. Pope, &c. The Mayor, who said the proposal had been very favourably received throughout the county, stated that it was a *sine qua non* to accepting an invitation that a sum of £800 should be raised as a guarantee fund, and they also stipulated further that the water and gas arrangements should be provided to the society's satisfaction. Generous promises to help forward the matter had been received from Lord Digby, Lord Wynford, Sir J. Hanham, Sir H. Peto, Sir H. Pelly, Sir R. Baker, and others.

As the meeting seemed unanimously in favour

## SHOW SECRETARIES.

Mr. R. H. BRITTAIN.  
Ripley Agricultural Society.

of the visit, the High Sheriff moved that an invitation be sent to the society to hold their show at Dorchester in 1908, and this was unanimously agreed to. It was also agreed to invite the Prince of Wales to attend the show, as the present King (then the Prince of Wales) did on the last occasion. A very large and representative committee was chosen to assist in furthering the proposal, and Mr. Douglas Thornton agreed to undertake the duty of hon. treasurer, and Mr. A. G. Symonds (town clerk of Dorchester) that of hon. secretary.

The Somerset County Agricultural Society evidently believes in looking well ahead, for they are already making arrangements for their show at Wells on May 15, 16, 17. It has been decided by the association to spend the sum of £800 on prizes. The schedule will include a champion jumping prize of £10, to be competed for on the last day of the show by exhibitors competing in the other classes. The prizes for Jersey cattle will be increased, and three classes will be allotted to Hampshire Down sheep. It has been decided to make a suggestion to the Prizes and Judges' Selection Committee that a separate class should be added to those for jumping, this to be restricted to horses regularly hunted with any recognised pack in the county and entered by their owners;

who must have hunted and ridden them at least six times with any one pack. The Wells Harriers Hunt has offered special prizes for the meeting. The dates for the closing of entries have been fixed as follows:—Implements, April 4; live stock and produce, April 11; poultry and pigeons, April 23.

## NOTES AND NEWS OF AGRICULTURAL SOCIETIES.

A special meeting of the members of the Staffordshire Farmers' Association was held at Stafford on the 15th inst., the Earl of Harrowby presiding, to consider the advisability of altering the name of the association and of extending the area to be covered by the operations of the association. The object of the proposed alteration is to bring the farmers in Staffordshire, Leicestershire, Warwickshire, Worcestershire, and a part of Shropshire into line in regard to their trading interests, especially in reference to the wholesale milk trade. The chairman strongly urged the importance of the proposed alteration, and stated that it had the hearty concurrence of the Earl of Lichfield, who had done so much for the Staffordshire Association.

A report of a committee was presented to the meeting in which they stated that they had satisfied themselves that in the Midlands there was a considerable area which did not at present come under the influence of any association whose objects were the same as those of the Staffordshire Association, and that they were of opinion that the bringing of the farmers in that area into line with the Staffordshire farmers could not be otherwise than for their mutual benefit. The committee recommended that the existing rules should remain unchanged for the present, except so far as to make them applicable to the larger area, and that the name should be changed to that of the Midland Farmers' Association. After some discussion the recommendations of the committee were approved by 12 votes to 6.

Amongst the subjects considered at the meeting of the Lancashire Farmers' Association held at Preston recently was the recommendation, made by many branches, that a mutual assurance fund should be formed by the association for insuring its members against fire and employers' liability risks. The chairman (Mr. W. J. Fitzherbert-Brockholes) said the financial question must be carefully considered, and the matter should be referred to a committee. Mr. Bibson said insurance companies had to do a lot of policing work. The association would have to do this if they started the assurance scheme. A guarantee fund would also be required. He suggested all the members should pay to the association, who should insure the members *en bloc*. Mr. Kay said the association had 1,350 members, and was therefore strong enough to form its own fund. On the motion of Mr. Sherdly the matter was referred to the Executive Committee.

The auditor's report presented at the annual meeting of the Mid-Somerset Agricultural Society contained the following:—"We find that while there is an estimated falling off of subscriptions of £20 to £25, and an increase of £40 in the amount of prizes paid in cash by the society, there is still an estimated balance in hand of about £100, as against £86 last year. This must be considered satisfactory under all the circumstances. On the receipt side we note records in the amount of entry fees, sum taken at the gate on the show day, and receipts from the sale of catalogues." The draft balance-sheet showed that the year commenced with a balance in hand of £100 on deposit, and £86 2s. 8d. on current account. The receipts, including £341 6s. 6d. subscriptions, came to £1,132 1s. 8d., making the total receipts for the year £1,318 4s. 4d., as estimated. The expenditure included £601 11s. in prizes, against £556 2s. last year, the special prizes given otherwise than through the society, or in plate, totalling to £136 8s. 6d., as against £163 13s. 1d. last year, although the amount offered for competition was greater. The balance at the close of the year was estimated at £104 11s. 9d. The society have therefore reason to be gratified at the success of their year's working.

At a meeting of the Leicestershire Chamber of Agriculture, held on the 15th inst., Mr. Beeson reported that he brought the question of the Army meat contracts before the Central Chamber of Agriculture, but as that body seemed backward in dealing with it he moved, and it was carried, that the Central Chamber be requested to arrange for a deputation to wait on Mr. Haldane with reference to the Army meat contracts.

## Northern Notes.

THE Christmas fat stock shows have been remarkable for the good quality of the entries, especially considering the poor returns feeders obtain for beef. There is still a spirit of emulation abroad, and it is an indisputable fact that we have better quality all round both of beef and mutton, than that offered in the markets thirty years ago. An instance in record of a beast being sold at Bedale thirty-two years since for £52 13s. Its weight was 140 stone. Last week at the same place a prize-winning bullock weighing 142 stone made £37 5s. at auction.

WHAT a contrast in the prices! The contrast emphasises in a striking way the tremendous downfall in value of beef. Farmers used to be advised to "walk their grain to market" on the hoofs of cattle and sheep. Provided they could be certain of as good a return, manural value of the food consumed taken into account, farmers would be only too glad to be relieved of heavy cake bills, and the disgust of having to sell good wheat and barley at 9d. per stone.

THE Bridlington Agricultural Society had a "record" entry this year, but unfortunately that fact does not spell success, and a score of pounds were lost on the show held in the height of the season at this fashionable Yorkshire seaside resort. These small societies, which serve a local area, are worked on too expensive lines; they have large ideas, and too many departments are included in the show.

MOST societies which have done best this year in Yorkshire are those which devote their attention almost entirely to horses, or to horses, sheep, and cattle. Were we to calculate the cost of providing accommodation at our small agricultural shows for dogs, poultry, &c., and estimate how much office work they entailed, and then compare the outlay with that in respect of the three classes of farm stock we have named—horses, sheep, and cattle—it would be found that the latter are housed or provided for more cheaply than the "smaller fry."

THE fur and feather departments are not to be despised. They have their place; but we contend they may with advantage be kept apart from what may be termed a real "agricultural" show. There is quite sufficient interest in a show of horses, cattle, and sheep to attract all the countryside, and especially the ladies, who make of these occasions a day specially set apart for displaying their summer toilettes.

IF there is any great desire for a fanciers' department, the fanciers themselves should either guarantee that their classes shall not be an encumbrance financially, or they should act independently, and arrange an exhibition entirely in their own interests. By tacking themselves on to an agricultural society they too frequently hazard its success. Is the agricultural world served in any useful way by mixing up fancy pigeons and poultry with the animals on which the success of farming depends?

M. R. E. F. JORDAN, the well-known Yorkshire breeder of Leicester sheep, met with great success at Smithfield, and came very near carrying off, in addition to two first and two second prizes and the breed cup, the cup offered for the best pen of Longwools. Mr. Jordan's sheep gained the chief prize for Longwools in 1892, 1894, and 1896, and his father was the recipient of the highest awards for his Leicesters at Smithfield in 1858 and the following year. The total value of the prizes won by representatives of this flock from 1876 to 1905 reaches a total not far short of £4,000.

ONE view of Martinmas in the North of England is that it has been a "quiet" one. The report on Rural Depopulation tells us how wonderfully agricultural labourers have diminished in number. This is hardly observable in a casual way; nevertheless, if the Government books tell us it is a fact, we have no option but to believe the statement. Agricultural servants are becoming better behaved when they assemble in the streets of market towns in their numbers; still there is room for improvement. A writer in a North Riding newspaper says it is now quite certain that farm servants are saving money, from the increased rush there is for small holdings, which can be entered upon by a thrifty man and his wife with the savings of some ten years in service. In this way one of the problems of the country is finding a solution.

THE art of hedge-cutting is so much thought of in the North that a championship is attached thereto. This honourable position is now held by Mr. James Bowen, of Stainton. He has won 142 prizes in his day, also four special prizes. He

entered the lists twenty-six years ago. Mr. Bowen has had several competitors who ran him very close for the coveted honour. One, the late Mr. J. Cook, of Bilsdale, won more than 100 prizes; and there is Mr. J. Musgrave, of Sutton, near Thirsk, an expert, who may very possibly surpass the achievements of the champion, as Mr. Bowen recently met with a very painful accident, a thorn piercing his left eye during a competition.

THE climate is as fickle as ever up North, each of the last two weeks we had snowstorms; the effects of the latter have been to leave the

### The Position in the Borough.

I am very happy to be able to report that the firmness of tone in our business, noted as having been restored last week, is well maintained. Brewers are evidently feeling that it is desirable to take advantage of the present moderate currency, some fairly substantial orders having been recently placed. Merchants, encouraged by these indications, are much more willing to operate, consequently some important lots of hops have changed hands during the last few days, and we may safely assume that values are now advanced 10s. to 15s. from the recent lowest points.

A leading authority says that activity and firmness have increased, especially with regard to useful qualities. The scarcity of strictly choice hops, either from Mid or East Kent, is, says the same authority, very marked for this time of year, and those growers who are still holders, are more inclined to take their chance after Christmas than offer at any price at the present time. It must be admitted that the outlook has decidedly improved, especially in view of the continued strength in the Continental markets.

In Nuremberg especially the values of export qualities have advanced, and it appears that the local demand there is likely to be sufficient to improve the position of sellers as soon as the New Year's trade commences.

Concerning our own stocks, I am informed by an experienced observer that he does not estimate the holdings of English growers to exceed 30,000 cwt., or say, about 50,000 cwt. This quantity does not represent more than one month's consumption, and considering that the unsold stocks of yearlings and olds are much smaller than the average, it now seems clear that the New Year will introduce us to a very different condition of affairs than we have hitherto experienced this season. There is, however, one element that we must not lose sight of.

As usual, the American supplies are uncertain, but from what we hear from the other side, they may possibly raise an obstacle to our anticipated progress. We are told that large quantities are waiting a favourable moment for shipment. Thus far they have been held back in consequence of the low level of our prices, but I expect that as soon as our advancement offers the chance of profit to shippers, we shall hear of important arrivals. It is, therefore, desirable that holders on this side should carefully watch the course of trade in America, lest they be taken unawares and lose the opportunity of making their legitimate profits.

It is at all events very pleasant to be able to talk about a renewal of business at this period when, in face of the great holiday of Christmas, our trade is generally so dull. I trust our expectations of further success will not be disappointed.

### Foreign Affairs.

#### America.

In New York State growers seem to be able to command fairly favourable prices, their claims being based on the good average quality of their average growths. My latest reports tell me of the passing of a large volume of business, for which from 19 to 20 cents. have been paid. The demand for export is, however, comparatively small, and the market appears to be upheld by local buyers, who, finding that Pacific Coast hops average a low quality, are anxious to secure good parcels that may be available.

From Washington I have a cable message, which says:—"Many hops are being shipped to London on consignment, and we believe the

land and highways in a "dirty" state. Arable land is very wet and unmanageable, and any sort of carting is an impossibility. Shepherding is anything but pleasant in the turnip fields, especially in the valleys. General work is, however, so well forward that farmers can possess their souls in patience for a time. After the fat stock markets which ended in mid-week, trade is very quiet in agricultural circles, and at this present date the weather has anything but a Christmassy feeling, being foggy day by day, a sure precursor of winter ills for man and beast.

December 20, 1906.

market will go lower later on." Reading between the lines, I gather from this that there is difficulty in making local sales, and that as growers are wanting money, they are consigning their hops under advances. This looks like a policy of desperation, and we may therefrom conclude that these shipments will be forced upon the English market at, perhaps ruinous prices. The other aspect of the matter is that as the qualities will not be acceptable by our consumers, they will not be saleable, and, in such case, will not be likely to be detrimental to our position. The early future will decide.

#### Nuremberg.

Activity of demand continues to prevail, being supported principally by local consumers, with some shipments to Belgium, England, and America. The tone of the market is consequently very firm, and any parcels having pretensions to colour and quality that may be offered are taken with avidity at full prices. It is becoming evident that continental brewers are not as fully supplied as was supposed at the opening of the season, this knowledge makes holders somewhat independent, and there appears every probability that with the renewal of business after the holidays, still further advances in value will be established. The official market returns show that from November 15 to December 13, 8,800 bales of hops arrived, and 10,900 bales were sold. Stocks were therefore reduced during the month by over 2,000 bales, and these figures therefore confirm the general statements as to the strength of the trade. The actual transactions are reported to be chiefly in market hops at 85s. to 110s.; medium Hallerdaus at 85s. to 95s., selected lots realising 120s. to 125s., the best qualities of Alsace and Wurtemberg coming out as high as 107s. to 118s. The most recent report states that the tendency of the market is extremely firm.

#### Belgium.

The general tone of the markets, whether for home consumption or for exportation, is very quiet. Only a small amount of business is being done, the present quotations for Pops or Alosts being approximately 52½ francs. An Alst correspondence writes to me this week as follows:—"I estimate that the Belgium crop of 1906 may be set at 50,000 cwt. Of this we have sent about 10,000 cwt. to England, about 1,000 cwt. to Germany, and our brewers have taken about 14,000 cwt. The stocks in the hands of merchants amount to about 5,000 cwt., and growers are still holding about 20,000 cwt." According to these figures the business done in Belgium this season is very small, and I am inclined to think that the crop must have been under set, and thus we can explain the low range of values that has continued.

## AGRICULTURAL LAW.

Advice of a Legal character is offered to Readers entirely free of charge. Particulars of cases should be addressed to the Editor, "MARK LANE EXPRESS," 3, Wellington Street, Strand, London, W.C.

### Right to Ground Game.

SIR,—Where the shooting is let, has the shooting tenant any right to the ground game?—A READER.  
[The shooting tenant has a right to shoot over the land when the landlord has reserved the shooting rights, and he has a right to shoot the ground game concurrently with the tenant, who obtains the right to shoot by virtue of the Ground Game Act.—BARNISTER-AT-LAW.]

### Transactions in Store Stock.

Reported to the Department of Agriculture and Technical Instruction for Ireland.)

Children Fair, co. Galway, held on December 17, much smaller fair than usual; moderate attendance of buyers and demand brisk, especially for cattle in condition. A good clearance was effected at prices favouring sellers. Calves, 3rd class, 1st 15s. to £210s; yearlings, 3rd class, £3 15s. to £5 2s. 6d.; two-year-old, 3rd class, £5 17s. 6d. to £7 7s. 6d.; three-year-old, 3rd class, £7 10s. to £8 12s. 6d.; 8 springers, 3rd class, £7 15s. to £9 15s.

## CORRESPONDENCE.

### Wet and Dry Milking.

SIR,—As you invite the views of your readers as to the merits of dry and wet handed milking, I should without the least hesitation endorse the opinion of the writer dealing with the matter bearing on the standpoint—that of the cow, for, with all due deference to learned professors and their theory, I fail to see how the dry-handed would answer if brought into practice otherwise than by failure.

The results would, I venture to predict, soon show that dry-handed milking was impracticable, if not impossible, to strip the udder out dry, which is most essential in milking.—Yours, &c.,  
GLOUCESTERSHIRE.

December 20, 1906.

SIR,—In response to your invitation to your readers to give their views on the above matter, I

### Potatoes in North Lincolnshire.

SIR,—All through the summer, which was so very dry, we imagined that our crop of potatoes could only be a small one, and as one dry week succeeded the other, the fear of disease was becoming non-existent in our minds.

Nice rains, however, came, and the crop increased, so that on October 1 a fairer scene could not be desired. Bales looked most flourishing, and better still, there was a big crop, and underneath most luxuriant haulm.

I left my potatoes in this state, going up to assist at the Dairy Show, where, when I worked a little (which I sometimes do), I was so moistly hot, such was the state of the atmosphere, that the perspiration ran down my face.

Knowing by sad experience that this was the cause of weather for the dreaded *Phytophthora infestans*, my heart would travel up to my potato

gather, and we have told each other our tales of woe, some better and others worse than the above, ever and anon asking what must we plant in lieu of Dates as a late variety, which question I most earnestly ask you, Mr. Editor, or your readers to answer.

The public need not fear a scarcity, for German potatoes will grow (1) their taller, and in the meantime we will with pleasure pay the rates and taxes for them.

December 18.

NORTH LINCOLN.

### Calving Curiosities.

SIR,—I read with interest, in your issue of December 17, a calving curiosity.

I thought I would send you an experience of mine.

I had a Shorthorn heifer which was due to calve at a certain date. About three months before her time her udder swelled, and she produced milk, and was milked for some time, thinking she had slipped her calf, but could not find it. After a time she came in season, and was put to bull. The same thing happened several times. I particularly wanted her in the dairy, but I found it no good, so I fattened her, and sold her to a butcher, about nine or ten months after I thought she slipped her calf, when he found a putrid calf in her. I may say she used to come in season about every nine days—a most extraordinary thing, I think.—Yours, &c.,

GEORGE COLLINS.

St. Michael's, Ashford, Kent.

December 19, 1906.

### Abortion of Cattle.

SIR,—With regard to this subject it would not be out of place to mention the mistletoe as a dangerous source of trouble at this time of year. The careless handling of these boughs—much sought for at Christmas time—by gatherers in our orchards is greatly dreaded by farmers. I can speak from experience, having been a victim to serious results from cows picking up portions of these boughs which have been thus littered about.

It is well known that cases of abortion are highly contagious, and that prompt isolation is necessary, otherwise it is sure to be communicated to the rest of the herd in the way spoken of by M.R.C.V.S.—Yours, &c.,

GLOUCESTERSHIRE.

December 19, 1906.

### Shorthorn Judges.

SIR,—I will feel obliged if you could kindly let me have, or let me know where I could obtain, a list of English Shorthorn judges.—Yours truly,

M. W. LITTON.

County Cork Agricultural Society,

21, Cook Street, December 15, 1906.

[We can only suggest that you should communicate with the Secretary of the Shorthorn Society, 12, Hanover Square, London, W.C.—Ed.]

The latest number of "Thornton's Circular" to hand is No. 153, Vol. 2, which gives a complete record of Shorthorn transactions from April 1 to June 30, 1906, and also gives the awards of Shorthorn prizes at the Royal Show, and details of the sale there.

THE NATIONAL POTATO SHOW: GENERAL VIEW OF THE HALL.

beg to say that having lived all my life on a dairy farm, milked thousands of cows myself, and seen tens of thousands milked by hundreds of different milkers, my experience is that no person can milk a cow properly with wet hands. Personally, I could not tolerate my own hands being wet whilst milking, though I have known some rare instances of men preferring to milk with wet hands, but most certainly they could not be called good milkers.

There can be no doubt as to which is the more cleanly method, though what is used to wet the hands with in wet-handed milking might make a difference. I have heard of men dipping their hands into the milk-pail for that purpose, but if any man dipped his hands into milk belonging to me he would be forcibly removed into the public road forthwith.

But probably we shall be enlightened by some advocate of wet-handed milking as to what is the proper thing to wet the hands with.—Yours truly,

December 18, 1906.

A. J. K.

### Is the Tomato a Fruit?

SIR,—With respect to the letter from Mr. O. R. Thornton, which appeared in your last issue on the much-debated question as to whether the tomato is a fruit or a vegetable, he is, of course, correct in saying that it is a fruit, but in spite of this it is always classed and treated as a vegetable.

If a man exhibited a dish of tomatoes in a collection of fruit, he would stand a good chance of being disqualified, unless some special wording of the schedule admitted the inclusion, because it is a matter of general custom to class the tomato as a vegetable.

It fell to the lot of a waiter in a restaurant to settle the debated question to the satisfaction of his employer, if not to the general public. A gentleman ordered some tomatoes for his lunch, and thinking to get a rise out of the waiter asked him whether the tomato was a fruit or a vegetable.

Without moving a muscle of his face the waiter promptly replied, "Neither, sir, they're an extra," and so the gentleman found out when he came to settle the bill.

RESTICS.

## BARLEY & MALT.

Barley at the Dublin Winter Show.

The barley-growing industry in Ireland has profited immensely by the efforts of, and money spent in prizes under the auspices of the Royal Dublin Society some years ago. The soil of the greater part of Ireland must be very eminently suited to the growth of this cereal or such number of samples with bold, plump berries that one sees in the sacks exhibited from all parts at the annual winter show at Ball's Bridge year after year would not be forthcoming.

Upon the present occasion there were no less than 287 entries, each entry consisting of one sack weighing 16 stone. The long rows of sacks in the galleries of the large hall give the judges no little trouble in dealing out the prizes to their satisfaction, as a vast improvement has taken place the last two or three years in the dressing of the samples as well as in their growth. The great drawback at present appears to be due to the more weeping skies that prevail in Ireland over our own eastern and southern counties, which tend to give a much dealer and somewhat stained colour to a good many of the lots, but as the majority of these samples are for the use of distillers, instead of the bright ale brewers on the English side of the Channel, the colour is not of so much consequence as the plumpness and soundness of the grain.

The bulk of the sample sacks this year were well brought out and must have been harvested very satisfactorily as such a thing as a sprouted corn could scarcely be found. A few sacks were rather spoiled by the presence of some wild oats to a small extent, and occasionally other seeds, whilst also now and again the piles had not been taken off any too well. In some cases, however, the samples were so uniformly good in berry, in dressing, and also in colour, as to be fit for any purpose. The sum of £290 was presented to the Barley Committee of the society to provide special prizes to be allocated to the various counties where the cereal is grown.

The various entries were, for the most part, furnished with ample particulars as to the growth, such as time of sowing and date of harvesting and threshing, previous crops, quantity of seed used per acre, distance of drilling, manures used, and yield of the crop, to which was also added a brief description of the nature of the soil upon which the crop was grown. The exhibits came from a very wide range of counties, seventeen sending entries which ranged from districts as wide apart as Kerry and Louth on the one hand, and Wexford and Galway on the other.

The co. Kildare supplied the greatest number of exhibits, and the general quality of these also stood highest. Wexford also sent up some very good barleys, and furnished twenty-five entries. Queen's Co. is also one of the finest barley-growing centres, both for yield and quality as well as acreage, and twenty-five entries came thence. The yield varied very much, in many instances being rather light, whilst in others very heavy crops must have been harvested.

The first prize sample in the co. Wicklow was grown from farmyard manure on light soil after potatoes and oats, sown on March 1 and cut August 17, the variety Chivalier. A heavier crop of the same variety carried off first prize in the co. Louth, without manure, soil, light clay, and gravel, two previous crops oats and roots, time of sowing March 5, and harvesting August 10.

One of the best samples from Kildare was also Chevalier, previous crops barley and turnips, time of seedling April 12, and cutting August 28. No manure was used in this case and the yield fair. Another equal first from this county was very similar in all respects. A first prize lot from co. Carlow was also Chevalier grown without manure, two previous crops oats and potatoes, time of sowing March 15, and there was a very good yield here.

From Wexford a first prize lot of very good barley and heavy yield was grown from Scotch seed no manure being used, and the two previous crops were oats and roots, this was sown February 11th and cut September 8th, showing a great variation in the period of growth and ripening.

Most of the first prize samples appeared to have been grown either without manure or with a little farmyard manure, as is usually the case this side of the Channel, too heavy dressings with artificial often causing the barley to bodge and spoil in a very growing season.

Altogether the barley exhibition appeared to create a good deal of interest, and is proving a great incentive to better cultivation and marketing. In Ireland too, the straw is of good value for feeding purposes (fodder).

## Royal Agricultural College, Cirencester.

The annual dinner of the Old Students' Club was held at the Trocadero, Piccadilly, W., on Wednesday week, Mr. B. S. Cave, C.B., M.R.A.C., H.M. Consul, at Zanzibar, in the chair. The chairman proposed the toast of the Surveyors' Institution, to which Mr. Langridge and Mr. Goddard replied. Mr. E. B. Haygarth, secretary of the Royal Agricultural College, proposed the toast of the Board of Agriculture, and Mr. Winfrey, M.P., in reply, said it was the Cinderella of all the State departments, having only £120,000 a year to carry on its work, being one-third the sum allotted to Ireland for a like purpose. He hoped, however, when the Chancellor of the Exchequer had put more taxes on those best able to bear them they would get a larger grant, and be able to spend more than a beggarly sum of £10,000 a year on agricultural education. Later in the evening Mr. A. G. Weigall, replying to the toast of the Royal Agricultural Society, referred to Mr. Winfrey's allusions to the Land Tenure Bill, and said that as a land agent he could not find out that the farmers wanted it.

The chairman, in proposing the toast of the Royal Agricultural College, said it was not only the premier agricultural educational institution in the Empire, but it was the only one of a like character doing a great public work that received no recognition or assistance from public funds, and he thought the time might come when the State or the county councils would have to repair that omission.

The winter term of this college closed on Wednesday, when the principal, the Rev. J. B. McClellan, M.A., conferred the diploma, scholarships, and other honours on the successful students. Owing to an alteration in the curriculum, which enables students to take the diploma examination in two parts, there were fewer candidates than usual for the final diploma examination, but the scholarship competitive was very keen, and the number of students obtaining scholarship standard marks larger than in any previous term. The external examiners for the diploma were:—In agriculture, Mr. H. W. Adams, B.Sc.; in agricultural chemistry, Dr. J. A. Voelcker, M.A. (London); in land surveying and engineering; Professor H. Robinson, M.Inst.C.E. (London); in veterinary science, Professor W. Hurling, F.R.C.V.S.; and in agricultural botany, Professor G. S. West, M.A. The chief awards were:—

Honour Diploma of Membership.—Maximum marks 2,000.—Qualifying marks, 1,400. Algernon Stokes Mathias, Lamphey Court, Lamphey, Pembrokeshire, 1,447. Final examination, part 1: Craven, Poppel.

Associateship.—Jocelyn Maitland Turner, Birmingham, 1,318. Alexander Algernon Osborn, Johannesburg, S. Africa, 1,306.

Certificate of Proficiency in Practical Agriculture.—Maximum marks, 600. Qualifying marks, 450. Henry Nichols Mortimer, Ricards Lodge, Wimbledon Park, 458.

Scholarships.—Open to the whole College. Maximum marks, 5,000. Qualifying marks, 3,100. First scholarship, £25: Wathen Arthur Waller, Leek Wootton, Warwick, 3,257. Second and third scholarships, £10 each: Robert Henry Priebe, Cloudestad Road, Balham, 3,160 (*ex aequo*); Ram Ganap, M.A., Delhi, India, 3,152 (*ex aequo*). Honourable mention for scholarships: Hanneker, Joynton, Peek, Relsch, Singh, P. Wright, W. Wright. Honourable mention on the term's work other than for scholarships: A. Casey, Sowerby.

## PUBLICATIONS RECEIVED.

A useful catalogue of forest, fruit and ornamental trees, shrubs, roses, herbaceous, &c., has been issued by Messrs. Kennedy and Co., Dumfries, whose business dates back as far as 1787.

The "Canada Year Book, 1905" (second series), issued by the Census and Statistics Office, Ottawa, abounds with statistics on every conceivable subject, all, of course, relating to Canada. The tables deal with population, agriculture, manufactures, trade and commerce, public accounts, railways, and, in fact, practically everything under the sun that shines in Canada, and must have entailed an enormous amount of work.

The "Journal of the Royal Agricultural Society of New South Wales," published under the title of the "N.S.W. Annual," is conducted on much more popular and sensible lines than those of our agricultural societies. In the first place, it is published at the modest price of 2s. 6d. (members free); secondly, it is neatly bound in stiff covers, and profusely illustrated; and, thirdly, all the articles are of an interesting nature and not too technical, whilst another good feature is that the society's current show is confined to a comparatively small number of pages. It is altogether a Journal on which the society can be congratulated.

There are two ways of getting more eggs. Get more hens or feed those you have with a little Colman's Mustard in the morning food.

See "The Field," Feb. 6, 1906.

One teaspoonful of Colman's Mustard to every six fowls is about the right quantity, and it is most conveniently given by mixing with the dry meal before adding the water. It also helps to keep the hens in good condition.

The best Mustard for the purpose is

**Colman's**

**J. T. HOBSON & CO.,** makers of all Portable Buildings, Stables, Poultry Houses, &c. Established Sixty Years. **BEDFORD.** Works cover Six Acres.

"Sutton's Amateur's Guide in Horticulture for 1907," is, if anything, better than any of its predecessors, as for the first time the work is printed on paper that does full justice to the many splendid illustrations which abound in its pages, and the result is a highly artistic production. The aim of the compilers has evidently been to enable lovers of a garden to ensure a continuous supply of the finest vegetables and a constant succession of beautiful flowers and on the wise selection of varieties, combined with good management, the pleasure and the profit of a garden naturally depend, no matter what the extent of it may be. Therefore this charming annual is undoubtedly a valuable one to the amateur and it may be added, no less to the professional. It can be obtained from Messrs. Sutton and Sons, Reading, for 1s. post free.

In Part XVI. of the "Atlas of the World's Commerce" the full-page plates deal with telegraphic communication, showing at a glance the British and Foreign cables, and the various countries with and without telegraphic communication. Such a map as this should be in every merchant's office. Another full-page plate is given of Central Europe—Industrial, where by an ingenious set of signs and colouring the different productions of this part of the world will be readily understood. The other coloured plates deal with India—Agricultural and Industrial, and portion of map, Europe—Industrial; a set of four maps of the British Isles, dealing with agriculture, iron industries, textiles, glass, &c., with an interesting diagram based on the latest census showing the occupations of the people of the British Isles.

**Retail Corn Merchants' Association.**

A meeting was held at Mark Lane on Monday to form an association of this nature. Among firms who gave their adherence to the movement were Messrs. Smith and Co.; Messrs. Wellers, of Cranleigh; Messrs. Farrington, of Reigate; Messrs. Lillico, of Croydon; Mr. Poulter, of Wimbledon; Messrs. Trowers, of Redhill; Messrs. Osborne and Young, of Brixton; Messrs. Sanders Bros., of Limehouse; Messrs. Marcuse and Co.; Messrs. Russell and Pike, of Chippendale; Messrs. Edwards Bros.; Messrs. Glosters, of Woking; Mr. Strapp, of Mildmay Park; Messrs. Attlee, of Dorking; and Mr. Snowden, of South Kensington. A few advised delay, but the Illust Commission Act, which comes into force on January 1, is held to make a definite association desirable as and from that date.

**POULTRY.**

**Eggs from South Australia.**

A new development in the egg trade, which is now being brought before the notice of the London produce merchants, is likely to turn out a great success. For some years poultry-farming has been increasing more and more in South Australia, and the quantity of eggs produced is now so large that the local and Commonwealth markets cannot absorb the supply.

The South Australian Government undertook to advance the freight on a small trial shipment, the producers themselves supplying the eggs, with the result that 700 cases of eggs were shipped by the steamship *Britannia*, and arrived in London on the 10th inst.

They were graded, packed, and chilled at the Government produce Export Department, Port Adelaide, and none but absolutely fresh-laid eggs were accepted. They have arrived in first-class condition, and it would take an expert to tell the difference between them and fresh-laid English eggs. These eggs have not been frozen, but merely chilled to a temperature which has been proved by experiment to be most suitable for them.

**NOVA SCOTIA**

Offers advantages to British Agriculturists with moderate capital. Improved Farms at Low Rates. Fertile Lands. Famous Fruits. Enormous mineral deposits of Coal, Gold, Silver, Iron, Copper, Lead and Tin. Climate temperate and healthy. Easily accessible to all the principal markets.—Full information supplied by the Agent General for Nova Scotia, Mr. JOHN HOWARD, 57A, Pall Mall, London, S.W.

**HEARSON'S CHAMPION INCUBATORS**

During the years 1904 and 1905 Hearsen's Incubators were tested at the University College, Reading, with other hot-water and hot-air machines, the result being that each year Hearsen's Incubators hatched the highest percentage of eggs recorded.

# Fertilisers and Feeding Stuffs.

## Note to Regular Subscribers.

We may remind our readers that we are prepared to analyse free of cost for our regular subscribers, who are farmers, and not in trade as vendors of fertilisers or feeding stuffs, samples of minimum lots of 2 tons of either article, in cases where there is solid reason to suspect an attempt to defraud. The analyses are published, under a *nom de plume*, in the paper.

We are also willing to publish replies in these columns to inquiries relating to the quality and use of fertilisers and feeding stuffs.

## Fish Guano and Raw Phosphates.

To the Editor MARK LANE EXPRESS.

DEAR SIR,—I am sending to you per parcel post two samples of manure for analysis, one manure being fish guano, of which I have bought thirty tons on following guaranteed analysis—10·11 per cent. ammonia, and 16·18 phosphate, which cost me £7 8s. per ton to my station.

The second manure is raw phosphate, the quantity purchased being 25 tons, with 50 per cent. guaranteed, which cost 9d. per unit.

In the fish guano I doubt the quality, and with the raw phosphate I have been led to understand it has been treated with some chemicals which are detrimental to the soil and plants.

Will you kindly analyse these manures and give full particulars of both through your valuable paper, of which, needless to say, I am a constant reader.—Yours,

E. H. R. B.

## Fish Guano.

*Results of Analysis.*—The sample contains percentage of:—

|                   |     |       |
|-------------------|-----|-------|
| Phosphate of lime | ... | 15·62 |
| Nitrogen          | ... | 5·58  |
| Equal to ammonia  | ... | 6·20  |

The sample is slightly deficient in both ammonia and phosphate, and if "E. H. R. B." will calculate out the value of this deficiency at the rate at which he is paying for the manure he will find that it amounts to over 8s. per ton.

## Phosphate.

*Results of Analysis.*—The sample contains percentage of:—

|                   |     |       |
|-------------------|-----|-------|
| Phosphate of lime | ... | 50·34 |
|-------------------|-----|-------|

The sample is up to the guarantee. The addition to the phosphate consists mainly of carbonate of lime, and appears to contain nothing detrimental to plants.

## A Word for Bone Manures.

A few years ago there was a disposition on the part of agricultural analysts and professors to depreciate the fertilising value of dissolved bone manures, and to express the opinion that mixture of superphosphate of lime with a little sulphate of ammonia or other nitrogenous material could be depended on to produce equally good results at a less cost. Greater experience, however, has shown that the old-fashioned preference of many farmers, practical and intelligent men, for a bone manure is not without its justification, and can be defended even from a purely scientific point of view. A greater knowledge of the action of bacteria teaches us that these useful organisms flourish best when there is a supply of organic substances in the soil, and it is this organic character of bone manures which makes them more valuable than simple mineral compounds, such as superphosphate and sulphate of ammonia or nitrate of soda.

A pure dissolved bone fertiliser, in which the bone material has only been partly dissolved by acid, or a bone compound manure containing a considerable proportion of the bone structure softened and rendered friable by the action of acid, possesses fertilising qualities which might with advantage to agriculture be more widely appreciated than they are by farmers. The plants may be regarded as the best judges as to what is good for them, and the luxuriant appearances of pastures dressed with such manure, or turnips to which they have been applied, are significant of their value.

## Atmospheric Nitrogen.

The International Nitric Company has been formed in Zurich, with a share capital of £30,000, to construct works on the Malina Pass (Switzerland) for the extraction of nitrogen from the air by means of electricity and water-power.

## On Manuring Malting Barley.

It is the experience of all barley growers that good malting samples cannot be obtained if the manures employed are highly nitrogenous in character.

According to Professor Percival, as expressed in his brochure, "Malting Barley," the direct application of large quantities of farm-yard manure or heavy dressings of sulphate of ammonia or nitrate of soda will ruin the prospect of obtaining a good malting sample. Not only is there danger of the crop becoming laid, and consequently ruined in colour and plumpness of grain, but under such conditions it is coarse and thick skinned, and the large proportion of nitrogen in the ground makes it difficult for the brewer to produce sound beer from it.

In the ordinary four-course system barley follows turnips or swedes fed off with sheep, often with the addition of cake, corn, or hay. The soil in such cases becomes highly fertilised with manure containing an excessive proportion of nitrogen, the ingredient which above all others tends to produce a late-ripening and laid crop.

In addition to the badly-balanced manuring which this system entails, there is the objection that the land cannot be manured evenly by sheep-feeding, and the necessary fine, uniform tilth is difficult to obtain.

The ordinary four-course rotation seems, therefore, unsuited to the growth of barley of first class quality. Where, however, this system is practised and every care taken in the folding to secure an even distribution of the droppings, a great improvement in the quality of the succeeding barley crops can be secured by the application of 2 or 3 cwt. of superphosphate at the time of drilling the seed or just after. The superphosphate tends to check luxuriance of flag, indirectly strengthens the straw, and conduces to an early ripening of the crop.

Good results sometimes follow late sowing, as late as the last half of April on land upon which turnips have been fed off, and it is possible that this practice might be generally useful.

Barley of good quality may be grown after leys, sometimes after mangels carted off, but the best crop is, without doubt, most generally obtained after a white straw crop, preferably wheat. The Wiltshire system of two successive root crops followed by a crop of wheat, leaves the land in good enough condition for the growth of a crop of barley, even without the addition of artificial or other fertilisers.

Where the land is poor and a good crop of wheat has been previously taken from it, manuring for the barley crop becomes a necessity, as without such manuring the yield is too small to be remunerative, and the grain is liable to be thin.

The following mixture per acre is well suited for such cases:

$\frac{1}{2}$  cwt. of sulphate of ammonia,  
2½ " " " superphosphate of lime,  
with the addition of 1 cwt. of sulphate of potash in the lightest class of soils.

## Purely Nitrogenous Manures.

The most important are nitrate of soda and sulphate of ammonia, others being guano, rape dust, dried blood, fish guano, shoddy, &c. Other things being equal, nitrate of soda is specially suitable, say the Board of Agriculture in their leaflet on the subject—

- (a) For use in spring and early summer, as in the manuring of hay, cereals, potatoes, and mangolds.
- (b) For use on heavy land.
- (c) For use as a top dressing.
- (d) For use in a dry district.

(e) For use where immediate effect is desired. Speaking generally, sulphate of ammonia suits better:—

- (a) For use on crops that make their growth late in the season, for example, turnips.
- (b) For use on light land.
- (c) For use on soil holding abundance of lime.
- (d) For use where it can be mixed with the soil (in contrast to top-dressing).
- (e) For use in a wet district.

It is, however, often difficult to say for which of these two manures the conditions are most suitable, and then the question should be decided either by the relative cost of the substances, or by using a certain amount of both.

If one of the organic manures can be bought at a cheap rate, it may be used to some extent as an ingredient of a mixture.

Nitrogenous manure cannot usually be profitably employed on leguminous crops (peas, beans, clover, &c.): and on a mixed crop of, say, clover and grass, if the clover is to be preserved against suppression, they must be used sparingly, if at all. They must also be used with caution on barley, and especially so where a fine sample, rather than large yield, is looked for. Other crops, however,

generally respond satisfactorily to the use of this class of manure.

Nitrate of soda and sulphate of ammonia are apt to be lumpy, therefore the farmer should look carefully to the mechanical condition. Nothing should be applied that will not pass a  $\frac{1}{2}$  in. sieve. Lumps larger than this will often kill plants with which they may come into contact.

Nitrate of soda is generally offered on the basis of 95 per cent. of purity (= 15·6 per cent. nitrogen or 19 per cent. ammonia), while commercial sulphate of ammonia usually contains 97 per cent. of the pure article (= 20·6 per cent. nitrogen or 25 per cent. ammonia). Sulphate of ammonia is thus the more highly concentrated manure.

## Solid Excrements of Animals.

The solid excrement of the sheep is, weight for weight, according to particulars given by Dr. Aikman, the most valuable as a manure, as it contains more nitrogen and phosphates than the others, and at the same time is much drier.

The quantity of dung voided by different animals varies: thus the cow exceeds the horse in quantity of dung.

*Horse Dung.*—The composition of horse manure is perhaps the most uniform of all the manures produced by the different farm animals. This is due to the fact that the food of the horse is generally of the same kind, consisting of oats, hay, and straw.

The total excrements voided by a horse in a day have been calculated at 25·11 lb., of which only 6·37 lb. consisted of dry matter. These 25·11 lb. contained 18 lb. of nitrogen and 92 lb. of mineral matter. The amount of straw necessary to absorb this amount of excrement may be stated at from 4 lb. to 6 lb. The amounts of nitrogen and mineral matter in 4 lb. of straw are 91 and 25 lb. respectively. The total amount of nitrogen and ash, therefore, in the farmyard manure produced by a horse in one day would be 19 lb. nitrogen and 115 lb. mineral matter; or, if we take the larger quantity of straw, somewhat more.

Taking these figures, we find that the amount of manure produced by a horse in a year will be from 11,720 lb. to 12,450 lb. (i.e., from 5½ to 5½ tons), containing from 69 lb. to 73 lb. nitrogen, and from 420 lb. to 460 lb. mineral matter.

Horse dung being, comparatively speaking, of a dry nature, it is extremely difficult to effect its thorough mixture with the litter. For this reason the manure formed from horse excreta is particularly liable to rapid fermentation. In the process of fermentation the nitrogen is converted into carbonate of ammonia. As nitrogen in this form is of an extremely volatile nature, the risks of loss from this source are considerable. As illustrating this fact, it may be mentioned that the total percentage of nitrogen contained by fresh horse manure might be reduced in the process of fermentation to one-half of its original amount by loss from this source.

*Cow Dung.*—The composition of the manure from the cow is very much less constant than is the case in the horse-manure. An average statement of that composition is therefore very much more difficult to obtain. The number of analyses available for the purpose of forming this average is, however, very large. The manure produced by cows contains a large percentage of water. This is due to the large quantity of water they drink. It has been estimated that milch cows drink along with their winter food, for every pound of dry substance, 4 lb. of water, and in summer about 6 lb.

According to some experiments the excrements of a cow in a day amount to 73·23 lb., of which only 9·92 lb. are dry matter. These excrements contain 256 lb. of nitrogen and 1,725 lb. of mineral matter. Cow-dung is, owing to its more watery nature and poorer quality, very much slower in its fermentation than horse-dung. When applied alone, cow-manure is very slow in its action, and makes its influence felt for at least three or four years. It is difficult to spread it evenly over the soil, owing to the fact that, when somewhat dried, it has a tendency to form hard masses, which, when buried in the soil, may resist decomposition for a very long period. The cause of this is due to the presence of a considerable amount of mucilaginous and resinous matter in the solid excreta, which prevents the entrance of moisture and air into the centre of the mass. This tendency of cow-manure to resist decomposition will be greatly lessened in the case of a cow richly fed.

## Chemical Manure in Russia.

A congress of landed proprietors of the Governments of Kieff, Kursk, and Kharkoff, at which the consumers of large quantities of superphosphates were represented, decided that, in the event of the syndicate of Russian superphosphate manufacturers not agreeing to reduce their price, they would purchase the whole of their requirements abroad.

### Mixing of Artificial Manures.

Many of our readers will soon be considering what fertilisers they will be requiring, and what proportion of the different fertilising ingredients the fertilisers should contain. In our opinion it is best to buy the manures with the requisite guarantee from a reliable agent or from the manufacturers, but many farmers prefer to purchase the ingredients separately and mix them together as required. In such cases sulphate of ammonia is the usual and most convenient source of ammonia, and, therefore, it may be pointed out that it must not be mixed with another manure containing free lime, such as basic slag; but it may be compounded quite well with superphosphate, guano, bone meal, dissolved bones, kainit, and sulphate of potash.

Nitrate of soda, on the other hand, should not be mixed with dissolved manures, such as superphosphate, dissolved bones, or dissolved guano, but may be mixed with slag. Superphosphate should not be mixed with slag.

When mixing manures which seem inclined to be sticky, it is a good plan to add a little gypsum to the mixing, as it helps to make the mixing drier and generally improves the condition.

### The Destruction of Rats.

Not only are rats most repulsive, but they are also a source of danger to mankind, as well as the cause of serious losses. It is estimated that the

damage caused by them in one year in Germany exceeds £20,000,000, in Great Britain £10,000,000, and in Denmark £400,000.

Various means are adopted to keep down their numbers, but it is difficult on account of their fecundity, as they multiply at the rate of 800 a year from one pair. Traps are useful for a time, but the cunning animals soon know the meaning of the trap and avoid the danger. Poisons are partially efficacious, but endanger the lives of other animals, and have the additional disadvantage that the poisoned carcasses become offensive.

Recently the aid of bacteriologists has been called in, and Professor Neumann was invited by the German Government to make a series of experiments. His investigations have resulted in the discovery of a preparation, which he calls "Ratin." The German Government have subjected this preparation to searching tests, and the Minister of Agriculture has sent out a circular in which he says:—In order to test the efficacy and practical use of "ratin," the Chamber of Agriculture for the province of Saxony has made exhaustive trials in its own bacteriological institute, as well as on a number of farms. The results of these experiments have now come to hand, and show that "ratin," when applied in solid or liquid cultures, causes among the rats (even in cases where ordinary poisons failed) a deadly epidemic, which kills off most of the animals, reaching often 100 per cent. The cultures,

which are readily eaten by the rats, are easily applied, and in marked contrast to the usual ordinary poisons, are quite harmless to all domestic animals. In consequence of the successes that have so far been achieved with "ratin," the Chamber of Agriculture in Halle will in future prepare cultures of "ratin" at its own laboratory.

### Prices of Fertilisers.

In consequence of advice of increase in production in Chili, and the arrival of large shipments, the price of Nitrate of Soda has fallen considerably during the past fortnight.

# BIBBY'S "CREAM EQUIVALENT" MEAL

FOR  
CALF-REARING.

Our Agents are continually hearing some such remarks as: "I want you to send me two more bags of that 'Cream Equivalent' Meal. It is fine stuff, and I should like you to see my weanling calves; they are a splendid lot—a perfect show."

We like to hear talk like this, and do not wish for a better advertisement of this Meal than these "Cream Equivalent" reared calves are all over the country.

It is quite easy to prepare. It swells out into a fine creamy substance, the calves are fond of it, and there is no scour.

When the calves begin to eat, we recommend a little dry feeding—a mixture of "Bibby" Cake, Oats and Bran is particularly suitable, the former being at once nutritious and digestible; and calves so reared are always one of the sights of the farm, and make fine well grown heifers with nice loose skins and plenty of good hair.

One cwt., costing 15/-, carriage paid, is enough for two calves. It costs about 1/3 more to rear a calf on "Cream Equivalent" than on the cheaper calf foods, while the difference in value of the grown animal is most marked, both as to condition, health, and growth.

It is the most soluble Calf Meal on the market, and can be made up simply by soaking the meal in cold water for six or seven hours, if this suits the feeder's convenience better than by making up with boiling water in the ordinary way.

If you are interested in this subject, write for our new circular, "How to Rear Calves for the Dairy." It will be sent free of cost to any address on receipt of postcard.

SOLE MANUFACTURERS:

### CHRISTMASTIDE.

We are on the eve of a festival not only universally observed throughout Christendom, but the most beneficent of any celebrated among the civilised nations of the earth; one in which the lion and the lamb may be said, in figurative speech, to lie down together, for the weak and most helpless are taken charge of and embraced by the strongest and most distinguished of their fellow-creatures, and it is regarded by all as an offence against the laws of propriety to allow any one to go hungry on a day peculiarly devoted to charity and goodwill to men.

The agricultural classes have always shared very intimately in the social reunions of the festival, the ancient traditions handed down to us of the burning of the ashen faggots, the Yule log, and the roasting of barons of beef in manorial house kitchens have only got into disuse by larger social organisations.

So far as farmers are concerned the year has proved more than a usual bountiful one in their corn harvest and realisations of good returns in live stock, so that it is only natural that they should rejoice and celebrate the annual festival

with domestic and social ardour, but aid their farm labourers and their families to be gleeful. The British farmer at home is seldom done justice to as regards his hospitality and genial and hearty assistance to those most dependent upon him. Those who know him best are fully aware that his bounty comes spontaneously from his good nature. He has often to deal with the idle vagrants and impostors who give him an ill name, but there is seldom a case of destitution in his immediate locality or among those directly or indirectly dependent upon him that he does not to his best ability relieve.

Let us hope, then, that the sixth Christmas of the twentieth century will be a peculiarly happy and enjoyable one to the farmers and their households in rural districts universally. The year has been more than usually bountiful, and although prices of grain and of some other products may yield too low market prices to be quite agreeable, there are intelligent ways of consuming home corn advantageously give a higher return for it than by direct marketing.

Times are continually changing, and every succeeding Christmas Day the up-to-date farmer has something fresh to note down and observe in the rapidly-changing circumstances of land occupation in our thickly-populated wealthy country, but if he has his wits about him he will endeavour to march with the times rather than lag behind them.

The past year has been peculiarly successful to owners of pedigree stock, and all who can afford it find their best interests lie in endeavour to get a slice of good fortune to be found in the export trade. The statement is frequently made, and, of course, perfectly true, that the emoluments thereof are in comparatively few hands; still, there are reasonably good returns for all who breed with good judgment and discretion.

For ourselves, we have made extraordinary endeavours during the past year to make our journal serviceable as a general business paper to the agricultural classes. Our efforts have been well appreciated, but we further trust that the helpful work we have done will receive due recognition during the coming year.

### Imports of Agricultural Produce.

The following account issued yesterday shows the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week which ended last Saturday. The quantities in the corresponding week of last year are given in parentheses:—

Animals, living:—Oxen, bulls, cows, and calves (8,972), 11,287; sheep and lambs (1,924), 4,588; horses (273), 103.

Fresh meat:—Beef (162,172 cwt.), 75,857; mutton (80,113), 39,137; pork (18,207), 17,972. Salted or preserved meat:—Bacon (101,591 cwt.), 119,730; beef (1,789), 1,241; hams (21,933), 31,403; pork (4,135), 3,751; meat, salted or fresh (16,460), 8,812; meat, preserved (13,700), 3,073.

Dairy produce and substitutes:—Butter (78,232 cwt.), 78,230; margarine (29,656), 27,000; cheese (28,651), 46,124; milk, fresh (27), nil; cream (133), 138; condensed (21,581), 16,030; preserved (299), 326.

Eggs (great hundreds):—(306,289), 415,406; poultry (value £68,960), £28,570; game (value £2,221), £4,828; rabbits, dead, not tinned (3,568 cwt.), 2,854; lard (52,238 cwt.), 62,872.

Corn, grain, meal, and flour:—Wheat (2,078,300 cwt.), 1,232,200; barley (415,700), 667,900; oats (145,000), 168,400; peas (31,360), 22,030; beans (20,159), 10,010; maize or Indian corn (1,198,800), 783,800.

Fruit, Raw:—Apples (106,947 cwt.), 164,510; pears (797), 3,028.

Hay (1,805 tons), 2,668; straw (1,435), 527; moss litter (1,407), 2,325; hops (7,503 cwt.), 7,886; locust beans (8,260), 3,354.

Vegetables, raw:—Onions (119,122 bushels), 130,496; potatoes (15,070 cwt.), 21,735; tomatoes (8,236), 8,256.

### The Decline of Agriculture in England.

In the House of Commons the other day, Captain Faber asked whether, during the last thirty years, the dependence of the United Kingdom on imported food had increased from £124,000,000 sterling to £205,000,000; whether the area of corn crops had diminished in the last thirty years by 3,000,000 acres; and whether any other European country showed such a marked decline in agriculture.

Mr. J. A. Pease, Lord of the Treasury, in reply, said the total value of the articles classified as food in the trade returns (excluding tea, coffee, cocoa, wine, beer, spirits, and mineral waters) imported into the United Kingdom was £126,000,000 in 1875, and £208,000,000 in 1905. The area under all corn crops in the United Kingdom was 11,399,000 acres in 1875, and 8,359,796 acres in 1905. Similar returns for the same period are only available for certain European countries, but in no case do they indicate so great a reduction in the acreage under corn.

# HORSES.

## Notes and Jottings.

"He doth nothing but talk of his horse."  
—"Merchant of Venice."

THE Englishman, thinking himself a horseman—as to a great extent he is justified in doing for is not England the stud farm of the world, despises or affects to despise the humble mule, and when mules are wanted for transport much money goes out of the country to those who have no prejudices against anything which they can breed to a profit. I was talking to a gentleman the other day, a distinguished naturalist as well as a practical breeder, and he expressed his surprise at the bitter prejudice which many English farmers have against an animal which our history proves is of the most useful and hardy, and that for certain work is invaluable. He has had considerable experience with mules, and he resents the commonly received idea that the mule is stupid and obstinate. Mules, according to him, are much more intelligent than horses, and they also are harder, and will live well and have a sleek coat where horses will starve. As beasts of burden and for farm work of certain kinds they are admirably adapted, and where would the Mountain Battery be without its mules?

a hack of him, though he shapes none so luddly in harness. It seems to me that the great objections to breeding mules are that they are fitted for draught alone, and that they will not reproduce the kind. So that the balance is certainly in favour of the mule so far.

WITH respect to the statement that mules are impossible as hacks I remember one that was a very hard nut to crack indeed when hounds were running in a wild moorland country. He was a big mule, standing over 15 hands high, and it was of course necessary to ride him with a crupper. He was treated with the customary derision when he appeared at the meet ridden by a lad, and people said all kinds of things about him. They said something very different when at the end of an hour and a half over the moors and hills the mule was in nearly as good a place as any of them. He could go where no horse dared go, and the way he picked his way from one fairly round place to another over some of the bogs would have been a treat to see if we had not had to gallop a long way round. He was hunted for half a season and then he was bought by a friend of mine, a large dairy farmer, and he ran in his milk cart for years, and wore out more than one horse. I do not remember ever

interesting article, expresses it as his opinion that we have quite as many, if not more, brood mares than we can use economically, and that the quality of the mares we have will compare favourably with those of their predecessors of forty five years ago. He cites the quality of the horses which are shown at the various horse shows in the country in support of his contention, and he certainly makes out a good case. That we are short of good stallions is his complaint, and, to a certain extent, this is very true, and it will continue to be true.

WITH much of what Sir Walter Gilbey says about the supply of mares I am in strict agreement. I have always held that we have a sufficiency of high class mares to make a start on an improved system of breeding, and I have never been one of those who have gone about lamenting the decadence of our horse stock. But I am not quite sure that Sir Walter Gilbey is correct in saying that our best mares are not taken abroad. In some breeds, the Cleveland Bay and the Yorkshire Coach Horse for example, I am sure that the best mares have been sold to go abroad, and that those breeds are suffering now from the mistaken policy of selling the best mares. Of that there is no doubt. With Hunter or Hackney mares, or with mares of the heavier breeds, the same sort of thing does not prevail. They are not so much of the General Purpose horse, as the two former breeds, and hence, perhaps, the reason that the drain has not been so heavy upon them.

SIR WALTER GILBEY gives it as his opinion that though we have plenty of brood mares, we breed fewer horses in proportion than we used to do, and that he is certainly right. And he says, and quotes Mr. Charles Tindall in his support, that the reason is that it does not pay to breed Hunters at any rate. In which, perhaps, he is only partially right. There is no doubt at all that fewer farmers hunt, the more the pity, than did thirty or forty years ago, but I think it is rather because their expenses, social and otherwise, are much heavier than they were thirty years ago, and consequently they do not breed Hunters, as hunting would take up too much of their time, and it is rather a risky business. Risky of course it always was, but a man did not mind the risks when he could ride the misfits himself, and get a good pull out of the plums.

IT comes as a surprise to anyone who has to pay a big figure for the horse that can carry him—and you do not get much in the way of a Hunter for £100—that Hunter breeding does not pay. If a man can sell his four-year-olds at anything from £50 to £100, hunter breeding will pay well enough. But I am afraid our farmers are not, as a body, such good horsemen as they were. In pure-way days they had to be good horsemen. They had to ride, at any rate, for it was practically the only way of getting from one place to another. The next generation or two were bred up to the same traditions, and as times were good they kept the hunters. Then came other means of locomotion, and a more complicated civilisation, and then, of course, other interests interfered with the riding in early youth. The older generation of farmers had to ride, and consequently most of them rode well. Unless a man can ride and train his own hunters he is not likely to make much profit out of breeding them. But I can put my hands on several men who make a very good thing out of breeding Hunters, even in these days; but they are all riding men.

THAT no system of premium will ever bring breeders of half-bred horses and Hunters the class of stallions which their predecessors could get at when there were no railways is certain. The Government may spend £50,000 a year in premiums, and the land will never secure for tenant farmers and breeders of half-bred stock such stallions as Hambletonian, Haphazard, Camillus, Puccelet, Delphin, and others of like class whose services were obtainable in the early part of the last century. It stands to reason that they should not. But that is no reason why they should not increase their grant to the Royal Commission on Horse Breeding. Since the inauguration of the Royal Commission Show at Nottingham, in 1888, a great improvement has taken place in the class of stallions shown and in the class of Hunters bred, quite sufficient improvement to justify further expenditure in this direction.

I CANNOT agree with Sir Walter Gilbey that the Brood Mare Society stands self-condemned. I have not seen any of the mares which the Brood Mare Society has leased out to farmers, but I have seen the mares which the Duke of Portland has lent to his tenants, and I am confident that anyone who knew what light horse breeding was in the Welbeck district will agree with me that since the Duke has provided his tenants with brood mares the improvement has been marked. An expensive mare is not necessarily a good brood mare,

HUNTER FILLY, "WATERCRESS."

Won in addition to a First Prize, the Challenge Cup for the best Young Hunter at the Hunters Improvement Society's Show this year. She is a three-year-old by Burnock Water, out of Mullingar Junior, and was exhibited by Mr. F. A. Rickaby, Prospect Stud Farm, Basingwold, Yorks.

CURIOUSLY enough, a day or two after I had the conversation with my friend I came across a very interesting article in *Blackwood's Magazine* which corroborated everything that he said. That they are more intelligent than horses the writer of this article insists, and he gives his reason, which seems to me a perfectly valid one. The mule, he tells us, has no nerves, whilst, as we know, the horse is a bundle of nerves which he has under no control whatever. The experiences of this artillery officer are that, if mules are treated kindly they will be docile enough, and he testifies to their courage and stamina, and tells of one mule that kept her place in the march without making a sign of fatigue till she fell down in a dead faint. But the mule will stand no nonsense; no tricks must be played with him, or he will be sure to resent it, and the mule, it must be remembered, gives no warning when he is about to kick as the horse does, and he seldom misses his mark.

I HAVE written about mules this week because, on the face of it, my friend's assertion that English farmers were neglecting their own interests for a foolish prejudice seemed one that was worth examining. Granted that the mule is a fine draught animal; that he can do nearly all farm work as well as a horse; that if he is fairly treated, he is docile and even affectionate, what is there to say against him? Well, I think no one will say that he has a good mouth. The set on of his head proves that to pull at him would be like pulling at a standing tree. And so it is impossible to make

seeing him jump what might be called a fence—that is a big flying jump such as a stiff thorn hedge or big timber, but he could creep over a country wonderfully, and was a safe mount. I believe he developed a temper after some years, but I am not sure on this point. It is possible, however, for the lads who drove the milk carts in those days were incorrigible, and were always teasing the animals they drove. And a mule will not stand teasing.

THIS, however, is a digression. Let us look for a moment at the breeding of mules in England. Of course, no one would advocate breeding mules from Shire mares, or Clydesdales, or Suffolks. But there is a class of small sturdy cart mares which could well be utilised to breed mules, and breeding mules for them would mean a reader profit than grading them up to the Shire or Clydesdale or Suffolk type. For hill farm work mules are admirably adapted, and if we could get over our prejudice against them, they are good for roadwork too. They would be found much more economical on some of the small hillside farms than horses are, and there will always be a good market for army purposes alone for more mules than are likely to be bred in England.

MY readers do not require reminding that I have always held that the cry of the pessimist about the scarcity of brood mares has been exaggerated, and that it is the loss of the quality rather than the numbers of our brood mares that we have to regret. Sir Walter Gilbey, in a very

and the £10 does not look much to give for a brood mare. I have known more than one that has cost less than that, and that won all over the country to boot. Perhaps the friends of the Brood Mare Society may over-state the case, but it is so easy for enthusiasts to over-state a case on either side of an argument, especially when the real facts are so difficult to get at.

THE LOOKER ON.

### Sale of Hunters at Leicester.

Messrs. Warner, Sheppard and Wade held their last sale before Christmas at Leicester on the 15th inst., when there was a big attendance and trade was very brisk, the top price during the afternoon being 190 guineas, which was paid for a five-year-old chestnut gelding sent up by Sir George Farrar, D.S.O., who has returned to South Africa. The Duke of Penaranda having met with an accident all his hunters were sent up for sale, and capital prices were paid for the best of them. Bandit, a seven-year-old, realised 180 guineas, Whitelegs, 155 guineas, Hemphol 110 guineas, and Somerby 81 guineas. Mr. W. Newman accepted 90 guineas for a weight carrier well known with the Crown and Westshire packs, and Cribbage, the property of Mr. W. Canley, realised 80 guineas, while Mr. F. M. Balding sold a bay gelding up to a good weight for 90 guineas. Mr. W. Threlkeld, of Kirkoswald, Cumberland, who sells annually, accepted 75 guineas each for First Flight and Bander, and 68 guineas for Surety; while Lord Howe sold Narboro' for 60 guineas; and Mr. T. H. C. Cox a bay gelding with which he had won two point-to-point steeple-chases for 75 guineas. The Master of the Roehdale Harriers, Mr. J. T. Pilling, sold Comrade for 75 guineas, and a bay gelding by Ward Arm, sent up by Mr. W. Graham Niven, was a bargain at 50 guineas.

### The International Horse Show at Olympia.

The directors of the proposed International Show to open in Olympia on June 7 next recently sent a deputation to the New York Show to make arrangements with the principal American and Canadian exhibitors, and to urge them to join in the international competition. The result has been entirely successful, and all the Americans consulted expressed themselves most heartily in support of the idea. The owners of the principal stables are already preparing for the trip, and the support of such influential men as Mr. Alfred Vanderbilt, Mr. Reginald Vanderbilt, Mr. Gerken, Mr. Harriman, Mr. Stotesbury, &c., makes the show a foregone success. The following report of the preliminary meeting is copied from the *New York Herald*:

Prominent horsemen were called together by James T. Hyde, assistant secretary of the National Horse Show Association for America, yesterday, to discuss the question of the proposed International Horse Show to be held in London June 7 to 13 next year. They met in the directors' room at Madison Square Garden. A committee consisting of Alfred G. Vanderbilt, John Gerken, and James T. Hyde was appointed to select a committee to have charge of the arrangements for American exhibitors.

Nearly every one present expressed his intention of crossing the sea and sending his best horses to compete.

Mr. Euren, who had come over from London to interest American horsemen in the proposal, pointed out that the date of the show, June 7 to 13 inclusive, was between the Derby and Ascot weeks, when everyone will be in town. The prize list, said Mr. Euren, totalled 35,000 dols., besides which numerous special prizes had been offered the directors by private individuals.

He also pointed out that should American and Canadian exhibitors care to, they can enter a circuit of shows, beginning with the International Show, from June 7 to 13, then going to Richmond open-air show next day, then to the Royal Show at Lincoln, and after that to The Hagley Show.

With regard to the judging, Mr. Euren said it was proposed to have an international jury, each country concerned to have representatives among the judges.

James T. Hyde thought it was no use attempting to send American horses over unless at least one hundred representative animals could be sent.

Alfred G. Vanderbilt said: "I shall be glad to send all my horses over and I intend going over myself."

Reginald Vanderbilt, in a speech as short as his brother's, said: "I shall be very glad to send mine over, too."

John Gerken caused a laugh by saying: "I will send mine over providing they have a four-in-hand event for horses under 15 hands."

Clarence Moore said he was not doing much exhibiting, but would go over and take some horses with him, "just to make a show of it."

Beck suggested that the American Government be approached for help to enable a number of representative horses to be sent over. He said that the Canadian Government would assist the Canadian representatives, and he thought that

President Roosevelt, sportsmen that he is, would be found willing to lend his aid in this direction.

Subsequently the provisional committee met and elected a strong representative American board to make arrangements on the American side, to examine the prize list which the English directors had submitted for their suggestions, to see to the shipping of horses, gathering of entries, enrolling members, and to do all other things necessary to bring the affair to a successful issue.

### Shire Horse Society.

Fifteen new members were elected at the meeting of the council of this society held at the society's house, 12, Hanover Square, W., on the 11th inst., Mr. R. W. Hudson (president) in the chair.

At this meeting Mr. A. H. Clark presented the report of the Editing Committee, and stated that the committee had that day confirmed the minutes of their previous two meetings, at the last of which, viz., on November 29, they had revised the proofs of Volume 23 of the Stud Book, and also authorised its issue when completed.

They recommended that the issue of duplicate export certificates printed in red (for the use of the Customs authorities) be discontinued, as they were no longer collected from the exporter. Applications had been submitted for the following prefixes and were granted:—

|            |                         |
|------------|-------------------------|
| Prefix.    | Applicant.              |
| Chearsley  | Exors. of R. Roadnight. |
| Cleavesley | Thomas Waring.          |
| Tidenham   | Talbot.                 |
| Vicarwood  | Ralph Wooddisse, jun.   |

The notes on the 1906 show had been submitted to the meeting on that day and had also been approved.

Mr. Hudson reported that the references from the last meeting had been carefully considered, and the Horse Show Committee recommended that the conditions created in 1905 and 1906 by the foaling regulations for brood mares should be brought up again at a meeting of the Horse Show Committee held after the next show. The misuse of soap and disinfection (when used for other purposes than washing) as a disqualification had also been carefully considered, and the committee recommended that Rule 24 relating to disqualification should be so amended as to read:—

"The use of resin, soap, or other substances designed to give an artificial appearance, &c., will act as a disqualification."

An application from the Territorial Live Stock Association of Calgary was favourably entertained, and the secretary was instructed to offer them a silver medal for the best Shire horse exhibited at their show.

The secretary read a letter from the secretary of the Royal Agricultural Society of England, inviting the society to send delegates to a conference to be held to discuss various questions with reference to the management of shows, &c., and after a short discussion it was resolved, upon the motion of Mr. E. Snow Fordham, seconded by Sir P. Albert Munz, that the council approved of the suggested conference, and they would be prepared at the right time to nominate delegates to represent the Shire Horse Society.

The dates for the council meetings in 1907 were arranged as follows:—viz., January 29, February 28 (at show), March 28, June 4, November 5, and December 10, after which the council adjourned.

### Hunters' Improvement Society.

Among other matters dealt with at the meeting of the Hunters' Improvement Society's Council, held on the 6th inst., was a letter from Colonel Deane with memorandum on national horse-breeding signed by himself, Lord Donoughmore and Mr. Algernon Turner, C.B., with reference to the recent conference on horse-breeding at the Board of Agriculture. Sir Merrik Burrell briefly explained the purport of the memorandum, pointing out that if the Government could see their way to increasing the grant of the Royal Commission on Horse-breeding to £25,000, it could be used to great advantage in three directions for the benefit of stallions and mares. They could maintain and enlarge the present premium system and apply to England the system which was working so favourably in Ireland, and also bring into operation that started by the Brood Mare Society. The main idea was to put suitable stallions at the disposal of farmers at a low fee. If the War Office could see their way to purchase horses at a younger age there would be a prospective market available.

He therefore moves—viz., "That this council is in entire concurrence with the views expressed in the memorandum on National Horse-breeding, and think it advisable to forward this memorandum to the Minister of Agriculture, signed by the president of this society, together with a covering letter expressing the opinion of the council as to the great and urgent need of substantial addition being made to the grant already voted to the Royal Commission on Horse-breeding."

Colonel Victor Van de Weyer seconded the resolution, and urged that the council could not do better than co-operate and sign the memorandum.

They would be following the suggestion of the Minister of Agriculture, who would be better able to present the scheme to the Chancellor of the Exchequer with a representative body of opinion in its support.

H.R.H. Prince Christian (the president) agreed with the views they had heard, and expressed his willingness to sign both the memorandum and the covering letter.

The resolution was adopted, and a cordial vote of thanks was passed to Colonel Victor Van de Weyer and Sir Merrik Burrell for so ably representing the society at the Conference on Horse-breeding.

Mr. Romer Williams, chairman of the Editing Committee, reported that the committee had again considered the pedigrees of the three of the brood mares awarded gold medals at shows during 1906, the entries being deferred from the October meeting pending further proof of breeding. They now reported that only in one case could they recommend the confirmation of the award.

Hon. Alexander Parker, chairman of the Horse Show Committee, reported that letters had been received from the Highland and Agricultural Society and the Royal Dublin Society accepting the gold medals authorised by the council at the October meeting. The Royal Commission on Horse Breeding had intimated that, subject to the approval of His Majesty and the Treasury, they unanimously accepted the invitation to hold their 1907 show in conjunction with the Farmers' Improvement Society in March next, giving the Hunter stewards access to the ring and veterinary yard on the Tuesday, as in previous years.

The prize list, as revised by the Committee at their last meeting, was presented, and its issue recommended.

The Chairman reported that the circular letter conveying the revised offer of gold and silver medals at affiliated shows has been under his consideration, and the Committee shared his opinion that these medals should be offered, as in previous years, as special prizes, and that they should only be open to those animals awarded class prizes at the affiliated shows. This report was adopted.

In response to the invitation from the Royal Agricultural Society, the Council appointed Sir Merrik R. Burrell, Bart., and the Secretary as representatives of the Society at the Conference which the Royal Agricultural Society of England were convening to discuss various questions relating to the management of shows and the general well-being of the Societies.

Six new members were elected and the following dates fixed for the meetings of the Council in 1907:

Thursday, February 7; Tuesday, March 12 (at Show); Thursday, April 11; Monday, June 3; Thursday, October 17; Thursday, December 12.

## VETERINARY.

*Advice of a Veterinary character, by an M.R.C.V.S., is offered to Readers entirely free of charge. Particulars of cases should be addressed to the Editor, "MARK LANE EXPRESS," 3, Wellington Street, Strand, London, W.C.*

### Mare with Tender Feet.

SIR,—I bought a half-bred mare last spring, seven years old, very poor. Since she has got into condition she seems very tender on fore-feet; she lifts first one up, then the other; also stands propping with them when stood in cart. I have got her shod in leather; feed her on chop and bran and very little oats. I should be pleased to know if she can be cured, and the best way to treat her.

—ANXIOUS.

ANSWER: Lameness is not, as so many appear to think, a disease of the feet or limbs, but the manifestation of the pain caused by the disease. "Tenderness" is slight lameness, the pain not being sufficiently great to cause halting, and thus "tender on the fore-feet" does not give any clue to the cause or the nature of the disease. You might be "tender on the feet" yourself—some folks are—but you would hardly expect a doctor to prescribe for you on the strength of that. Horses sometimes go tender from chronic laminitis, incipient navicular disease, laminal congestion, corns, concussion, and a number of other diseases of the feet, the pain of which is not sufficient to cause actual lameness or sheer inability to stand concussion with the ground or sustain the weight of the body. In very many cases what is put down to "tender on the feet" has nothing to do with the feet at all, which are as sound as the proverbial "bell of brass," but is due to excessive "wear," or injury to the tendons. We cannot tell you "if she can be cured" when we know nothing of what is the matter with the animal; nor can we advise "the best way to treat her" under such circumstances. We want to know why the mare goes tender, and something about the appearance and condition of the feet. In the meantime, try cold water swabs, and stick to the leathers unless the frogs are thrushy.

### Notes and Jottings.

THE Smithfield Show is associated intimately with the Leicester breed of sheep, because in its early days interest was very closely centred on it; in fact, the improvement taking place in the breed and the interest aroused in it was a very potent cause of the society's formation. The breed in its pure state does not loom so large in the public eye as it did then, but it was the means by which so many other breeds were improved, that in looking at any long wool breed we see strongly-marked evidence of its influence.

IN some ways the Leicester seems to be overshadowed by its sub-breeds; which appear able to adapt themselves to an extremely wide range, and one had an impression some years ago that it might in a comparatively short period be regarded as a disappearing breed. However, there is little doubt that there has been an increased stamina worked into it that has placed it on a stronger basis. The sheep shown at Smithfield did not suggest any appearance of decadence,

their flocks by night in lambing pens on some bleak down, awaiting the advent of the early arrivals; not always the most inspiring period in a lambing season, as so often where they have unfavourable conditions during the season of pregnancy they reveal themselves in bad presentations or premature ones. If the start is good, there is always hope of a favourable season.

THOSE who postponed buying in store sheep until the New Year in the hope of getting them cheap will not find themselves in such a favourable position as they reasonably expected in the early part of autumn, when the food supply looked like giving out early in winter. If ever there was a season, over a very large portion of the country, which looked like giving trouble, it was suggested in the autumn, but the openness of the weather since has been truly phenomenal, and the situation is entirely changed. Instances of late flowering of plants are very common, but my own experience of gathering a Royal poppy from an exposed position in my garden during the Cattle Show week must be as exceptional as most cases, for it ordinarily flowers in June, yet it was a finely developed, well covered head. If this could go through safely it is not surprising that the handy roots have grown rapidly.

THE difficulties of the lambing pen have markedly lessened since the more general use of antiseptics has been adopted. It stands in some relation to the great saving of life that has been secured in surgical hospitals, where hospital fever can be regarded with comparative lightness, though previously to the use of antiseptics the percentage of deaths from septic poisonings was dreadful. Meadows, who was for a number of years shepherd

### National Sheep Breeders' Association.

The financial statement presented at the annual meeting of the Sheep Breeders' Association was of a very satisfactory kind. Both the report and the financial statement were agreed to, and it was further decided to place on deposit £100 to £140 belonging to the society, leaving a balance of £50 on current account for working expenses. Mr. H. Smith, jun., proposed Mr. Henry Dudding as president elect. He said it was the turn of the Lincoln flockmasters this year to nominate the president. Wherever Lincolns were known the names of Dudding and Riby were known.

Mr. Webb seconded the resolution, which was heartily carried.

Mr. A. Mansell submitted the following resolution, of which he had given notice:—"That as the regulations relating to the shipping of sheep for Australasia are so carefully drawn, that sheep are inspected by the veterinary surgeon appointed by each Colonial Government before shipment, and the voyage occupies six weeks, the council respectfully suggests that the period of quarantine, nearly thirty days, is excessive, and trusts that the respective Governments will see their way to modify the period of quarantine." He had reason to believe that the Colonial Governments, if properly approached, would reduce the period of quarantine. A reasonable period would be sixteen days.

Mr. Carey Coles seconded, and the resolution was adopted.

A committee already in existence were authorised to consider any replies that might be received from the Colonial Governments, and to report to the next meeting of the council of the association.

### Hampshire Down Sheep Breeders' Association.

The report presented at the annual meeting of the Hampshire Down Sheep Breeders' Association held at the Agricultural Hall, Islington, during the Smithfield Show stated that the progress of the association had again been most satisfactory, both as regarded membership and the number of sheep registered. During the year fifty-three members were elected, making the total number of members (after allowing for withdrawals upon dispersion of flocks, death, &c.) 422, or a net increase of sixteen. The total number of sheep entered in Vol. 17 was 236,617, viz., 169,515 breeding ewes, 64,368 stock ewe tegs, 2,734 rams (540 of which are registered singly), total 236,617, this being a total increase of 7,752 head; the number of new flocks registered was sixty, and old flocks recorded 343; total 403, or a net increase of thirteen.

The report further stated that the issue of export certificates during the year had very considerably increased, 236 having been issued in respect of 770 animals for export to widely different foreign countries and colonies—a fact which testifies to the increasing popularity of the Hampshire Down as an early maturity and prime mutton-producing class of sheep.

Mr. Cary Coles, who presided in the absence of the president, in moving the adoption of the report, which was carried, commented upon its satisfactory character, and pointed out as particularly gratifying the increase in the number of members, and the number of flocks registered, whilst the Association had a balance in hand of £1,043 18s. 3d., as against £943 13s. 6d. in 1905.

Votes of thanks were subsequently passed to the retiring president (Sir Alex. Henderson), the secretary (Mr. J. E. Rawlence), the assistant-secretary (Mr. J. Mountford), and also to the auditors.

### Oxford Down Sheep Breeders' Association.

At the annual meeting of the above association, held at the Royal Agricultural Hall, Islington, on the 11th inst., Captain Longworth Dames was elected president and Mr. John Bryant president-elect for the ensuing year. The present vice-presidents were re-elected with the addition of Mr. Hugh W. Stilgoe and Mr. S. Whitbread.

The accounts were passed, and showed a surplus of £32 on the year's working.

The council were pleased to report the greatly increased number of rams entered in the Flock Book, and to note the rapid progress the breed is making for crossing purposes in the Lowlands of Scotland and North of England.

The following important decision was unanimously adopted:—"That no new flock be entered in the Flock Book after April, 1908, unless they are directly descended from a flock or flocks already registered."

At a special meeting of the East of Fife Agricultural Society to consider a scheme of amalgamation of the society with the North of Fife and Wudygates Societies, a motion against amalgamation was carried by 27 votes to 11.

### PEN OF SUFFOLK SHEEP.

At the recent Smithfield Club Show these Sheep were First in the Class for Three Fat Wether Sheep of the Suffolk Breed over 12 and under 24 months old, and also won the Cup for the best pen of Suffolks. They were bred and exhibited by Mr. H. E. Smith, The Grange, Walton, Ipswich, and at time of exhibition were 22 months old, whilst their weight was 7 cwt. 1 qr. 27 lbs.

in fact were full of vigour and the essential features of modern Whiteface quality. This we have noticed in the breeding shows also; and, doubtless, the breed is feeling and will feel the benefits of its modernising. It still is a necessary breed, as on some soils breeds which are partly descended from it have a way of running away from type, and require to have fresh dash of the original blood instilled to keep them up to the mark. Nor is the foreigner by any means done with it.

THE Leicester takes part of the credit for the great success of the Lincoln longwool; it did not give the size for which the Lincoln has always been celebrated, but it toned down the coarseness which was once a distinguishing feature of the breed. Messrs. Dean's wonderful pen of wethers stands out as a fine example of the way the Lincoln men have developed quality and yet maintained all the size and vigour that any one could wish for. It was a pen which will not be forgotten for a long while.

WITH the finish of the fat stock shows and markets the thoughts of shepherds will be directed to the more ordinary, but not less essential, duties of the lambing pens, and while most people are enjoying their Christmas beside a cheery fire, not a few shepherds will be watching

at the Holesley Bay College, went there with a good reputation as an ewe manager, and he subsequently maintained an average of lambs per ewe, which the county competitions showed to be quite exceptional. He has repeatedly assured us that the use of antiseptics and information he had collected from the veterinary surgeons there had made a difference of quite 15 per cent. more lambs he could raise as compared with what he was able to do from his previous experience. It might be explained that in calculating his lamb average accordingly with the terms of the competition, he regarded a ewe saved as the equivalent of three lambs. If about 15 per cent. saving could be effected among our lambs it would have a striking effect on the value of our flocks. Doubtless a considerable portion of this is done among a very large number of our flocks, though there is reason to believe that there are too many cases even yet where the losses are much because the nature of contagions and the simple means of preventing are either not understood or not enforced. Cleanliness in the bedding; the proper disinfection of the hands before handling another sheep; the application of suitable disinfectants early after lambing, certainly cause some little extra trouble; but, so far as the farmer is concerned there is no doubt that he greatly profits by seeing that they are rigorously enforced.

### Notes and Jottings.

AT the time of writing these notes everything points to a more than usually busy Christmas. Tradespeople are running to and fro, shops are gaily decorated, and poultry and the meat-producing animals, with fat cattle heading the list, are being slaughtered in greater numbers than ever, and it is satisfactory to be able to report that in many cases at least the retail demand is all that could be desired, notwithstanding the unseasonable change in the weather that took place on Sunday last, and for the present appears likely to continue with us Christmas over. It was a most unfortunate change for the late markets, which included many of the largest in the country. Many pounds' loss were suffered by the consigners of big, heavy cattle after the change in temperature as compared with those who marketed a few days earlier.

HOW the dead meat trade and the enormous importation of foreign cattle, dead and alive, has revolutionised the cattle markets of the country. What a poor figure the Great Day Market in the Metropolis cuts now as compared with even twenty years ago, and the comparison is still greater a few years further back. To-day, of course, Deptford furnishes a great number of marketable cattle, some of which, according to the quotations, are running the home-fed beasts rather closely, as I see as much as 4s. 10d. per stone is quoted in some instances. Then there is undoubtedly another point that affects the Metropolis very much, and that is the enormous quantity of dead meat that finds its way thence as compared with the more inland towns, which leaves a greater proportion of the supply for the latter to be provided by country-fed animals.

LEAVING the seasonable topic of beef for a few moments and looking into other matters that are commanding a great deal of attention at the present time, we find the question of butter-making once more prominent. Now it must be potent to most people that the average dairy farmers of this country do not care to run a butter producing dairy. Whether the price is the great reason of this, or whether it is the apathy, and more than this, carelessness that is manifested by most of those connected with the manipulation of the milk from the drawing it from the cow up to the making up and weighing as well as marketing the butter, one cannot say, or whether it is that England and English people, as regards their majority, consider themselves more suited to other spheres of life than the ordinary work of the dairy.

THOSE who have witnessed the interest and enthusiasm that some of the dairymaids from other countries display in their attention to dairy work will be compelled to admit that the continental maids devote much more energy to their work, and appear far happier and more at home in the dairy. The milking competition that were instituted a few years ago at the London Dairy Show have so far appeared to be working some slight revolution in this respect, and a good number of Scotch and English maids have been taking part in these contests, and did their work well. Many English people who are not connected at all with agriculture and stock-keeping have set their faces very much against the employment of female labour in the sheds and yards, and no doubt this had not been without its effect.

FOR the other side of the question we know of some places where the sheds and their occupants are kept in a cleanly and up-to-date manner, and maids are employed in the milking as well as in the manipulation of the milk where matters run very smoothly. As a rule, cows are much quieter, and give down their milk quite as well or even better where females are concerned with them, than when everything is done by the rougher hands of the other sex. And we are also able to state that these girls are not one wit the worse afterwards for having taken part in the milking. Indeed, a clean suit of clothes is at once exchanged for the covering that was made use of whilst the milking was going on, and no traces of anything in the slightest degree objectionable follows.

OTHER countries appear, however, so much better suited to the butter-making side of dairying than our own country that it seems quite likely that our butter supply will be drawn much more largely from abroad, either from our own colonies or other countries, in the future than it has been in the past. New Zealand appears to be increasing its output at an enormous rate. Creameries are doubling in number and extent; and so it is also in the Argentine; and then we

have to bear in mind the fact that the climate of these countries is much more favourable for the production of butter than our own, and especially in the one point of being able to furnish us with the best grass-made butter at a time when our home make is too often anything but even palatable.

HAVING regard to the whole of the points mentioned above, there is not much to encourage English dairy farmers to go in for butter-making as their staple dairy business, except in some special farms such as were a number of pigs are kept, or where it is desired to bring up a number of calves every year for the purpose of fattening as two year olds. Where this is the case, the skimmed or separated milk from a herd of well-fed dairy cows that are used for making butter, fills a place where it is of greater value than could possibly be the case were it either disposed of in its whole state or used even for cheese-making. Wherever butter-making is attempted as the main dairy business of a farm it is absolutely necessary that the strictest cleanliness is observed with regard to all the utensils used in or out of the dairy, also in regard to those who are doing the work. It is equally necessary that the greatest care be taken in the churning and working of the butter, not a drop of butter-milk must be left in, or the case is hopeless, and it is further equally necessary that the cows are fed upon proper pastures during the summer where there is an absence of herbs, such as wild garlic and the like, that always taint the butter, and in winter the feed must consist of the best green hay, carrots or mangolds, and good sound cake or meal. These conditions strictly observed will insure an uniform quality, and that of the very best all the year round, and where this is the case there is little difficulty in finding private customs at a remunerative price. It is also well to have some cows coming in fresh every month from the end of June to the following March.

NOTICED in an agricultural paper the other day a case in which a breeder is very much troubled with contagious abortion, and asked several questions as to what is likely to be the procuring cause of this trouble. Memory fails me as to what some of the causes suggested were, but one question that struck me very much was as to the probabilities of cocksfoot grass, which grows very luxuriantly in the pastures, causing the trouble. Now I should not be at all surprised were this so. Cocksfoot is a very rank-growing grass, particularly under trees where there any, and the cattle frequently refuse to bite off its coarse heads of seed whilst young and sweet, and I have distinct proof that the eating of these ripened heads of strong grass seeds in the autumn brought disaster to two different herds in the shape of abortion.

EXPERIENCE has convinced one that there is no better way of keeping a breeding herd healthy upon their pasture than by continually grazing these pastures with mixed stock horses as well as sheep, but more especially the former. I believe the horse to be the best possible scavenger on a pasture field; every tuft that has grown up from the droppings of the cattle grows up and seeds, the cattle refusing to eat it, but where horses are present this is all cleared off by them, and the risk of these deleterious seeds damaging the cattle is thus entirely avoided, the pastures at the same time being kept more level and thereby improved, whilst the horses grow and improve under such circumstances in a most pleasing and profitable way.

THERE are several kinds of food that we use for cattle feeding, too, that do not have altogether a wholesome effect upon the breeding cows. One of these is green vetches. I have known this food, where given very liberally during the early summer months, to give a good deal of trouble with the cows holding to the bull, sterility rather than abortion. Brewers' grains, too, have in some instances given similar trouble. The latter feed varies very considerably; indeed, there is greater variation in the quality and feeding results of these than almost any other food. Whether the difference is due to the malting or brewing or mixing other substances is not easy to learn, but the results as stated have been noted upon several occasions, and have in some cases been disappointing.

WHERE troubles occur with foods as in the cases mentioned, it sometimes happens that unfavourable results are the outcome of a too liberal use of the articles that have caused the trouble. When the vetches are a heavy crop and the grass perhaps a little short the cattle are

naturally thrown upon the former feed more wholly, and by the same rule with roots, when plentiful they are doled out with loss care, whilst in the case of grains (brewers') when very cheap, as often happens, a much more liberal supply is given to the cows than at a scarce and dear time, and these excesses may probably have something to say when the untoward results mentioned have taken place. A little care pays at all times, but is much more needful where a herd of breeding cows is concerned.

### Sale of the Earl of Durham's Fat Stock.

The Christmas sale of the fat stock reared on the farms of the Earl of Durham attracted a large gathering than usual to Bowes House Farm, near Fenclough, Durham, on Monday, and included in the visitors was the noble lord himself. The stock submitted was about up to the average in number, and included 93 cattle and 150 sheep, whilst in quality they more than equalled the high reputation Lord Durham's stock enjoy. At the great shows of Christmas stock recently held at Smithfield, at Bingley Hill, at Leeds, and at York the Lambton stock has taken a prominent part, and at each place has secured the notice of the judges. Three of these prize beasts were sent on to the sale, and were all bought by the Stanley Stores, who gave £100 for the trio—a black and white steer, a Highland Kyle steer, and a Highland heifer. Beyond these, the cattle were of a smaller class. The sheep were also a nice lot, and included a contingent of twenty-five Southdown wethers from his lordship's Newmarket estate.

The sale commenced with a herd of thirty Shorthorn steers, which ranged in price from £27, given by Mr. Thompson, of Philadelphia, an old attendant at these sales, down to £17 10s., the total realising £968 10s. Nine Shorthorn heifers brought an average of £20 12s. 2d., and a total of £183 10s. Following these came the special beasts, a grand party of three, whose appearance evoked general admiration. The buyer of the Stanley stores secured all three, and, strange to say, in comparison with the other cattle these brought an average of 1s. a stone less. Next in order were the blue greys, a useful lot of twenty heifers and twenty steers, which brought good averages all round. The heifers totalled £437, and the steers £449. A quartette of Highland steers brought an average of just over £20 each, the four realising £80 7s. Seven fat cows brought £120, and this ended the cattle sale, the total of ninety-three head averaging £21 10s. 1d. each, or an aggregate of £2,041 15s.

The sheep brought equally good prices, 155 mule sheep averaging 60s. 11½d.; twenty-five Suffolk hogs, 78s. 2d.; forty cross-bred Oxford hogs, 56s. 9d.; 125 half-bred Cheviot hogs, 51s. 1½d.; 105 half-bred Cheviot ewes, 46s. 7½d.; and the 450 sheep sold averaging 55s. 9½d., whilst the total for the sale was the good one of £3,297 11s. 6d.

### Prizes for Shorthorns in 1907.

At the last meeting of the council of the Shorthorn Society it was decided to offer the following prizes for Shorthorns in 1907:

**CHAMPION PRIZES.**—Royal Agricultural Society of England: Two Champion Prizes of £30 each, for the best male and best female Shorthorn. Highland and Agricultural Society: Two Champion prizes of £25, for the best male and best female Shorthorn. Royal Dublin Society: A Champion Prize of £20, for the best yearling Shorthorn bull bred in Ireland. Bath and West of England and Southern Counties Society: A Champion Prize of £10, for the best Shorthorn bull. Welsh National Agricultural Society: A Champion Prize of £10, for the best Shorthorn bull.

**DISTRICT PRIZES.**—For the best Shorthorn bull calved in 1906, located in the undermentioned districts. District prizes of £10. The name of the show at which the prizes will be awarded are given in parentheses:—

Beds, Herts, and Middlesex (Bedfordshire), Berks, Wilts, and Hants (Royal Counties), Cambridgeshire and Essex (Essex), Cheshire (Cheshire), Cornwall and Devon (Devon), Cumberland (Cumberland), Derbyshire (Derbyshire), Durham (Durham), Gloucestershire and Monmouthshire (Gloucestershire), Herefordshire and Worcestershire (Herefordshire and Worcestershire), Isle of Man (Isle of Man), Lancashire (Royal Lancashire), Leicestershire and Rutland (Leicestershire), Lincolnshire (Lincolnshire), Norfolk and Suffolk (Norfolk), Northamptonshire and Hunts (Hunts), Northumberland (Northumberland), Nottinghamshire (Nottinghamshire), Oxfordshire and Bucks. (Rutland and Central Bucks), Shropshire (Shropshire and West Midlands), Somerset and Dorset (Somersetshire), Staffordshire (Staffordshire), Surrey, Kent, and Sussex (Tunbridge Wells), Wales (North) (Denbighshire), Wales (South) (United Counties), Warwickshire (Warwickshire), Westmorland (Westmorland and Kendal), Yorkshire (Yorkshire).

In Scotland there will be four district prizes of

£10 each for the following districts, the names of the shows at which they will be awarded being those in parentheses:—Argyle, Perth, Fife, Kinross, Clackmannan, Stirling, Linlithgow, Dumfries, and Renfrew (Stirlingshire); Ayr, Wigton, Lanark, Dumfries, Kirkcudbright, Edinburgh, Haddington, Peebles, Berwick, Selkirk, and Roxburghshire (Border Union); Elgin, Banff, Aberdeen, Kincardine, and Forfarshire (Royal Northern); Inverness, Nairn, Ross, Sutherland, Caithness, and Orkney (Northern Counties).

For Ireland three distinct prizes of £10 each are offered for the following districts:—Connaught (Ballina), Leinster (Royal Dublin), Munster (Co. Cork), Ulster (Royal Ulster).

**REGULATIONS.**—The regulations applying to bulls competing for the Shorthorn Society's district prizes are as follows:—

1. All bulls competing for these prizes must be the bona fide property of the exhibitor, residing in the district for which the prize is offered, and such bulls must be located from the time of entry until the show, and entered in the special classes provided for these prizes, and in the ordinary classes for which they are eligible at the shows where the society's prize is awarded, and have been calved in the year 1906.

2. All bulls must be eligible and entered in Coates' Herd Book, with a registered number, or their pedigrees sent for such entry previous to the show. Note.—The entry as "produce, under dam," will not be sufficient.

3. No bull to be allowed to take more than one district prize offered by the Shorthorn Society.

**PEDIGREE SHORTHORN COWS IN MILK.**—At the shows of the undermentioned societies for the year 1907, a prize of £10 will be offered as a first prize in a special extra class for pedigree Shorthorn dairy cows in milk, four years old and upwards, the societies named to offer in such class a second prize of £5.

England and Wales.—Bath and West of England Agricultural Society, British Dairy Farmers' Association (in this case for best animal exhibited in pure-bred Shorthorn class, gaining most points on inspection and milking), Cheshire Agricultural Society, Durham Agricultural Society, Herefordshire and Worcestershire Agricultural Society, Leicestershire Agricultural Society, Oxfordshire Agricultural Society, Royal Counties Agricultural Society, Royal Lancashire Agricultural Society, Shropshire and West Midlands Agricultural Society, Somersetshire Agricultural Society, Staffordshire Agricultural Society, Tunbridge Wells and Southern Counties Agricultural Society, United Counties Agricultural Society, Warwickshire Agricultural Society, Westmoreland and Kendal Agricultural Society, Yorkshire Agricultural Society.

**Ireland.**—Royal Dublin Society (£15). This society to offer a second prize of £10 and a third prize of £5; County Cork Agricultural Society, Ballina Agricultural Society, North-West of Ireland Agricultural Society, Royal Ulster Agricultural Society.

The above prizes will be offered in a special extra class for pedigree Shorthorn dairy cows in milk, four years old and upwards, on the day at which the dates are calculated at the show at which the prizes were offered, eligible for, and entered in, Coates' Herd Book, or pedigree sent for such entry previous to the show. Such cows to be clean milked to the satisfaction of the stewards at six o'clock on the previous evening, and to be milked in the ring on the first morning of the show in the presence of the judge, who shall see the milk weighed, and any cows that do not yield up to the following standard shall not be awarded a prize:—Cows having calved within three calendar months of the first day of the show, and if calved more than three calendar months from the first day of the show, 20 lb. of milk. No animal having once taken one of these prizes is eligible to compete again the same year.

### The Canadian Cattle Question Again.

At a conference held in London under the auspices of the Free Importation Canadian Cattle Association of Great Britain to consider what steps should be taken to attain the object of the Association Baile Watson, of Glasgow, who presided, said the Prime Minister and, probably, two-thirds of the Cabinet, were pledged to support the repeal or amendment of the Diseases of Animals Act of 1896, and so provide for the abolition of compulsory slaughter of Canadian cattle at the ports of debarkation in Great Britain. The question now was, whether they should approach the Prime Minister and those associated with him, and ask them to implement the pledges they gave on former occasions. There was a strong opinion among members of the Association that they should endeavour to obtain an answer "aye" or "no" from the Prime Minister. He was satisfied that unless the Government introduced a message, or gave an undertaking that they would bless the measure of a private member

there was no hope of carrying a Bill under the present Government.

Mr. W. Henderson, of Lawton, Coupar Angus, moved a resolution affirming the purpose of the association, and resolving to ask the Government to introduce a Bill dealing with the matter, or, failing that, to give facilities for a private measure, and also to ask the Prime Minister and the other members of the Government pledged to support the movement, to receive a deputation on the matter at an early date, and this was carried with only one dissentient. A committee was subsequently appointed to arrange for a deputation to the Prime Minister.

### Shorthorn Society.

Eleven non-members were elected at the council meeting of the Shorthorn Society held on the 11th inst., when the prize scheme of the society for 1907 was decided upon, and will be found set out elsewhere. In connection with this it was pointed out that the prizes for Shorthorn cattle offered by the Royal Agricultural Society in 1907 will be increased by the addition of the following prizes offered by the Shorthorn Society. A class for a Shorthorn bull and two, three, or four of his male offspring bred by the exhibitor, not less than six months old on the day of entry, with prizes of £20 and £10, £5 and two extra classes for bulls, with prizes £10, £6, £4 in each class. A class for Shorthorn heifers in milk, calved in 1904, with prizes £10, £5, and £4. Also two classes for pedigree Shorthorn dairy cows in milk—viz. cow in milk, four years old and upwards, &c., £10, £6, £4, and cow in milk, under four years old, £5, £4, £3, such cows to be entered or eligible for entry in Coates' Herd Book; also £5 to the breeder of the first prize animals in the Shorthorn classes, these prizes being in addition to the two champion prizes of £30 each offered by the Shorthorn Society for the best male and best female Shorthorn exhibited.

Lord Middleton reported that the Editing Committee had examined the list of pedigree exportation certificates issued by the secretary since the last meeting of the committee—viz., for South America 50, New Zealand 4, total 54.

In pursuance of notice, Mr. St. John Ackers moved: "That there should be a minimum age limit for Shorthorn bulls which would be accepted as sires of animals entered in the Herd Book." It would be remembered, he said, that at the last meeting the committee reported an application for the entry of an animal stated to have been got by a bull calf at four months old, and which the committee had not accepted. He thought that if a limit was adopted—say, nine months—breeders would be more careful to keep their calves separate, and so prevent applications such as he had referred to. He suggested nine months, but as to this he was quite willing for the limit to be fixed by the council.

Mr. W. Duthie, in seconding the motion, thought it was desirable to have such a rule, although it was not well to fix the minimum age limit too high.

Mr. R. Stratton thought that such a rule should not be retrospective; he knew of animals now in calves which were only eight months old at time of service.

The motion, on being put to the meeting, was approved in principle, and the question referred to the Editing Committee for a rule to be drawn up on the subject.

A letter was read from the Royal Agricultural Society of England with reference to a proposed conference of delegates, &c., of agricultural societies to the council to appoint delegates to represent the society at the proposed conference; and on the motion of Lord Middleton the president and secretary were appointed the society's delegates.

A letter was read from the Right Hon. F. Wrensch, of Killarney, Ballybrack, Co. Dublin, suggesting that a meeting of the society should be held once a year in Ireland, at the Dublin Society's spring show. Shorthorn breeders were increasing in Ireland, and the trade looked very healthy, but it appeared that the Irish breeders were not sufficiently in touch with the parent society. It would give Irish breeders an opportunity of meeting and discussing any subjects of special interest to Ireland, such as the selection of a member to represent Ireland on the council, &c.

Lord Lovat thought the idea a good one, and that it would no doubt increase the interest in Shorthorn breeding in that country, and he therefore moved that a meeting such as suggested should be held.

Mr. J. A. Proce seconded the motion.

Mr. Richard Stratton thought they should have time to consider this question, as the matter had only just come before them, not having been received in time for the agenda. He could not see how they could hold a meeting of the society there. Why should not Irish breeders meet and send any suggestions to this society? If the society held meetings in Ireland, similar meetings would have to be held in other parts of the country, and this was more than they could undertake.

Mr. A. M. Gordon was of opinion that if a

### HORSES.

#### SHIRES.

**BLAGDON SHIRE HORSE STUD.** (Established 1874). Prefector, CLEMENT KEEVIL Billington, Leighton Buzzard, Beds. (late of Blagdon, Maiden, Surrey). High-class animals for sale of all ages and both sexes; also massive sound Stallions to let for the season.

**CROSS, J. L.** Cathorpe Towers, Rugby. Shire Stallions, Mares, &c. Also Red Shorthorn Bulls from milking strains, and Oxford Down Sheep.—Apply F. CAMPBELL, Cathorpe, Rugby.

**JOHNSON, WALTER**, Hatfield, Doncaster. Stud Horse, Lambton King 16757. Stallions for hire. Weighty young Stallions, Mares and Fillies on Sale.

**MUNTZ, Sir P. ALBERT, M.P.**, Dunsmore, Rugby.—SHIRE-BRED STALLIONS, COLTS, MARES and FILLIES. About a hundred of all ages. Prize-winners London and other leading shows. Also high-class Shropshire SHEEP, winners first prize at Royal Agricultural, 1886, second in 1887, and first in 1888.—Apply THOMAS EWART, Dunsmore.

**NOTTINGHAM CORPORATION**, Stoke Farm.—Shire Stallions, Mares, Fillies, and Geldings of fashionable breeding, including prize-winners on sale. Inspection invited. Visitors mat.—Address A. AVIS, Stoke Bardolph, Nottingham.

**SEVERAL** Sound Reliable Shire Stallions to Let for the season at reasonable figures. Apply, J. WHITEHURST, Markeaton, two miles from Derby.

#### HUNTERS.

**ROBINSON, ERNEST W.**, Brookleigh, Esher. Irish-bred 1, 2, 3, and 4-year-olds, blood mares, made and unmade Hunters for sale.

#### HACKNEYS, &c.

**CONCHAR, JOHN**, Wyde Green, Birmingham. Breeder of High class Hackneys. Several have been successful in the showyard. Colts and Fillies by the leading Stallions of the day.

**MOORE, HENRY**, Burn Butts, Cranswick, Hull. Pedigree Stud of HACKNEYS, including many prize-winners, yearlings, two years, and others.—Can be seen on application to Henry Moore.

#### CLYDESDALES.

**CLYDESDALES.**—The Seaham Stud Co. have Mares, Fillies, and Colts of the choicest breeding always on Sale.—Apply, R. BRYDON, Seaham Harbour, County Durham.

#### PONIES.

**MILLER, W. S.**, Forest Lodge, Brecon, South Wales. Extensive Breeder and Exporter of best class of Welsh Mountain Ponies and Cobs

### CATTLE.

#### SHORTHORNS.

**COWLEY MANOR** Shorthorn Herd, property of James Horlock, Esq. Bulls and Heifers of choicest breeding. Cruickshank and Bates blood, successful in dairy and showyard.—Apply, W. HITCH, Estate Office, Cowley, near Cheltenham.

**DENNY, F. A. & E. H. M.**, Bore Place, Chiddington, Eden Bridle, Kent. A carefully selected herd of choice Shorthorns.—Stud Bulls, Asses Constellation 85184, by Silver Mint 79908; Primrose Pride 79605. Young Bulls for sale.—Apply, G. MACLEAN DAVIDSON, as above. Telephone, Bore Place, Boreham Reach Railway Station, Pemburgh, Glam.

**WORDSWORTH**, Duffcarrig, Gorey, Co. Wexford, Ireland. Pedigree Dairy Shorthorns (Cruickshank and Scotch strains). Successful in dairy and showyard. Young Bulls and in-calf Heifers of good colours for sale. Exportation orders executed.

**SHORTHORNS.**—COWS of the Seraphina, Julia, and Old Fairy families. Young Bulls and HEIFERS, sired by Blood Royal; younger stock by Jexeller, son of Blood Royal, a Bull shown with great success last season, and recently sold for exportation.—J. R. WILKINS, The Grove, Longton, Lancs.

Send 2 stamps for Illustrated Book.

### TAMWORTHS.

**THE Melton Constable celebrated Herd** of Pedigree Tamworth Pigs. Prize winners at Norfolk, Suffolk, and other shows. Champion, Cups Smithfield. Several recently exported for Continental and Colonial herds.—Apply R. OWEN GODDARD, Estate Office, Melton Constable, Norfolk.

A remarkable record of farm service is held by Mr. Richard Bell, of Ruston, near Searborough, who recently completed fifty years of continuous service. Mr. Bell was ten years of age when first hired as farm servant. He is a single man, and has always lived in, according to the custom of farm servants who, not being married, have not to keep a home of their own.

**Lincolnshire Farm Prizes.**—The council of the Royal Agricultural Society of England have decided that a farm which has been in the occupation of an intending competitor from April 6, 1905, will be considered to come within the terms of condition four, which states that a farm must have been in the occupation of the competitor for two years.

meeting was held in Ireland the society would have applications from Scotland and elsewhere for similar meetings. He suggested that the council send a courteous reply regretting that the society could not hold a meeting as suggested.

Mr. Wm. Duthie agreed with Mr. Gordon. He thought they should send a reply as suggested, and on Lord Lovat's motion being put to the meeting it was lost.

The next meeting of the council was fixed for January 29, 1907.

### Dairy Shorthorn Association.

The first annual general meeting of the above association was held at the Agricultural Hall, London, during the Smithfield Show week.

The Right Hon. the Earl of Crew was elected president of the association for 1907, and the retiring president (the Right Hon. Lord Rothschild) was elected vice-president.

The report received from the council, which was adopted, stated that the total number of members of the association was now sixty-one.

The council, the report continued, think it is a subject for congratulation that at every show where the association offered money there have always been pedigree Shorthorns capable of yielding sufficient milk to qualify for the prizes, and there is no doubt the formation of this association, and the friendly spirit in which the Shorthorn Society has assisted its efforts, have been the means of proving to breeders both at home and abroad that the Shorthorn is the best dual-purpose cow, since it can be bred to produce the maximum of either beef or milk.

The council thanked those gentlemen who so generously contributed to the prize fund in 1906, and they hoped that they would again assist with their subscriptions to this fund during the coming year, and thus enable the association to carry on its work of helping to improve the Shorthorn dairy cattle of this country.

It was decided to issue certificates to all cows competing for prizes given by the association that reach their milk standard.

In future the association's financial year was fixed to end on August 31, and the annual general meeting is to be held during the London Dairy Show week.

### A Public Abattoir at Islington.

The foundation-stone of the first public abattoir to be erected in London was laid at the Metropolitan Cattle Market, Islington, on Wednesday, by Mr. Alfred Bower, chairman of the Cattle Markets Committee of the Corporation of London. The City Corporation are the owners of several abattoirs which were erected in the vicinity several years ago, but these are let to private owners. In the new buildings, which it is expected, will be completed in about six months, cattle will be slaughtered under the supervision of the corporation's own officials, and the abattoirs will be available to any butcher or meat salesman who wishes to avail himself of them.

The buildings will cover about two acres, and will be equipped in the most modern fashion, the cost being about £40,000. A commendable feature in their construction will be the complete separation of the slaughter-house from the cooling-rooms. After the animal is slaughtered it will be sent on an over-head rail across an open space to the cooling-rooms, and the system used will prevent contact between any two carcasses, and so prevent the spread of possible disease.

The system of veterinary inspection will be very thorough. On another portion of the ground occupied is to be erected a destructor house where condemned carcasses can be destroyed at once. Apart from the obvious security to the public secured by having animals intended for public consumption slaughtered under these conditions the good prospect which the undertaking has of proving remunerative may be gauged from the fact that in the private abattoirs alluded to no less than 236,000 animals were killed this year.

The charges to be made are, as at present arranged, sheep 2d. per head, calves 6d., pigs 6d., and bullocks 1s. 6d.

Mr. Bower, before laying the foundation-stone, stated that only 21 per cent. of the meat sold in the Central Market at Smithfield was home-bred out of a total of 23,000,000 of produce which passed through that great emporium annually. He hoped the new abattoir would be the means of increasing the demand for home-fattened meat, which would benefit not only the London traders, but also the farmers of this country. To secure that the new abattoir should be built on the most improved hygienic conditions, the slaughterhouses in France, Germany, Austria, and many of the big provincial cities had been visited, and he was sure that their buildings would be at least equal to any of those on the Continent.

Mr. Joel Goodwin, a well known Lincolnshire agriculturist, proceeding to attend an allotment committee meeting at Ruston on Wednesday afternoon, when he fell dead in the Sessions House yard, as the result of an apoplectic seizure.

# Weather, Crops and Stock.

## Yorkshire (North Riding).

WE are passing through a quiet time in North Yorkshire. There is little doing on the land, and the Christmas and stock markets are over. The latter have not, on the whole, been quite up to the standard of recent years in quantity and quality. Farmers are tired of putting prime stock on the market and selling it at less than ordinary prices, as they have often done at Christmas, hence the falling off. For the last month or six weeks there has been a slightly better feeling in the beef trade, but the price has advanced slowly, and is still far below what farmers consider a remunerative level. Mutton has sold much better, and the same may be said of pork. We have plenty of fodder with which to face winter. Grain has been a good crop, so there is plenty of straw; we have an average crop of hay well-on, and roots are excellent and only missed being the crop of a life-time owing to a bad attack of mildew. So far as this aspect of agriculture is concerned, we have much to be thankful for. Potatoes have risen considerably in price, but they are a very short yield in this part of the country—the worst for several years. We have not yet found the maincrop variety we are looking for. Less wheat has been sown than has been customary for the last year or two owing to a break in the weather at a critical time. Farms are letting well at advanced rents. If there are districts where land is a drug, let the owners apply here, for we have spare tenants, and good men, too. Several left from this district for Canada last year, and have sent home good reports, others will join them next spring. We are not having roaring times. There is more stuff about the homesteads, and this gives us the air, if not the reality, of prosperity, but prices are too low for doing great things. Industrious men are making a living, and that is the best that can be reported at present.

## Essex (Maldon).

AFTER a few sharp frosts and wintry days, mild and growing weather has again set in. Wheat appears to have come up a good plant and look well, also winter oats. There is a larger acreage of winter beans sown this autumn, which look well on a whole; the low price of wheat and higher price of beans has tempted growers to sow more of this crop. I observe some few acres of winter barley have been sown in this district, which is just coming out, it having proved to be a profitable crop this last season. The wheat crop last year in the light lands did not rise very heavy, but on the heavy lands it was a very good crop. In fact, the heavy-landers have had the best of it all round during the past season on account of the dry summer. Barley has yielded well everywhere. The mangold crop came off a good deal heavier than at one time was expected. Swedes are a very poor crop on the whole, but kohlrabi have done very well. They have proved themselves to be a much harder root than swedes, and make a lot of very healthy and forcing food. Turnips are not a very good crop, many of them do not look like standing the winter, and are very much inclined to rot. There has been a very good show of fat beasts at all the local markets in this district, and trade has been very good. Mutton has been selling well for some time, it appears to be very scarce about here. Some few young lambs have made their appearance, and may be seen running about looking forward to an early Easter.

## Kent.

AGRICULTURAL prospects in this district are so far fairly favourable, in spite of a very early and severe November. The land has worked well, and most of the wheat has been put in. The present month has not been up to much for making up arrears, there not being two consecutive days alike—frost, snow, rain, and fogs—and at present it seems more like spring than Christmas. On the whole, it has been good for stock, as there is still a fair bite on the marshes, and sheep have done well, especially the breeding flocks; but frost is now required, so that carting manure may be got on with, which is getting behind. Potatoes are keeping badly in the clumps, and one often hears of these "dropping" in through blight and rot. There is a good crop of mangold generally, which has been secured in good order. The one and chief thing against the farmer is the price of all produce, which is lower than it has been for several years, the only exception probably being mutton. Hops too, were very disappointing, and a heavy loss to most growers, considering the heavy expense of growing a small crop this year, several acres are being grubbed about here, and another year like the last two will about settle hop growing in England.

## MISCELLANEOUS.

**OIL AND GAS ENGINES**, 14 h.p. £20; no lamp required. Specially simple, and suitable for all farmers' work. Any size equally cheap. List free.—CLIFFE ENGINE WORKS, Morton, Bingley.

## Seasonable Topics.

### The New Year.

AS this issue of the MARK LANE EXPRESS will reach our readers on the first day of 1907, we offer with it our sincere wishes for a Happy New Year. Behind us is 1906, old and tried, worn-out and gone; before us is 1907, new, fresh, young, and full of possibilities. Merrily the bells ring out the old and ring in the new as if it were a good thing to get rid of another year and hurry on the passage of time. The world likes novelty, and we treat old men, old servants, and old customs much as we treat old years. As they pass we mark their good points and enlarge on their virtues, but as we shake one hand in farewell to men who are passing from the scene of action, we beckon a welcome with the other to those who are to take their places. It is all in the common order of things, for the world with the years must keep moving on, and as we remember with feelings of pleasure the seasons that are favourable, we forget not the men who have done life's work well. What has 1907 in store for us? We know not. It is stretched open like the front page of a new copy-book, unmarred by any blot, but at the same time bearing no record of work accomplished. It is full of possibilities in the way of health, wealth, and prosperity, but—ah, we must not forget the but—there are chances also in another direction, and in the rough and tumble game of life never a year passes but what some go down as surely as others go up. But we will not dwell on adverse chances now, the New Year is a time of hope and gladness, and it is in this spirit that we tender to our readers the time-honoured wish.

### Should Women Milk?

IF this question had been put a matter of half a century ago it would have been answered with a united reply of "Certainly they should," but of late years we have got to look on many things in a different light to what our grandfathers did, and this is a case in point. There are a good many people in this world who know nothing whatever about farming, but they freely express their opinions that milking is nasty dirty work quite unsuitable for women. The farmer's daughter, too, who has had a smattering of a boarding school education, objects to milking, not because she has any antipathy to work, but because there is a certain lowering of dignity about milking; and as for maidservants—well, a good many of them never learn to milk, perhaps because they think ignorance will be a means of getting out of a task that is personally distasteful. But after all, is there any real reason why girls should not learn to milk? We think not, and there is no need for the work to be dirty or unpleasant. This is largely a question of cowsheds,

and when we think of the interiors of some of these structures we certainly have some sympathy with the girls who object to milking therein. It is not the milking so much as the sheds that are obnoxious, and it is quite a different thing to milk a cow in a dairy shop competition to what it is performing the operation in a good many sheds where cows are tied up to be milked. In up-to-date establishments the cowsheds are so clean and spotless that one would not object to dining in them, but it must be remembered that these structures are not typical of the cowshed on the average farm.

### Snow.

AS we write the country before us is covered with a thin white mantle of snow, and people are saying that the weather is seasonable. Just so, but the worst of seasonable weather in this country is that it does not often last long enough. We get a few sharp frosts and a fall of snow, and then promptly follows a cold thaw, making everything wet, dirty, and uncomfortable. Except, perhaps, for the roads that would be made in the fodder supplies, a spell of sharp, wintry weather would be welcome now, as there is nothing like frost for pulverising newly-turned-up ground, and it would get rid of a good many obnoxious pests that survive through a mild winter. As for snow, it is Nature's means of supplying moisture to the earth and is also an excellent means of protecting crops in the ground when frost is very severe. Of course it has its discomforts, and it is not pleasant to have roadways snowed up and all that sort of thing, but when snow comes and stops for a while we can easily employ implements for clearing roads, and means of travelling are not seriously hampered.

### Another Pill for Poultry Farmers.

WE have been reminded of the millions of eggs that annually come into this country from the Continent that the figures have got a little wearying, and now poultry-keepers have another pill to swallow in the shape of eggs from Australia. The first consignment arrived not long ago, and the process of chilling is said to be so effectual that after travelling 13,000 miles it would take an expert to tell the difference between them and new laid English eggs. This is comforting, perhaps, to the man who has had painful experience of the typical "shop 'un" with his morning rasber, but the British poultry-keeper will naturally ask what chilled Australian eggs will be sold as. A newspaper man asked if the South Australian Government intended to adopt any means by which their eggs could be identified by the consumer so as to prevent their being sold as English, but he got a

negative reply and an explanation that the duty of the above authority ended in delivering the eggs to the English merchants. It seems to us that this is where a grievance is likely to come in. Chilled Australian eggs may be very good, in fact perfect, but some of us have a weakness for the real new-laid article, and if prepared to pay the price asked for it, we would prefer to run no risk of getting a Cornstalk substitute.

### Why People Leave the Land.

WE are reluctant to discuss again the hackneyed topic of back to the land, but we had an instance brought before us the other day which provides one answer to the question why some people leave the land and others are unable to return to it. It was a case of a family on a lordly estate consisting of a man and wife and six children occupying a two-roomed cottage, and the whole family sleeping in the same apartment. The place is a mere hovel, and when asked why he did not leave it the man replied that he could not get another cottage if he did, and as it was part of the farm on which he worked, and the rent of one shilling a week part of his wages, he had to make the best of it. There is no need to ask why this man does not leave the land; it is simply because he has not the means to get away, but one need not wonder that those who are away do not return to conditions of this kind. We are inclined to think that the solution of the rural labour question consists after all in better housing, because twelve shillings a week and a two-roomed hovel are not very great attractions. We are not sure whether the custom of letting labourers' cottages with farms is a good one, for while there are some farmers who see that the cottages on their holdings are kept in proper habitable order, there are others who are very negligent about this, and apparently think that anything is good enough for labourers. This might have answered in the old days of ignorance, but it will not do in the twentieth century, and one of the best means of keeping workers on the land is to provide them with suitable habitations to live in.

### Oxygenised Meat.

FROZEN meat is common enough in our markets, but we understand that the Australians are about to go one better by means of a new process called oxygenising. This consists of placing carcasses in an hermetically sealed chamber, which is charged with oxygen up to a certain pressure, and after being under this treatment for a number of hours the carcasses can be shipped as bulk cargo. It is stated that the idea has been patented in Sydney, where a powerful syndicate has been formed to push the new process. The new method has simplicity to

recommend it as well as cheapness, for whereas it costs from £3 to £4 per ton to freeze meat, it can be oxygenised at from 8s. to 10s. per ton. Again, a freezing plant may cost £20,000, whereas the oxygenising apparatus that will do the same work will, according to statements made, entail an outlay of only £5,000. Whether the oxygenising process will revolutionise the frozen meat trade and do away with refrigerating chambers remains to be seen, but if it succeeds it will mean cheaper foreign meat in our markets, and with it will come the stern necessity of having foreign meat labelled and sold as such, instead of being offered for sale, as a good deal of it is now, as home-fed and home-killed meat.

### In View of Lambing.

With the turn of New Year's Day the thoughts of sheep breeders and shepherds turn in the direction of the important season of lambing. In some districts there will

be no lambs for some time to come, but in the southern counties the early arrivals make their appearance in January, when the time of anxiety commences. But if lambing is an anxious time, it is also one of pleasure and excitement provided all goes well, and it introduces one of those varieties in the yearly routine which prevents farm life from ever being monotonous. One man naturally grows more serious than usual as the ewes get advanced in pregnancy, and it is the shepherd who realises that on his shoulders rests a weight of responsibility. Sheep are naturally nervous animals and liable to abortion through frights and rough treatment, and consequently every possible care should be taken of them prior to the hour of lambing. Then, again, there must be nothing wanting when the actual season begins, and the shepherd who is up to his business will see that his yard is ready, pens are in order, and he has plenty of straw, &c., at hand to run on as he needs it.

## Agricultural Politics.

BY A LOBBYIST.

### Two Significances.

The report of the Small Holdings Committee has many significances. To me the greatest of all lies in the fact that the committee—unlike the feather-headed philanthropists who believe that every street-corner loafer or unfortunate of the towns is a heaven-sent farmer—is anxious to make the small holder the physical apex of a rural edifice. The small holder, and for the matter of that the labourer, should, it is advised, be first of all created in the school. He should receive the advantage of nature-study, and be trained in manual work based on rural needs. Even demonstration-plots should be provided. The small holders once called into existence, they should, it is advised, be aided by credit societies, which should be in themselves associated with a disciplined system of co-operative culture. The regular proposals of the report were expected. The requisition of land under compulsory conditions when it cannot be obtained otherwise, the sub-division and equipment of the land so secured either for letting or for sale, the adoption of a scheme of repayment by annual instalments, the period of repayment to be as prolonged as is possible, and the concession of State loans to landlords to enable them to equip their estates for small holdings, the interest of those loans to be at as low a rate as possible—all these suggestions (despite Mr. Jesse Collings' protest against State-loans to private owners) were anticipated. They may be said to have been regarded as the inherent mosaic of the fabric. They were the first fruits of the remarkable and complete failure of the Act of 1892. What is gratifying is the evidence revealed to lighten the financial burden both upon the landowner and upon the small holder—I myself a remarkable testimony to the anxiety penetrating the committee and an evidence of its refusal to be trammelled by the quakings and fears of the individualistic economists.

### Needed—a Policy for To-Day.

For my part, I am not much moved by the reservations of Sir F. A. Channing—even though he has associated with him the authority of Professor James Long—or by the objections of Mr. Jesse Collings to the extension of State loans to landlords. Sir F. A. Channing should comprehend that the new policy will have a greater chance of success (and, frankly, we cannot afford to repeat the lamentable, almost grotesque, failure of 1892) if this carries with it the sympathy of the landlords. That sympathy would be absent if the policy were based on the example of the Scottish Small Landowners Bill. Nay, after the experience of the Land Tenure Bill, I doubt that the House of Lords will be ripe for a measure of that character for another decade. True, despite the anxiety to modify the expense, the cost associated with the compulsory acquisition of land would, under the proposed scheme, be very serious. However, a universal compulsory scheme based on the Scottish Small Landholders Bill would provoke an antagonism—partly, because of the repugnance felt towards its progenitor—which would be a bar-sinister to success. It is no use blinking our eyes to one fact. That fact is that the Scottish Small Landholders Bill—many of whose principles I am in favour of—is regarded

with a feeling which is very much worse than disquietude and distrust by the landlord class. The more practical policy is, I repeat, to seek to enlist the sympathy of the landlords. That the method of State loans under generous conditions would accomplish. Sir Francis Channing is, perhaps, a herald of a future policy. We want, however, a policy for the moment.

### Supervision—not Centralisation.

May I add one or two reflections, based on my knowledge of the Parliamentary temper, and suggested by Sir F. A. Channing's criticism of the proposal to make the executive authority in the new policy a branch of the Board of Agriculture. Well, whether that body be a branch of the Board or a distinct Commission, for heaven's sake don't throttle the business by a system of bureaucratic centralisation. A county council should not only be endowed with powers of compulsory acquisition, it should be associated with the administration of the scheme. In other words, we should have local administration with a central supervision. In this way we should have the advantage of local knowledge, and associated with that local knowledge such expert information (the lessons deducible, for instance, from the experience of the experimental farms) as would be in the possession of the special branch or commission. Centralisation too often spells damnation. This is the era not of the bureaucracy, but of representative municipal institutions. Never mind the failure of the local authorities to act under the measure of 1892. That failure will not be repeated. The generous financial suggestions would, if they were carried out, partially prevent this. A greater guarantee of non-failure would be the suggested possession of power by the supervising body to act, should there be a refusal to act on the part of those whom the *Daily News* genially describes as "the village mandarins (that is, the landlords and farmers who control the county and district councils) who have hitherto robbed the labourer of his bithright upon the land."

### Would he Combine both Roles?

How will Parliament regard the implied suggestion of one part of the main report that the small holder should also combine in himself the rôle of labourer. I am bound to say the Radical politician is against it. He does not want the peasant proprietor to remain a dependent labourer, or, as some of their number would put it, "a serf." Their vision is not of a small holder who is half a peasant proprietor and half a labourer; their dream is of an independent peasant proprietor. They do not stay to think that there are economic conditions under which the peasant cultivator must inevitably combine both capacities. They do not reflect that there are labourers who are mentally and constitutionally unfitted for a position of complete independence. They do not even pause to remember that in many a case the weekly wage received as a labourer would be a great advantage to that labourer in his rôle of small holder. Hence we may expect a good deal of criticism at the proposal to moderate the size of the holding to permit of this dual capacity. Herein, however, is where local knowledge would be of the

greatest value. Of course, the local mind would comprehend that the cost of equipping a holding sufficiently large for an independent family of cultivators would be less than the cost of equipping that same plot for a number of labourers.

### The Future of the Board.

I pray, Earl Carrington—to whom we must all look as the acclaimed friend of the small-holding principle—that, when he presses his colleagues in the Cabinet to carry the proposals of the report into effect, he will not in any way be coerced by the seductive parsimony of the Treasury into relinquishing the suggestions for increasing the effectiveness of the Board of Agriculture. Never mind whether the executive authority be a special branch of the Board or a special Commission, there was beyond this present in the mind of the members of this committee the anxiety to clothe the present framework (and the Board is little more than this) with palpitating flesh. The establishment of experimental farms, the organisation of rural education, and the distribution of knowledge and assistance—these are proposals which indicate the desire that the Board should be worthy the nation's traditional interest. The Board of Agriculture is, frankly, in its present innocuity and impotence out of harmony with the fine practical character, strenuous desire for usefulness, and original ambitious and methods which characterise Lord Carrington. His lordship is deserving of being something better than a lay figure in the sphere of action. He ought to be strengthened in his antagonism to the Treasury's parsimony by the fact that Lord Onslow was one of the sponsors of these proposals enlarging the area of the Board's work.

### The Future Building Laws.

The member of the committee, Mr. James Long, who dwelt upon the necessity of devoting attention to the building bye-laws, did a useful piece of work. Those bye-laws are a terrible jumble, differing in localities, in character, and in the costs they inflict according to the caprice of rural puntiffs, who may know as much about building as they do about the Pons Asinorum. The consolidation of the bye-laws, and the drafting of a set of rules suggested by expert experience and the knowledge of landlords like Lord Carrington, must be an achievement coincident with the adoption of the proposals of the committee.

### Congratulations!

Congratulations to Mr. Jesse Collings: This new scheme of village education will be as much an achievement of his as if he had carried his Bill through the House of Commons.

### A Compliment!

Mr. Digby Collins is a well-known Cornish squire and politician. Mr. Digby Collins is the chairman of management of the Western Counties' Agricultural Co-operative Association. This is Mr. Digby Collins' opinion of the Associated Chamber of Agriculture: "I hear more nonsense talked there in one hour than I hear in most mixed assemblies in about three."

## LINCOLNSHIRE FARMERS' UNION.

### The Annual Dinner.

The annual dinner of the Lincolnshire Farmers' Union is to take place on January 25 at the Drill Hall, Lincoln, at 6.30 p.m. The President of the Board of Agriculture (Earl Carrington) was to have attended, but owing to his doctor ordering him rest it is doubtful whether he will be able to put in an appearance. His representative in the House of Commons (Sir Edward Strachey) will, however, be present, and invitations have been sent to various local M.P.'s, M.F.H.'s, &c., so that a most representative gathering is expected; in fact it is estimated that between 250 and 350 persons will be present.

### Donington Branch.

The annual general meeting of the Donington Branch was held at the Peacock Hotel, Donington, on Thursday, December 27.

Mr. T. Harrison was unanimously elected chairman, and Mr. S. Hansard hon. secretary of the branch. The committee was re-elected with the addition of Mr. G. Barton.

The meeting was most enthusiastic, and the secretary of the union obtained a useful increase of membership.

It was resolved to ask the Central Committee to accept holders of five acres and upwards as full members.

# FARMING IN 1906.

The year that is rapidly drawing to a close will go down to posterity as a remarkable one on the score of weather. It was preceded by an autumn of peculiar suitability for all farm operations; but this was succeeded in turn by a cold February and a wet spring. The sowing season brought with it a favourable change, and full advantage was taken in this direction. A more favourable April for arable cultivation and cropping is not on record, and that it was fully appreciated may be seen from the figures concerning the crop of the country. Both April, May, and June were exceedingly cold months.

July came in with a complete change, and from that day onward the summer was remarkably brilliant, while the sunshine was greatly in excess of the normal. It is many years since we have had such a summer, and although the droughts, which must necessarily go hand-in-hand with the heat, have been very troublesome, the year itself cannot be summed up other than as of a favourable nature. The autumn was exceptionally mild and open, while the substantial rainfall has done something to repair the ravages of a spell of heat upon our wells and water-courses.

## Crop Areas.

Naturally the total area of land and water in Great Britain has not changed from last year, but the total acreage under all crops and grains shows a further contraction of 0.1 per cent., a small decimal truly, but a large area when applied to such figures as 32,266,790, which is the area for the present year.

Turning to the various crops, wheat shows a further shrinkage of 41,279 acres, the area under the premier food-stuff this year being 1,755,716. This reduction is not altogether unexpected, as the unfavourable weather at sowing time was expected to have some such result. Of barley there is a substantial increase, and now this crop is almost as much grown as wheat—1,751,238 acres being devoted to it this year. Oats are now by far the most popular corn crop, and the figure shows only a slight variation on last year, the area being returned at 3,042,936 acres. The minor crops in this section, rye, beans and peas, are noticeable for the remarkable increase in the cultivation of beans, and the almost corresponding decline in the popularity of peas. Of beans there are 288,891 acres, an increase of 34,126 acres compared with 1905, and of peas 153,979 acres, or 21,256 acres fewer than a year ago. Rye is grown on 61,808 acres, which shows an increase of 2,611 acres.

The abundant yield and low price of potatoes last season has left its mark on the crop, for there is recorded a decline of 42,552 acres as compared with a year ago. The area grown this year is 565,921, and the amount of contraction is 7 per cent. The great root crops, turnips and swedes, which form the bulk of the winter food supplies, are practically unchanged, and it is hoped that the 1,590,920 acres devoted to this culture will give a satisfactory and profitable yield. Mangels show expansion to the extent of 6.8, the area now devoted to them being 431,458 acres.

The various green crops, such as cabbage, kohl rabi, rape, vetches, and lucerne, show a striking general tendency to expand. The most important of these is vetches, and here we find that there has been an increase of 4.1 per cent., the area now cultivated in this way being 142,047 acres. Rape is grown on 93,820 acres, while cabbage monopolises 70,368 acres, which shows an expansion of 3.9 per cent. Lucerne has grown to the extent of 4.4 per cent., and is now cultivated on 55,734 acres. The generic term, other crops, accounts for 114,003 acres, and it is obvious from the growth of 7.4 per cent. in this item that great attention is being paid to the minor crops of the farm. We hope with profitable results.

The season for grass and hay was variable, and

the yields are likely to be poor in the southern half of the country. The respective areas devoted to this crop, however, show only slight alterations from the standard, beyond the tendency to expand. Of clover and rotation grasses for hay there are 2,191,587 acres, a slight growth of 0.1 per cent.; the same crop grown not for hay runs to 2,249,159 acres, or a decrease of 1.7 per cent.

The greatest areas of the country are, of course, devoted to permanent grass, considerably over

## FAMOUS SHORTHORNS.

Photos by G. H. Parsons.

1. WHITE HEATHER. Champion Cow R.A.S.E., 1904; First Prize R.A.S.E., 1905. 2. ROYAL EMBLEM. Champion Shorthorn Bull R.A.S.E., 1905 (sold for £3,250). 3. LADY AMY VII. Female Champion R.A.S.E., 1905.

half the total acreage under all crops being found under this heading. Of grass for hay there is 4,785,613 acres, an increase as compared with last year of 2.1 per cent.; while of permanent grass used for grazing there are 12,459,121 acres, a figure which varies by 0.4 per cent. as compared with a year ago.

Flax seems to have a tendency to pass out of cultivation altogether, as this year there are only 263 acres, as compared with 441 acres in 1905; possibly, however, exigencies of rotation have something to do with the contraction in its area. Hops are growing on a smaller scale than last year, there being 2,245 acres less, the total area under cultivation being 46,722 acres. So much depends on the price obtained for the produce that a smaller crop often brings in a better return than a large one.

Small fruit shows a tendency to grow this season, there being 80,226 acres, a figure which has expanded from 78,825 a year ago. Orchards, too, have a similar disposition to increase, this year monopolising 247,687 acres, or an increase of 3,364

acres. Bare fallow has greatly decreased, something like 10 per cent., this year's figures being 314,552.

## Produce of Crops.

The estimated total produce and yield per acre of the principal crops in the year 1906, is always of great interest. The yield of wheat was 59,161,772 bushels, against 58,902,490 bushels in 1905; barley, 60,553,977 bushels, against 58,902,490 bushels; and oats, 123,343,857 bushels, against 116,436,887 bushels. The average yield per acre in the two periods was: Wheat, 33.66 and 32.78; barley, 34.58 and 33.91; and oats, 40.55 and 38.16. The average yield in bushels of the ten years 1896 to 1905 was: Wheat, 31.22; barley, 33.94; and oats, 34.92.

Beans show a big increase with 9,970,892 bushels this year, against 8,201,730 last year on an increased acreage this year of 30,090 acres. Average yield 34.73 bushels against 32.28 last year, and for the last ten years 28.59.

Peas are estimated to yield 4,515,783 bushels, against 4,439,433 last year, with a decreased acreage this year of over 20,000 acres. The average is put at 30.21, last year 25.71, and for the last ten years 26.61.

The total potato crop of 1906 is estimated at 3,428,711 tons, against 3,762,706 tons last year; and the average yield 6.06 tons in 1906 and 6.18 in 1905, the average of the past ten years being 5.78 tons.

Turnips and swedes show a general advance, 22,627,840 tons being grown this year, against 21,840,582 last year, and this year there is a slight increase in the land sown. The average is put at 14.22 tons per acre, against 13.74 last year, and 12.96 for the ten years respectively. This year, 8,538,480 tons of mangold were grown, against 8,213,260 last year. The average is 19.79, against 20.32 last year, and 18.70 for the ten years.

Hay from clover, sainfoin, &c., shows an increase, being 3,200,969 cwt. this year, against 3,143,443 last year. The acreage is almost the same: 20.21 cwt. is the average yield for this year, against 28.72 last year, and 29.06 for the past ten years.

Hay from permanent grass is put at 5,834,892 tons this year, against 5,087,917 last year, and there is an increased acreage this year of nearly 100,000 acres. The average this year is 22.51, against 21.71 last year.

## Corn Markets and Prices.

The importance of corn prices to farmers in this country, becomes year by year a decreasing one. It is said to have made the admission that what should be the principal industry in the country, that of producing food for the inhabitants, becomes increasingly unprofitable. In spite, however, of the changes that have come over farming in Great Britain, the corn crops are still of importance not only for rotation exigencies, but also for the production of straw, which is essential for our live stock. Turning to the corn markets, we find from the imperial weekly averages that, roughly speaking, wheat is 2s. a quarter less than it was this time last year. Since the new crop has come into the market prices have fallen by 4s., and there seems to be little hope of any improvement setting in. The price of flour is likewise substantially lower than was the case a year ago, the quotations per sack for the last monthly average being respectively 22s. and 23s. in 1906 and 1905.

Of barley prices it is rather more difficult to speak, as no difference is made in the returns between that used for malting purposes and the inferior qualities used for feeding. For malting barley of the best class there is always a keen demand, at prices which leave a substantial profit. This year has been no exception to the rule in this respect. As regards feeding barley, which is controlled to a very large extent in price by the huge importations of foreign feeding stuffs, values show little variation from last year, ranging as they do now just over the 24s. per qr.

Oats have met a fair trade during the year. Last January they were selling at 18s. 2d. per qr., a figure which gradually appreciated until the new crop came onto the market, when, as is usual, prices fell away. Since then there has been a

gradual improvement, and they are now well over 17s. per qr., with a hardening tendency. Other feeding stuffs have been obtainable at reasonable prices throughout the year, at values similar in range to what present-day farmers are accustomed.

An attempt was made some two or three months ago to get up a bit of a scare concerning the cornering of the wheat market by an American syndicate, but nothing came of the "nine days' wonder," which died a natural death.

The following table shows, in a simple form for Great Britain, the

#### Acreage and Yield of Principal Crops.

|                               | Total<br>produce.<br>Bushels. | Acres.    | Yield per<br>acre.<br>Bush. |
|-------------------------------|-------------------------------|-----------|-----------------------------|
| Wheat .....                   | 59,091,772                    | 1,755,716 | 33.66                       |
| Barley .....                  | 60,553,977                    | 1,751,238 | 34.58                       |
| Oats .....                    | 123,388,857                   | 3,042,926 | 40.55                       |
| Beans .....                   | 9,970,892                     | 288,851   | 34.73                       |
| Peas .....                    | 4,515,783                     | 153,979   | 32.10                       |
| Potatoes .....                | 3,428,711                     | 565,921   | 6.06                        |
| Turnips and<br>swedes .....   | 22,627,840                    | 1,500,920 | 14.92                       |
| Mangolds .....                | 8,538,480                     | 431,458   | 19.79                       |
| Hay from clover,<br>&c. ..... | 3,200,969                     | 2,191,587 | 29.21                       |
| Hay from perm.<br>grass ..... | 5,384,892                     | 4,785,613 | 21.71                       |

#### Fat and Store Stock.

The droughts of the past year was utterly disastrous to those graziers who were only possessed of coarse inferior grade stock, not worth going to extraordinary outlay to ripen. Large numbers of such were pressed on the market in half-fattened state with the result of depressing the beef trade more than it had been before. In the summer months there was a slight appreciation for secondary, first quality remaining pretty much the same until August, when a considerable decline in second quality took place in the Metropolitan market, and provincial markets became glutted with the half-fed of every inferior grade.

Fortunately the markets for sheep were well supported even in the districts which suffered worst by a far different state of things being experienced in the north-western and other northern counties; and in Scotland, Wales, and the border counties of the Principality. Prices at autumn fairs are always chiefly affected by the prospects of the root crop, and although deplorably bad in the eastern, southern, and south-western counties, the fact that there were bumper crops of roots and hay in the parts of the kingdom above named, which had been beneficently visited with summer rains, turned the scale, and the congested districts shared in the better fortunes of those which, by covering a greater extent of territory, and from the affluent of their treasures, mastered the situation.

Pigs, both fat and lean, sold at high rates throughout the year. The average values for baconers and porkers, as chronicled for the months of March and April, were not, however, sustained afterwards. In November the rates had again appreciated almost to the range of spring ones. Notwithstanding the fact of good prices having prevailed for three or four years, the breeding of swine is not pursued to the same extent as formerly.

The following figures show the price of beef and mutton at the Metropolitan Market at the end of each quarter:—

|                  | Beef.          |                | Mutton.        |                |
|------------------|----------------|----------------|----------------|----------------|
|                  | 1906.<br>s. d. | 1905.<br>s. d. | 1906.<br>s. d. | 1905.<br>s. d. |
| March 30.....    | 4 4            | 4 4            | 5 8            | 6 4            |
| June 30.....     | 4 8            | 4 10           | 5 10           | 5 8            |

#### Numbers of Live Stock.

The returns relating to the number of horses, cattle, sheep, and pigs show, perhaps, less variation than usual. The total number of horses used for agricultural purposes of all ages is, 1,565,681, a figure which shows a slight decrease on last year's to the extent of 0.2 per cent. It is satisfactory to be able to record that unbroken horses exceeding one year old have grown by almost five thousand.

The total number of cattle in the country is 7,010,856, or 23,536 more than a year ago, this number is further divided into sections. For instance, of cows and heifers in milk or in calf there are 2,738,411, or a percentage increase of 0.8; those between one and two years old number 1,494,795. The only decline to be recorded is among yearlings, which number 1,350,986, or a decrease of 3.6 per cent.

The total number of sheep shows a slight, but satisfactory increase; they now number 25,420,300, or a gain of 163,164 over last year. The growth, it is pleasing to record, is principally among ewes kept for breeding purposes, while young sheep under one year in age are also substantially more numerous.

Pigs again show a decline in numbers; there are now 2,233,461, or 101,458 less than last year. Sows kept for breeding, however, show a tendency to expand, so with the present price of pork it is quite likely that a year hence pigs of all descriptions will be considerably more numerous.

The following figures show how our live stock population have fluctuated during the past two years:—

|              | 1906.      | 1905.      | + Increase.<br>- Decrease. |
|--------------|------------|------------|----------------------------|
| Horses ..... | 1,568,681  | 1,572,433  | - 3,752                    |
| Cattle ..... | 7,010,856  | 6,987,020  | + 23,836                   |
| Sheep .....  | 25,420,300 | 25,257,196 | + 163,104                  |
| Pigs .....   | 2,233,461  | 2,424,919  | - 101,458                  |

#### Animal Diseases.

The health of farm animals has been satisfactory during the year. Anthrax shows no movement in either direction; the number of outbreaks, it is true, are somewhat fewer, but the animals involved are almost as numerous. Foot and mouth disease continues happily to be a stranger to these shores, while rabies are also non-existent in this country. Glanders, which perhaps is to a great extent a disease more to be found in town stables, has remained stationary, while the number of outbreaks of sheep scab is very nearly half what it was last year, and over a third less than in 1903. Swine fever, on the other hand, has been more prevalent than for some time past. Whether this is due to more stringent regulations, or to the increase of disease, is a matter of opinion, but suffice it to say that up to the present time, this year 6,677 animals have been slaughtered as diseased or exposed to infection, as against 3,518 in 1905 and 5,402 in 1904.

#### Pedigree Stock Sales: Cattle.

Breeders of pedigree cattle have found throughout the whole of the year a firm and buoyant trade. The demand from Argentina, Australia, and other countries has been maintained, and in consequence a high level of prices has been reached.

The ubiquitous Shorthorn takes first place in any review, and the sale of the year was that of the late Mr. P. L. Mills' sale at Ruddington, of 115 head realised an average of £153 18s. 5d. per head. The Argentine buyers who secured many of the jewels of the herd only did so after the stiffest contest with England's foremost breeders, many of whom were able to retain at home some very choice stud animals, including that noted stud bull King Christian of Denmark. Amongst the prices paid for bulls were 1,100 guineas, 900 guineas, 420 guineas; for bull calves, 130 guineas; for cows, 600 guineas (the top price of the year for females), 500 guineas, 390 guineas; for three-year-old heifers, 310 and 300 guineas; for two-year-old heifers, 420 and 330 guineas; for yearling heifers, 420 guineas; and for heifer calves, 378 guineas. The best average of the year was Mr. W. Duthie's—namely, £304 15s. for eighteen calves, the top price being 850 guineas. Mr. A. T. Gordon (for fourteen) obtained an average of £120 12s. 6d., cows making up to 250 guineas, two-year-old heifers to 200 guineas. Mr. A. M. Gordon's average was £123 16s. 6d. for the same number (a bull making 700 guineas), seven of which gave the handsome average of £211 8s. Mr. John Marr's average for sixteen bull calves was £122 5s. The late Mr. James Webb's forty head gave an average of £98 4s., an average just in excess of that secured by Mr. H. Dudding, whose annual sale took place on the previous day, when an average of £94 4s. 8d. for fifty-one head was secured, the best price being 1,000 guineas for Alastair 2nd.

Other breeds, although overshadowed by the "red, white, and roan," have had their share of success. The demand, both home and export, for the Hereford breed was good, best prices being: bulls, 100 guineas, at Mr. J. G. Jones' sale; two-year-old bulls, 90 guineas, at the society's spring sale, at which the yearling bulls went up to 120 guineas, the best sale price of the year. The top price for females was 104 guineas, at Mr. D. Price's sale. The Sussex sales have been about the usual number, and none call for any special note save a draft sale held by Lord Winterton, while the top price for bulls, 135 guineas, is stated to be a record one. There have been some better prices realised for Devons. Mr. C. L. Hancock realised for sixty head the very excellent average of £35 7s., bulls making up to 52 guineas and cows 63 guineas. The society's sale at Exeter was good, and the prices ranged from 61 guineas. The Jersey sales have shown a good demand for all the best animals offered. Lord Rothschild's sale, with an average of £21 3s. 5d., heads the list of sale averages, and at this sale the best price of the year was made for females, 70 guineas.

#### Horses.

Shire horses continue to make satisfactory prices. Mr. H. Jagger's sale gave the best average for the home sales, £83 19s. for thirty-nine head. Several excellent prices were made: 250 guineas for brood mares, 300 guineas for a three-year-old filly, 220 guineas for a yearling filly, the top price of the

year for this age. Sir A. Henderson's sale at Buscot came out with an excellent average: thirty-five head made £80 8s. per head. The top figure of the sale was 310 guineas for a three-year-old filly, the top price of the year. The late Mr. P. L. Mills' stud, dispersed in September, included a notable series of stud stock dispersal sales. The best prices were brood mares 220 guineas, yearling fillies 230 guineas, and several others between these figures and 125 guineas, making a general average of £65 6s. 5d. for fifty-five head. At the annual Shire horse sale the aggregate sale total was an excellent one, and the average worked out at £93 5s. 11d. for 110 head. The highest price of the year for brood mares—510 guineas for the champion mare—was realised here.

Clydesdales had a more than usually prosperous year, four stallions of Mr. Smith's (Blacon Point) making 700, 400, 295, and 250 guineas, and an average of nearly £220 for fourteen head. Suffolks have been in good local demand, but otherwise there is not a great deal to record.

The sales of Hackneys, &c., have not been so numerous as in some former years. Sir Gilbert Greenall secured an average of £58 15s. for fifty-four head; 350 guineas, the top price, being realised for a harness mare. Some capital prices were realised at Mr. R. Whitworth's sale, notably, 200 and 100 guineas for pony stallions, and 300 guineas for harness horses. Mr. R. W. Jay sold twenty-four for 128 guineas average; Helma made 650 guineas, and 250, and 210 guineas were made for geldings. The best prices for what may be fittingly termed show horses were 1,175 guineas for Menella and 650 guineas for Gay Matthias.

Among the Hunter sales Mr. A. Bourne realised the top price of the season with 600 guineas, and his average for eleven—£283 10s.—is the best noted. Mr. Downer sold five at from 420 guineas, and averaged £231 1s.

#### Sheep.

Our flockmasters have had a splendid season, and the demand from abroad has been really phenomenal. Lincoln Longwools are the most remarkable. The record price and average of the breed at Rily sale is one almost, if not quite, without equal. 1,440 guineas for one ram, and several others making up to £500 guineas, with an average of £152 1s. 9d., is an average that no other living breeder has ever realised. Mr. Dudding heads the list both for individual prices of yearling ewes, 30 guineas, and average of £16 17s. 4d. for twenty-three. Messrs. Dean average £71 3s. 1d. (top price, 280 guineas); Mr. J. Pears, £47 13s. 4d. (top price, 203 guineas). Messrs. R. and W. Wright's names are absent, and the reason is one worthy of record—namely, because the whole of a valuable flock has been purchased for export as a whole to the Argentine, the sale being one of the most important ever effected in connection with any breed of sheep, and one that involved the largest sum of money ever paid or received for a sheep deal in England. Leicester have experienced a good home and export trade, and made up to 20 guineas; Cotswolds have done slightly better and made up to 30 guineas.

Down lambs have sold well; Oxford have been sold as high as 75 guineas for one of Mr. Worley's. Southdowns have also had a good season, with prices up to 100 guineas for one of the Duke of Richmond's. Among Hampshire, Mr. Carey Coles made the best figure, a ram lamb being let for 105 guineas, a close runner - up being Mr. J. Flower, who made 180 guineas. Shropshires have met a good trade. Sir R. P. Cooper's 115 guineas, at the Royal Show sale, where the capital average of £23 19s. was realised, was top sale price. Prices and averages for Kent sheep have made remarkable progress. Until Mr. J. E. Quedsted made 120 guineas for one at Ashford sale, and averaged £20 18s., both records for this breed. Other breeds which have also done well are Dorset Horns, South Devons, Border Leicesters, and Black Face.

#### Pigs.

Pig breeders have had a fair inquiry for their stock. Among Large Whites the dispersal sale of the late Mr. P. L. Mills realised top average—£9 3s. 9d. for 150 head. The Middle White breed has but few sales on record of this year, Mr. T. S. Jay's £8 3s. 6d. being the best average. The Berkshire sales have shown a capital demand, Mr. A. Hiscock's average of £11 11s. was the best of the year.

#### Agricultural Shows.

A fine summer is always beneficial to agricultural shows. The Royal Show at Derby, as regards weather, struck one of the best patches which was invariably of service to this climate. Notwithstanding this the show was a fine one, while the financial result was so satisfactory as to make it evident that the new series of movable shows which commenced at Derby will be crowned with success. The good fortune at Derby appears likely to extend to the exhibition at Lincoln in 1907. The Bath and West and Southern Counties' Agricultural Societies met on the outskirts of

Swindon, and this fixture will be remembered by the fatal tram accident, in which both exhibitors and visitors were concerned. The show itself is likely to be a financial failure, but the 1907 meeting at Newport will make up any shortcomings in this direction. The Royal Counties' Agricultural Society met at Portsmouth in brilliantly fine weather, and again success attended their efforts; the Royal Lancashire at Lancaster are able to record a favourable verdict, but visitors to the succeeding fixture—the Yorkshire—have recollections of Middlesbrough; its thunderstorms, heavy rains, and inclement conditions of anything but a favourable nature.

The Highland and Agricultural Society, who met at Peebles, were rewarded with success. The site of the show was in one of their "loan" districts, but it is on this account all the more gratifying to find a substantial margin of profit. The Irish Shows again had a successful season. The Royal Dublin Society's fixtures are of such a well-known character as to defy competition, while the gatherings at Belfast are doing good work in providing Northern exhibitors. The Welsh National Show at Aberystwyth bids fair to establish a society for the principality that will be productive of great good.

### Minor Points.

Agriculture has come in for a greater share of attention in Parliament than usual. Of the Land Tenure Bill and the Report of the Agricultural Committee of the Tariff Reform Commission it is undesirable to speak here, as both lend themselves to a considerable amount of political feeling. The Dogs Bill, which comes into effect on January 1, 1907, is a short Act which deals with the worrying of sheep, and it will be welcomed by all farmers; while the New Fertilisers Act, which comes in operation at the same time as a useful measure supplementing other Acts dealing with the sales of fertilisers and feeding stuffs.

The potato boom has left its trail all over the country, and new varieties are under a cloud at present. We cannot say that this is undeservedly the case, and the folly displayed by those responsible for the ridiculous claims put forward for new varieties have reaped their own reward. There is no doubt that potato disease is very prevalent in this country, and big growers are looking forward anxiously and eagerly for a variety to take the place of the Up-to-Dates which has served them in good stead for so many years.

### The Le May Challenge Cup.

In order to encourage excellence of quality in English hops, and to stimulate planters in their endeavours to attain to the highest standard, Messrs. W. H. and H. Le May have for some years offered for competition at the Ashford Cattle Show a valuable sterling silver cup, open to the whole of the hop-growing parishes of England. It becomes the absolute property of any grower who wins it three times, but it is not necessary it should be won in three successive years.

That it is worth the winning will be seen by a glance at the appended engraving, especially when we add that its net weight is 8½ ozs., and that, including the plinth, its height is nearly

24 in. The design is exceptionally elegant, and the fortunate possessor of such a cup may well be proud of the testimony it furnishes of his practical skill in his profession. The winner this year is Mr. W. Rogers, of Horton Kirby, Dartford, who also secured this distinction in the same competition in 1904, so that he has only to repeat his success once again to enable him to hold the cup in perpetuity.

This final result may be safely anticipated when we examine the record of Mr. Rogers at the hop competitions at the Brewers' Exhibition. Being a regular exhibitor since 1900, he has as regularly been distinguished in the prize lists. In 1903 and in 1905 his samples secured the Gold Medal and Championship, and he has, in addition to these honours, taken six first, four second, and one third prizes. No other English planter, as far as I am aware, holds so high a position, and approving the principle of giving honour to whom honour is due, I have great pleasure in making these facts public.

### Notes from Foreign Markets.

#### America.

A correspondent in Tacoma (Washington) writes me this week as follows:—"Reading your interesting reports in the MARK LANE EXPRESS of November 19 we note that you publish extracts from a letter received from a Washington dealer, which gives a very 'bearish' view of conditions on this side. There are always two sides to every question, and your correspondent is certainly very one-sided, being no doubt prompted by

his anxiety to force the market down to as low a point as possible in order to cover sales made at low prices last summer. To give you the other side of the situation, we ask your attention to the enclosed statistics, compiled by Oregon dealers, who are as much on the 'bull' side as your correspondent is on the reverse. We desire to say that as regards prices we do not agree with either of these extreme views. We believe that after the New Year conditions will change, and that we shall then see buying more brisk, and prices go up a notch or two. We do not believe in either a 10-cent, or 20-cent, market, but certainly think that present prices, which average 12½ to 14 cents for good useful hops, are lower than the situation warrants, taking into consideration your abnormally small crop and our increasing consumption. We do not lose sight of the fact that brewers' carry-over stocks were large, but surely at these prices they are not likely to let them get smaller."

The figures referred to show that, including the old hops carried over into the 1906 season, and the more of 1905 and 1906, after making allowance for imports and exports, the supplies for two years amounted to 550,000 bales. The local consumption for the two years, 1906 and 1907, is calculated at 520,000 bales, on the basis of the production of 120 millions of barrels of beer, averaging rather over ½ lb. of hops per barrel. The compilers consequently conclude, after taking imports, &c., into account, that the surplus this season in the U.S.A. available for export is round about 80,000 bales. In their accompanying remarks they imagine that, owing to English requirements, the exports will probably amount to 110,000 bales, and that this will create a shortage in America, which must certainly enhance values. They also point out that the marked increase in the production and consumption of beer in the United States will demand about 37,000 bales more hops per annum, and as there is no enlargement of the hop-growing area, it will be found that, by the time the 1907 crop has arrived, the whole of the earlier growths will be cleared out. Thus they predict that the Pacific Coast markets will be advanced to 20 cents, within the next few months, and practically advise growers who have not sold their 1906 hops to await the issue of events.

The views thus declared appear to be confirmed by the official reports of exports and imports during the first three months of the present season, when compared with the corresponding movements of 1905. The exports this year are 26,548 bales, and last year they were only 8,391 bales. The imports this season are 1,963 bales, as against 5,242 bales in same period of 1905.

#### Nuremberg.

Although the proximity of the holidays usually affects the market by reducing the volume of business, this year's experience is quite exceptional, as the activity which has prevailed during the past few weeks is still maintained. The new supplies for the seven days ending December 20 amounted to 1,700 bales, the sales totalling 2,200 bales. Stocks are therefore substantially reduced, and sellers are consequently very firm in upholding their quotations. The principal business has been done in the best green hops, which are sought for by local brewers. Choice Hallertaus have been sold at as high a price as 130s., and choice Wurttemburgs same figure. Lower qualities are also being freely taken at 90s. to 105s. for home consumption. But in consequence of the small demand for exportation yellow samples may be bought rather more easily, and can be obtained at from 75s. to 80s. The general tendency of the market at the close of the business for this year is in favour of continued firmness, with the probability of further advancement when the New Year's trade opens.

#### Belgium.

After a rather long period of comparative depression, the Belgian hop markets have caught something of the stronger tone prevailing elsewhere. Values of Alsops have advanced several points, and may now be quoted at from 65 to 70 francs, Poperinghes having also improved in like proportion. The outlook for the New Year appears to be indicative of further strength.

What is a steer? was the question that gave the Buckinghamshire Divisional Bench some trouble the other day. A farmer was summoned for allowing two beasts to stray on the public highway, and the summons went on to specify one as a heifer and the other as a steer. The defendant said he had not had a steer on his farm since the beginning of August, and that if he was convicted he should appeal. The question arose as to what really was meant by a steer. Johnson gives it as a young bullock, but this one appeared to be a little more than a calf, though in age it could be properly classified as a steer. To meet the difficulty, the bench suggested omitting the "steer" from the summons. To this the defendant consented, and, pleading guilty to allowing the heifer to stray on the public highway, he was ordered to pay 11s. 6d.

### Home Affairs.

Writing in the Christmas holiday week, I ask myself if there is any place for hop trade reports at such a time. I hope that every one of us has enjoyed to the full the happiness arising from joyous social gatherings with their festive accompaniments, and that we have all been free from any note of sadness that might otherwise have marred our pleasure. But the days of relaxation from the cares of business have passed away for the nonce, and our offices are again open.

It is therefore incumbent upon us to face the more serious aspect of life, and while we examine the records of the season thus far, to look at the possibilities of the future. Unfortunately, our experience since September is somewhat clouded by disappointment. Neither planter nor trader (with but few exceptions) can congratulate himself upon the results of his efforts. Despite of our limited crop, that reasonably raised expectations for a brisk demand and remunerative prices, we have had a dragging, dull trade, and values have been low.

Nevertheless the crop is now practically cleared, the unsold balance being reduced to such an insignificant point, that we may surely anticipate a stronger market when the New Year comes in. Such an anticipation is encouraged by the course of affairs during the last two or three weeks. When business was suspended for the holiday, the market had maintained the firmness that was initiated by the recent upbringing of healthy demand. A large quantity of hops had changed hands, and the advanced values were well supported up to the last moment. By inquiries from factors to-day, I ascertain that they are very confident as to the tendency of the trade. There are well founded reports that brewers are coming forward in January, prepared to take over a good proportion of the hops on offer, and from all present appearances we may expect that in a short time the English market will be clear of stock if holders are willing to sell. These conditions necessarily imply further advancement of prices, and I sincerely trust that growers who are holders will be amply rewarded for their patience.

Another encouraging feature may be found in the views expressed in my foreign notes by American correspondents. These are much more optimistic than previously. One of them says that he appreciates the difficulties I labour under in getting reliable reports from his side, having noticed my bewilderment at the conflicting state with this remark, from time to time. I fully agree with this remark, and also with the advice given me to "shake them up together and take the average," as by that means I shall get somewhere near the truth. I am doing this to-day, and find, in the average arrived at, that the dreadful bogey of American competition is not so black as he was formerly painted. He will doubtless disturb our calculations to some extent, but we need not be so much afraid of him, as to lose our confidence in the more favourable prospect, now presented to us.

## THE SMALL HOLDINGS COMMITTEE'S REPORT.

### Important Recommendations.

The report of the Departmental Committee appointed in April, 1905, by the Board of Agriculture and Fisheries, to inquire into and report upon the subject of small holdings in Great Britain, was issued last week as a Blue-book. The referendum of the committee was to inquire into the administration and working of the Small Holdings Act, 1892; to examine the various arrangements made by land owners in recent years for the provision of smaller agricultural holdings; and to report as to the conditions under which such holdings are most likely to be attended with success, and as to the measures which may most advantageously be taken, either by legislation, co-operative association, or otherwise, to secure the increase of their number.

The committee consisted of the Earl of Onslow (chairman), Earl Carrington, the Right Hon. Jesse Collings, M.P., Sir Ralph Anstruther, Major Patrick Craigie, Mr. C. Bidwell, Mr. W. Brown, Mr. F. A. Channing, M.P., Mr. James Long, Mr. J. W. Willis-Bund, and Mr. R. A. Yerburgh, M.P. On his appointment as President of the Board of Agriculture, Earl Carrington appointed Mr. R. C. Munro Ferguson, M.P., as a member of the committee in his place.

The committee state that they have examined witnesses drawn from all parts of Great Britain, and including members of county council small holdings committees, who detailed operations carried out under the Act, and dealt with the deficiencies and difficulties in connection with the administration thereof; an official from the Land Registry Department, who went into the question of registration of title under the Act and generally; landowners and land agents who have had experience in the creation of small holdings, and who also gave evidence on the general question; representatives of associations and co-operative and other societies which have acquired land for the purpose of disposing of it to small cultivators; individual cultivators of small holdings; witnesses who have visited and reported on small holdings in what may be described as the small holdings districts; officers from the respective Local Government Boards of England and Scotland who gave evidence on building bye-laws; witnesses who dealt with co-operation and co-operative credit banks; a superintending inspector from the Board of Agriculture and Fisheries, and an inspector from the Board of Education, who went into the question of agricultural education; the secretaries of the Crofters' Commission and Congested Districts (Scotland) Board, who outlined the functions of those bodies and the action they have taken. Representatives of the English and Scottish Chambers of Agriculture and the secretary of the Highland and Agricultural Society of Scotland also gave evidence. Other witnesses included the High Commissioner for New Zealand, who described the system of land settlement in Australia and New Zealand, and the Vice-President of the Irish Local Government Board, who stated the provisions of the Labourers (Ireland) Acts as to erection of cottages. A total of fifty-eight witnesses were examined, and 10,990 questions asked and answered.

### Committee's Recommendations.

The recommendations embodied in the report are numerous and far-reaching. The principal proposals are:—

1. That in addition to the machinery provided by the Small Holdings Act, 1892, the provision of small holdings should be assisted by the direct intervention of a central Government Department.
2. That, with this view, special branches of the Board of Agriculture and Fisheries be formed for England and Scotland to make definite experiments in the creation of small holdings.
3. That Parliament be invited to make an annual grant for the conduct of such operations.
4. That, in the event of the Board of Agriculture and Fisheries being unable to obtain by agreement land required for these operations, compulsory powers should be conferred on the board.
5. That the Board should make annually to Parliament a return showing the progress made in the provision of small holdings by local authorities, and the extent of the difficulties or the measure of success experienced; and for this purpose the board should have statutory power to procure from the county councils the necessary information on these points.
6. That where the Board considers action is feasible, it should take such steps as seem advisable to secure suitable land, to properly set out, sub-divide and equip it, either to let at an annual rent or to sell to suitable applicants, the purchase price to be repaid by such annual instalments, including the interest and sinking fund, as will repay the total outlay over a prolonged period of years.

There are, in addition, a series of recommendations for the amendment of the Small Holdings Act of 1892. The first two are intended to relax the conditions of repayment, which at present press rather heavily on the small occupier.

One of the recommendations is that the purchaser shall pay down one-eighth instead of one-fifth of the purchase money as at present. The second is that, after payment of the first instalment, the county council shall have power to defer the payment of the instalments from time to time in such cases as it deems advisable. It is also proposed that county councils may relax the condition prohibiting the erection of more than one dwelling-house on the holding, if, in their opinion, such relaxation will tend to develop the use of the holding for agricultural purposes. Another important recommendation is intended to obviate the necessity of a holding being offered for sale, to the person entitled to the land of which it forms part, when the small holder has paid all the purchase money and wishes to use the land for other than agricultural purposes.

It is also recommended that, in addition to the experimental action of the Central Department in acquiring land and establishing small holdings in particular localities, State loans, similar to those granted under the Public Money Drainage Act of 1846, should be made available for the purpose of enabling landowners, under certain restrictions, to undertake the necessary adaptation and equipment of voluntarily providing small holdings throughout the country. Such advances are to be granted at the lowest rate of interest possible without loss to the Treasury.

Additional recommendations are that further facilities should be provided for agricultural instruction in rural districts, and that for this purpose an addition should be made to the present grant to the Board of Agriculture and Fisheries; and that practical steps be taken by Government to promote all forms of agricultural co-operation, and especially to encourage the formation of agricultural credit societies by means of State loans, on the approved security of a central co-operative agricultural credit association.

### Reservation Reports.

Mr. R. C. Munro Ferguson, M.P., while approving of the main lines of the report, suggests some financial modifications; and reservations on minor points are also made by Sir Ralph Anstruther, Mr. James Long, and Sir Francis Channing, M.P.

Mr. James Long urges in his reservation report that something more should be done for the farm labourers by the provision of substantial and roomy cottages and an acre of land at rents within their narrow means, and he comments on the hindrance caused by the arbitrary character of the building bye-laws of many local authorities. He also agrees in the main with the supplementary report of Sir F. A. Channing, especially as to the causes of rural depopulation and as to the great importance of co-operation and suitable education.

### Sir F. Channing's Views.

In his supplementary report, Sir Francis Channing submits an alternative scheme of the most drastic and effective character. After urging at length and with many illustrations from the evidence—(1) that the interference of the State to develop small holdings can only be justly called for if the small holdings to be erected are based on real economic demands and capable of being worked at a profit; (2) that experience of the success of co-operative land societies in England, and of the history of the development of Danish agriculture, demonstrates that by co-operative methods will land be provided most cheaply, supervised as to its cultivation most effectively, and profitable working of the industry in all its branches made most possible; (3) that the essential condition of rural regeneration is the expansion of agricultural education on practical and novel lines.

Sir Francis makes his principal suggestion as an amendment to the report in the suggestion that a small holdings policy will best be pushed by an independent land or small holdings commission with universal compulsory powers of hiring land by an order of the commission, fixing a per cent. to be paid to the landowner and security of tenure for the small holder.

In other words, Sir Francis wishes to apply, with such modifications as may be necessary, the principle and the procedure of the Small Land-holders (Scotland) Bill, introduced this session by Mr. John Sinclair for Scotland—to the whole of England and Wales also. Under this procedure any land of under £50 annual value can be provided, the Commission undertaking the cost of equipment, compensation to outgoing tenant, &c., and charging a small percentage on the small holder. In this operation Sir Francis suggests that the action of co-operative societies, as in the "Garden City" scheme, should be enlisted by the Commission.

### Mr. Jesse Collings' Suggestions.

Mr. Jesse Collings, in his separate report, says that he considers the committee's recommendations as to the provision of small holdings by the central authority and by county councils quite

inadequate, and he condemns the recommendation of State loans to landowners to adapt and equip voluntarily provided small holdings "as a retrograde step, which, if taken, would create a distinct barrier to the restoration of a peasant proprietary in this country."

To deal effectively with the question under consideration the following provisions are, in his opinion, absolutely necessary:—

1. A substantial sum to be placed at the disposal of the Board of Agriculture for the purpose of creating small holdings throughout the country. The terms, as to loans to small holders, to be such as will secure that poverty be no bar to suitable men acquiring the ownership of the land they till.

2. The Act of 1892 to be amended in the manner suggested above.

3. That as Parliamentary grants are made to the Congested Districts (Scotland) Board, 1897, for (among other purposes) the "creation of a body of small proprietors," so grants of a similar kind should be given to local authorities in England for the equipment of small holdings. Such grants-in-aid to be apportioned among the county councils according to the liabilities which the councils themselves have undertaken under the Act of 1892.

## Correspondence.

### American Linseed Cake.

SIR.—With regard to the new Fertilisers and Feeding Stuffs Act, which comes into force on January 1, 1907, the effect of same will tend to show the consumer more than ever the best value obtainable, for the reason that sellers will be obliged to state on every invoice the oil and albuminoids contained in the article sold.

It is authoritatively computed that each unit of oil and albuminoids is of equal feeding value, also respectively two and a-half times that of every unit of carbohydrides; hence it is a simple operation for the intending purchaser to judge the real total worth of the feeding properties of individual brands or makes of cakes, meals, &c.

For example, the following analysis recently taken of two sorts of foreign made showed results:—

### Ordinary American Linseed Cake.

|                |       |                    |       |
|----------------|-------|--------------------|-------|
| Oil.....       | 6.76  | multiple 2½ equals | 16.90 |
| Albuminoids    | 36.77 | " 2½ "             | 91.92 |
| Carbo-hydrates | 35.17 | " 1 "              | 35.17 |

Feeding units..... 143.99

### Ordinary Russian Oil Cake.

|               |       |                    |       |
|---------------|-------|--------------------|-------|
| Oil.....      | 10.81 | multiple 2½ equals | 27.02 |
| Albuminoids   | 27.91 | " 2½ "             | 69.77 |
| Carbohydrides | 36.94 | " 1 "              | 36.94 |

Feeding units..... 133.73

Our friends on the Continent have learnt from experience that American linseed cake is purer and higher in oil and albuminoids combined than almost any other description. The imports into Antwerp alone of this make are about 4,000 tons weekly. The only reason that American brands are not favoured in England is on account of the hardness, but the continental farmer does not object to this, as by damping the cake with a little water after being passed through the breaker, and subsequently keeping same for twelve hours the cake becomes as tender and palatable as the higher-priced softer makes.

R. & J. HEWETSON.

1, Catherine Court, December 28, 1906.

### Dry and Wet Handed Milking.

SIR.—In my opinion "wet-handed" milking is the best way, and most natural. Was ever a calf known to suck a cow with a dry mouth? There is a peculiar softness in milking with a hand moistened with a little fresh-drawn milk. The cows like it and the milkmen like it. We milk over fifty cows daily, and have quiet cows to milk and also fidgety ones. But I believe in the "wet" hand.—Yours faithfully,

TITOS. DAWES.

Soggs House, Ewhurst, Hawkhurst,  
December 19, 1906.

The Northamptonshire Agricultural Society have altered the date of their 1907 show to Wednesday and Thursday, May 22 and 23.

Earl Carrington, President of the Board of Agriculture, is to be the principal guest at the annual dinner of the Liverpool and District Farmers' Club on February 8.

At a public meeting held in Glasgow it was unanimously resolved that the time had come when the Glasgow Veterinary College should cease to be carried on by private enterprise alone, and should be established on the basis of a public institution under a board of governors, and a committee was appointed to deal with the matter.

Hens keep in better condition and lay more eggs if given a little Colman's Mustard in their morning food.

See "The Field," Feb. 6, 1906.

The truth of this statement has been proved again and again since its discovery last February.

Try it yourself by mixing, for every six fowls, one tea-spoonful of Colman's Mustard with the dry meal before adding the water.

The best Mustard for the purpose is

## Midland Notes.

AFTER a succession of green Christmases, we have enjoyed—or suffered—one this year of the "real old-fashioned" type. In this district of Warwickshire the open fields are covered three or four inches deep, but, of course, the drifts are considerably more. Something like that appears to be the rule, but in North Stafford and Derby the fall is much heavier, and one hears gloomy stories from Notts. The change came suddenly, so that losses of sheep are spoken of in hill districts. But it is early to be prophesying evils like that. Our Midland breeds can hardly claim the stout resistance to cold which makes the Herdwicks so popular in the north, but sheep are always wonderfully hardy, and however deep the snow, need never be despaired of until the dead bodies are actually discovered.

ONE of the minor troubles of the season is the poor keeping qualities which the potatoes are showing. A large grower in South Nottingham was giving me a distressing account of his experiences a few days ago, and nearer home, as in Staffordshire, for example, complaints are almost as bitter. It is some consolation that prices show a tendency to rise; but, so far, the advance is nothing like enough to counterbalance the loss on diseased and rotten tubers.

THE fining of batches of farmers for selling milk not up to Board of Agriculture standard has been a subject of conversation lately in Worcestershire and elsewhere. One need never be surprised at city magistrates showing entire ignorance of milk vagaries; but some recent cases seem to indicate that even in rural and semi-rural districts the bench is apt to be less enlightened on these subjects than it should be.

WHETHER the milk in any particular case is watered or not is always a question of fact which the court must decide for itself. But when the "appeal to the cow" is disregarded, and a farmer defendant is told in effect that the official standard is so low that no pure milk can fall below it, then the need for magisterial instruction on these points is pretty evident.

YET there is room for doubt whether all farmer milk-producers are as straightforward as they ought to be. The manager of one of the largest Midland milk-retailing concerns assures me that in times of scarcity the supplies which reach him are often found to depreciate in quality also. Taking advantage of the low official standard, the pure milk is watered down until it only just exceeds the legal minimum requirement. One cannot call it downright dishonest, but it is a straining of the law in a manner that reflects no credit on him who adopts such a course.

NOT a little interest is being taken in the small holdings report, for the Midlands possess some of the favoured districts where miniature occupations can be relied upon to pay their way, provided always the tenant knows his business and the seasons are not wholly unpropitious. There is still plenty of room for more small holders in the fruit and market gardening districts of the Avon, Teine, and Severn valleys. The fruit industry shows signs of development also in Warwickshire, where the soil and climate have long been considered unpropitious.

BUT what, one wonders, has become of the scheme which was whispered of a year ago for cutting up a very large estate in Warwickshire into small holdings? Has it all come to nothing? Apparently so.

December 27, 1906.

The Local Government Board have just issued a return giving the rateable value of agricultural lands and the amount of grants made to each union under the Agricultural Lands Act, 1896, which would otherwise have to be raised by poor rates year by year. The total amount of the grants so paid to all "spending authorities" in respect of the deficiency arising from the provisions of the Act in the produce of the poor rates for the year is estimated to have approximated £1,314,000, an amount equal to about 2d. in the £ on the total rateable value outside London.

## NOVA SCOTIA

# Fertilisers and Feeding Stuffs.

## Interesting Case under the Feeding Stuffs Act, 1893.

Probably the last case under the old Fertiliser and Feeding Stuffs Act took place last week at Wells County Petty Sessions. It is of interest as showing the difference of opinion which sometimes occurs between agricultural analysts themselves and also the difference between the practical results obtained and what might have been expected according to the view of the expert.

Thomas Turner Chard, trading as T. T. Chard and Sons, of Weston-super-Mare, and also of Valenta Mills, Sevier Street, Bristol, feeding-cake manufacturers, were summoned at the Wells County Petty Sessions on Monday, by Mr. G. I. Simey, clerk to the Somerset County Council, for selling to F. G. Nurse, as food for cattle, 10 cwt. of loose young stock cake, which contained ingredients deleterious to cattle, namely, indigestible fibre and sand. In a second summons defendant was charged with selling to Mr. Nurse cake, to which had been added certain indigestible fibre and sand, worthless for feeding purposes, and which was not disclosed at the time of the sale. There was a third summons under which defendant was charged with sending out with the feeding cake in question an invoice which failed to disclose a material particular to the prejudice of the purchaser. Mr. Vachell (instructed by Mr. Simey) was counsel for the prosecution, and Mr. Garland (instructed by Mr. A. J. Mawer, of Wells) was counsel for the defendant. The cases were of an important nature, both to farmers and to feeding stuffs manufacturers, and the court was filled with farmers, dealers, and several representatives of cake firms.

Mr. Garland said, unfortunately, the previous night at the Swan Hotel Mr. Chard met with a very serious accident. He fell on a narrow staircase and badly injured his knee, and was unable to be present. He did not intend to ask for an adjournment, though one would rather Mr. Chard was present, though it was out of no disrespect that he was not there, but his traveller was present.

The summons was then read out, charging defendant with selling the loose young stock cake containing fibre and sand.

Mr. Vachell: There are two other summonses, and I propose to first proceed on one of the other two—the one with sending out a certain invoice which was false in a material particular to the prejudice of the buyer. The learned counsel then proceeded to open the facts, stating that the informations had been laid by Mr. Simey, clerk to the Somerset County Council, who directed these proceedings under the powers which the council possessed. The summonses were taken out under the 1893 Fertilisers and Feeding Foods Act, which was passed to protect farmers against unscrupulous manufacturers. The defendants' traveller, Mr. J. Jones, was at Wells Market on May 5, and persuaded Mr. Nurse, of Wick Farm, Coxley, to purchase half a ton of loose young stock cake at £6 10s. a ton.

The Chairman presumed there was no guarantee. Mr. Vachell said there was something in the nature of a guarantee, but there was no description of the ingredients of the cake. Mr. Nurse saw Mr. Burton, of the county council, and, in no spirit of antagonism, asked him to take a sample of the cake for analysis to see whether it was suitable for young stock. The invoice was a warranty that the stuff was reasonably fit for food for young stock. If the analysis of the county council was challenged, it could be analysed by the chief analyst.

Mr. Garland: Of course it was challenged. Mr. Vachell then read some correspondence which had passed between the defendant and Mr. Burton, and, proceeding, said the cake was very good indeed so far as nutrition was concerned, and the purchaser was paying £1 2s. 6d. for the cake in question for that which was not only useless, but for that which was positively dangerous.

Mr. George Frederick Nurse having given evidence of purchasing the cake,

Mr. J. H. Burton, county instructor in agriculture, and the authorised representative of the analyst of feeding stuffs under the Acts, said he took three samples of Mr. Nurse's cake on May 18. One was sent to Mr. Lloyd, of London, the other to Mr. Nurse, and one he kept. The tins were sealed and air-tight. He received a certificate from Mr. Lloyd of the result of his analysis, which read:—"Moisture, 14.40; oil, 5.20; albuminoids, 14.25; carbo-hydrates, 43.48; indigestible, 15.07; mineral matter, 7.60." The comment was:—"This is a very poor, dirty, indigestible cake, and not fit for young stock." A copy of the analysis was sent the defendants, who wrote that it was not an analysis of the cake. He (the witness) was very angry at this letter because it inferred that he had not taken a proper sample.

Mr. Garland intimated that there was no intention to cause irritation.

Witness, proceeding, said that the nutritive part of the cake was very low. It was extremely low in albuminoids; the carbo-hydrates were for the purpose of keeping up heat. This cake was the lowest, except one, which was sold by the same firm, in albuminoids of any cake he had analysed during the last two years. The cake contained Bombay cotton-seed, which was the worst that could be used for young stock. No farmer in his senses would so use it; 15.07 of indigestible fibre was, he considered, quite an inadmissible amount, having regard to the fact that the cake was for young stock. For mature animals Bombay cotton-cake might be all right. The percentage of sand was the highest he had found out of seventeen samples.

In cross-examination by Mr. Garland the witness said the invoice he considered false in that it implied that the cake as sold was guaranteed fit for young stock, whereas they (the prosecution) said it was not fit for young stock. The expression "sand" included silica. Generally speaking, he did not approve of compound cakes for the feeding of young stock. He condemned Bombay cotton cake, and did not recommend it under any circumstances for young stock. He did not recommend any particular cake. He recommended a cake if asked. He never recommended any particular firm.

Mr. Garland: Have you ever taken commission from any firm?

Mr. Burton: "Oh, dear, no, certainly not."

Mr. Frederick James Lloyd, Fellow of the Chemical Society and Fellow of the Institute of Chemistry, and agricultural analyst to the counties of Somerset, Devon, Kent, and Surrey, put in his analysis of the cake (given above). The examination of the cake showed that it contained Bombay cotton-seed and rice meal. It also contained an excessive amount of sand, such as no cake given to young stock should contain. It contained a very high quantity of indigestible fibre for young stock. He should not care to give Bombay cake to any stock under eighteen months.

By Mr. Garland: He attacked that food on the questions of woolly fibre and sand. His assistant helped in the analysis. He could not swear that he was present all the time his assistant was making the analysis. He did not make the analysis as to the fibre or the sand contained in the cake. Different parts of the cake when analysed might give different analysis.

By Mr. Vachell: His assistant was thoroughly competent, and if there was any doubt the analysis was repeated.

By the Chairman: His assistant had not taken any degrees, but he was perfectly qualified to make the analysis. Witness frequently checked the analysis. He thought it was very unfair to suggest in court that his analysis was unjust and take steps to prove that it was wrong. He was quite willing that the third sample should be sent to the chief analyst at Somerset House.

This was the case for the prosecution, and Mr. Garland, for the defence, called Mr. F. G. Cosh, clerk and chemist to the defendant, who said his firm carried on a large business as manufacturers of feeding stuffs. When they were going to make a large bulk a small portion was first made and tested, and if the analysis was satisfactory then the bulk was made. He analysed a sample of the cake in question, with the following result:—Moisture, 14.48; oil, 5.90; albuminoids, 16.62; carbo-hydrates, 44.06; fibre, 11.33; ash or mineral matter, 7.61. The mineral matter contained sand, 1.81.

By Mr. Vachell: They did not make an analysis of the bulk in all cases. The main bulk of the cake in question was analysed on May 10. Witness afterwards said the bulk was not analysed.

Counsel next asked what were the ingredients, and witness said locust beans, Rangoon rice meal, Bombay cotton-seed—

Mr. Garland objected. It was Mr. Chard's desire that the recipe, which was a trade secret, should not be made known in open court.

The Chairman agreed, but thought they might know the percentage of cotton-seed.

After some discussion, the witness said he did not know. (Loud laughter.) Charles James Waterfall, of Bristol, analyst, F.C.S. and F.C.I., gave the result of an analysis of the sample of the cake taken by Mr. Burton. He made a first analysis on May 30 and another on June 13. His analysis on May 30 gave:—Moisture, 13.52; oil, 5.84; albuminoids, 16.63; carbo-hydrates, 48.17; fibre, 8.24; mineral matter, 7.60; sand, 1.40. The analysis taken on June 13 was:—Moisture, 12.81; oil, 5.90; albuminoids, 16.74; carbo-hydrates, 45.72; fibre, 9.20; mineral matter, 8.70; sand, 1.80. He did

not agree with Mr. Lloyd that Bombay cotton-seed was injurious; the prejudice against it was dying out. Rice meal was a fine food for young stock.

By Mr. Vachell: Care had to be exercised in the use of Bombay cotton-seed because of its astringent character. He wrote down the name of another manufacturer who sold a cake one of the ingredients of which was Bombay seed; but in answer to Mr. Vachell, he said it was not sold as a young stock cake.

William Green, a foreman in the defendant's employ, said the cake was made from a formula, and the ingredients were carefully mixed.

Ernest George Vait, of Temple Farm, Upton, said he had been a customer of Messrs. Chard since 1898, and his father before him. He had some of the cake in question, and fed his lambs and other young stock with the most excellent results, the stock realising the best prices.

George Crew, of Cold Farm, Bruton, and manager to Miss Hoddinot, gave similar evidence. In May he had two tons of the cake in question, and fed his young stock with it with very good results.

John Edward Whatley, Bishop's Stoke, Shrivernham, Berkshire, farming 1,900 acres, said up to May 1904, he used from Messrs. Chard a cake known as treacle cake. He had since bought over 20 tons of the cake in question. He bought 20 tons of it in May last, and fed his lambs with it, and got the best price for them.

William Palmer, manager to the defendant, deposed to sending out the young stock cake—By Mr. Vachell: There was no general stock kept. It was made as the orders for it came in.

This concluded the case, and Mr. Garland proceeded to address the court on behalf of the defendant, and submitted that there was no evidence that the cake contained any deleterious ingredients; neither, he argued, was the invoice untrue. He defied his friend to produce a case where the prosecution had been conducted on such lines as the present one. It was simply an attack upon Bombay seed. The proceedings here were entirely misconceived. He commented upon the fact that the analysis was made in May, but the summonses were not issued till October, which he thought showed they had some doubt in their minds.

Mr. Vachell replied on a point of law. The chairman, in giving the decision of the court, said they could not get over the fact that the analysis was not made by Mr. Lloyd, but by his assistant, a young man of 23. Upon the evidence of three farmers, who apparently dealt very largely in cattle, they could not see that there was anything deleterious in the cake. In the face of this and the variety of the analyses there would be a verdict for the defendant, with costs to the extent of £20.

The other two summonses were adjourned.

## Liming Meadow Land.

The good old practice of liming at regular intervals meadow land has fallen into desuetude, but as attention is being drawn to the advantages attending the process, it is to be hoped that it will be again more frequently adopted.

The Agricultural Department for the County of Lancaster have been conducting experiments with the object of ascertaining in what form a dressing of lime can be best given. As the report states, it is a common custom when liming land to apply the material as cob lime (called also lump lime, burnt lime, shell lime, and quick lime) in small heaps placed regularly over the field. In this way, the lime acted upon by the influence of exposure to the atmosphere, is converted into a fine powder called slaked lime, most of which, in a shorter or longer time, combines chemically with the carbon dioxide of the air, and becomes once more carbonate of lime.

As the cob lime is converted again into its original condition carbonate of lime, what, it may be asked, is the advantage of applying the more expensive cob lime? The advantage arises from the much finer condition of the material after it has been burnt and becomes slaked lime.

Recently ground lime, produced by grinding the cob lime by suitable machines, has been put upon the market. It can be spread more evenly over the land. Being burnt lime, the chemical changes indicated above take place, and it becomes carbonate of lime, in a very fine condition, distributed evenly over the surface.

The question arises, seeing that the burnt lime becomes carbonate of lime, whether ordinary limestone rock—carbonate of lime—ground to a fine powder and evenly distributed over meadow land might not produce results equal to those obtained by cob or burnt lime, and thus dispense with the expensive process of burning the rock.

This is the question, the experiments were

undertaken to investigate, and the conclusions arrived at are summarised as follows:—

1. Taking into account the results obtained at the County Council farm in the two years 1905-6, and also the price per ton, ground limestone can be employed economically upon meadow land where a dressing of lime is needed.

2. According to the results obtained at the various farms in the county, the more finely divided forms of lime are more immediately effective than cob lime. The results indicate also that ground limestone is a more profitable dressing than either ground lime or cob lime; and the following remarks are added:—

1. In districts where, owing to nearness of lime-kilns it is more convenient to use cob lime, it is essential that the lime be spread from the heaps as soon as fallen, and also, in order to ensure more effective distribution, the light harrows should be passed over about two or three days afterwards, so as to scatter any lumps that may not have fallen in the heaps.

2. Ground lime should not be delivered at the farm until all arrangements have been made for its application, as less will be occasioned by the hurrying of the bags. The ground lime should be finely ground, 35 per cent. to pass through a sieve with 10,000 holes to the square inch, and should contain about 90 per cent. of lime.

3. When ground limestone is used it should contain a large percentage of fine powder; it should also contain a high percentage of carbonate

of lime. When the purer limestones are used for the preparation of ground limestone, the percentage of carbonate of lime may be higher than that given in the analysis table 1—viz., 95 per cent.

### Rules to be Observed in Fattening Stock.

The following practical suggestions for the rational treatment of fattening cattle are worth noting. They are published by a continental agricultural journal somewhat as follows:—

1. It is necessary to be very punctual in the times of feeding.

2. The rations should be moderate in quantity, so that the animal eats the entire portion, and does not get into the bad habit of leaving some in the crib.

3. And yet the quantity of food supplied must be so measured that the animals after eating it are thoroughly satisfied.

4. Any sudden change in the food is to be avoided. On the importance of this point the following examples are not without interest:—

Two 2½ years old oxen received each per day 5½ lb. of hay, 5½ lb. of straw, 1½ lb. rape cake, and 45 lb. of beetroot. When the latter was replaced by half the quantity of meal, the beasts not only ceased to increase in weight, but even lost weight, so that it required some days before they again regained the weight they had attained before the change in food.

This point should especially be borne in mind when making a change from winter to green fodder. Two one and a half year oxen were fed ninety-nine days with 5½ lb. hay, 4½ lb. of straw, and 22 lb. of potatoes. In May, however, as much as they would eat, was substituted for the old ration. As a result they lost weight during the first eighteen days of the change.

If the change of food is arranged very gradually and judiciously, it can be made without loss. The point we wish to urge is that it must not be made suddenly.

5. Indeed, in fattening, an effort should be made to introduce gradual changes in the food in order to excite the appetites of the beasts. In this direction the use of condiments mixed with the food can be recommended, always bearing in mind that the condiments are only to excite appetite and possess no real feeding value.

6. Quiet and rest is essential for the animals.

7. In the preparation of the food scrupulous cleanliness is necessary; the beast must also be kept clean and the stalls maintained in a healthy condition, and all dirt regularly removed.

### Fertilisers for Japan.

The importation of fertilisers into Japan for the year 1905 was considerably larger than that for the previous year. The remarkable increase in the demand for artificial fertilisers is a noteworthy feature of Japanese agriculture.

THE  
"BIBBY" CAKE  
IN THE FORM OF  
"CAKETTES."

"Send me two tons o' they nobbs same as Mr. Brown is a using" was the colloquial way in which a new customer gave us an order the other day through our Market Representative.

This buyer had often thought he would like to try the "Bibby" Cake, but he belonged to the old school of farmers who are not easily led along untrodden paths.

He had, the previous week, been paying a visit to his neighbour, Mr. Brown, who had often spoken favourably to him of our Cake, and on looking over his Stock and noting the extreme handiness of the "Cakettes" for Summer Feeding, he at last resolved to give us a trial order, and did so in the words just quoted.

It was doubtless the good condition of Mr. Brown's Cattle and the manifest handiness of the "Cakettes" which had finally broken down this buyer's conservatism: and now we have received a trial order we shall take good care to retain his business. Our method is a simple one: We put such value into all our Cakes and Meals as will insure the best results obtainable.

THIS IS THE TRUE SECRET  
OF OUR SUCCESS.

It is, perhaps, hardly needful to point out in this place that the "Bibby" Cake is the most popular brand of Cake that has yet been made, and no other explanation but the one above mentioned will explain this fact.

It is not well, therefore, for buyers to be put off with a Cake which is offered as something "just as good": It is much better to say to the Cake merchant: "I must have 'Bibby,' and will not take a substitute."

The "Bibby" Cake has steadily won its way to

THE PREMIER POSITION  
IN THE PUBLIC FAVOUR,

and of all the Cakes on the market is admittedly the best. In the form of "Cakettes" it is also the handiest; there is this further to be said about it:—the more carefully it is tested against other competing Cakes, the more certainly and with increasing emphasis will be the reply to those who offer a substitute—"I MUST HAVE 'BIBBY,' PLEASE; THAT IS THE CAKE I WANT, AND I WILL TAKE NO OTHER."

### RING OUT THE OLD YEAR; RING IN THE NEW.

Our present issue falls on the last day of 1906, a year that will long remain in the memories of farmers as one of the best experienced for a considerable period, at any rate since the first decade of the twentieth century opened, and its bounties were all the more appreciated because for a very lengthy period unexpected.

For instance, it was not until the latter part of May that there were any signs of a bountiful corn harvest, and although in large portions of the north-west of England, parts of Scotland, Wales, and the counties bordering on the Principality, there were early signs of roots and hay being added to the cornucopia of the year, there were regions further south and east that were not so fortunate in this respect. Still, the fodder and root produce of the whole was sufficient to sustain the sheep industry to a high standard of marketable value, while in regard to all kinds of pedigree stock the demand has been exceedingly appreciative throughout the year, especially the stock that has been required for the Argentine.

The dairy industry, it is true, suffered from a

severe drought in August and the early part of September; and the fruit and hop industries have failed to a remarkable degree. But these are only quite exceptional features to the general prosperity of the year, and nine-tenths of those who make their living out of the land will look back gratefully and lovingly on the year we are bidding adieu to, being loth to part from it as from an old friend.

The year has been remarkable in its weather throughout, but in nothing more so than in the almost total absence of frost and snow at the period of the year when it is usually most intense. January was a remarkably wet month, but almost one of the mildest on record, followed, it is true, by a much colder February, but certainly not the one to fill the dykes with snow. Only within the last ten days, as if mindful of its omission in no Arctic taste of real winter

having presented itself, Christmas brought in its train snow-clad lands almost from the Highlands of Scotland to Land's End. May this seasonable white shroud envelop the reptile and vegetable pests which are destructive to vegetation and fruition; and may the earth prove refreshed thereby, and impart in return for it an early springtide of freshness and beauty, to be followed in turn by a genial hot summer and another fruitful season.

While wishing bounteous harvests, with the same prosperity in live stock which has been experienced in the present year, to all our readers, especially those who cultivate the land, we add a Happy and Prosperous New Year, especially those who have been left out in the cold in the past season. May they be included in the next without any detraction from the more prosperous classes.

## Northern Notes.

THE master-butchers of the "third part" are doing their level best to retard the abattoir question. There cannot, however, be the shadow of a doubt about its consummation. The addresses of the experienced meat inspector to the corporation of the ancient city of Hull have thoroughly aroused public opinion to the importance of such a provision being made, so as to ensure perfect supervision of the meat supply. Every reasonable citizen fully recognises that the butchering trade, like all other trades, have their difficulties to contend with. When beasts bought in the market prove on slaughtering to be diseased, it is a most unfortunate circumstance for the trade; but it is only fair to state that the loss in this direction is a very small percentage indeed, and that by a system of insurance the individual butcher does not lose very much.

THE citizens of Hull are a reasonable people, and there can be no desire on their part to prejudice public opinion against the butchers; but it is not somewhat absurd and childish for the trade to say they will not use an abattoir if it is provided? Many of the slaughterhouses at present in use are undesirable in construction and situation, and where such places are scattered all over the town, an efficient system of inspection is well nigh impossible. The Master Butchers' Association know that the question as to the use or otherwise of the abattoir by those in the trade is not for them to decide. The general public will determine that question by demanding that the meat shall be supplied from the place where the most efficient system of inspection prevails.

THE cup of grievances of the pig dealer and breeder in the North is well nigh full. One hears the Board of Agriculture anathematised in the country places, and not a good word spoken for a representative, from the President to the junior inspectors. What can the Board do? The pigs go on catching contagion to an alarming extent, as the returns published in the last issue of this journal clearly showed. One feels sorry for the dealers, sorry for the Board, and also sorry for the sick animals, which are giving the whole country-side a tremendous lot of trouble. As to the swine fever orders prevailing in East and West Yorkshire, the Board of Agriculture was recently appealed to by an influential M.P., but they cannot be moved to taking the responsibility for revoking or amending them in the direction of withdrawing the obligation on the part of an owner to obtain a licence prior to moving his pigs out of a market and then subjecting them to a twenty-eight days' quarantine. The Board is adamant. Some of us think that Sir Edward Strachey, when he delivered his post-prandial speech at the Farmers' Club, might have devoted more attention to this swine fever business. If the stamping-out of this disease is a question of money, then the cash ought to be immediately forthcoming from a Treasury that seems to be overloading. Sir Edward dwelt on the hope of obtaining a grant for the extirpation of glanders. While the Board is in a suppliant attitude towards the Treasury, it might extend both hands and humbly request a grant for eradicating both glanders and swine fever. The latter is by far of more importance, and its effects are more far-reaching than the former disease.

THE decision of the North-Eastern Agricultural Federation at Tharlington to ask county councils to offer a prize for the school book most

suitable for use in rural schools is an opportune one. "There is also some alteration needed in other directions," says a correspondent of a Northern paper. Requests are now being made for workshops to be attached to various schools in the larger towns, in order that scholars whose parents wish them to do so may get an idea of various trades. Why then, it is asked, cannot pupils in rural schools be allowed to learn something of the occupations by which in future they are to earn a livelihood?

THE Leicester Sheep Society is gaining a nice addition to its membership. Many fleeces of Leicesters have been kept for several genera-

tions in a pure state; and the owners of some of them in North Yorkshire particularly are coming into the fold of the society, which has had a Flock Book for fourteen years, the society being, as a matter of fact, just a year younger than the Lincoln Society, which is now a very large aggregation of flock-owners. The Leicester Society has members scattered about in several widely-separated counties, from Leicester to Durham, and from Durham to Cumberland and Westmorland. The winning pen of Mr. Jordan's Leicester wethers at Smithfield weighed on leaving his place at Driffield 66 stones 6 lb. These were the heaviest sheep he had sent up during the last ten years.

December 28, 1906.

## THE FARMERS' DIARY.

**TUESDAY, JANUARY 1.**—New Year's Day. Scotch Corn Markets Closed. All Continental and American Corn Markets Closed. "Baltic" and "Atlantic" Cattle Markets Closed. **WEDNESDAY, JANUARY 2.**—Congleton Horse and Cattle Fair—Oswestry Horse and Cheese Fair—Thurles Horse and Cattle Fair—Downpatrick Horse, Cattle, Sheep, and Pig Fair—Mark Lane First Corn Market of the Year.

**THURSDAY, JANUARY 3.**—Bristol and Birmingham First Corn Markets of the Year—Gloucester Fair—Horsford Horse Fair—Carlisle Horse Sale.

**FRIDAY, JANUARY 4.**—Yeovil Horse Sale—Lincoln First Corn Market of the Year—Cockermouth Horse Sale.

**SATURDAY, JANUARY 5.**—The first Saturday Markets of the Year are generally of importance and the year's Trade suspended over Christmas being now resumed—Leicester Horse Sale—Northampton Horse Sale.

**MONDAY, JANUARY 7.**—Twelfth Day falling on a Sunday, many fairs held that day usually take place on the 7th instead. This is Plough Monday, and has its own list of local fairs. Spring Ploughings if the weather allows are supposed to commence—Manchester Horse Sale.

**TUESDAY, JANUARY 8.**—This is St. Lucia's Day. For some unknown reason it has a series of local fairs—Towcester Horse Sale.

missioners, therefore, confined their demand to an account stated on the basis of the sale prices.

The action was heard by Lord Johnston, who said he was of opinion that the position taken by the Commissioners of Inland Revenue was not well founded. The question depended upon the statutory provision, Finance Act, 1894, section 7—"The principal value of any property shall be estimated to be the price which, in the opinion of the Commissioners, such property would fetch if sold in the open market at the time of the death of the deceased." Now, property regarded in view of this provision might be of different descriptions. When one came to deal with a subject of a fluctuating value, the fluctuation depending upon natural increment or, rather, on the excess or otherwise of natural increment over natural decrement, a different question arose.

Such a subject was a herd of cattle. It was in a definite ascertainable condition at the date of the deceased's death. But in the lapse of months important changes took place. At the date of the death a cow might be two or three weeks from calving. In the course of three or four months the risks of calving and the risks to the life of a young calf were over. The cow in calf was one thing; the cow and her calf on its feet and three or four months old was a totally different thing.

Again, a calf a few weeks old at the date of the death and a calf some months old at a date posterior to the death were also very different things. The calf was over the troubles of its early weeks, and every month was developing more of its quality. Similarly, a cow might prove either to be barren or to be in calf. Again, losses by death occurred from time to time, and cattle which might be perfectly healthy at the date of the death of the owner might, either singly or as a herd, be afflicted with disease, rendering them valueless at the end of three or four months.

He therefore thought it was obvious that the call for a valuation (and no valuation could be better than actual exposure to sale by auction) at a date three or four months posterior to the date of the death would not give the true value of the herd at the date which the statute itself fixed—namely, the date of the death.

There could be no question that, in interest of the estate, the trustees acted prudently in taking the risk of carrying the herd through the summer and selling it in October; rather than selling it at once, and they also acted prudently in not taking the risks of carrying it through the winter and selling it in February, which was the other chief market month for prize cattle. Even if he had decided to consider the special circumstances, he should have no hesitation in saying that the herd must be valued at the date of the death, though it might have been imprudent to bring it to the hammer till three or four months later, and that the Commissioners of Inland Revenue were not entitled to have a valuation as in October, when the best market might be anticipated or a valuation based on the result of actual sale at that period.

His lordship therefore found for the defendants with costs.

## Notes of the Week.

We have become so accustomed to mild winters that the heavy fall of snow on Wednesday night came as a surprise.

It has stopped all out-door farm work for the time, and is causing great trouble and anxiety to sheep farmers.

Someone with a love for figures has calculated that 11,190,630 tons of snow must have fallen over London between midnight and breakfast time.

This blizzard recalls to memory the great storm of January 18, twenty-six years ago.

We are always glad to say goodbye to the shortest day of the year. It is a date of which we are pleased to see the back, and to welcome the gradually lengthening days.

The new Fertiliser and Feeding Stuffs Act comes into force to-day. We hope it may prove useful to the farming community.

Among the bills which received the Royal assent before the prorogation of Parliament was the much-debated Land Tenure Bill, now known as the Agricultural Holdings Bill.

Small Holdings are now being boomed for all they are worth, and probably for a good deal more than they are worth. Time will show.

Vegetable and fruit growing are to form the staple product of the small holders. The following is a concrete instance of the experience of one vegetable grower.

He sent to a Midland market 592 dozen heads of celery, which sold for £5 19s. 4d. The railway carriage cost £3 13s. 2d., portage 12s., commission 9s., leaving 25s. 2d. for the grower, who had to pay 35s. for the labour of taking up the celery and carting it to the station.

The Central Co-operative Agricultural Bank starts under favourable auspices. Among its first directors are the Marquess of Zetland, the Earl of Stamford, the Earl of Coventry, Lord Lucas, and the Hon. T. A. Brassey.

There are about 3,400,000 milch cows in the United Kingdom; it is not the cow that eats the most or the cow that eats the least that is the best cow, but the cow that makes the best use of what she eats.

A lady who kept poultry had, among others, some Andalusian fowls. One day she had one killed for dinner, and it proved to be a very tough bird. "Rachel," said the lady to her old servant, "what fowl is this? It seems an extremely ancient one." "Well, mum," replied the servant, "no wonder, it's one of these there Antedeluvians!"

"He who puts his hand to the plough must not turn back," said the eloquent orator, but he was nonplussed when an old ploughman among the audience shouted out: "Then what is he to do when he gets to the end of the furrow?"

Butter, supposed to be 400 years old, has been found buried in an Irish peat bog. Its origin is unknown, but it is thought to be ordinary butter buried in the peat for preservation and afterwards forgotten.

Scientific men say its origin is unknown. We know that the origin of much of the butter sold in the shops is quite as much unknown.

The lowest price touched by wheat during the year just closed was 25s. 9d. towards the end of September, while the highest price was 32s. in the month of July.

When laying the foundation stone of the new abattoirs at the Islington Cattle Market, the chairman of the Cattle Markets' Committee said

he hoped it would be the means of increasing the demand for home-fed meat.

That is a consummation devoutly to be wished.

At present only 21 per cent. of the produce sent into the market is English grown and fed. During the coming year it is estimated that 263,000 animals will be slaughtered in the abattoir.

It is sometimes very difficult to ascertain the origin of infectious diseases. Diphtheria recently broke out among the children of a country school, and finally it was traced to some chickens that had diphtheritic throats. The germs were conveyed to the children by means of the playground dust.

An instance was also mentioned where a cat, having slept in the nest of a diseased fowl, contracted the malady and communicated it to a child.

Among the greatest curiosities of the Christmas fruit market were some enormous dessert pears, which we are pleased to say are of home growth.

They are known as the Doyenne du Comice variety, and some of them turn the scale at 12 oz. They sold at top prices, realising wholesale up to 12s. per dozen.

It is interesting to note that this variety was cultivated by the late well-known novelist Mr. R. D. Blackmore, author of "Lorna Doone" and other popular novels.

Something like a Turkey!—an enormous turkey, weighing 33 lb.—was reared for this Christmas by Miss Down, of North Devon.

As indicative of the progress of agriculture at the Cape, it may be noted that a Lincolnshire potato grower is sending out 500 tons of seed potatoes.

Some of the old Christmas superstitions are very curious. In Cornwall there is a quaint custom of dedicating the apple trees to the New Year. A few of the household take out a jar of cider, an empty bottle, and a gun to the orchard. A small bough is put into the bottle.

Then the following incantation is sung:—

"Here's to thee, old apple tree,  
Hats fall, pucks fall, great bushel bags full,  
Hurrah! and fire off the gun."

In Lincolnshire it is a popular belief that the sun shining through the church window on the apple trees on Christmas Day betokens a heavy crop of fruit in the ensuing year.

### The late Mr. Marr's Shorthorns and Estate Duty.

In the inventory of the personal estate of the late Mr. W. S. Marr, Uppermill, Tames, lodged by his executors for the purposes of estate duty, his stock of cattle, including his famous herd of Shorthorns, was entered at the valuation put upon them by Mr. William M. Ritchie, Old Meldrum—viz., £9,031. This valuation was made on June 20, 1904, just about a fortnight after Mr. Marr's death. Estate duty had been paid on that amount. The herd was not disposed of until October 11, 1904, when it realised the sum of £17,722 17s., being greatly in excess of the value put upon it in the inventory.

The commissioners of Inland Revenue, being dissatisfied with the value put on the herd in the inventory for the purpose of estate duty as largely an under-estimate, raised an action to compel Mr. Marr's trustees to lodge a corrective inventory of the personal or movable estate and effects of the deceased William Smith Marr, including therein the full and true value of the herd of Shorthorn cattle which belonged to him, based on the proceeds actually realised through sale. The Com-

# SHEEP.

## Notes and Jottings.

**A**FTER a long period without winter severities, we have had a return of frost and snow, which recalls the fact that our climate holds possibilities even though it may not always assert them. Those who had their food supply in safety on Boxing-day had reason to congratulate themselves, as it is poor satisfaction to have to search for it under three to six inches of snow, and then only to find it frozen hard into the soil. As of late years there has been a disposition to disregard the necessity of getting food into safety, it is to be hoped that milder weather may soon come and set the food free again.

**W**E have been surprised in our travels to see what a small portion of the root crop is put into safety in comparison with that customary to clamp in years gone by, and have given a warning note from time to time as to the danger of so doing. The loss that may be sustained by omitting to control the effect of frost, by securing the more dangerous portions of the root crop, far exceeds the cost of securing it during many years. It is a risk, however, very often taken. Personally we have a distinct inclination for fatty foods in cold weather, though they may be distasteful to us during the heat of summer; and the

**L**OCUST beans under £6 per ton are a cheap additional food, and are very safe. Maize at £5 per ton at port is well worth attention, as is good grinding barley from £5 to £6. It is doubtful if there is anything cheaper than ground cotton-seed, containing 39 to 25 per cent. of oil, at about £8, but unfortunately this article has been submitted to a considerable amount of adulteration at times, and it is very necessary to ensure getting it genuine; moreover, it is not a good keeper, as it is liable to heat, and must be watched closely, as heated food of this kind is deleterious; if it is of a ruddy tinge it has heated at some time, and should be avoided. Taking the present prices, the best admixtures of foods, best suited to sheep feeding at this season, ought not to cost over £8 per ton after paying carriage, and mutton can be made cheaply when this is the case.

**T**HE Spanish Armada has credit for the introduction of several breeds of animals to this country, in fact, where local evidence as to the origin of local breeds is not strong it is quite customary to ascribe it as due to animals shipwrecked at that time; and for that matter any distant shipwreck is located to the time of the Armada. The Hardwick sheep is one of the breeds which is locally regarded as the progeny of some forty

make yet, which should act beneficially. The choicest mutton still fetches well over 6s. per stone, and where this is the case it may generally be accepted the sheep farming is in a satisfactory condition. Considering the large importation of foreign mutton the trade for coarser mutton leaves no cause for complaint, especially when the price of wool is considered. While the snow is on the ground, and work on the land cannot be proceeded with, a good opportunity is afforded to have a look at the sheep which have been sent out to agist on keep that is not too plentiful. There are, doubtless many who, if they saw their sheep faring as many do in this weather, would gladly pay a trifle more to have them better treated, and find it profitable to do so. Sheep agisting on poor pastures, and those covered with snow, or frozen blocks, rarely get as much hay as they should have, and it is no wonder the death roll is so heavy.

## VETERINARY.

*Advice of a Veterinary character, by an M.R.C.V.S., is offered to Readers entirely free of charge. Particulars of cases should be addressed to the Editor, "MARK LANE EXPRESS," 3, Wellington Street, Strand, London, W.C.*

### Contagious Abortion in Cattle.—I.

Some two years or more ago it was pointed out by a deputation which waited on Lord Onslow, the then President of the Board of Agriculture, to urge the Government to take up the subject of abortion in cattle, that one of the greatest difficulties which had to be contended against in dealing with specific abortion was the comparative ignorance of the farmer with reference to the insidious character of the disease. Since that time a good deal has been done by the Board of Agriculture, by the agricultural press and various other agencies, to educate the farmer up to the measure of his responsibilities in relation to the suppression of the disease, but many do not read or do not pay much attention to what is recommended, for there are yet large numbers of farmers and dairymen who have not the haziest notion that there is such a thing as contagious abortion in cattle, or who, at any rate, behave as though they never heard of such a thing.

We are reminded of this by two recent questions relating to cows casting their calves and the failure of others to breed, which are so obviously outbreaks of epizootic abortion that it is simply marvellous that their true character was not long ago recognised. To these and other readers in similar position a few notes on this subject may be useful, but we may premise them with the remark that they will contain nothing that is new, except to those who do not keep themselves up to date in connection with the causes of animal diseases.

The first thing we would impress on the farmer and cowkeeper is that there are two varieties of abortion—simple or sporadic, and specific or contagious—and that it is very necessary to distinguish between them. Simple or sporadic abortion is due to some mechanical or chemical agency acting injuriously on the system, and it is a matter of accident or bad feeding or mismanagement; but by far the most common and serious form—serious on account of the large loss it occasions for several years in succession when it gains a footing on a farm, is that known as epizootic, infectious, contagious, or specific abortion. This is defined in the Leaflet (No. 108) issued on the subject by the Board of Agriculture as "an infectious catarrh of the womb, transmitted from one animal to another by the transference of the specific microbe," and as the introduction of this form of the disease into a herd is followed by the premature expulsion of the fetus in practically the whole of the pregnant cows, with subsequent difficulty in getting the animal, including the heifers, to breed regularly, it is of the utmost importance that its character be promptly recognised.

There is, it must be admitted, a difficulty in differentiating between simple and specific abortion in first cases, but the safe plan, unless it be satisfactorily demonstrated to the contrary, as where an accident has happened, is to regard all cases of abortion as specific and contagious, and at once commence the precautions as to strict isolation, &c., to which we shall presently refer. An accurate history of the first case occurring on any premises is of immense importance in aiding diagnosis, or forming a correct conclusion as to the exact character of the disease.

The Board of Agriculture recommends, in order that a correct conclusion be arrived at, that inquiry should always be made in the following manner:—

"(a) Was the recent purchase of a cow followed by cases of abortion in a herd previously exempt?

"(b) Did abortion occur in cows standing alongside the new comer?

"(c) Did the herd from which the new purchase came suffer from abortion?

DEVON LONG WOOL SHEEP.

This pen won the First Prize in the class for three fat wether lambs of the Devon Long-woolled breed under 12 months old, at the recent Smithfield Club Show. They were bred and exhibited by Mr. F. White, of Torweston, Williton, Somerset; were nine months old when shown, and weighed 4 cwt. 1 qr. 26 lbs.

Esquimo would starve on the dietary of a West Indian.

**I**T is the same with animals, and more so with sheep which live entirely exposed to the inclemencies of the weather than with cattle which have some degree of shelter. The rational feeding of sheep must therefore be guided to a considerable extent by the climatic conditions—directed somewhat by the market prices of the food. Fats as supplied by linseed, cattle seed, cod-liver oil, and other foods in less degree are specially valuable in such weather as we have recently experienced, as they afford a ready means of supplying heat to animals. But heat-giving matter can be supplied by sngary or starchy foods.

**O**NE of the most striking features in connection with feeding stuffs in recent years is the better recognition of the value of good decocted cotton-cake; a gap of some pounds sterling between the price of cotton-cake and linseed cake was constant for many years; now, however, it is a matter of a few shillings only, which is much more in accordance with the actual value, especially when advantage is taken of the relatively low price at which some of the starchy foods are purchasable. For all that, linseed cake of good quality at anything like £8 per ton is cheap mutton making material, provided it is not used to excess. We put ½ lb. per day as an outside limit for a sheep. After that quantity additions should be made in the form of oil or starch.

sheep which long ago came off a Spanish vessel stranded on the Sandy Coast Drigg, and taken possession of by the lord of the manor.

**W**HATEVER their origin, they gradually won their way to the highest of the Cumberland fells, where their hardiness was much appreciated; in fact, at the request of the tenants a certain number was apportioned by the lord of the manor among them, and they gradually increased until at the beginning of the last century they were the preponderating breed on the highest mountains; often in circumstances where other breeds found it impossible to thrive. The year which comes to end now will be a memorable one in the annals of the British sheep farmer, be he an exhibitor and exporter, or one who caters for the ordinary home markets for meat and wool. It has been singularly free from diseases, and even the minor diseases left to us such as scab are being hounded out of existence. Good weather has kept the sheep in excellent health, and though at one time there seemed the possibility of a distressing shortness of sheep food during winter the exceptional autumn has made this good, and, moreover, ensured the spring catch crops a full plant.

**W**OOL has been thoroughly satisfactory, and the keen business being done at manufacturing centres causing a brisk trade is not likely to allow the falling away in price that has sometimes been predicted since the top prices failed to be maintained. America has evidently calls to

"(d) Does abortion continue to appear in the herd year after year?"

"(e) Has any cow in a previously healthy herd been served by a bull which had formerly served a cow which had suffered from abortion?"

"(f) Was any bull bought from a herd where abortion is common, and has this been followed by abortion in the cows which he serves in the new and previously healthy herd?"

"(g) Has any abortion appeared among the cows in a herd from which an infected cow has recently been removed?"

When these inquiries point to the presence of contagious abortion, immediate measures to minimise, and, if possible, to suppress it, should at once be taken. To wait a whole year before beginning to seriously consider the character of the cases is not only an occasion of loss, but a means of extending the disease and increasing the difficulties attending its eradication. The owner of every sound herd must recognise that there is a danger of introducing the disease through the agency of each cow he purchases, and as it is impossible to tell by any method of examination whether the proposed new purchase harbours the specific microbe responsible for producing epizootic abortion or not, no precaution can be too stringent. Only to buy when satisfied that the herd from which the cow comes is, and has been, free from abortion is one of the precautions recommended to be taken, and to, as far as possible, make the herd self-supporting by rearing heifers for the dairy is another, but very often, indeed generally, cows have to be purchased in the open market, and no previous history is obtainable. In such cases isolation for some time before placing new cows in direct contact with the herd tends to minimise the risk, but isolation can never be regarded as complete where the same attendants wait on both lots. Labour difficulties are, however, already sufficiently acute without having to provide two sets of attendants.

In the case of a newly purchased bull it should always undergo, before being used for service, a thorough irrigation of the sheath and genitals with an antiseptic solution.

There is no doubt whatever that the breed kept for public service is an important factor in the dissemination of the disease. Owners of aborted cows often send them to a bull belonging to someone else without the slightest pretence of treatment, and without disclosing the fact; indeed, it often happens when, as is generally the case, there is failure to conceive, such cows are sent to several different bulls in the neighbourhood, thus providing for the infection of healthy cows and heifers subsequently sent to him for service. In a few cases it is ignorance, but in many it is carelessness and neglect, or sheer recklessness of consequences to others that causes men to send aborting cows to a bull used for public service or, in order to get rid of the cow that has "picked her calf," sell her in open market as newly calved, very often with a calf at foot belonging to another cow. Such tricks are more than men and less creditable. They ought to be made a penal offence, and to this end contagious abortion ought to be scheduled as a contagious disease, and restrictions on the movement of untreated aborted cows imposed.

M.R.C.V.S.

(To be continued.)

## PIGS.

### National Pig Breeders' Association.

At the last meeting of the council of the National Pig Breeders' Association the Finance Committee reported that Mr. Howard Taylor had been elected chairman for the year. The balance in hand was £82 1s. 9d., and 18s. subscriptions, outstanding accounts for payment £26. The secretary was instructed to collect subscriptions outstanding after January 1. Report adopted.

The Editing Committee reported that they had granted six applications for prefixes, and decided that the conditions of entry for Vol. 24 be the same as Vol. 23. They had arranged to meet at Derby on February 11, 1907, to revise the entries for the volume. Report adopted.

The winners of the medals given by the association in 1906 were given, and silver medals were again offered to any society complying with the conditions laid down by the association.

A letter was read from Sir J. Greenall asking the association to continue the classes for young sows under eighteen months at the Lincoln meeting. This was agreed to, and delegates were elected to attend the conference the council of the R.A.S.E. are arranging relative to the management of shows generally in the spring.

The next meeting was arranged for Wednesday, March 6, 1907, at the Bingley Hall, Birmingham.

### Notes and Jottings.

At the time of penning these notes stern winter is upon us, with every appearance of continuing for a time. Snow is lying a considerable depth, and all horned stock are seeking shelter of some kind or another from the sleet and blast. Fodder, if only straw, must be liberally handed round to even the most backward stores, whilst the milkers and feeders will do with closed doors for a time during the night. Good ventilation, however, is very necessary, and if it can be given without producing draughts it is altogether most beneficial. This is different to the theory our forefathers used at one time to teach by showing you sheds full of fattening steers kept in such warm and close buildings as often to be found in a steaming sweat when visiting them in the middle of the day.

I AM pleased to see that the note re wet or dry milking given in a recent issue has elicited some replies, and which are not by any means one-sided. As regards the cleanliness of the two systems, for my own part I think the moist system is decidedly the cleaner of the two, in proof of which I may say that in my own sheds there are no rules as to whether dry or wet milking should be practised, the matter being left entirely with the operator, and I find that the majority milk wet handed. It may here be mentioned, too, that new milk is supplied retail to some few customers, one of whom, a very particular party who has milk from other dairymen, said to me a short time ago, "Yours is the cleanest milk I ever saw; there is never the slightest sign of anything objectionable about it, very different from some others."

THERE is another point, too, I have noticed when watching milkers in our showyards, and that is, many cows are fitted with such tiny teats that a man cannot possibly milk them full handed, and when the thumb and finger only can be applied dry milking is very hard for both cow and milker. Then, again, when coarse, windy-teated cows have to be dealt with, like "Gloucestershire," your correspondent's, I cannot see how the animals can be properly cleared out with dry hands. Of course, care must be taken that the hands are clean to begin with, and that nothing but clean moisture is used. I have noticed, too, where dry-handed milking is the rule that there is often considerable sediment in the bottom of a pail or churn that has been allowed to stand for a time.

It is satisfactory to note that a motion is on foot to discontinue or revise the points given for periods of lactation in the milking trials at some of our shows. It is well known that in the past some cows have won their honours almost entirely upon lactation points, these said cows being barreners, whose flow throughout has in consequence been larger and has naturally been retained for a considerably longer period. As the object of giving prizes for milking trials is to improve the milking properties of our various breeds by enabling those who desire to do so to purchase the offspring of such cows, the benefits likely to accrue are very much minimised when the cow is not likely to produce another calf and has also won her prize by recording an abnormal yield owing to being barren.

A REVIEW of the average weights of the steer classes at the recent Christmas Show at the Agricultural Hall gives some rather interesting information. Some of the classes are considerably heavier than a year ago, whilst others are somewhat lighter, and yet the third section vary but a matter of a few pounds per head in the two years. Aged Shorthorn bullocks (between two and three years old) give a capital average of weight this year; Red Polls are also better, and so are some of the Angus and crosses, other classes of the latter section being lighter. The variation, however, in any case, when age is taken into consideration, appears to be too slight to suggest that the breeds are any of them losing ground in weight, and also rather suggests that for some time past breeders and feeders have been doing their best.

TAKING the breeds in catalogue order, Devon steers under two years old have eight entries this year that average alive 10 cwt. 2 qr. 4 lb. as against 10 cwt. 3 qr. 25 lb. for a similar number in 1905. Steers of this breed above two years old and not exceeding three years had seven entries last year that gave an average of 14 cwt. 3 qr. 24 lb. against 14 cwt. 3 qr. 2 lb. average of eight animals this year, so that the difference in this class amounts to but 22 lb. per head. South Devons in 1905 were represented by four entries that averaged 15 cwt. 3 qr. 7 lb. each and this year the solitary steer of this section gave 15 cwt. 1 qr. 5 lb. Heifers of this breed were some three-quarters of a cwt. heavier last year than upon the present occasion, the number of this sex (four) being equal in both years.

HEREFORDS in their younger steer class at Islington gave rather an unsatisfactory account of themselves this year. Only three animals of this age were competing, and their average was 12 cwt. 3 qr., whilst last year the corresponding class of this breed gave the excellent average of 13 cwt. 9 lb. for nine head. This class in 1905, however, was an exceptionally good one, weight and age being considerably above two and not exceeding three years old in 1905 were six in number, with an average weight of 16 cwt. 3 qr. 17 lb., whilst at the recent show a similar number were catalogued which gave an average weight of 16 cwt. 2 qr. 22 lb., being but 5 lb. per beast difference in the two classes in 1905 and 1906.

SHORTHORNS as a display varied very considerably numerically in the two years, especially as regards its class of steers under two years old. This class in 1905 contained eleven entries, which gave an average live weight of 13 cwt. 0 qr. 13 lb., as against four entries in the present year with the lower weight of 12 cwt. 0 qr. 7 lb., being more than a cwt. each lighter than last year, and four in number as against eleven. The steers under three years and over two years were better this year in weight with the excellent average of 17 cwt. 1 qr. 17 lb., against 16 cwt. 2 qr. 12 lb. last December, and the numbers were eight in 1905 and seven in 1906. Heifers of this breed were heavier last year than upon the present occasion, and there were four of them instead of two.

SUSSEX cattle are a very wonderfully improved breed when compared with a few years ago, and the weights of both classes of steers were very good this year, though not quite as heavy as in 1905, when ten of them scaled an average of 13 cwt. 0 qr. 4 lb. This year the class of ten averaged 12 cwt. 2 qr. 15 lb. The older steers not exceeding three years old were also lighter a year ago, giving an average of 16 cwt. 1 qr. 11 lb. for ten animals, as against the very good record of 16 cwt. 2 qr. 22 lb. for seven entries at the recent show. Red Polls were a very short entry both years; in 1905 the four steers under two years scaled an average of 11 cwt. 1 qr. 20 lb., and three steers under three years 14 cwt. 1 qr. This year the younger class were 11 cwt. 1 qr. 10 lb. average, and the older ones, of which two animals only were entered, averaged 15 cwt. 2 qr. 10 lb.

IN 1905 Aberdeen-Angus steers not exceeding two years old were a very strong class numerically, and for their breed did not weigh exceptionally well; thirteen steers scaled an average of 11 cwt. 0 qr. 11 lb., and this year eight of similar age averaged 12 cwt. 2 qr. 2 lb. The older class of steers, too, over two years and not exceeding three years were rather light on the scales a year ago, giving but an average of 15 cwt. 3 qr. 24 lb. for five animals, whilst this year half-a-dozen of them ran to 16 cwt. 1 qr. 20 lb. average, which, though lighter than either the Sussex, Shorthorns, or Herefords of the same age, is still a very fair weight.

GALLOWAYS, both years, came out quite as light in weight as could be expected; indeed, neither classes, junior or senior, were quite as heavy as they should be. In 1905 the juniors averaged 11 cwt. 0 qr. 2 lb., and the seniors 13 cwt. 1 qr. 7 lb.; whilst at the recent show the figures were for the steers under two years, 10 cwt. 3 qr. 5 lb., and for the older ones, 14 cwt. 1 qr. 27 lb. Welsh cattle this year were exceedingly good in quality, but their average weight was somewhat marred by the presence of several animals that were not well finished, and there were no correspondingly heavy weights to level these up. Steers under two years in 1905 weighed 12 cwt. 3 qr. 4 lb., and the older classes the very good average of only 5 lb. short of 16 cwt. each. This year the young ones pulled up an average of 12 cwt. 1 qr. 17 lb., and the older ones 14 cwt. 3 qr. 4 lb.

HIGHLAND cattle only varied 7 lb. per head in their average weight in the two seasons as regards the class not exceeding three years, being 13 cwt. 2 qr. this year, which is 7 lb. heavier than a year ago. Steers above three years

old were 18 lb. per head heavier in 1905, with an average of 10 cwt. 0 qr. 6 lb. Crossbreds in their junior classes were lighter this year than in 1905, the steers under two years by some hundred-weight each, being 12 cwt. 3 qr. 14 lb. last year and 11 cwt. 3 qr. 7 lb. this year, the heavier class

of steers being 16 cwt. 3 qr. 8 lb. in 1905 and 16 cwt. 3 qr. 13 lb. this year, which looks as though feeders have been doing their very best in this section for some time past. The aged class of heifers also varied but 10 lb. per head in the two years.

# HORSES.

## Notes and Jottings.

"He doth nothing but talk of his horse."  
—"Merchant of Venice."

IT seems an anomalous state of things that there should be large classes of Hunters shown and big prizes given for the breed in a country in which hunting does not exist. Yet this is the case in New South Wales, where but one hunt is now in existence, the Sydney Hunt Club, the Goulbourn and other hunts, for some reason or other, having been discontinued. In spite, however, of there being only one hunt in New South Wales, at the New South Wales Royal Agricultural Society's Show there were no fewer than ten classes for Hunters, the prizes in which amounted

prize at the Royal Show was £50, and of the total amount given £162 was won by four horses. It may well be that a good show jumper is worth a lot of money, especially in a country like England where there are plenty of prizes to be jumped for every day of the season, and where a really good horse can make quite a nice little income for his owner without much expense. But even here the moderate jumper, the horse that only flukes into a place now and again, is of little value if he cannot do something else to earn his living. And one would think that the value of a moderate jumper in New South Wales must be small indeed. Of course, the cost of horse breeding is infinitely less in New South Wales than it is here, and there is a market there which we have not, the squatters

GALLOWAY HEIFER, NELLY 5th OF HENSOL.

The Galloway Heifer, Nelly 5th of Hensol, who is the property of Messrs Thomas Biggar and Sons, Chapelton, Dalbeattie, but was bred by Captain R. D. Barre Cunningham, Hensol, New Galloway, won at the recent Smithfield Club Show the Breed Cup, and was First in the class for Galloway Heifers not exceeding 3 years old. She was, when exhibited, 2 years 10 months 2 days old, and weighed 13 cwt. 2 qrs. 2 lbs.

to the handsome sum of £250. It may be remarked, in passing, that at the Royal Show at Derby in June there were fourteen classes of Hunters (exclusive of the jumping competitions), the prizes in which amounted to £350.

THE conditions under which the two Royal Agricultural Societies hold their shows are so different that it is scarcely possible to make a general comparison between them, but the circumstance of their being ten classes of Hunters, all of which seem to have been well filled, and which certainly were a great attraction at the show in a country in which hunting can scarcely be said to exist, is curious when one comes to look at the fact that in a country in which there are close upon 30 packs of hounds there should only have been fourteen classes and only some £70 more should have been given in prizes. The question naturally presents itself—How does the executive manage to get entries enough to fill these ten classes? This question is in a measure answered by the classification. Of the ten classes seven are for jumpers. They are neither more nor less than simple jumping competitions. It certainly is remarkable that in a country in which there is no hunting or practically no hunting, jumping competitions should be so popular as they are in New South Wales. The writer of the official report of the New South Wales Royal Agricultural Society's Show says:—"The real hunting is done in show grounds, and instead of Hunters being brought out by the agricultural societies to be sold to hunting men or hunted by their owners, the only effect of the competitions in showyards is to encourage horsemen to breed or buy horses and school them solely for exhibition purposes."

UNDER these circumstances one would scarcely look upon Hunter breeding as a very great source of profit in New South Wales. The best

requiring many horses to enable them to go round their immense holdings. But why men should be at the trouble to school horses to the jumping business on the hard ground and to breed extensively for it is puzzling, to say the least of it.

IT may be said that jumping competitions are popular in England with a class that have never been on a horse and are never likely to get on to one, and so they are. Probably—nay, certainly—they are more popular with them than they are with hunting men. But the reason for this is not difficult to find. In England there is a strong tradition in favour of hunting. Most men if they have not seen hunting themselves have some friend who has. Hunting pictures of greater or less merit are in most picture shop windows. Our literature is full of allusions to the sport; men who know something about it or who know nothing are equally keen to write about it, and the ground is, as it were well prepared. I certainly think it is the tradition of hunting which makes jumping competitions so popular in this country.

THE writer of the report of the New South Wales Royal Show says "one grows rather tired of hearing that the most successful of showyard Hunters would not follow hounds two miles." Well, perhaps we do hear a good deal to that effect, and the inference is that the statement is correct and is the result of accumulated experience. To begin with there is a very great deal of difference between the good going of the show season and the deep going of midwinter, but I take it that the reason why the showyard jumper is seldom a good hunter is that in the hunting field he meets with a class of fences such as he is unaccustomed to, and which he does not know what to do with, and the consequence is disaster

### HORSES.

#### SHIRES.

**BLAGDON SHIRE HORSE STUD.** (Established 1879). Proprietor, CLEMENT KEVILL, Billington, Leighton Buzzard, Beds. (late of Blagdon, Malden, Surrey). High-class animals for sale of all ages and both sexes; also massive sound Stallions to let for the season.

**CROSS, J. L.,** Cattothorpe Towers, Rugby. Shire Stallions, Mares, &c. Also Red Shorthorn Bulls from milking strains, and Oxford Down Sheep.—Apply F. CAMPBELL, Cattothorpe, Rugby.

**JOHNSON, WALTER,** Hatfield, Doncaster. Stud Horse, Lambton King 16757. Stallions for hire. Weighty young Stallions, Mares and Fillies on Sale.

**MUNTZ, Sir P. ALBERT, M.P.,** Dunsmore, Rugby.—SHIRE-BRED STALLIONS, COLTS MARES and FILLIES. About a hundred of all ages. Prize-winners London and other leading shows. Also high-class Shropshire SHEEP, winners first prize at Royal Agricultural, 1896, second in 1897, and first in 1898.—Apply THOMAS EWART, Dunsmore.

#### HUNTERS.

**ROBINSON, ERNEST W.,** Brookleigh, Esher. Irish-bred 1, 2, 3, and 4-year-olds, brood mares, made and unmade Hunters for sale.

#### HACKNEYS, &c.

**CONCHAR, JOHN,** Wyde Green, Birmingham. Breeder of High-class Hackneys. Several have been successful in the showyard. Colts and Fillies by the leading Stallions of the day.

**MOORE, HENRY,** Burn Butts, Cranswick, Hull. Pedigree Stud of HACKNEYS, including many prize-winners, yearlings, two years, and others.—Can be seen on application to Henry Moore.

#### CLYDESDALES.

**CLYDESDALES.—**The Seaham Stud Co. have Mares, Fillies, and Colts of the choicest breeding always on Sale.—Apply, R. BRYDON, Seaham Harbour, County Durham.

#### PONIES.

**MILLER, W. S.,** Forest Lodge, Brecon, South Wales. Extensive Breeder and Exporter of best class of Welsh Mountain Ponies and Cobs.

### CATTLE.

#### SHORTHORNS.

**COWLEY Manor Shorthorn Herd,** property of James Horlick, Esq. Bulls and Heifers of choicest breeding. Cruickshank and other milkers in dairy and showyard.—Apply, W. HITCH, Estate Office, Cowley, near Cheltenham.

**DENNY, F. A. & E. H. M.,** Bore Place, Chiddingtons, Eden Bridge, Kent. A carefully selected herd of choice Shorthorns. Stud Bulls, Ascot Constellation 9184, by silver Mint 7000; Primrose Pride 7905. Young Bulls for sale.—Apply, G. MACLEAN DAVIDSON, as above. Telegrams, Bore Place, Bough Beech Railway Station, Penkridge.

**WORDSWORTH, Duffcarrig, Gorey, Co. Wexford, Ireland.** Pedigree Dairy Shorthorns (Cruickshank and Scotch strains). Successful in dairy and showyard. Young Bulls and in-calf Heifers of good colours for sale. Exportation orders executed.

**SHORTHORNS.—**COWS of the Séraphina, Julia, and Old Fairy families. Young BULLS and HEIFERS, sired by Blood Royal; young stock by Jeweller, son of Blood Royal, a Bull shown with great success last season, and recently sold for exportation.—J. R. WILKINS, The Grove, Longton, Lancs.

**TAYLOR, GEORGE,** Cranford, Middlesex.—Bates' Shorthorns, deep milkers. Winners Milking Competitions, London Dairy Show, 1905. 6 Bull Calves for Sale. Stock Bulls: Beau Sabreur, Drumerey, Rowbury, and Kirkcharrm.

**THE Best Rent-paying Dairy Cattle in the World.—**BROWN, JOHN, Marden Farm, Hertford. Young Bulls for Sale. Royal Duke, in service, bred at Hawkrig, Wigton, grand stock-getter, combining quality with substance. 180 head kept; inspection invited. Telegrams: "Tewin."

#### HEREFORDS.

**JACKSON, R. NEWTON,** Blackbrooke, Pontillas, Herefordshire. Pure-bred Hereford Cattle, with pedigrees dating back to very early volumes of Herd Book. Bulls and Heifers for sale at reasonable prices. Shire Horses and Shropshire Sheep.

### CATTLE—continued.

#### HEREFORDS (continued).

**THE SHEEPSCOTE HEREFORDS,** property of Peter Coats. Established 1900. This herd has in 1904, 1905 and 1906 won more first and champion prizes than any other in England. Headed by Endale, Bage Protector, and Fusilier. Young stock on sale. Inspection invited.—Apply, J. K. Hyslop, Estate Office, Sheepscote, Clifford, Herefordshire.

#### DEVONS.

**WANTED** to buy for export, 100 PEDIGREE BOARS and 300 SOWS for breeding purposes; type small, compact, good flesh.—Send fullest details, with lowest price, to **LIEBMAN Bros.**, Hop Exchange, London, S.E.

I remember when Bailey and Barnum's Circus visited the north a few years ago talking this question over with the manager. They had a horse there which was certainly the best timber jumper I ever saw. I forget the exact height he cleared, but it was considerably over 6 ft. 6 in. I believe somewhere about 7 ft., and he possessed the world's record then. He seemed when he jumped to rear up and hit himself over the rails. I asked the manager what would happen if one was to take him at a nice half-pace gallop over a few fences which were within sight of the circus. They were stiff, but not one of them over 4 ft. high. The first, indeed, was a bit of very stiff timber certainly 6 inches lower. "I guess he would fall," was the reply, "it is a different game."

**STILL** I have known some showyard jumpers that were brilliant performers in the hunting field, and I shall never forget the pleasant ride I had on one a few seasons ago. He was a remarkable temperate horse, had a fair turn of speed, and was as clever as he was a bold and good jumper, and I was glad to see him going well not so very many weeks since. But the show jumper that was particularly called to mind by the sentence quoted at the commencement of the preceding paragraph was Mr. John Harrison's Topsy, a chestnut mare that flourished in the sixties and early seventies. Topsy was a clean thoroughbred one, was foaled in 1856, and was by Pilgrim, dam by Felipeo or Freedom, grandam by Perion. She was a wiry mare, with capital shoulders, rather straight in the neck, and as quick as one as I ever saw. She was

also one of the hottest. She used to go down to her fences in a series of back jumps, which were enough to upset any ordinary rider who was not prepared for them, and very often she would go sideways till she got within four or five lengths of them, when she would straighten herself and bound over them like a deer. There was no touching or brushing the fences with Topsy, unless, as happened occasionally, she got a little too near before she took off.

**IN** her time Topsy played many parts. She took prizes as a hunter; she won jumping prizes when she was well advanced in her teens; she was a very good hunter, though in the hunting field it must be admitted that she was rather a handful; and she won many a steeped also in useful company. As a chaser her manners were perfect; she laid herself out to gallop and jump in approved style, and was much easier to ride between the flags than she was in the hunting field or showyard, which was a very singular thing. And when she jumped in a steeped have she used to spread herself instead of jumping "straight up and down," as was her custom in the showyard, and sometimes in the hunting field. She was a rare good sort, and was a little annuity to her owner. I believe, but of this I cannot be quite certain, that she took a prize or two, or at any rate, "got into money" as a brood mare.

**IT** is interesting to look for a moment through the prize list. The winning Thoroughbred stallion was the imported Sir Foote by Sir Hugo, dam by Galopin—Miss Foote, second to him being

## ROOTS AT THE SMITHFIELD SHOW

MESSRS. SUTTON AND SONS' STAND.

## 200 Acres for Small Holdings.

A big development of the small holding system is projected at Bromham, a village in the neighbourhood of Devizes. The parish council, who for a long period have held a large quantity of land under the Crown, hearing that the tenant of Abbotswood Farm—a holding over 200 acres in extent—was negotiating with the Crown for the surrender of his tenancy, applied for the same to be cut up into small holdings. Mr. F. E. N. Rogers, M.P. for East Wilts, interested himself in the matter, and the chairman of the parish council has just received a letter from him stating that Lord Carrington has authorised him to say that so soon as arrangements are completed with the present tenant for quitting, the parish council will be accepted as tenants. This decision has given the greatest satisfaction at Bromham, for the soil is admirably adapted for early produce, and the villagers find a ready and profitable market at Bath and Bristol.

MESSRS. WEBB AND SONS' STAND.

another imported horse in Flavius by Hampton—Alvina. Then the champion Coaching stallion was Count Risby 2236, who was bred by Mr. Parker, of West Cottingham, and who took first prize in the Yorkshire Show at Leeds in 1902, when he was the property of Mr. George Burton. He is now owned by Mr. Philip Clearley, who also took first prize in the class for stallions between three and four years old with a son of his, a very satisfactory incident. The champion Hackney stallion was also a Yorkshire-bred horse, to wit, Moncrieffe Statesman by Barton Duke of Connaught—Lady Salisbury.

**M. R. ABRAHAM GRADAGE**, of Bramhope, near Leeds, has just lost that well-known Shire stallion Nyn Hitchin Duke 14782. Nyn Hitchin Duke was bred by Mr. Arthur Ransom, of Hitchin, Herts, and was foaled in 1891. He was by Hitchin Duke 9586—12545 Hitchin Beauty by Brailford Hero 3434, and was a good

prize winner in his day. As a foal he took three first prizes and one second, and as a yearling he made a similar score. He began his two-year-old season well by winning in a strong class at the Shire Horse Society's Show when he had such horses as Cathorpe Gold, Rebel Chief of Hotfield, and Menestrel behind him. He was then the property of Mr. J. P. Kidston, of Nyn Park, Potter's Bar, N., who sold him to Mr. Gradage. For that gentleman he did very well the first year he had him. He took first and special prize at the first show at the Royal, at Cheshire, first at the Royal, at Manchester, Liverpool, and North Lancashire at Blackpool, and first at the Yorkshire at Dewsbury. In the following year he won in a very strong class of three-year-olds, in which Vulean VII. was second to him, and Double X., William, East Anglian, Royal Salute of Bury, Victor Chief II., and other good horses were behind him in a class of sixty-four. He was also reserve for the Junior Stallion Cup to

Rokey Harold. This was probably his best performance in the show ring. I do not remember him being shown very much after this, but he did good service at the stud, and filled the country with a lot of active and powerful cart horses.

THE LOOKER-ON.

A cottage and one acre two rods of land at Smallwood, Cheshire, rented at £14 per annum, has recently been sold for £140, which works out at over £250 per acre, and exactly thirty years' purchase at the present rental.

The cowkeepers at Stone, Staffordshire, who have a right to pasture cattle at a nominal rental on what is known as the Common Plot, received an offer of £40 per annum from the local golf club for permission to construct a nine-hole course. At a meeting of the cowkeepers the proposal met with great opposition, and by a unanimous vote the offer was declined.

## MISCELLANEOUS.

**BEST & CHEAPEST MANURE** for farm and garden, "NATIVE GUANO," an effectual remedy for grass, wireworm, &c., price £3 10s. per ton in bags, 2-ton lots carriage paid; orders under 10cwt., 4s. per cwt. at Works, or 5s. per cwt. carriage paid to any station in England. ## CORN MARKETS.

## LONDON.

**Mark Lane, Wednesday.**—Wheat: English firm, but quiet. Foreign steadily held at unchanged prices, but inactive. South Russians, ex ship, quoted at 29s 9d to 33s; landed, at 30s 6d to 33s. Plata, landed, at 31s 6d to 33s. No. 1 Northern Manitoba, at 34s; No. 2 at 32s 9d; No. 3 at 32s, all ex ship to arrive. Flour quiet, unchanged. Maize steadier and about 1½d to 3d dearer, but not active. River Plate, ex ship, quoted at 21s to 21s 8½; landed, at 21s 9½ to 22s. Barley quiet, inactive. Odessa-Nicolaieff, quoted at 15s 9d, ex ship to arrive, 19s 3d landed. Oats slow. Russian quoted at 15s 6d to 16s; Americans at 17s to 17s 6d.

**Mark Lane, Friday.**—Wheat: English steady, but quiet at fully late rates. Foreign sellers maintain late prices, but demand inactive. No. 1 Northern Manitoba, at 34s; No. 2 at 32s 9d; No. 3 at 32s, ex ship to arrive. South Russians, ex ship, at 29s 9d to 33s; landed, at 30s 6d to 33s; choice white Karachi at 31s; red Karachi at 30s 6d, ex ship to arrive. Flour quiet, unchanged. Maize steady, but quiet. Mixed American, landed, quoted at 22s 9d to 23s 3d; River Plate, ex ship, at 21s to 21s 3d; landed, at 21s 9d to 22s. Barley quiet, unchanged. Odessa-Nicolaieff, ex ship, quoted at 18s 9½; landed, at 19s 3d; New Snyrna, unscreened, ex ship to arrive, at 19s 6d to 22s; screened, at 22s to 25s. Oats dull, unchanged. Russians quoted at 15s 6d to 16s; Americans, 17s to 17s 6d.

## COUNTRY.

**Ashford, Tuesday.**—There was a very poor attendance of buyers, and of sellers of English corn there were almost none. Wheat was quoted unchanged, oats the turn cheaper, and maize slightly dearer. Wheat, 31s to 34s; English feeding barley, 26s to 28s; foreign barley, 21s to 23s; mazagan beans, 32s to 34s; tick beans, 34s to 36s; flat maize, 26s to 27s; round maize, 25s to 26s; white oats, 21s to 24s; black oats, 20s to 23s per quarter.

**Bury St. Edmunds, Wednesday.**—Market thinly attended, and only a very small quantity of wheat on offer. Trade quiet, and prices unchanged, at 31s to 31s 6d per qr. Oats and beans same and firm, at last week's prices. Maize, round, the turn lower, at 23s per qr. Other feeding corns and straws in very quiet demand, at about 1st week's prices.

**Banbury, Thursday.**—Wheat, red (new), 30s 6d to 31s 6d per qr; barley, 26s to 31s per qr; beans, (new), 32s to 33s per qr; oats, 19s to 25s per qr; peas, 31s to 36s per qr.

**Birmingham, Thursday.**—Very thin attendance. Trade very quiet. Foreign wheats remain at about late rates. Quotations:—River Plates, 30s 3d to 31s 6d per 496 lb; Russian, 30s 6d to 32s per qr, both at Sharpness. Only a very small quantity of English wheats showing, which made from 11s 6d to 12s per 186 lb delivered. Plata maize was 9d lower at 21s per 480 lb, Bristol. Flat maize was unchanged at 22s 6d, Bristol. Grinding barley was 9d per qr lower at 19s per 400 lb at Bristol. English oats, 22s 6d to 23s per 312 lb; beans, 13s 3d per 193 lb delivered.

**Bristol, Thursday.**—There was a fair attendance on our market to-day. No English wheat offering; foreign very firm at unchanged prices. Maize, unaltered for spot, 3d to 6d dearer for future. Barley, unaltered. Oats, 3d dearer. Flour, firm. —GRACE BROS.

**Berwick, Saturday.**—Moderate attendance, with few samples of grain on offer. Wheat, 28s to 30s; oats, 22s to 23s.

**Chichester, Wednesday.**—There was no corn on offer, and business was practically confined to feeding stuffs. The attendance was small.

**Coventry, Friday.**—The attendance was only small. Show of wheat samples practically nil, and trade inclined to be a shade quieter. All classes of spring corn well maintained late rates, but there was comparatively little on offer. Quotations:—Wheat, 11s to 11s 9d per 186 lb; barley, 28s to 34s per 48 lb; peas, 12s to 14s per 195 lb; beans, 12s 9d to 13s 3d per 193 lb; oats, 24s 6d to 27s per 352 lb.

**Cambridge, Saturday.**—There was again a very thin attendance, and a very small supply of corn on offer. A few samples of wheat changed hands at unaltered values. Reds, 31s to 32s, and white up to 33s per 504 lb. No spring corn showing. Harvest is expected to begin in about a month.

**Chester, Saturday.**—There were no changes in prices, except for beans, which are dearer. English grain commands the full rates of late. Trade was very slow, with a smaller attendance, farmers being busy with the hay. Quotations: New white and red wheat, 4s 7d to 4s 10d per 75 lb; n w grinding barley, 3s 6d to 4s per 64 lb;

old beans, 6s 3d to 6s 6d, and new, 5s 5d to 5s 8d per 80 lb; old oats, 3s 3d to 3s 6d, and new 2s 8d to 3s per 64 lb; old Indian corn, 13s to 13s 3d, and new 12s to 13s per 240 lb; ditto River Plate, 12s to 12s 6d.

**Canterbury, Saturday.**—Trade was very quiet, supplies being limited to only a small supply of English corn, which maintained recent rates. English oats 19s to 23s; foreign slightly dearer, 19s to 22s per qr. English grinding barley is practically exhausted.

**Carlisle, Saturday.**—Very small supply of oats in our market to-day. Good demand at late rates; 22s to 23s per 336 lb. —THOMAS ROBINSON.

**Colchester, Saturday.**—Quiet market with very poor attendance, the few samples showing making about the same as last week, but tendency easier. Recent rains have done good to grass and roots, but some of the corn crops are badly laid. —JOSEPH WILES AND SON, LTD.

**Devizes, Thursday.**—There was no change in prices at to-day's market. The following were the quotations:—New wheat, 15s to 17s; secondary, 13s 6d to 14s 6d; best barley, 26s to 32s; secondary, 20s to 24s; rye, 22s to 24s; old black oats, 22s to 24s; new ditto, 19s to 23s; malting barley, 20s to 32s; beans, 16s to 18s; fine flour, 24s to 26s; extra fine, 27s to 30s.

**Derby, Friday.**—Scarcely any wheat or other grain offering, owing to the small attendance of either sellers or buyers. Prices remained nominally unchanged. White wheat, 32s to 34s; red, 31s to 32s; beans, 31s to 35s; old oats, 24s to 25s; new, 22s to 24s.

**Dublin, Friday.**—There was a small attendance and a quiet feeling, but firm tone. Irish wheat quiet. Barley nil. Oats limited. Oatmeal steady. Quotations:—Wheat, 19s to 20s; malting barley, 14s 6d to 15s 3d; grinding ditto, 12s 9d to 14s; oats, 11s 6d to 13s; oatmeal, extra pinhead, 12s 6d to 13s 6d; flour, 10s to 11s 6d; pollard and bran, 6s to 6½d.

**Dorchester, Saturday.**—As farmers are now in the midst of haymaking and a big fair follows next week, but very few attended to-day's market, where the business was of a most limited character. Very little grain of any kind offering, especially of wheat, prices of which for home grown kept steady, whilst foreign ruled quiet, and but few sales resulted, these being at barely late rates. Grinding barley has rather favoured buyers, as did maize, prices of which in some cases declined 3d per qr. Oats, which are very scarce, made full prices, as did both beans and peas, supplies of which are almost, if not quite, exhausted.

**Doncaster, Saturday.**—Very small supply of English wheat, and scarcely any trade done. Prices a shade easier, up to 11s 9d per load being paid. Foreign also the turn in favour of buyers. Flat maize firm, round maize and beans a little dearer. Other things at late rates.

**Exeter, Friday.**—Trade quiet. English wheat scarce and rather dearer; foreign unchanged. Barley and maize, 3d to 6d cheaper. Oats and flour firm. English wheat, 4s to 4s 10d; superfine flour, 25s to 27s; fine, 24s to 25s.

**Glasgow, Wednesday.**—The trade during the week has been quiet, but prices have been firmly maintained for bread stuffs, and feeding stuffs have been in rather better demand at last week's prices. Barley has been held for some slight improvement in value. There was the usual attendance at our Corn Exchange to-day. Wheat quietly firm. Flour unchanged and in slow demand at late rates. Maize 3d. per boll dearer on the week. Corn (owing to scarcity) fully 6d per boll dearer since last Wednesday. Oats—Home quiet and unchanged; foreign a shade easier for spot prices, but firmer for forward. Barley quietly steady. Beans unchanged for foreign but English 3d. per boll dearer. Pease unaltered. Bran and thirds show no change. Oatmeal quiet, but steady in price. —GIBSON AND CLARK.

**Glasgow, Friday.**—Market very quiet. Business difficult, and compared with last market day, prices are wholly unchanged.

**Gloucester, Saturday.**—English wheat in such small supply as to be unquotable. A quiet trade in foreign wheat at prices practically unchanged. Plata maize 6d, flat and Bessarabian 3d each cheaper. Barley 3d lower. Oats scarce.

**Hamtham, Saturday.**—The farmers' supply of grain in the district is now practically exhausted. Only a few samples were offered, and these sold at prices which showed no variation from those of last week.

**Hereford, Wednesday.**—Attendance small, with prices tending in buyers' favour. Quotations:—Wheat, 3s 9d to 3s 10d per bushel; barley, 3s to 4s; oats, 2s 6d to 3s 3d; beans, 4s to 4s 3d; and maize, 3s to 3s 3d.

**Ipswich, Thursday.**—A thin attendance, people having busy at home with the hay. Very little wheat was offering, but this seems to have no effect on the price. Good reds nominally unchanged at 32s per 504 lb. Oats rather scarce and firm, but with only a quiet demand, at 22s 6d to

23s 6d per qr. Maize: Round the turn lower at 22s; flat firm at 23s 6d per qr. Linseed cakes quiet and unchanged. Middlings scarce and firm; fine at 55s to 55 10s, coarse at 55 10s per ton. Bran quiet at 24 15s per ton.

**Leeds, Tuesday.**—The quantity of wheat on passage shows a substantial reduction; on the other hand, granary stocks have increased. Arrivals off coast are liberal, and the Russian exports continue to exceed expectations. Crop reports from America and Russia are less favourable, and keep the trade in a firm state; the demand, though not active, is more general, and holders of wheat insist upon fully late week's rates. The supply of English is now extremely small. Maize 3d easier; oats in poor demand; beans scarce. —DUNN AND CO.

**Lincoln, Friday.**—Business quiet, there being no English wheat on offer. Foreign samples were firm at unaltered rates. Feeding stuffs without change.

**Leeds, Friday.**—With a limited demand for both English and foreign wheats, there was no change from last Tuesday's prices, except that inferior descriptions of foreign were the turn easier in face of the heavy arrivals coming to hand. Malting barley firmly held, with a substantial advance for finest qualities. Maize was a shade easier. Beans, peas, oats, and flour unchanged.

**Liverpool, Friday.**—There has been a moderate attendance of millers, but wheat meets only a small inquiry, and values are ½d to ¾d below last Tuesday. Flour.—A quiet trade for all qualities without quotable change in prices. Maize.—Mixed is steady at ¾d to ¾d decline, with more inquiry. Plata steady, with a moderate trade at ¾d advance. Barley.—Malting quiet, and the turn lower. Feeding quiet, unchanged. Beans slow to move at about recent prices. Peas quiet, generally the turn lower, with a small trade passing. Oats quiet but steady, with little actual change in prices, and a slow sale. Oatmeal firm, unchanged, but inactive. Oatcake.—A quiet trade, unchanged for American but occasionally 2s 6d per ton lower for English linseed. Indian meal is in slow demand, but sellers hold at late rates. —SEGAR AND TUNNICLIFFE.

**Leicester, Saturday.**—Good attendance of buyers and dealers, with small supplies of home-grown wheats, which met a very dragging sale; red wheats, 31s to 33s; white wheats, 32s to 34s, per 36 stones. Grinding barley slow. Fine oats steady, at 23s to 25s per 26 stones. **Manchester, Thursday.**—English wheat in short supply. Foreign wheat was fairly firm. Indian corn and mixed American firm, and in sellers' favour; Plata a shade easier. English beans firm and about 6d dearer. Oats quiet. Other cereals showed little change, but were steady.

**Newark, Wednesday.**—Quiet market; trade dull; little change in prices. Quotations: Wheat, white and red, 29s 6d to 31s per qr; barley, grinding, 22s to 24s per qr; oats, white, 21s to 22s 6d per qr; black, 20s to 21s 6d per qr; beans, new, 32s to 34s per qr.

**Newport, Wednesday.**—There was a small attendance and little business was done. Wheat showed a drooping tendency. Maize slow, but firm. Other kinds of corn unchanged. Flour, fines, 2s per sack.

**Northampton, Saturday.**—Better attendance, but very little corn on offer. Wheat, 31s to 32s; malting barley, 26s to 32s; new white oats, 21s to 22s 6d new black oats, 19s to 20s; beans, 32s to 33s; peas, 29s to 30s; flour, 24s 6d to 28s.

**Newcastle-on-Tyne, Saturday.**—A slow demand for wheat of all grades, and prices in buyers' favour. Maize steady at unchanged prices. Oats remain steady, and are held for full prices. Peas slow sale, and slightly in the favour of buyers. Beans remain firm, and held for last Saturday's quotations. —J. POLLARD AND CO.

**Norwich, Saturday.**—There was very little doing in the wheat at our market to-day, and no alteration in values. Copious rain has fallen during the past day or two, which will be of great service to the growing crops. Wheat, red, 32s to 32s 6d per qr, weight 63 lb per bushel imperial. Corn inspectors' return for the week ending June 10, 1906:—Wheat 1,134 qr, 30s 3d.—J. A. MILLS.

**Nottingham, Saturday.**—Small attendance. Wheat held for full rates, both English and foreign. Grinding barley steady trade. Oats and beans but few offering, and prices in sellers' favour. —R. HURBLEY.

**Oxford, Saturday.**—There was very limited supplies on offer at the market, and although business was inactive, late rates were fully maintained.

**Preston, Saturday.**—Last week's prices for wheat remain unaltered, only a small volume of business having passed during the week. There was a moderate attendance. Farmers' wheat made full prices, and oats, being scarce, were dearer. Flour unchanged. Quotations:—Wheat, white,

new, 13s 9d to 14s 3d per windle of 220 lb; ditto, red, 13s 6d to 14s; oats, old, 3s 3d to 3s 4d per bushel; oatmeal, 26s to 26s 6d per load of 240 lb; beans, 16s 6d per windle of 220 lb.

**Peterborough, Saturday.**—We have had some heavy rains during the week which have partially laid the crops on the fens. The few samples of wheat on the market to-day made late rates.

**Ripon, Thursday.**—The market has a brisker tone, and a fair trade was done. Round maize shows a downward tendency. Prices:—Wheat, 29s 6d to 30s; ditto, foreign, 32s to 35s 6d; grinding barley, 23s 6d to 24s 6d; malting, ditto, 27s to 29s.; oats, 21s to 22s 6d; round maize, 23s to 24s; ditto, flat, 21s per qr.

**Reading, Saturday.**—There was an improved attendance and a fair trade at the following prices :—Wheat, 29s to 36s; gridding barley, English, 25s to 29s; foreign, 18s to 21s; oats, English, scarce and dear at 23s to 25s; foreign, American mixed, 17s to 21s; English beans advanced 1s, but trade in peas, with the exception of good blues for boiling, was dull.

**Reford, Saturday.**—The attendance to-day was about an average. Wheat was a comparatively small supply, but trade was rather inactive, and currencies generally remained about the same as those of last week—30s to 31s per qr. Oats were, if anything, slightly lower, owing to foreign competition, white making 22s to 23s, and black, 21s to 22s per 24 stone. Flat maize scarce and rather dearer at 25s 6d, delivered here, and Plate maize 25s. English beans a small show and inquired for, selling at 33s 6d to 35s per 38 st.

**Sheffield, Tuesday.**— Quiet trade and late prices ruled. Quotations:—Wheat, white, 32s to 33s; ditto, red, 31s 6d to 32s 6d per 504 lb; oats, black, 20s to 21s; ditto, white, 22s 6d to 23s per 336 lb; peas, grinding, 31s 6d to 32s; ditto blue, 55s to 70s per 504 lb; beans, English, 36s to 36s 6d per 532 lb; barley, grinding, 24s to 24s 6d; ditto malting, 28s to 32s per 448 lb; Indian corn, small, 24s to 24s 6d; ditto Plate, new, 22s 9d to 23s; ditto flat, 24s 6d to 25s per 480 lb.

**Stamford, Friday.**—Poor attendance, but there was hardly any grain on offer, and no demand. Wheats 31s 6d; oats 20s to 21s per or

**Shrewsbury, Saturday.**—Wheat, 13s 3d to 13s 9d per 225 lb; new oats, 14s to 15s per 225 lb; peas, 13s to 14s per 240 lb; beans, 14s 6d to 15s 6d per 240 lb.

**Sunderland, Saturday.**—Grain rather less freely offered. Wheat maintained last week's prices. Barley dull. Oats quiet. Arrivals: coastwise, wheat, 645 qr; oats, 597qr; foreign wheat 9164 qr.—E. AND F. RICHARDSON

**Tunbridge Wells, Friday.**—White wheat, 3s 6d to 33s; red ditto, 32s to 32s 6d; barley, 28s to 34s; grinding ditto, 23s to 25s; oats, English, 19s to 23s; rye, 24s to 25s; peas, 32s to 37s; beans, 32s to 36s; tares, 42s to 50s; maize, 22s to 24s.

**Workshop, Wednesday.** — Small attendance, and scarcely any grain on offer. White wheat, 30s to 31s; red ditto, 29s to 30s; grinding barley, 26s to 28s; white oats, 22s to 23s; black oats, 20s to 21s; flat maize, 25s to 26s; round maize, 26s to 27s per qr.

**Wolverhampton,** Wednesday. — Small attendance, and the tone of the trade was flat. Quotations were about the same as last week. New wheat, 14s per 216 lb; flat corn, 27s; English beans, old, 15s 6d, new, 15s; oats, old 18s, new, 15s.

**Warwick, Saturday.**—Very small market and very little grain of any description on offer. What little wheat there was is unchanged in value. Oats and beans, &c., about the same.

**Winchester, Saturday.**—English wheat quiet and unaltered. Foreign firm and unchanged. Barley, oats, and maize held at last week's prices. Flour a fair demand at late rates.—**FEAR, COLEBROOK AND CO., LTD.**

**Wisbech, Saturday.**—A thin attendance at market, and no change in prices from last Saturday. Scarcely any samples offering from farmers.—JAMES FLETCHER.

**Yeovil**, Friday. Home-grown wheat continues scarce, and what remains in farmers hands is firmly held. Foreign maintained last week's advance. Grinding barley down 6d. Maize flat and 6d cheaper. British wheat of best quality, 31s to 32s per qr.; secondary, 28s to 30s; foreign, 27s to 28s. English white oats, 21s 1d to 22s; black, 21s 6d to 22s. Barley, 21s to 22s; ditto, black, 18s 9d. English barley, 28s 6d to 32s; secondary, 22s to 26s; grinding barley, foreign, 19s; round maize, 21s to 21s 3d; flat, 22s to 23s; winter beans, 35s to 39s; spring, 39s to 37s; winter vetch, 56s to 62s 6d; spring ditto, 52s to 55s. A steady trade in flour at last week's level. Good milling offals continue in good request at firm rates.

**York, Thursday.**—Only a very small supply of grain, the locally grown samples being nearly all exhausted. Wheat meets a slow trade at last

week's prices. Fino white realised 30s to 32s, red and mixed 29s to 30s per qr of 36 stones; feeding barley, 24s to 26s per qr of 32 stones. Oats slow; white Tartary, 19s to 20s, black 20s to 21s, white Garton 21s to 22s per qr of 24 stones; rye, 24s; beans about 33s per qr of 36 stones.

## FOREIGN.

**Hamburg** Saturday.—We had forcing hot weather with occasional thunder showers. The growing crops are making satisfactory progress. Market quiet for wheat and rye, while feeding barley and maize are meeting some attention at reduced prices. Fino red Holstein and Mecklenburg wheat being scarce is firmly held at 29s 6d per 480 lb. c.i.f. Hamburg. Bohemian and Russian Ruffo alfalfa is offering at 22s 3d, South Russian and Danubian at 27s 9d to 29s 6d per 480 lb. c.i.f. Hamburg. Sound rye in demand, but scarce, many parcels South Russian arriving out of condition. Pud 9 10/15, sound quality, is selling at 23s 3d to 23s 6d, parcels alfalfa are offering at 22s 6d to 23s, Pud 9 15/20 at 23s 3d; August-September shipment, 22s 6d per 480 lb. c.i.f. Hamburg. In Bohemia and Moravia, which had suffered from unfavourable weather, according to latest reports has much improved, and promises to turn out fair average result. In the Saale district the prospects are highly satisfactory. Stocks of malting barley are cleared. 06/61 Ko South Russian feeding barley on the spot is selling at 17s 6d; August-September shipment at 16s 9d; 13s per 400 lb. c.i.f. Hamburg. Rye in demand. July shipment is held at 21s; July at 21s 3d; River Plate-June-July at 20s 6d per 480 lb. c.i.f. Hamburg. JOHN TATLOCK.

## CORN STATISTICS

## Imports of Foreign and Colonial Corn.

Statement of the quantities of Foreign and Colonial Corn Imported into the United Kingdom in the week ended Saturday, June 30, 1906:—

|                   |                |

## LIVE STOCK AND MEAT TRADE REVIEW

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

### Trade in London.

At the Islington Cattle Market during the week there was a small decrease in the number of beasts offered for sale. Trade for all descriptions of both prime and second quality fat beasts was rather a disappointing one so far as consignors were concerned, the tendency in regard to value being a downward one, especially towards the close of Monday's business, a protracted finish ensuing. Notwithstanding, a few choice grass-fed beasts (Herefords and Lincolns) were offered for sale; these met with a limited inquiry, rates ruling 2s. per 8 lb. easier than in the previous week. Both Scotch and Irish fat cattle were conspicuous by their absence. Fat butchering cows and bulls were in average supply, and met a slow sale, buyers hanging back for lower prices, which in most cases had to be conceded. On Thursday trade was practically at a standstill in this part of the market.

At Deptford there was also a shorter supply this week, trade in consequence ruling slightly firmer, though no formidable advance in value can, however, be noted. The total number on offer at both markets was 4,018, as against 4,656 during the previous week. The supply consisted of 850 British, decrease 40, and 3,168 foreign, decrease 598, these latter comprising 2,717 from United States, and 451 Canadians. The following were the top rates paid per 8 lb. (sinking the offal):—90 stone Herefords, 4s. 6d.; 90 stone Norfolk, 4s. 4d.; 100 stone Lincoln Shorthorns, 4s.; 110 stone Scotch, 3s. 10d.; 90 stone States, 3s. 9d.; 3s. 11d.; 95 stone Canadians, 3s. 7d. to 3s. 9d.; 90 stone fat cows, 3s. 4d.; 100 stone fat bulls, 2s. 8d. to 3s.

The sheep trade confined entirely to Islington proved dull and heavy as a whole, owing to the poor trade experienced lately at the dead meat market. Choice quality sheep sold fairly well, but other grades were rather lower in value, as also were ewes; even at this reduction a clearance on neither market-day was possible. For prime quality fat grass lambs there was a steady inquiry at last week's quotations, heavier descriptions being in excess of the demand. Scotch sheep also sold fairly well, late currencies governing all transactions; Irish, on the other hand, were very little sought after, owing to so many half-finished sheep being penned. The total number penned was 10,840, and showing a decrease of 740 as compared with last week. Best pens made per 8 lb. as follows:—8 stone Downs, 5s. 8d.; 8 stone Scotch, 5s. 8d. to 6s.; 10 stone Downs, 5s. 2d. to 5s. 4d.; 10 stone Irish, 5s. to 5s. 2d.; 6 stone half-breeds, 5s. to 5s. 2d.; 10 stone ewes, 3s. 10d. to 4s.; 11 stone half-bred ditto, 3s. 8d. to 3s. 10d.; 5 stone fat grass lambs, 7s.; 6 stone half-bred ditto, 6s. (offal given).

Calves were in average number and met a slow but steady inquiry; the best on offer to dress from 166 lb. to 177 lb. were quoted at from 5s. 6d. to 5s. 8d. per 8 lb., all being sold, though late in the day.

### Trade in the West.

Now that rain has again fallen pretty copiously in most parts of the country, we are hoping to see an improved trade for stores, which has of late been exceptionally quiet for everything but the very best, and these, unfortunately, are only coming to hand in very small supply, the great bulk of the stock now coming out being of a decidedly inferior character, and such as claim but very limited attention. The better class grades of stock—either for milk or for grazing purposes—readily maintain their value, but anything of a medium stamp distinctly favours the buyer. Young, fresh-condition barreners are now making £24 to £30 per pair, and sales are easy to effect on these terms, as this is just the class of stock wanted; but the plainer grades, which are difficult to cash, can be bought in any quantity at prices ranging from £15 for anything very plain up to £22 or £23 for the animals showing better condition. The same remarks apply to dairy beasts, the best, which command a quick sale at from £16 to £22, being scarce and difficult to procure; whilst just the reverse is the case with the ordinary runs, these ranging downwards from about £15 to as low as £9 or £10 for, principally, milked-out cows or for heifers with something wrong in their quarters. Stirk heifers are also none too saleable at prices ranging from about £8 to £11; and yearlings are even more unsaleable at from about £5 to £7. A few stock bulls are still being brought out, the more serviceable changing hands up to £15, ranging down to £7 or £8 for younger and less promising animals.

The sheep trade is devoid of anything great

activity as yet, but with the improved keep prospects trade should look up a little in view of the general demand for ewes and lambs; even mutton is scarcely selling so well as it has been of late. This, however, is not likely to affect the price of keeping sheep very much, seeing what a shortage there is and how difficult it is in many cases for flockmasters to replenish their numbers, and consequently we anticipate seeing prices fully maintained even if they are not improved upon, a prediction that was fully verified at Blandford on Thursday, ewes there selling readily from 46s. to 54s., and wether lambs to 38s. Store pigs, too, are selling very well indeed, and so are calves for rearing, though the latter are certainly easier in value than they were.

Some very prime quality fat beasts, Devon and Shorthorn steers and heifers are now being offered, and for these a good trade rules at fully late rates—4s. 6d. to 4s. 10d. for the heavier weights, and 4s. to 4s. 4d. for those not quite so well finished (of from £16 to £24 each), the rougher grades of fat bullocks meeting a much slower sale at 4s. to 4s. 2d. or a trifle more. The veal trade, although keeping fairly firm, is scarcely so good as it has been; but this may in a measure be due to the hot weather, which is a factor purveyors have always to reckon with, particularly in regard to this class of meat. From £3 to £5 has been the general run of values during the past week (or from 7d. to 8d. per lb. for the best).

The mutton trade has kept fairly steady for all the native weights in Downs and crossbreeds, which may be quoted from about 6s. 2d. to 6s. 6d. per stone, and coarser weights 5s. 8d., and occasionally 6s., these quotations having reference to wethers and tegs; but ewes, especially where at all coarse or a little bit aged, have dropped in value from 2d. to 4d. per stone. The lamb trade, except for the very best grades, has also lost some of its buoyancy, which is hardly more than can be expected, seeing how the season is going on; but some of the ripest Downs and crossbreeds make up to 11d., though 10d. to 10½d. is a more general range, and coarser breeds, 9d. to 9½d., with less demand than there has been.

Pigs continue to find a decent market, porkers making 10s. to 10s. 6d. per score, this price now being rarely exceeded; whilst hogs sell at 9s. to 9s. 6d., and coarse heavy pigs at 7s. 6d. to 8s. 6d., the weather being largely responsible for the drop there has been in values of late.

### Trade in Scotland.

The number of fat cattle on offer this week has been almost similar to last, and trade in favour of buyers. Fat cows have been shown in rather larger numbers, and they, in keeping with the cattle, made decidedly less money. Sheep were a decidedly better show as to quality this week, and an improved trade was got to the extent of 1s. to 2s. per head. Lambs also made quite last week's prices. Heavy ewes, however, on account of the warm weather, were 1s. to 2s. a head cheaper. There was a small show of calves which made more money. Pigs also were in smaller numbers, and they were easily sold at higher prices. A large show of store cattle also met a stiffer market, although a considerable number of the best-conditioned cattle and stirks were sold out. Store sheep in very small numbers, and they quite maintained recent high prices. Milch cows met rather a better market. Quotations:—Top-price of cattle per live cwt., 40s.; current, 35s. 6d. to 37s. 6d.; mutton, from 8½d. to 10½d. per lb.—JOHN SWAN AND SONS, LTD.

### Trade in Ireland.

Trade for cattle in last Thursday's Dublin market maintained the improvement of the day week, although supplies showed an increase of practically 500. The continued firmness was due to the appearance of about half-a-dozen extra buyers from cross-Channel centres, who bought very freely, and quite counterbalanced any influence that larger supplies would undoubtedly have had. Another thing which makes beef sell well is that the heifers and bullocks now on offer are of exceptionally good finish, and just the kind that English and Scotch buyers are in want of. Prices all round showed an upward tendency, especially for choice beef. A good and early clearance was made. The live weight for best beef ruled from 31s. to 33s. per cwt., but some extra choice Shorthorns and Aberdeen-Angus made up to 34s. 6d. per cwt. in a few instances. Good second-class beef sold at from 28s. to 30s., and coarse cattle from 24s. to 27s. per cwt. (live weight). Dead weight prices for choice ox and heifer beef may be given at from 58s. to 59s. 6d., and a few extra lots up to 61s. 3d. per cwt.; good second-class beef, 56s. 6d. to 58s., and coarse quality from 48s. to 48s. 6d. per cwt. The mutton department trade was decidedly weaker, though the increase in supply of sheep was only slightly larger than that of the previous market. The demand was sluggish, and buying

slow and dragging—more especially for heavy weight sheep and hoggets suitable for the London market, and lighter hoggets, such as are generally in demand for the big Midland English towns were more difficult to dispose of. Dublin butchers chiefly bought Cheviots and mountain sheep. We have been inclined with foreign sheep during the week, a cargo having been landed at this port, of 4,000 carcasses, together with several hundred cases of shoulders of mutton, and 300 carcasses of frozen lambs. The latter importation seriously affected the lamb trade in the Dublin market. The inquiry from home buyers for mutton was disappointingly slow, they seeming to require very few sheep as compared with previous markets. The dulness of the English trade made exporters deal with great caution. Prime wether mutton sold at from 7½d. to 7½d. per lb.; ewe, 6½d. to 7d.; inferior sheep from 5½d. per lb. Good lambs sold at from 32s. to 43s. each—the latter price being paid by a local butcher for an exceptionally choice pair of lambs. Prime veal made from 7½d. to 8½d. per lb.; inferior calves, from 5½d. to 6½d. per lb. Milch cows met with a satisfactory inquiry, especially choice springers and newly-calved cows. Other sorts made about late rates, store cattle selling well, as the pastures are excellent after the heat and late rains. At nearly all the country fairs taking place lately prices have risen for good store stock. There were 1,664 cattle and 9,258 sheep offered for sale in Thursday's market.

Pigs made a small show. Trade was dull in the opening hours, even although several cross-Channel dealers were in attendance, and business did not begin to improve until the morning was well advanced, when scarcity of supplies made matters more lively at slightly improved prices. It was only in choice light-weight pigs that this improvement could be noticed, and they sold at from 51s. to 53s. per cwt. Heavy shipping pigs did not share in this rise; but a good all-round clearance was effected.

## LONDON.

**Central Market, Friday.**—Fair supplies, and fair demand for fresh meat. Pork dearer. Quotations:—English beef, 3s 4d to 3s 7d; Scotch sides, 3s 10d to 4s 2d; ditto, shorts, 4s 2d to 4s 4d; Deptford and Liverpool killed, 3s to 3s 6d; refrigerated hindquarters, best, 3s 4d to 3s 6d; ditto, seconds, 2s 10d to 3s; ditto, fore-quarters, 1s 10d to 2s 4d; inferior beef, 2s 4d to 2s 8d; mutton, Scotch wethers, 5s 2d to 5s 6d; ditto, tegs, 5s 1s; ditto, ewes, 3s to 3s 6d; English wethers, 4s 4d to 5s; ditto, ewes, 3s to 3s 6d; foreign sheep, 4s 4d to 4s 8d; English lamb, 5s 4d to 6s 1d; veal, 3s 4d to 4s 8d; English pork, 4s to 4s 10d; Dutch ditto, 3s 8d to 4s 4d per 8 lb.

**Islington, Thursday.**—Supply of beasts consisted of fat butchering cows and bulls, and small consignments of prime quality cattle. Norfolk for latter trade was practically at a standstill, prices consequently being unquotable, whilst the former, though very slow of sale, found buyers at about last Monday's quotations. Top prices paid per 8 lb.: Fat bulls, 3s 4d to 3s 6d; exceptional fat bulls, 2s 8d to 3s. Increase of 480 in number penned in sheep market supply, including seventy Scotch, for which trade ruled fairly steady, late currencies governing most sales. English sheep, however, met limited demand, with downward tendency in value, though not sufficient to quote. Lambs were difficult to vend, even at reduction of 2d. per 8 lb. Best pens made per 8 lb. as follows:—8 stone Scotch sheep, 5s 8d to 6s.; 8 stone Downs, 5s 8d; 9 stone ditto, 5s 6d; 10 stone ditto, 5s 2d to 5s 4d; 10 stone half-breeds, 5s 2d to 5s 4d; 10 stone ewes, 3s 10d to 4s; 5 stone fat grass lambs, 6s 10d; 6 stone half-bred ditto 5s 10d. Calf trade slow but steady at late rates. Quotations per 8 lb. sinking the offal: Beasts, 2s 8d to 3s 6d; sheep, 4s 8d to 6s; calves, 3s 8d to 5s 8d; lambs, 5s 4d to 6s 10d. Total supply: Beasts, 30; sheep and lambs, 2,470; calves, 30; milch cows, 5.

## COUNTRY.

**Ashford, Tuesday.**—Slow trade for beef: Best, 4s 5d to 4s 8d; cows, 3s 8d to 4s per stone. Mutton 2d cheaper. Down wethers made 5s 6d to 6s.; small Kent, 5s to 5s 4d; and barrens, 3s 6d to 4s. Veal a little cheaper, 3s to 3s 6d. Pork unchanged at 4s.

**Birmingham, Thursday.**—Small supply of beasts, sheep, and pigs, trade slow. Beef made 5s 1d to 6½d per lb, mutton, 6d to 8½d. per lb; lamb, 9d to 9½d per lb; veal, 7d to 8½d per lb; bacon pigs, 9s 9d to 10s per score; cutting pigs, 9s 9d to 10s per score; sows, 7s per score.

**Bristol, Thursday.**—Beef was plentiful, but enquiry limited, and prices declined, best quality selling at 3½s to 3s 8d per cwt., and secondary at 5½s. About average business done in mutton and lamb, of which there was a good supply at late rates. Pigs were fairly numerous, and quotations were unaltered, trade being quiet.

## MARKET SUPPLEMENT.

V

**Berwick, Saturday.**—Consignments totalled 670, 20 less than the previous Saturday. A small attendance of buyers, and though quality generally was good, a dull trade was experienced. Calves, 5s 10s to £6 15s; heifers, £7 10s; stirks, £11 10s; Shorthorn bulls, £12.

**Chester, Thursday.**—There was a large show of cattle, with only a small attendance of buyers. The demand generally was slow, and a large amount of stock remained unsold. Quotations:—Milch cows, £16 to £21; calves, £15 to £19; barrens, £10 to £13; stirks, £6 to £9; heifers, £9 to £14.

**Canterbury, Saturday.**—There was a quantity of Irish cattle offered at to day's market, but trade was very slow. Sheep were in small supplies, and better-class made 54s; old sheep with lambs, 38s; working tines, 36s; and useful working lambs, 18s.

**Colchester, Saturday.**—Beef, 4s 2d to 4s 4d per stone; fair supply. Mutton, 5s 6d to 6s per stone; short supply, but good trade. Lamb, 6s 8d to 7s per stone; good supply and good trade. Pork, 8s 6d to 9s per score; good supply, but slow trade.

**Carlisle, Saturday.**—There was a good supply of Irish cattle on the Sands, which met a steady inquiry. Small heifers £7 10s to £10; better descriptions, up to £15 10s.

**Dublin, Thursday.**—A better tone and more animation in trade for cattle. Choice lots of finished bullocks and heifers were placed without difficulty at last week's best quotations; other sorts earlier sold at late rates. No material alteration in the price of sheep. Lambs, though in good demand, not so easily placed at last week's prices; fair clearance effected. Cattle—live weight (best), 31s to 33s and 34s per cwt; secondary and inferior lots, 26s to 30s per cwt. Mutton—dead weight, 6d to 7d per lb.—GANLY, SONS, AND CO.

**Dorchester, Saturday.**—For the time of the year moderately good supplies came to hand at Messrs. T. Ennor and Sons' repository sale, at which, however, buyers were well represented. Good useful barreners met a decidedly better inquiry after the late rain; but milch beasts sold much more quietly, though at very trifling, if any, alteration in values. The range for the more serviceable grades of barreners from £24 to £26 per pair; others, £20 to £22 10s; good reliable milch beasts met a fair sale at from £16 to £21 15s, and plainer kinds, 13s 10d to £15; bulls to £15. Fair trade in beef, only the best of which maintained its value, heifers selling from £10 10s to £19 (or 10s 6d to 11s 3d per score); fat cows, £15 to £18. Small show of mutton, best qualities of which made 7d to 8d; and seconds, 6d to 7d. Lamb steady at unchanged values.

**Doncaster, Saturday.**—Good supply of cattle for the time of the year, but trade slow, and prices unchanged. Milch beasts made £17 to £22; bullocks, £12 to £17; heifers and drapes, £11 to £15; and young stores, £7 to £9 each. Few sheep on offer, and no improvement in prices. Hogs made 4s to 4s 8s each.

**Edinburgh, Wednesday.**—Trade quieter. Bullocks made from £12 10s to £16 15s; stirks, £8 5s to £10 10s; bulls, £10 to £10 15s; best Shorthorns, £23s to £26 15s; Ayrshires, £14 to £19. Sheep sold well; half-bred hogs, 43s; grey-faced, to 41s; black-faced, to 33s 6d; half-ewes and lambs, singles, 60s.

**Exeter, Friday.**—Small supply of fat beasts; very quiet trade; late prices barely maintained. Steers and maiden heifers, 11s 6d to 11 6d; cows, 8s 6d to 10s. Also small supply of sheep; quiet demand; small wethers, 8d to 9d; large, 8d; ewes, 6d; lambs in wool, 10d; rams, 5d. No keeling sheep.

**Glasgow, Wednesday.**—Smaller show of cattle and sheep, and trade fair. Prices firm. Quotations:—Top Scotch cattle, 64s; current, 60s to 62s per cwt; top hogs, 10d; heavy weights, 9d to 9 3/4; ewes, 6d to 8d per lb. Dead meat, 5d to 5 1/2; best Scotch beef, 6d; best Steaks, 5 1/2 to 5 1/2; best Canadians, 5 1/2 to 5 1/2; widders, 8d to 8 1/2 per lb.

**Gloucester, Saturday.**—Messrs. Bruton, Knowles, and Co. report their sales as follows:—Sixty cows and calves for which there was a better demand. Short supply of store cattle with a slight improvement in trade.

**Hereford, Wednesday.**—Dragging trade for over supply of beef; best stores, 6d to 6 1/2, per lb., secondary, 4d to 5d; calves, 7d. Sheep not overstocked; wethers 8d, ewes 6d to 7d, and lambs 9d to 10d. Pigs limited; porkers, 5 1/2. Trade for store stock the same as last week.

**Lynn, Tuesday.**—Fat beasts smaller show, trade very slow, 9d to 7s per stone. Very few stores and very little trade, £6 to £12 each. Average show of fat sheep, very slow trade, 8s 6d to 9s per stone. Stores slow trade, 40s to 45s. Store lambs, 25s to 33s; fat lambs, 30s to 40s each.

**Lincoln, Friday.**—A small number of buyers attended, and the supply of store beasts was limited, but there was a fairly good trade.

**Newcastle, Tuesday.**—Cattle met a firm,

dull trade; prime heifers, 8s 3d to 8s 6d; second-class, 7s 9d to 8s; steers, 8s to 8s 3d; coarse and inferior, 6s 6d to 6s 9d; pigs, 6s to 7s 3d per stone; sheep, 5d to 9 1/2; lambs, 9d to 11d; veal, 6d to 8 1/2 per lb. Cattle, 42s; sheep and lambs, 5, 38s; calves, 13d; pigs, 36d.

**Newport, Wednesday.**—A short supply of cattle, sheep, and lambs. A large attendance of buyers, and a good trade all round. Quotations: Best English beef, 6 1/2 to 6 3/4 per lb; secondary, 6 1/4 to 9d; cows, 4 1/2 to 5 1/2; best wether mutton, 8d to 8 1/2; ewes, 6 1/2 to 7d; lamb, 9d; calves, 7d to 8d; porker pigs, 10s to 10s 6d per score.

**Norwich, Saturday.**—There was a considerable falling off in the show of fat cattle, but still the supply was much above the average of the season. Trade was not fast, but showed a slight improvement on last week. There was no quotable difference in heifers. Store cattle were in limited supply, and the demand was very poor, sales being effected with difficulty, whilst a large number remained unsold. Compared with last week, prices were in favour of buyers. There was a small show of sheep. Lambs made 25s to 35s per head, and breeding ewes 45s to 60s. Small market for sheep and dull sale, with downward tendency in values; prices averaged from 8s 9d to 9s 9d. Fat store pigs were offered in rather larger supply, and were again in brisk demand, all being sold. Fat pigs average 7s per stone.

**Nottingham, Saturday.**—Average show of milch beasts with rather better trade. Best milch cows made £17 to £21; in-calf heifers, £13 to £17. Fair share of store beasts, with trade about the same. Strong beasts made £10 to £14; younger beasts, £6 to £9; calves 25s to 45s. There were no sheep.

**Preston, Wednesday.**—There was a smaller show of stock, and only a moderate attendance of buyers. A brisk trade was done in mutton, but beef ruled slow. Quotations:—Heifers and bullocks, 6d to 6 1/2; cows and bulls, 5d to 5 1/2; hogs, 9d; lambs, 8 1/2 to 9d; fat calves, 7d to 8 1/2 per lb.

**Reading, Wednesday.**—Average supply of fat beasts, trade very slow. Best, 4s 2d to 4s 4d; middlings, 3s 10d to 4s per stone. Calves in average supply, trade slower and lower, at 4s 10d to 5s per stone. Sheep in average supply, trade about the same. Best small, 5s 6d to 5s 8d; large, 5s to 5s 2d per stone. Ewes in average supply, trade much lower at 3s 10d to 4s per stone. Lambs in good supply, trade a little better at 6s 4d to 6s 6d per stone. Nostore beasts on offer. Small supply of pigs, trade unchanged: Neat porkers, 4s 4d to 4s 6d; large pigs, 3s 8d to 4s per stone.

**Reford, Saturday.**—Few head of store stock on offer, but sufficient to meet all requirements. Prices unaltered.

**Shrewsbury, Tuesday.**—Small supplies all round. Sheep trade in store cattle, but good demand for fat sheep, calves, and pigs. Beef trade much better than last week. Quotations:—Beef, 6 1/2 to 7d per lb; mutton, 6 1/2 to 8d per lb; lamb, 8 1/2 to 9d per lb; veal, 6d to 7d per lb; porker pigs, 9s to 9s 9d per score; bacon pigs, 8s 6d to 9s 6d per score. Numbers offered as follows:—Cattle 583, sheep and lambs 1,249, calves 110, pigs 259.

**Sheffield, Tuesday.**—There was a good trade. Best milch cows, £19 to £22; secondary qualities, £14 to £15 10s.

**Thame, Tuesday.**—Again a large entry of stock, but a smaller attendance of buyers. Beef trade, especially for cows, was decidedly slower. Mutton barely retained late rates. Lambs were in good demand, and sold well. Veal maintained late rates. Messrs Bond and Burrows' sale comprised 96 fat beast, 345 fat sheep, 84 fat and weaning calves, and 120 fat and store pigs. Fat oxen made from £15 15s. to £21 10s; fat heifers, £14 to £21 10s; fat-tigs, 42s to 54s; fat ewes, 36s to 46s; fat lambs, 28s to 41s; fat calves, £3 to £5 6s; weaning cow calves, 30s to 60s; bull calves, 10s to 48s; bacon hogs, £3 to £4 15s; porkers, 28s to 36s; store pigs, 12s to 22s.

**Worksop, Wednesday.**—Smaller supply than usual, with trade good. Best beef made 6s 9d to 7s; secondary qualities, 6s 3d to 6s 6d per stone; Southdown wethers and cross-breeds, 7d to 7 1/2, and in a few instances up to 8d per lb; ewes, 5 1/2 to 6 1/2; lamb, 9d to 9 1/2; veal, 8d to 8 1/2 per lb.

**Wolverhampton, Wednesday.**—A moderate trade and supply all round. Quotations:—Beef, 5 1/2 to 7d per lb; veal, 7d to 8d per lb; mutton, 6d to 8d per lb; lamb, 7d to 8 1/2 per lb.

**Yeovil, Friday.**—Heifers and calves sold at from £10 10s to £17; cows and calves, £11 to £18 15s; barreners, 9s 5s to 11s 15s; y-rings, £7 5s to £8 15s; store bulls, £7 to £12 12s; Down ewes, 35s to 43s; Down wethers, 40s to 49s; Down lambs, 27s 6d to 32s 6d; horn ewes, 37s 6d to 45s; horn wethers, 44s to 52s 6d; horn lambs, 30s to 32s.

## FOREIGN.

**Yorkhill, Monday.**—Small supplies of Canadian cattle were on offer at the usual weekly sales held to date, only 403 head being penned in the lairages. There was a fairly large attendance of buyers, and business, following upon a quiet opening, became active towards the close, and a total clearance was effected at all the stands at prices somewhat similar to those ruling in the early part of last week, while at the same time the tone of the market was distinctly firmer. Bullocks made a really good show, and for those of well-finished description a steady demand was experienced, choice beasts making 60s per cwt. deadweight, other sorts ranging from 57s to 58s per cwt., according to quality and finish. Bulls were scarce and dear, prime choice animals selling at about 49s per cwt. deadweight, rough and heavy goods making from 1s to 2s per cwt. less.

## FEEDING STUFFS.

**Mark Lane, Monday.**—Linsed Cakes.—The improvement of last week is fairly well maintained, and although only a small inquiry exists for spot parcels, there is more inclination to enter into contracts for autumn and winter delivery even at the premium asked of 2s. 6d. to 5s. per ton. Russian are attractively offered at last week's low values. Canadian purees may be bought at £7 5s. to £7 7s. 6d. East India seed purees make 2s. 6d. per ton more money. London made are procurable for immediate removal at temptingly low figures. Cotton Cakes.—Egyptian continue in good request, and with the prospect of limited shipments in the near future, values are fully as dear, while English command extreme prices. Decorticated American brands are available at £7 10s. to £7 12s. 6d., and Meal at £7 10s., but there are now sellers of New Crop Meal at £6 17s. 6d. to £7 per ton. Rape Cakes.—Scarc. East India and Ravison unchanged. Maize Germ Meal.—A parcel of white American on the quay is quoted at about late rates, while English is more reasonably offered. Maize gluten meal moves off steadily at £5 15s to £6 per ton. Rice Meal.—Landed lots of Rangoon sell slowly at £4 13s 9d to £4 15s., while for steamer parcels to come along, £4 11s 3d to £4 12s 6d, ex ship terms, would be accepted. Locust beans remain quiet but firm at £5 15s for whole, and £4 16s per ton for Kibbled. Nitrate of soda is without change at £10 17s 6d per ton ex quay.

—PINNOC ROSES, 30, Mark Lane, E.C.

**Hull, Tuesday.**—Linsed.—In spite of light shipments the market has ruled very inactive, and prices have declined about 9d per qr on the week. Spot Plute, 39s 3d to 39s 6d; about, 39s 9d; June-July, 39s 9d; July-August, 40s. Cottonseed.—The market turned quiet again last week for old crop Egyptian, and 6s 10s accepted passage, but sellers to date ask 5s 11s 3d; June, 6s 12s 6d; July sold and still offers at 6s 13s 9d. Small sales November-January reported at 6s 12s 6d. Bombay has ruled quieter, and very little business done; spot, 25s 4s 6d; June-July, 25s 6s; and July-August, 25s 6s 9d, nearest values. Oils.—The market is quiet. Linsed Oil, 19s 9d, 19s 3d, 19s 1d; December, 19s 9d, 19s 3d, 19s 1d; Bombay, 17s 6d, 17s 3d, 17s 1d; June-August, 17s 6d, 17s 3d, 17s 1d; April, 17s 6d, 17s 3d, 17s 1d; June-August, 17s 6d, 17s 3d, 17s 1d. Rape, Brown East Indian, 23s 3d. Oilseed Cakes.—Linsed Hull made are 2s 6d per ton cheaper, with a steady market at the decline. Foreign sales are steady. Cotton.—Quiet, but very firm in all positions.—KEIGHTLEY, MAXTED AND CO.

# TO-DAY'S MARKETS.

## THE CORN TRADE.

MARK LANE, Monday, July 2

Supplies of home-grown grain still on offer are held with great firmness, and to-day were saleable for previous extreme rates. The large arrivals of foreign are very difficult to place, but the holders show a greater degree of confidence than many had expected, value can seldom be called definitely low on the week. Maize to-day was a quiet trade, with round corn again rather cheaper to buy, but prices for flat and yellow sun-tained at their previous level. Barley was 3d. cheaper for Russian, Persian, and American 400 lb. descriptions, but all 424 lb. to 448 lb. barley made fully former rates. Oats were decidedly against holders of Russian, American, and Argentine, but good prices were paid both for heavy Baltic oats and for New Zealand. The late are the heaviest and best samples on the market, but supply is extremely limited. Foreign beans and peas were dearer than ever.

### BRITISH GRAIN (Off Stands).

| July 2.                     |               | s. | s.   |

## THE FLOUR TRADE.

MARK LANE, Monday, July 2.

The tendency of London markets is still against the holder, and there are complaints of over-production within the London area. The country flour, however, which continues to arrive in far larger quantity for the time of year has a good deal, if not most, to do with the feeling over-supply of the London district. Foreign flour has declined 6d per sack for all sorts of Hungarian and French, and is also inclined to go back for American. There is too little Argentine on offer for prices to be modified. The sale of middlings, bran, and pollard is small, but rice meal at the low prices ruling has met with some request.

## CLOSE OF THE MARKET.

THE MARKET CLOSED WITH SALES VERY SLOW, BUT NO BRANCH OF TRADE COULD BE CALLED DEPRESSED.

## TERM MARKET.

Futures this morning are firmer for maize, but for wheat they are weaker. There is not much doing in either market. To-day's calls are as follows:

|             |                                  |
|-------------|----------------------------------|
| Wheat.....  | July delivery, 6s 7d per cental. |
| " Sept..... | 6s 8d                            |
| " Nov.....  | 6s 8d                            |
| Maize.....  | July, 4s 9d                      |
| " Sept..... | 4s 8d                            |
| " Nov.....  | 4s 7d                            |

A small inquiry for new Russian barley, October delivery, was reported at 17s 9d per qr. (of 400 lb.).

## THE BALTIC.

The large number of cargoes of wheat now on offer of ports off call necessarily makes the spot market for the leading cereal rather weak. Cargo sales on the four last days of June included No. 1 Northern Manitoba at 30s 3d per 480 lb., White Kurrachee at 30s 9d per 492 lb., Red Kurrachee at 29s 3d per 492 lb., Rosario at 29s 3d per 480 lb., Victorian at 31s per 480 lb., and White Walla at 31s 6d per 500 lb.

Maize cargoes inclined on Saturday to favour buyers. The prices accepted included 20s. 9d. per 480 lb. for Argentine, 21s. 9d. per 480 lb. for Novorossisk, and 21s. 6d. per 480 lb. for American. Barley cargoes have been in poor request, yet some business for futures has to be recorded, namely, two cargoes for July shipment from Odessa at 18s. and two for October shipment from Nicolaieff at 17s. 3d., all per 400 lb.

Other cargo sales include Smyrna beans at 29s. 6d. per 480 lb., white American oats at 16s. 9d. per 320 lb., and Calcutta linseed at 41s. 3d. per 440 lb.

During the last six days of June the large number of 33 cargoes arrived on sale at ports of call. Of these 25 were wheat and 5 linseed. For the first half of 1906 the arrivals have been 218 wheat cargoes, 5 maize, 21 barley, 30 linseed, and 4 mixed cargoes.

## STATE OF TRADE. 1 P.M.

Wheat cargo are in such force that it is difficult to keep prices up to Saturday's level; nevertheless values cannot be quoted lower. Maize, barley, and oats are offered for future shipment at prices about 3d. per qr. under Saturday's rates. Linseed cargoes open firmer from Saturday, but cottonseed is weak.

## BUSINESS DONE.

Wheat.—Blue Stem, 31s 9d per 500 lb. arrived; New South Wales, 30s 9d per 480 lb. arrived; Argentine, 29s per 480 lb. arrived; Red Walla, 30s 9d per 500 lb. arrived; Bessarabian, 30s 9d per 492 lb. prompt ship; Rosario, 29s per 480 lb. prompt shipment; Bahia Blanca, 29s 9d per 480 lb. prompt shipment; Red Kurrachee, 29s per 492 lb. prompt shipment.

Maize.—Argentine, 20s 3d per 480 lb. prompt shipment; American, 21s per 480 lb. prompt shipment.

## SEEDS

London, Monday. There is an increased demand for rape and mustard. Prices unchanged, but firm. The new crops, Dun and Blue Peas, so far promise well. —P. HARRIS AND CO.

## HOPS.

Borough, Monday.—There is no change to report on this market, prices remain very firm with an upward tendency. The reports from the plantations speak of a continued attack of fly and fresh lice and matters are becoming serious now that we are into July. —W. H. AND H. LE MAY.

## GRAIN AND FLOUR FACTORS REPORTS.

**Flour.**—Prices unchanged with small business passing. Grain.—American corn is more plentiful on spot, but the price is firm. Danubian maize on spot is selling freely at 4½d per boll at recent Plate values. Home and foreign oats are a slow sale. Pease very dull. Feeding beans firm on spot, and grinders are 1½d to 3d per boll dearer for shipment. Oatmeal unchanged, Oatcake firm but not much inquired for. Barley steady. Mill stuffs.—The demand continues good for common and fine thirds. Bran is still dull and unchanged in value.—MCKINNON and McDONALD (Glasgow).

**Flour.**—Quotations remain unchanged; demand languid; business more in favour of buyers than of sellers.

**Offals.**—The demand for bran has somewhat improved, and prices are now firmer.—GREENHILL Bros. (Belfast).

**Flour on the spot** has met a limited demand, the trend of prices being in buyers' favour, forward prices show no change on the week.—T. S. MEDILL and SONS, LTD.

**Arrivals of wheat and flour** are moderate; the trade is quiet, and prices are unchanged. Maize sells slowly at last week's prices. Barley is 3d per qr lower. Oats sell slowly at about last week's rates.—COVENTRY and SHEPHERD.

**Milling Offal.**—All grades of offal are steady at last Monday's prices, with a short supply.—JOHN BAWCOMB and CO.

## PROVISIONS.

**London, Monday.**—**Bacon:** The arrivals of bacon last week were from Ireland 1,793 hales, and from foreign ports 12,360 bales. There was a firm steady market for bacon, and Irish and Danish were quoted some 1s to 2s dearer. Irish, 60s to 66s up to 72s; Danish, 60s to 67s up to 72s; Canadian, 59s to 62s up to 65s. **Butter:** The butter market was firm.—French, 92s to 106s; Danish, 108s to 110s, up to 112s; Russian, 76s to 94s, up to 98s; Irish, 92s to 106s; Australian, 80s to 102s; New Zealand, 78s to 106s.—**Lard** was a steady market. Irish, 54s to 63s; American, 44s 6d to 45s 9d; Danish, 50s to 58s.

### EGGS.

**Saturday.**—**Appley:** 13 and 14. **Berwick:** 9d to 10d per doz. **Bridgnorth:** 12 and 13. **Carlisle:** 12 and 13. **Doncaster:** 12 and 13. **Grantham:** 12 and 13. **Howden:** 14 and 15. **Ipswich:** 12 to 14. **Lancaster:** 9 to 12. **Malton:** 13 and 14. **Pontefract:** 13. **Retford:** 1s 5d to 1s 6d per score. **Richmond (Yorks):** 13. **Shrewsbury:** 13 and 14. **Stokeley:** 12 and 13. **Whitby:** 12. **Worcester:** 12. **York:** 12.

### BUTTER.

**Saturday.**—**Appley:** 8d to 10d; **Berwick:** 6d to 10d. **Bridgnorth:** 1s 1d to 1s 2d. **Carlisle:** 9d to 10d. **Doncaster:** 11d to 1s. **Grantham:** 11d. **Howden:** 9d to 1d. **Ipswich:** 1s to 1s 2d. **Lancaster:** 1s. **Malton:** 9d to 11d. **Pontefract:** 11d. **Retford:** 11d to 1s. **Richmond (Yorks):** 10d to 11d. **Shrewsbury:** 1s. **Stokeley:** 9d to 10d. **Whitby:** 10d. **Worcester:** 10d to 1s 2d. **York:** 1s.

### WET AND DRIED GRAINS.

**Mark Lane, Saturday.**—The market continues without any particular change, and owing to the large increase in quantity now being dried, prices are firmly maintained at about 13s ale and 10s 3d porter. Distillers, 25s, and pressed white distillery meal, 82s 6d per ton. Dried grains are without change at ale, 92s 6d; mixed 86s 3d; distillers, 110s per ton on rail in London; ale 90s, and mixed, 82s 6d per ton on rail at Burton. Oat feed, to arrive, 67s 6d; Ramon rice meal, 96s 3d; Calcutta rice meal, 86s 3d; fine ground rice husks, 60s; rice germ, 97s 6d per ton. All the above are free on rail, London.—HAMLYN and CO.

### HOPS.

**Canterbury, Saturday.**—The fine weather improved the growth of the plant and colour of the foliage. The aphid blight is particularly severe, and washing is vigorously proceeded with. Prices range from 45s to 95s per cwt.

**Worcester, Saturday.**—Although the hops grow, washing does not appear to check the blight, and many yards, even where well washed, appear sickly, and only the young work has any vigorous appearance. Business is confined to retail sales from merchants' stocks, as growers ask more than buyers will give. Brewers are well supplied as a general rule, and it will only purchase anything special in quantity or value.—CHARLES FARM and CO.

# TO-DAY'S MARKETS.

British arrivals include as follows:—Scotland, Eastern Counties, 231; Midland, Home, and Western Counties, 374; Devon, 5; Ireland, —.

There was a decrease of 210 head in the number of beasts offered for sale to-day compared with Monday last, the majority of the supply being drawn from the Eastern Counties. The arrivals from the Midlands were larger this week, the season for grass-fed cattle being now in full swing. For both prime and second quality beasts, trade was of a slow, but steady nature, late currencies governing all transactions. Fat butchering cows and bulls met with very little demand from either town or country buyers, late values, however, governed all sales. No stores were offered for sale to-day. There is every prospect of a clearance being made to-day.

The following are top quotations per 8 lb. (sinking the offal):—

|                 | Monday,<br>July 2, 1906.<br>s. d. | Monday,<br>July 3, 1906.<br>s. d. |
|-----------------|-----------------------------------|-----------------------------------|
| Scotch .....    | 4 8                               | 4 8                               |
| Devons .....    | 4 8                               | 4 8                               |
| Herefords ..... | 4 6                               | 4 8                               |
| Norfolks .....  | 4 2                               | 4 4                               |
| Runts .....     | 4 4                               | 4 6                               |
| Lincolns .....  | 3 10                              | 4 0                               |
| Irish .....     | 4 0                               | 4 3                               |
| Canadian .....  | 3 4                               | 3 6                               |
| Fat Cows .....  | 3 4                               | 3 6                               |

There was a decrease of 910 in the number of sheep and lambs penned compared with Monday last. Trade opened and continued throughout the day of a firm and steady nature, at slightly higher rates for both wethers and ewes. Irish descriptions, on the other hand, were difficult to vend, whilst Scotch shared in the general brightening up of trade, sellers both asking and obtaining 2d per 8 lb more money. Prime quality small grass lambs met with a brisk sale and cleared early in the day. Very little inquiry was experienced for heavier descriptions. The supply included 200 Scotch, 400 Irish, and 1,670 from the Eastern Counties. A clearance will be made.

Undermentioned quotations are at per 8 lb. (sinking the offal) and are for the best of each class penned:—

**London (Central), Monday.**—Good supply. Slow demand. Beef: Scotch, 3s 10d to 4s 6d. English, 3s 6d to 4s 6d; American, 3s to 3s 5d. Mutton: Scotch wethers, 5s 2d to 5s 6d; ewes, 3s 4d to 3s 6d; English wethers, 4s 4d to 5s 6d; ewes, 3s to 3s 4d. Lamb: English, 5s 8d to 6s 8d; veal, 3s to 4s 4d; pork, 4s to 4s 6d per 8 lb.

**St. Ives (Hunts.), Monday.**—Beasts, 302; sheep and lambs, 1,981; pigs, 282. Fat cattle met a fair demand, stores a fair trade, fat and store sheep fair demand, and fat pigs a better trade; milk cows were on short supply and met a middling trade. Prices:—Beef, 7s to 7s 9d; mutton, 8s 2d to 10s 6d; lamb, 10d; pig, 6s 6d to 7s 6d; milk cows, £14 to £22.

## FOREIGN.

**Dartford, Monday.**—Beasts, 1,428. To-day's supply compared with Monday last showed an increase of 681 head, and consisted entirely of shipments from the United States as far as beasts are concerned. Trade was of a firm and steady nature at late values. Besides the above about 300 more were withheld for Wednesday. The best on offer were quoted at from 3s 9d to 3s 11d; see and, 3s 7d to 3s 8d; per 8 lb (off d given in). 149 Canadian sheep were consigned, but there was not sufficient trade to quote prices when our report left. On Saturday, 1,533 from the United States and 451 from Canada were offered for sale, and with a firm and steady trade were quoted at from 3s 9s to 3s 11d. for the former and from 3s 7d to 3s 9d per 8 lb for the latter.

**Liverpool, Monday.**—The supply of cattle was about same as last week. Demand slow and late rates barely maintained. Sheep and lambs in greatly increased numbers, demand in consequence very slow, and prices for both in buyers' favour. Beef, 6½d to 4½d; mutton, 5½d to 6½d; lamb, 9½d to 9d per lb. Atmarket: 904 cattle and 9,877 sheep and 1 lamb.

## FEEDING STUFFS.

**London, Monday.**—**Linseed Cake:** There is no fresh feature to report in the trade, which keeps dull. The only inquiry that exists is for the cheaper brands of Russians in bags. **Cotton Cake:** Demand is much better, and values have increased 1s 3d. per ton for Egyptian made. **Linseed:** Market steady, with a quick trade in No. Daluth.

## FRUIT AND VEGETABLES.

**Covent Garden, Saturday.**—Large and varied supplies of fruit and vegetables and trade fairly brisk. Quotations for English produce:—**Grapes,** 1s to 3s 6d; melons, 1s to 2s 6d each; peaches, 2s to 12s; green figs, 1s 6d to 5s; nectarines, 2s to 12s per dozen; strawberries (Southampton), 1s 3d to 2s 6d per basket; ditto (Kent) 2s 6d to 4s per peck; ditto (Cornish), 2s 6d to 3s 6d per dozen punnets; apricots, 9d to 1s per box; ditto, 2s to 2s 3d per case; red currants, 6s 9d to 8s; black ditto, 3s 6d to 7s per half-sieve; gooseberries, 2s to 3s per half-sieve; tomatoes, 3s 6d to 6s; asparagus, 6d to 2s per bundle; green peas, 2s to 3s per bushel; ditto, 4s to 5s 6d per bag; broad beans, 1s 6d to 2s; beetroot, 1s 6d to 2s; spinach, 2s to 3s per bushel; horse-radish, 4s to 13s per dozen bundles; cabbages, 3s to 4s 6d; coslettines, 1s 6d to 2s per tally; onions, 5s to 6s per cwt; mushrooms, 6s to 10s per 12 lb; green beans, 6d to 8d per lb; cauliflowers, 4s to 5s per tally; mint, 1s to 2s; leeks, 1s 6d to 2s; carrots, 2s to 3s 6d; turnips, 2s 6d to 4s; parsley, 1s 6d to 1s 9d per dozen bunches; cucumbers, 7s to 7s per flat; radishes, 4d to 6d per dozen bunches; endives, 1s 3d to 1s 6d; vegetable marrows, 2s to 3s per dozen; potatoes (old), 30s to 35s per ton—(new), 1s 6d to 8s per cwt.

## CHEESE.

**Highbridge, Tuesday.**—There were 24 tons of cheese pitched, and with a large attendance of buyers all was cleared. Best Dutch consisted up to 4s per cwt., secondary Dutch, 3s to 4s 6d, and other Dutch, 2s to 4s. A few other cheeses failed to reach 4d. Cheddars made 10s to 10s 6d; truckles, 5s to 5s 6d; doublets, 3s 6d to 4s.

**POTATOES.**

**Borough**, Saturday.—There was a fair inquiry for the good deliveries this morning. New, Cherbourg, 5s; Jersey, 6s 6d; St. Malo, 6s per cwt.

**Bristol**, Friday.—Old clover hay, 8s to 90s; old meadow hay, 7s to 80s; wheat straw, 50s to 55s per ton.

**Carlisle**, Saturday.—Average supplies of potatoes at the public retail markets, and a steady sale at 5d to 6d per stone for old potatoes, and 4d per quarter for new.

**Doncaster**, Saturday.—Large supply of new Jerseys and St. Malo potatoes, and a good trade at 6s 6d to 7s per cwt, or 1d per lb. No demand for old potatoes.

**Goole**, Wednesday.—There was very little doing in the potato market. In the retail market 5d to 8d was reached for old potatoes. New potatoes made 1s 4d per stone.

**Manchester**, Saturday.—Yorkshire warps,

8s to 9s; sands, 6s to 7s; Cheshire, 5s to 6s; ditto, new, unwashed, 13s to 15s; ditto, washed, 14s to 16s per load; Jersey, 7s to 8s; Cornish, 7s 6d to 8s 6d per cwt.

**Spitalfields**, Saturday.—Arrivals were smaller, but demand proved slow. New: Cherbourg, 4s 6d to 5s 6d; St. Malo, 5s 6d to 6s per cwt. Dutch, 2s 9d per basket.

**Stockton**, Wednesday.—Jersey potatoes, 8s per cwt, old potatoes, £2 5s to £2 10s per ton.

**Workshop**, Wednesday.—Old potatoes, 5s 6d per load or 18 stones; new potatoes, 7s 6d to 8s 6d per cwt.

**York**, Saturday.—Old potatoes are plentiful, and sell at 5s to 6s per hamper of 6 stones. Lincolnshires at about 6s to 6s 6d, and a few local-grown tubers are on offer at from 6s to 7s. The condition of the new crop is reported good.

**HAY AND STRAW.**

**Birmingham**, Friday.—Small supply; trade quiet. Hay, £4 2s 6d to £4 5s per ton.

**Derb.**, Friday.—Best clover, 85s to 90s per ton; best hay, 75s to 87s 6d; secondary ditto, 65s to 70s; wheat straw, 60s to 70s; pressed, ditto, 50s to 60s; chop ditto, 51s to 65s; peat moss, 35s to 40s.

**Hereford**, Wednesday.—Very little business passing. Hay in the stack made 55s to 60s per ton, and straw, in the bulk, 35s to 40s.

**Lincoln**, Friday.—Old hay in fair demand. Best quality, £4 per ton on the ground; inferior, £3 to £3 10s; highland grown straw, £2 per ton on the ground.

**Manchester**, Friday.—Hay, 63d to 74d; clover, 63d to 73d; straw (wheat), 33d to 4d; oat 4d to 4 1/2d per stone.

**Lancaster**, Saturday.—Meadow hay, 7d; clover, 7 1/2d; wheat straw, 4 1/2d; oat straw, 4d per stone.

**Newcastle**, Tuesday.—There were 13 carts of hay and 7 carts of straw at market. Old land hay, £4 10s to £5 10s; new land hay, £5 10s to £6 10s; wheat straw, £1 3s to £1 4s 6d; oat straw, £1 12s.

**Nottingham**, Wednesday.—Average supply at market, which met with a slow sale. Quotations:—Inferior to good hay, 70s to 80s; prime ditto, 85s to 90s; inferior to good clover, 78s to 80s; prime ditto, 85s to 100s; wheat straw, 45s to 55s per ton.

**Sheffield**, Tuesday.—Moderate supplies shown. Business quiet, dealers asking fully late prices. Choice seeds, £4 15s to £5; prime old hay, £4 10s to £4 15s; seconds, £4 to £4 5s; straw, £3 10s to £3 15s per ton.

**IMPORTANT SALE**

OF

**PEDIGREE SMORTHORN CATTLE**

— AND —

**SOUTHDOWN SHEEP,**

The Property of the late Mr. JONAS WEBB,

On **FRIDAY, JULY 13, 1906.****Messrs. JOHN THORNTON & CO.**

will **SELL BY AUCTION**, at Melton Ross, about a mile and a quarter from Barnethy Junction, the late Mr. JONAS WEBB's old-established choice herd of Bates

**SHORTHORNS,**

which comprises many fine specimens of the famous Duchess, Grand Duchess, Waterloo, Oxford and Thordale Rose tribes, as well as several good animals of the Laurestina family. First-class bulls have been used, and the herd kept pure to the old Bates and prize Linton blood. Laureate 81433 by Mr. C. R. Lynn's Stroxton Prince from the champion cow Laurestina Maid, and his sons Melton Duke of Leicester 3rd 86005, Melton Grand Duke 2nd 89289, Melton Baronet 2nd 89285, and Melton Knightley 89290, are now in service, the three latter being included in the sale.

The herd has been bred with special regard to its milking properties. It contains a capital lot of good yearling heifers and calves; several of the cows have calves at foot. Prizes have been won at the Royal, the Smithfield Club, the Yorkshire, Nottinghamshire, Lincolnshire, and other County Shows, as well as at the International Show at Paris.

**SOUTHDOWN SHEEP.**

The flock of Southdown Sheep, comprising about 200 Ewes and Yearling Ewes, will also be sold; they are bred from the old flocks at Babraham and Streetly Hall runs from Mr. Adeane's celebrated prize flock have lately been used.

**SALE COMMENCES AT ONE O'CLOCK.**

Catalogues may be had of Mr. HERBERT M. WEBB, Melton Ross, Barnethy Lincoln; or JOHN THORNTON & CO., 7, Princes Street, Hanover Square, London, W., who will execute commissions.

## AUCTION SALE ANNOUNCEMENTS.

**HOWLETTS ESTATE**—Area 1,832 acres.

In the Eastern division of the County of Kent, comprising exceedingly valuable Freehold Agricultural, Sporting, and Residential Estates, in the picturesque parishes of Petham, Thanington, Milton, Chart-ham, Harbledown and Westgate, Bekebourne, Ickham and Well, and Littlebourne, near the cathedral city of Canterbury, divided into eight capital Farms, with superior Residences and premises and some of the finest hop land in the county, and including the Mansion known as "Howletts," seated in a beautifully-timbered park, occupying a charming situation close to Bekebourne Station and within 3½ miles from Canterbury and 10 from the famous golf links at Sandwich.

**M**R. JOSEPH STOWER has been favoured with instructions to offer for SALE by AUCTION, at the Auction Mart, Tokenhouse Yard, London, on THURSDAY, July 26, 1906, the above ESTATE, in 12 lots, as follows:—

Lot 1.—Debden Court Farm, next the village of Petham, with residence, outbuildings, cottages, arable and sheep-pasture ... a. r. p. 204 1 26

Lot 2.—Newhouse Farm, Thanington, with superior residence and buildings, cottages, arable and sheep-pasture ... 230 3 0

Lot 3.—Thanington Court Farm adjoining, and close to Canterbury, with excellent family residence and farm premises, cottages, marsh, pasture, hop, and arable lands, intersected by the River Stour, and having extensive road frontages ... 240 3 5

Lot 4.—Tonford Farm, Thanington, with historical residence, outbuildings, cottages, and capital arable, hop, marsh, pasture, and woodlands, intersected by the Great Stour, which affords good trout fishing ... 222 1 4

Lot 5.—Howfield Farm adjoining, with residence, farm premises, modern cottages, and enclosures of pasture, arable, marsh, hop, orchard, and woodlands ... 350 2 34

Lot 6.—Part of Howfield Wood, with gravel pit, arable land, and garden plot adjoining at Chart-ham Hatch ... 45 1 7

Lot 7.—Part of Cobham Court Farm, Bekebourne, including a superior family residence, with capital farm premises, arable and pasture lands and plantations ... 124 3 6

Lot 8.—The Mansion of "Howletts," with lovely pleasure grounds, stabling, kitchen gardens, and park, including part of Howletts Home Farm, with residence and extensive outbuildings, cottages, and the remainder of Cobham Court Farm, adjoining, together with thriving plantations, and woods, affording ample facilities for game rearing ... 329 1 24

Lot 9.—Enclosures of Arable and Woodlands, with extensive building frontage and four capital cottages with gardens, an enclosure of Building or Accommodation Land, with good road frontage ... 82 1 1

Lot 10.—An enclosure of Plantation, about 600ft of road frontage, close to Bekebourne Station ... 1 0 35

Lot 11.—A group of five cottages and gardens at Bekebourne Hill ... 0 2 28

Lot 12.—Bekebourne School with house and premises. Leased for 80 years at a ground-rent ... 0 0 36

Total Acres ... 1,832 3 6

*Continued from previous column.—*

A considerable area of the land, a large portion of which contains some valuable minerals (including brick earth and, it is believed, coal deposit), is situate within the city boundary of Canterbury, with valuable frontages capable of building development either immediately or in the near future.

The several properties may be viewed by permission of the tenants, and particulars, with plans and conditions of sale, can be obtained, when ready, of:—

Messrs. TROWER, STILL, and Co., Solicitors, 5, New Square, Lincoln's Inn, London, W.C.

Messrs. VIGERS & Co., Surveyors and Land Agents, 4, Frederick's Place, Old Jewry, London, E.C.; and of the Auctioneer, Mr. JOSEPH STOWER, 43, Chancery Lane, London, W.C.

**REGISTERED KENT OR ROMNEY MARSH RAMS.**

**N**OTICE is hereby given that the Annual SHOW and SALE of Registered Rams consisting of the first selections from most of the leading flocks will take place on FRIDAY, SEPTEMBER 28th, 1906, in the Cattle Market, Ashford, Kent, after 12 o'clock luncheon. Prizes are offered for the best yearling Ram, the best Stud Ram, and the "Best Woollean Ram."

Catalogues and full particulars in due course from W. W. CHAPMAN, 4, Mowbray House, Norfolk Street, Strand, London, W.C.

*At low reserves to dispose of an outlying Estate.*

**ISLE OF SHEPPEY, KENT.**  
In the Parishes of Minster, Eastchurch, and Leysdown, close to Eastchurch Station, and intersected by the light and railway from Leysdown to Queenborough, whence London is reached in about one and a half hours.

**FREEHOLD PROPERTIES**, covering an area of 252½ a. 3r. 2p., comprising the very interesting and historical house known as "Shurland" (the site of the 13th Century Castle), eight farm houses, 31 cottages, agricultural buildings, and various enclosures of productive arable and excellent grazing land; also the Eastchurch Cattle Market and building land in the village.

The arable, besides being good corn land, is well suited for the growth of turnip and mangold seed, canary, &c., and the pasture for sheep grazing or dairying purposes, for which the light railway offers considerable advantages, besides affording facilities for the sale of produce and purchase of manure and feeding stuffs.

Portions of the Estate, having charming views over the North Sea, the River Thames, Medway, and Swale, might profitably be developed for building purposes, whilst other portions afford sites for the erection of commercial premises, with the advantage of rail and water carriage.

**TO BE SOLD BY AUCTION** by Messrs. COBB, at the Mart, Tokenhouse Yard, London, E.C., on Friday, July 13, 1906, at 2 o'clock precisely, in nine convenient lots, viz.:—

- |                             |     |            |

(Continued on next column.)

## PUBLIC NOTICE.

## PROCLAMATION

BY HIS EXCELLENCY THE HONOURABLE SIR WALTER FRANCIS HELY-HUTCHINSON,

Knight Grand Cross of the Most Distinguished Order of Saint Michael and Saint George, Governor and Commander-in-Chief of His Majesty's Colony of the Cape of Good Hope, and of the Territories and Dependencies thereof, etc., etc., etc.

WHEREAS it has been shown to me to be expedient to alter and amend the Regulations, promulgated by Proclamation No. 75, bearing date the 21st day of April, 1900, providing for the examination and quarantine for the disease known as Tuberculosis of cattle introduced into this Colony from any country overseas other than the Colony of Natal:

Now, therefore, under and by virtue of the powers and authorities in me vested by the seventh section of the Act, No. 27 of 1893, intituled the "Animal Diseases Act, 1893," I do hereby proclaim, declare and make known that the Regulations contained in the subjoined Schedule shall be the Regulations for the examination and quarantine of cattle which may be introduced into this Colony from any country overseas other than the Colony of Natal, and shall have force and effect from and after the 1st July, 1906, in lieu of those promulgated by the aforesaid Proclamation No. 75 of 1900, which is hereby superseded and repealed.

## GOD SAVE THE KING!

Given under my Hand and the Public Seal of the Colony of the Cape of Good Hope, this 5th day of May, 1906.

WALTER HELY-HUTCHINSON,

Governor.

By Command of His Excellency the Governor in Council

ARTHUR J. FULLER.

No. 156, 1906.

## Schedule to the foregoing Proclamation.

1. The word "Cattle" in these Regulations shall be taken to mean and include all animals of the bovine tribe.

2. All cattle, save as hereafter excepted, shall upon arrival at any Port of this Colony from any country whatsoever overseas be liable to be subjected by a Government Veterinary Surgeon to the test, known as the tuberculin test, before being allowed to land.

It will, however, be within the discretion of the Veterinary Officer aforesaid to accept the certificate of any fully qualified Veterinary Surgeon of the country from which such animals have been brought, supported by a record of temperature reactions, to the effect that such cattle were submitted to the tuberculin test immediately before being embarked and had given no indication of the presence of tuberculosis.

3. In the absence of a satisfactory certificate as aforesaid the cattle shall be removed to a place provided by the Government or by the owner subject to the approval of the Inspecting Officer for quarantine purposes, and shall be subjected by a Government Veterinary Surgeon to the necessary testing by tuberculin to ascertain whether they are or are not affected with tuberculosis.

4. In the event of the test indicating the existence of tuberculosis, the animals shall not be removed alive from the Veterinary Station, but shall be destroyed there, and the owner shall be allowed to deal with the carcasses as he may think fit, provided, however, that the flesh shall not be used for human consumption unless the said officer shall give a certificate that it is fit for that purpose.

5. All expenses of inspection, quarantine, testing, destruction and otherwise shall be borne by the owner of such cattle.

6. The foregoing Regulations shall not apply to cattle entering by sea from the Colony of Natal, so long as similar regulations remain in force in that Colony, nor shall they apply to cattle imported solely for purposes of slaughter, provided that, before being landed, they shall be inspected by the Government Veterinary Surgeon and declared to the best of his belief to be not unfit for human consumption, and the owners or importer shall sign and deliver to such officer an undertaking to the effect that none of such animals shall be used or disposed of for any other purpose than for immediate slaughter for food.

## Mark Lane Express

## SCALE OF ADVERTISEMENT CHARGES—ORDINARY POSITION.

PER INCH, SINGLE COLUMN:

|                 |     |     |           |

## RAILWAY ANNOUNCEMENTS.

**"A.B.C." TIME TABLE.**—Those who find the use of the ordinary Railway Time Table difficult and complex, will welcome the new "A.B.C." Guide, which has been issued by the Great Northern Railway Company. In this Time Table are alphabetically arranged the train services from London to the numerous towns in the Midlands, Yorkshire, the North of England and Scotland, served by the Great Northern Railway. The book also contains the London Suburban Services, and is embellished by a good map. Copies may be obtained at any Great Northern Office, or from the Chief Passenger Agent at King's Cross. (Price 1d.)

**JULY TRAIN ALTERATIONS.**—The Great Northern Railway Company are adding considerably to their already numerous travelling facilities, both as regards train service and cheap fares, from the commencement of July. Full particulars may be obtained at any Great Northern Railway Company's Office, or from the Chief Passenger Agent at King's Cross.

London Manager, H. B. Brett, 2 and 3 Imperial Buildings, Ludgate Circus, London, E.C.

## CORN MARKETS.

## LONDON.

**Mark Lane, Wednesday.**—Wheat: English was scarce and ruled firm; the few samples shown were of good quality, and realised high prices. Foreign held steadily at late rates, but in poor demand, 33s 7½d wanted. No. 1 Northern Manitoba, landed: 32s 9d Australian, ex quay. Flour: English quiet, unchanged. American steady but with a poor demand. Iron Dukes quoted 2½s 6d, ex ship to arrive; and patents, 25s, landed. Maize: American scarce, and sound quality commands firm rates. La Plata firmly held, but quiet, 21s 6d quoted, ex quay. Barley dull and neglected, values nominal, 18s 6d American (46 lb), Winchester, ex quay. Oats very slow, and in absence of demand, values ruled nominally unchanged, 17s 3d quoted No. 2 white clipped American, ex ship. Beans and peas receive no attention, and values remain unchanged.

**Mark Lane, Friday.**—Wheat. —English steady, inactive, at late rates. Whites quoted at 31s to 34s 6d; reds at 30s 6d to 34s. Foreign sellers ask late rates, but demand very poor. South Russian, ex ship, quoted at 29s 6d to 33s, landed at 30s 6d to 33s. No. 1 Northern Manitoba at 33s 6d; No. 2 at 32s 9d; No. 3 at 32s, all ex ship to arrive. Australian, landed, at 32s 9d, ex ship at 32s. Choice white Karachi at 31s, red Karachi at 30s 6d, both ex ship to arrive. Flour dull, unchanged. Maize slow, with an easier tendency. Mixed American, landed, quoted at 22s 9d to 23s; River Plate, ex ship, at 20s 9d, landed, at 21s 6d. Barley dull, inactive. Odessa-Nicolaieff Kherson, ex ship, quoted at 18s 3d to 18s 6d, landed at 19s. Oats—Sellers maintain late rates, but to effect sales less money would have to be taken. South Russian quoted at 16s 3d to 16s 6d; Americans, 17s to 17s 6d.

## COUNTRY.

**Ashford, Tuesday.**—There was rather more trade, though English corn was very scarce. Rates, on the whole, were unchanged on the week, wheat making 32s to 34s; English feeding barley, 2½s to 28s; white oats, 21s to 24s; black oats, 20s to 23s; foreign barley, 21s to 22s; mazaagan beans, 32s to 34s; tick beans, 34s to 36s; flat maize, 26s to 27s; round maize, 25s to 26s.

**Banbury, Thursday.**—Wheat, red (new), 31s to 32s per qr; barley, 26s to 30s per qr; beans (new), 32s to 33s per qr; oats, 19s to 21s per qr; peas, 30s to 37s per qr.

**Berwick, Saturday.**—Small attendance, with practically no grain on offer. Wheat, 20s to 32s; oats, 22s to 23s per qr.

**Birmingham, Thursday.**—A very poor market, there being a small attendance, and very few buyers. There was no change in values of foreign wheats, but the tendency was in favour of purchasers. So very little English wheat on offer that it becomes difficult to quote. Both River Plate and flat maize were at last week's prices, and met with little demand. Grindg barley was 3d easier. English oats and beans were unchanged.

**Brighton, Thursday.**—Small trade at last week's prices, and small attendance. The few samples of wheat offered were too dear for buyers. Best bran, 90s per ton. Barley, 28s to 33s; grinding ditto, 22s to 24s; oats, English, 19s to 23s; peas, 30s to 31s; beans, 34s to 35s.

**Bury St. Edmunds, Wednesday.**—Wheat, although in small supply, was unchanged in value at 31s to 31s 6d per qr. Oats and beans were firm at last week's prices. Maize, round, unchanged at 23s, and flat at 24s 6d per qr delivered. Grinding barley: English scarce and firm; Russian, 21s per 400 lb, and fine dressed at 25s 6d per 48 lb. Oatcakes and bran quiet at last week's prices.

**Cambridge, Saturday.**—Thin attendance, and very little business doing. A few samples of wheat met a slow trade at unaltered prices—31s to 32s per 504 lb. The present forcing weather is bringing the crops on very fast, and harvest may be earlier than at one time expected.

**Canterbury, Saturday.**—English wheat is still making up to 34s 6d; oats firm at from 19s to 23s; English feeding barley, 25s to 27s per qr. Some heavy corn has been laid by recent rough weather, but cereal crop prospects are generally satisfactory except for oats.

**Chester, Saturday.**—The attendance of farmers was smaller than usual, and trade generally was dull, with prices for maize easing off. Full prices were asked for all classes of English grain. Wheat was very sparingly offered. Quotations: White and red wheat, 4s 7d to 4s 10l per 75 lb; grinding barley, 3s 6d to 4s per 64 lb; old beans, 6s 3d to 6s 6d, and new, 5s 6d to 5s 9d per 80 lb; old oats, 3s 3d to 3s 6d, and new, 2s 8d to 3s per 46 lb; old Indian corn, 12s 9d to 13s, and new, 12s to 13s per 24 lb; ditto River Plate, 12s to 12s 6d.

**Chichester, Wednesday.**—No corn on offer by farmers. Trade very quiet, but more doing in feeding stuffs. Grinding barley, 19s to 19s 6d; oats, English, 18s to 23s; beans, 33s to 36s; maize, 22s to 22s 6d.

**Colchester, Saturday.**—Very little grain offering, but trade quiet. Wheat slightly better. Prices of other grain unchanged.—JOSEPH WILES AND SON, LTD.

**Coveytry, Friday.**—Consequent upon the hay harvest the attendance of farmers was very meagre, and scarcely any samples of English-grown corn offering. Prices nominally unchanged. Wheat, 11s to 11s 9d per 186 lb; barley, 28s to 34s per 448 lb; oats, 24s to 26s 6d per 352 lb; beans, 12s 6d to 13s; peas, 12s to 14s per 196 lb.

**Derby, Friday.**—There was a small attendance and little business, without any change of note in any kind of grain. Wheat, white, 32s to 34s; red, 31s to 32s; beans, old, 34s to 35s; oats, old, 24s to 25s; new, 22s to 24s.

**Doncaster, Thursday.**—There was no change in prices at to-day's market. The following were the quotations:—New-wheat, 15s to 17s; secondary, 13s 6d to 14s 6d; best barley, 26s to 32s; secondary, 20s to 24s; rye, 22s to 24s; old black oats, 22s to 24s; new ditto, 19s to 23s; malting barley, 26s to 32s; beans, 16s to 18s; fine flour, 24s to 26s; extra fine, 27s to 30s.

**Doncaster, Saturday.**—Small supply of wheat, both English and foreign, and a very slow trade, scarcely any business being done. English wheat made up to 11s 9d per load. Scarcely any demand for other cereals, and last week's prices were repeated in all cases.

**Dorchester, Saturday.**—The corn market wore a very deserted appearance to-day, and very little if any business was done. Prices remained nominally unchanged from previous market.

**Dublin, Friday.**—There was moderate attendance and a quiet business. Flour in quiet demand. Irish wheat and barley practically finished. Oats dull. Oatmeal firm. Bran quiet. Pollard scarce. Wheat, 19s to 20s; barley, malting, 14s 6d to 15s; grinding, 12s 9d to 14s 6d; oats, 12s to 13s; oatmeal, extra pinhead, 12s 6d to 14s 6d; flour, 10s to 11s 6d; pollard and bran, 6s to 6s 6d each.

**Exeter, Friday.**—Trade dull. Scarcely any English wheat on offer. Foreign unchanged. Barley 6d cheaper. Maize and oats unchanged. Flour quiet. English wheat, 4s to 4s 3d; superfine flour, 25s to 27s; fine, 22s to 25s.

**Glasgow, Wednesday.**—There was about the usual attendance. Wheat and flour in slow demand at unchanged prices. Maize and corn dropped another 6d per boll since last Wednesday owing to large arrivals. Barley—a dull trade at low rates. Oats—Scotch quiet but firm; foreign 3d per boll cheaper on the week. Beans firm for Scotch, but unchanged for foreign. Pease in better demand at firmer prices. Beans firm but unchanged, with thirds 2s 6d per ton dearer owing to scarcity. Oatmeal quiet, but 6d per sack dearer.—GIBSON AND CLARK.

**Glasgow, Friday.**—Wheat quiet and unchanged. Flour had a slow sale. There has been a little doing in Kansas patent and new winter crop patents; prices steady for town patents at 24s to 24s 6d per 280 lb. Round maize quiet at 24s to 26s per 280 lb. Mixed American corn, 13s to 13s 1½d. Grinding beans on spot favour buyers, but forward positions favour sellers. Other articles unchanged.

**Gloucester, Saturday.**—No English wheat offering, foreign occasionally 3d lower, very dull trade. Maize and barley could be bought at 3d less. Oats unaltered.

**Grantham, Saturday.**—A nominal market, with practically no corn on offer, and prices about the same as last week.

**Hereford, Wednesday.**—The market was very small indeed, there being practically no business done in any kind of English grain. Prices unchanged. Quotations:—Wheat, 3s 9d to 3s 10d per 62 lb; barley, 3s to 4s per 56 lb; oats, 2s 6d to 3s 3d per 40 lb; beans, 4s to 4s 3d per 62 lb; maize, 3s to 3s 3d per 60 lb.

**Ipswich, Tuesday.**—Wheat: Supply very small, but this affected the trade but little, as English wheat is now being used only to a small extent, other sorts being relatively cheaper. Reds sold at 32s per 504 lb, delivered at Ipswich. Oats: Useful parcels rather scarce, and firm, at 22s to 23s per qr. Beans firm at 33s to 34s per qr. Grinding barley: Russian, 18s 6d to 20s per 400 lb; fine dressed, 24s 6d per 448 lb. Maize: Round, unchanged at 22s; flat, steady at 23s 6d per qr. Oatcakes and bran quiet at last week's prices. Middlings very firm at full prices.

**Leeds, Tuesday.**—There is no important change in the trade since last week. Cargoes off the coast have been fairly cleared, and prices for shipment rule above present spot values; thus with conflicting crop reports holders of wheat remain very ready, and buyers have to concede fully late rates. The demand, however, continues far from active. Indians are fully 3d per qr

lower. Maize 3d easier, beans and oats slow.—DUNNS AND CO.

**Leeds, Friday.**—English wheat was in small supply without any change from Tuesday's prices; good supplies of foreign which favoured buyers. Samples of new foreign barley were deficient in quality, and prices irregular. American maize firmly held. Beans, peas, and oats fully maintained late rates. Second and third qualities of flour were the feature of the market.

**Leicester, Saturday.**—Restricted supplies of home-grown wheats, and with a moderate attendance trade ruled slow, buyers being indifferent to operating. Red wheats, 31s to 32s 6d; white wheats, 32s to 33s 6d per 36 stones; grinding barley slow at unaltered prices; beans steady; gne oats, 23s to 25s per 36 stones.

**Lincoln, Friday.**—Moderate attendance and languid tone prevailing. Scarcely any English wheat on offer, and prices unaltered. Foreign in quiet demand at last week's rates. Feeding stuffs firm and unchanged in prices.

**Liverpool, Friday.**—At the market there has been a fair attendance, and wheat meets more inquiry with a moderate trade, but Manitobas are ½d to 1d lower; other grades unchanged from last Tuesday. Flour.—A quiet trade for both foreign and home-made brands, without quotable change in values. Maize.—Mixed is ½d to ¾d lower, but meets a better demand at the decline. Plate is in fair demand, and ½d lower owing to fresh arrivals. Barley.—Malting quiet, unchanged. Feeding meets a moderate inquiry, but prices are about ½d lower. Beans is a slow article, at occasionally the turn lower prices. Peas sell slowly, and are quoted fully ½d per cental lower. Oats in quiet demand at last market day's prices. Oatmeal steady at late rates, but very inactive. Oatcake.—Not much doing; too much grass about. No change quoted in values. Indian meal is a poor sale at late rates.—SEGAR AND TUNNICLIFFE.

**Maidstone, Thursday.**—The wheat trade was firm to-day at the market as the stock of English is in a small compass, and holders secured fully last week's rates, an occasional very slight advance for a "picked" sample. Not any change of importance in the stock of other grain. Charming weather this week.

**Manchester, Thursday.**—In wheat [the price of English was nominal, but foreign did not show any quotable change. Flour very slow, and occasionally 6d per sack lower. In Indian corn, mixed American showed little change, but Plate was about ½d lower. English barley was dearer and in demand. Beans and peas unchanged.

**Newark, Wednesday.**—Thinly attended market; trade very dull. Quotations: Wheat, white and red, 30s to 31s; grinding barley, 21s 6d to 23s; oats, white, 21s to 22s 6d; black, 20s 6d to 21s 6d; new beans, 33s 6d to 35s per qr.

**Newcastle-on-Tyne, Saturday.**—The wheat trade ruled quiet at our to-day's market, and to do business merchants would have accepted 3d to 6d per qr under last week's quotations to bring about business. A slow demand for maize at 6d per qr under last week's prices. Oats remain steady; demand, however, is not active. Beans firm at late rates. Peas in buyers' favour. Feeding barley steady.—J. POLLARD AND CO.

**Newport, Wednesday.**—There was little business done. Maize very firm. Other kinds of corn unchanged. Flour, fines, 24s per sack.

**Northampton, Saturday.**—Small attendance, farmers being busy haying. Very little corn on offer. Wheat, 31s to 32s; malting barley, 20s to 32s; new white oats, 21s to 22s 6d; new black oats, 19s to 20s; beans, 31s to 32s; peas, 29s to 30s; flour, 24s 6d to 28s 6d.

**Norwich, Saturday.**—There is no alteration in the wheat trade at our market to-day, and very little business doing as farmers are busy hay harvesting. Fine and hot weather now prevails. Wheat, red, 32s to 32s 6d per qr, weight 63 lb per bushel imperial. Corn inspector's return for the week ending June 30, 1906:—Wheat 525 qr, 29s 10½d.—J. A. MILLS.

**Nottingham, Saturday.**—No English wheat offering, the little passing in foreign at late rates. Grinding barley steady. Oats and beans in small supply, and full rates supported.—R. HEBBLE.

**Peterborough, Saturday.**—We have had favourable weather on the whole during the past week for the growing crops. Scarcely anything doing on our Corn Exchange to-day, and prices remain nominally unaltered.—THOMAS HILL AND SON.

**Preston, Saturday.**—Moderate trade has been done in wheat, and sellers had to make slight concessions to do business. To-day's market was thinly attended. Quotations:—Wheat, white, per winde of 240 lb, 13s 9d to 14s 3d; ditto red, 13s 6d to 14s; oats, old, per bushel, 3s 3d to 3s 4d; beans, per winde of 220 lb, 26s 6d to 17s.

**Reading, Saturday.**—The attendance was on the small side, and business was slow. Wheat ruled 32s to 32s 6d, but there was practically no trade for grinding barley. Oats, which were

## MARKET SUPPLEMENT.

iii

again scarce, sold at 21s to 23s 6d; beans and peas at current rates.

**Retford, Saturday.**—Very small supply of English wheat, but there was no improvement in trade, and prices generally remained unchanged at 29s 6d to 30s qr. Flat maize was scarce, and worth 25s 6d; Plate maize, of which the new crop was said to be just in the market, was selling at 24s per 34 stones. Shortage of English beans, which were worth 34s 6d per 38 stones. Limited supply of English white oats, which were quoted at 23s to 24s; black ditto, 22s to 23s; foreign oats were a fair show, and also made 22s to 23s per 24 stones.

**Ripon, Thursday.**—A better attendance, and business was brisker. Flat maize firm, and 6d per qr. dearer. Prices:—Wheat, 29s 6d to 30s; ditto, foreign, 32s to 35s 6d; grinding barley, 23s 6d to 24s 6d; malting ditto, 27s to 28s; oats, 21s to 22s 6d; round maize, 23s to 24s; flat ditto, 25s to 25s per qr.

**Sheffield, Tuesday.**—With simultaneous arrivals of different shipments of Plate maize, shippers are easier, and a dragging market was experienced at 3d to 6d per qr under last week's rates. There was a slow trade in English oats, beans, and wheats at late prices, but foreign oats were slightly lower. Millers' offers quiet and unchanged. Quotations:—Wheat, white, 32s to 33s; ditto, red, 31s 6d to 32s 6d per 504 lb; oats, black, 20s to 21s; ditto, white, 22s 6d to 23s per 336 lb; peas, grinding, 32s to 32s 6d; ditto, blue, 55s to 70s per 504 lb; beans, English, 30s 6d to 36s 9d per 332 lb; barley, grinding, 24s to 24s 6d; ditto malting, 28s to 32s per 44s lb; Indian corn, small, 24s to 24s 6d; ditto Plate, new, 22s 3d to 22s 9d; ditto flat, 24s 6d to 25s per 480 lb.

**Shrewsbury, Saturday.**—Wheat, 13s 3d to 13s 9d per 225 lb; new oats, 14s to 15s per 225 lb; peas, 13s to 14s per 240 lb; beans, 14s 6d to 15s 6d per 240 lb.

**Stamford, Friday.**—There was a good attendance of farmers and dealers. Wheat, 31s to 31s 6d; oats, 20s to 21s 6d; beans, 31s 6d to 32s 6d. Maize and other feeding stuffs firm and unchanged.

**Stockton, Wednesday.**—There was not much wheat showing, which sold at 30s to 30s 6d per qr. The foreign wheat trade keeps very slow at prices 3d to 6d lower on the week. Oats quiet. Maize 3d down.

**Sunderland, Saturday.**—Little business passing at this day's market. Wheat steady and unchanged. Barley and oats quiet. Arrivals nil.—E. AND F. RICHARDSON.

**Tunbridge Wells, Friday.**—White wheat, 34s 2s 3s; red ditto, 33s to 34s; barley, 28s to 34s; grinding ditto, 23s to 25s; oats, English, 18s 6d to 23s; rye, 24s to 25s; peas, 32s to 37s; beans, 32s to 36s; tares, 42s to 50s; maize, 22s to 23s.

**Warwick, Saturday.**—Scarcely a sample of English grain on offer, and very small attendance owing to haymaking. Prices not quotable, but feeding stuffs inclined to easier.

**Wisbech, Saturday.**—Small attendance at market. No samples of English offering. Values unchanged. Weather favourable for crops.—JAMES FLETCHER.

**Wolverhampton, Wednesday.**—A very quiet market; very little business being transacted owing to the absence of farmers. Quotations: New wheat, 14s per 216 lb; flat corn, 27s; English beans, old, 15s 6d, new, 15s; oats, old, 18s, new, 15s.

**Workop, Wednesday.**—Slow market, with practically no local grain showing. Wheat, white, 30s to 30s 6d; ditto red, 29s to 30s; barley, malting, 28s; ditto grinding, 25s; oats, white, 22s to 24s; ditto black, 20s to 21s; flat maize, 25s; ditto round, 24s per qr.

**Yeovil, Friday.**—English wheat in small supply. Foreign a fair sale. Home-grown barley sold at 6d advance; foreign down 6d. Other grain without quotable change. Best quality home-grown wheat, 31s to 32s per qr; secondary, 28s 6d to 30s 6d; foreign wheat, 32s to 34s; English barley, 28s 9d to 33s; secondary, 22s 6d to 27s; grinding barley, foreign, 18s 6d; English white oats, 21s 9d to 22s; black, 21s 6d to 22; Irish white oats, 21s 6d; flat, 18s 9d; flat, round, 22s to 23s; round, 21s to 21s 3d; rye, 22s 6d to 25s; winter tares, 52s 6d to 57s 6d; spring tares, 57s 6d to 65s; winter beans, 35s to 36s; spring, 35s 6d to 37s 6d.

**York, Saturday.**—Wheat is nearly exhausted in this district, and very few samples are on sale; prices are unaltered. Fine white, 30s to 31s; red and mixed 29s 6d to 30s 6d per qr of 36 stones; feeding barley, 24s to 25s per qr of 32 stones. Oats dull, the high prices asked for Yorkshire corn preventing business. White Tartary, 19s to 20s; black, 20s to 21s; short, 21s to 22s per qr of 24 stones; rye, 24s; beans, 33s per qr of 36 stones.

## FOREIGN.

**Hamburg Saturday.**—Weather forcing hot, with occasional showers. Crop prospects are still

satisfactory. We had a firm market for all descriptions of grain without much business doing. German wheat, stocks of which are much reduced, is firmly held at 30s 6d to 31s 6d per 504 lb, f.o.b.; 19 Ko River Plate, Barletta Russo, afloat is offering at 28s 9d; No. 1 Macaroni, promptly from America, at 28s; 79/80 Ko new Danubian, July-August, 29s per 480 lb, c.i.f. Hamburg. Rye in fair demand at the reduced rates; 9 11/15; South Russian near at hand is selling at 22s 9d; 9 15/10, July, old style, offering at 22s 3d per 480 lb, c.i.f. Hamburg. Reports from the Saale district and Bohemia say that the crops of barley are making satisfactory progress, a large quantity is in view, but quality still depends upon the weather till harvest. Owing to the critical state of affairs in Russia feeding barley met some attention at 60/61 Ko South Russian near at hand, and July-August was sold at 17s 3d to 17s 6d per 400 lb, c.i.f. Hamburg. River Plate maize, on account of its fine condition, is in favour and selling at 21s 3d to 21s 6d; mixed American on the spot is held at 21s; July-August at 20s 6d to 20s 9d per 480 lb c.i.f. Hamburg.—JOHN TATLOCK.

## CORN STATISTICS

## Imports of Foreign and Colonial Corn

| Statement of the quantities of Foreign and Colonial Corn Imported into the United Kingdom in the week ended Saturday, July 7, 1906:— |                |
|--------------------------------------------------------------------------------------------------------------------------------------|----------------|
| Wheat .....                                                                                                                          | 3,062,200 cwt. |
| Wheat-flour .....                                                                                                                    | 284,900 "      |
| Barley .....                                                                                                                         | 263,400 "      |
| Oats .....                                                                                                                           | 467,190 "      |
| Maize .....                                                                                                                          | 1,349,000 "    |

# TO-DAY'S MARKETS.

## THE CORN TRADE.

MARK LANE, MONDAY, JULY 9.

The extreme scarcity of British produce caused all samples of home-grown grain to-day to command full prices without difficulty, though the market otherwise was rather against the holder. Foreign wheat was 6d lower for Manitoba, and the turn in the same direction for all other descriptions. Singularly little business done, millers apparently being rather overstocked with imported wheat. Maize was firm for flat corn, but 3d cheaper for round and yellow. Sales were fairly good considering the season. Foreign barley was neglected and Russian sorts were 3d. down. The demand for imported oats was at a rather low ebb, and with large offering prices were reduced 3d. per qr. Beans were scarce and fully as dear as on the 2nd inst. Peas were the turn in buyers' favour.

### CLOSE OF THE MARKET.

THE MARKET CLOSED VERY DULL INDEED, THE SULTRY WEATHER BEING UTTERLY AGAINST DEMAND.

## THE FLOUR TRADE.

MARK LANE, MONDAY, JULY 9.

There was to-day a disposition to take rather less money for country makes, and American descriptions were pressed on sale at the lowest prices of the 2nd inst. London trades were not cheaper, but the sales proved disappointing. Hungarian flour, despite the June decline of 1s., was decidedly inclined to go down, and the same may be said both of French and of Australian descriptions. Argentine flour was 1s. lower on the week, and at this decline met with more demand. Curiously little of it is forthcoming this season, and the quality is good. Manitoba flour at 24s for first rate samples was naturally the subject of some attention. Owing to the small production of millers' offals in July the market for them is a trifle firmer on the week.

### London Flour.

### HOPS.

Borough, Monday.—We cannot report any improvement in the growing crop. The blight still continues, and only those gardens that are persistently washed are at all holding their own. The market is exceedingly firm, and stocks of all descriptions are in a very small compass. The imports of hops for the month of June 1906, were 10,271 cwt. For the corresponding month last year, 1,531 cwt. The imports of hops from Jan'y 1 to June 30, 1906, were 98,796 cwt. For the corresponding period last year, 32,286 cwt. The exports of hops for the month of June, 1906, were 1,186 cwt. For the corresponding month last year, 1,819 cwt. The exports of hops from England from January 1 to June 30, 1906, were 6,934 cwt. For the corresponding period last year, 10,607 cwt.—W. H. AND H. L. MAY.

## THE BALTIC.

The cargo sales of the first seven days of July were not numerous, but the great trade centred at the club in St. Marys is never wholly stagnant. Of wheat cargoes sales have included Rosario at 29s. 6d. per 480 lb., Bahia Blanca at 29s. 9d. per 480 lb., Australian at 31s. 3d. per 480 lb., No. 3 Manitoba at 29s. 6d. per 480 lb., and Red Kurachee at 29s. 3d. per 492 lb. Values seem pretty level for the more ordinary kinds of wheat.

The maize trade has been slack, and cargoes on Saturday were 3d. lower from the commencement of the week. Sales included Turkish at 21s. 9d. per 480 lb., Novorossisk at 21s. 9d. per 480 lb., La Plata at a guinea per 480 lb., and American at 22s. per 480 lb.

Other cargo sales of the week have included Smyrna beans at 31s. per 480 lb., Kustendje barley at 19s. per 400 lb., and Roumanian oats at 14s. 9d. per 304 lb. Cargo arrivals off ports of call last week included 1 wheat ship from Argentina and 2 from Australia. Of course these arrivals do not include the directly-consigned grain, but only the cargoes on sale.

### STATE OF TRADE.

Cottonseed and linseed cargoes are held more firmly from Saturday, not so those of cereals. The cargo market is weak for futures, and in the case of barley, oats, and maize for near dates also. Wheat near at hand is steady.

### BUSINESS DONE.

Wheat.—Rosario, 29s 9d per 480 lb, on passage; White Kurachee, 29s 9d per 492 lb, August shipment; Blue Stem, 32s 6d per 509 lb, on passage; Walla Walla, 31s per 500 lb arrived; Red Walla, 30s 3d per 500 lb, arrived.

Maize.—Argentine, 20s 9d per 480 lb, July shipment; Argentine, 20s 6d per 480 lb, August shipment; American, 22s 3d, arrived.

Barley.—Russian, 18s 3d per 400 lb, arrived; Russian, 18s per 400 lb, on passage; Russian, 17s 3d per 400 lb, October shipment; Persian, 16s 3d per 400 lb, September shipment.

Oats.—Petersburg, 15s 3d per 304 lb, arrived; Roumanian, 14s 6d per 304 lb, October shipment; American, 16s 6d per 320 lb, prompt shipment; Volodga, 15s 9d per 304 lb, prompt shipment.

Beans.—Smyrna, 30s per 480 lb, September shipment.

Peas.—Indian White, 32s 3d per 504 lb, August shipment; Canadian, 6s 9d per 100 lb, prompt shipment.

Linseed.—Calcutta, 41s 3d per 410 lb, on passage; Argentine, 39s 9d per 410 lb, on passage; Duluth, 40s per 424 lb, on passage.

Rapeseed.—Ferozepore, 44s 6d per 416 lb, prompt shipment.

Poppyseed.—India, 43s 6d per 377 lb, prompt shipment.

Cottonseed.—Egyptian, £6 10s per 2,240 lb, arrived.

## GRAIN AND FLOUR FACTORS REPORTS.

Flour.—The market for flour is dull. Some business is passing in new crop American winter wheat flour. Grain.—American corn is 3d per boll lower owing to arrivals. Plate maize plentiful at 4 1/2d per boll less than recent prices. Oats very dull, especially for foreign, which are much pressed for sale. Grinding beans are again 1 1/2d 3d dearer for shipment. Oatmeal quiet. Oilcake unchanged. Barley steady. Millstuffs.—Millers are behind with orders for thirds. Bran, however, is a slow sale.—McKINNON AND McDONALD (Glasgow).

Wheat.—Trade continues slow, and buyers are still indisposed to purchase, except for immediate requirements; no further change to report in prices.

Flour quiet trade on spot at about last week's prices. Forward offers are more reasonable and are beginning to attract buyers.—T. S. MADILL AND SONS, LTD.

Milling Offal.—The continued warm and dry weather is making offal very firm.—JOHN BAWCOMB AND CO.

## TERM MARKET.

The market in futures lost strength on Saturday, and to-day is decidedly weak both for wheat and maize. A little is doing in futures for oats, and holders are less depressed from Saturday.—

|            |                                  |
|------------|----------------------------------|
| Wheat..... | July delivery, 6s 8d per cental. |
| ".....     | Sept. " 6s 7d "                  |
| ".....     | Nov. " 6s 8d "                   |
| Maize..... | July " 4s 8d "                   |
| ".....     | Sept. " 4s 7d "                  |
| ".....     | Nov. " 4s 7d "                   |

The price of barley for October delivery is 17s 6d per 400 lb, South Russian.

## SEEDS

London, Monday.—Various new seeds are now due on the market, but there is practically no movement beyond the usual demand for mustard and rape. Prices unchanged but firm.—JOHN PICARD AND CO.

## MARKET SUPPLEMENT.

V

## PROVISIONS.

**London, Monday.**—Bacon: The arrivals of bacon last week were from Ireland 2,344 bales, and from foreign ports 12,435 bales. There was a firm market for bacon all round last week, and Irish and Danish were quoted some 1s to 3s dearer, prices ranging: Irish, 60s to 69s up to 74s; Danish, 60s to 69s up to 74s; up to 74s; Canadian, 60s to 63s up to 67s. Butter: The butter market was steady.—French, 92s to 106s; Danish, 110s to 112s; Russian, 70s to 98s; Dutch, 102s to 104s; Irish, 92s to 105s; Canadian, 102s to 106s; Australian, 80s to 102s; New Zealand, 70s to 107s. Lard: Lard was a steady market. Irish, 54s to 62s; American, 44s 3d to 46s 6d; Danish, 50s to 58s.

## EGGS.

**Friday.**—Altrincham: 10. Ashburton: 9d to 10d per doz. Barnstaple: 14. Chester: 11 and 12. Crews: 11d. Dartmouth: 10d to 1s per doz. Derby: 12 and 13. Helmsley: 14. Knutsford: 10 and 11. Leyburn: 14. Lincoln: 13. Lostwithiel: 16. Macclesfield: 10 and 11. Nantwich: 13 and 14. Northwich: 11. Otley: 12. Redruth: 9d per doz. Runcorn: 11 and 12. St. Austell: 14. Stamford: 12 to 14. Stockport: 10 and 11. Tavistock: 11 to 13. Totnes: 11d to 1s per doz.

**Saturday.**—Appleby: 13 and 14. Berwick: 10d to 11d per doz. Bridgnorth: 12 and 13. Carlisle: 12 and 13. Doncaster: 12. Grantham: 13 and 14. Howden: 13 to 15. Ipswich: 12 to 14. Lancaster: 9 to 12. Malton: 12 and 13. Pontefract: 12 and 13. Retford: 1s 6d to 1s 8d per score. Richmond (Yorks): 11 to 12. Shrewsbury: 12 and 13. Skipton: 12 and 13. Stokesley: 12 and 13. Whitby: 12 and 13. Worcester: 12. York: 10 to 12.

## BUTTER.

**Friday.**—Altrincham: 1s 2d to 1s 3d. Ashburton: 11d to 1s. Barnstaple: 11d to 1s. Chester: 10d to 1s. Crews: 1s 1d. Dartmouth: 11d to 1s 1d. Derby: 1s to 1s 1d. Helmsley: 14d. Knutsford: 1s 2d to 1s 3d. Leyburn: 11d to 1s. Lincoln: 11d to 1s. Lostwithiel: 10d. Macclesfield: 1s. Nantwich: 1s. Northwich: 1s 1d. Otley: 1s 2d to 1s 4d per 24 oz roll. Redruth: 9d. Runcorn: 1s 2d. St. Austell: 11d. Stamford: 11d to 1s 1d. Stockport: 1s to 1s 1d. Tavistock: 1s to 1s 2d. Totnes: 1s to 1s 1d.

**Saturday.**—Appleby: 9d to 10d; Berwick: 6d to 1s. Bridgnorth: 1s 1d to 1s 3d. Carlisle: 10d to 11d. Doncaster: 1s to 1s 1d. Grantham: 1s to 1s 1d. Howden: 9d to 11d. Ipswich: 1s to 1s 2d. Lancaster: 1s to 1s 1d. Malton: 9d to 11d. Pontefract: 11d to 1s. Retford: 1s 1d to 1s 2d. Richmond (Yorks): 10d to 11d. Shrewsbury: 1s. Skipton: 10d to 1s. Stokesley: 10d to 11d. Whitby: 9d to 10d. Worcester: 10d to 1s 2d. York: 10d to 1s.

## CHEESE.

**Glasgow, Wednesday.**—Liberal arrivals; sellers firm, which checks business. Dunlops met an improved demand at firm prices. Dunlops, 54s to 56s; Cheddars, 57s to 60s; fine grass lots fetched 1s to 2s per cwt. more. Canadians still regarded as too dear.

**Newport, Wednesday.**—About 10 tons pitched, and a good trade. Quotations: Caerphills, 40s to 46s per cwt; fancy dairies, 47s to 48s; truckles, 55s to 63s; Derbys, 63s to 64s; Cheddars, 58s to 63s.

## WOOL.

**London, Saturday.**—English—per pk. of 240 lb.—Fleeces, South Down hoggs, £14 10s to £15 10s; half-bred hoggs, £14 5s to £14 15s; half-bred wethers, £14 to £14 10s; Kent fleeces, £13 10s to £14; South Down ewes and wethers, £14 10s to £15 10s; Leicester ewes and wethers, £13 to £13 10s; Colonial—per lb.—Vic., fleece super., 2s to 2s 2d; scored, good, 2s 2d to 2s 3d; scored, average, 1s 1d to 2s 0d; N.Z., scored, average to fair, 1s 2d to 1s 4d; N.S.W., second, average, 1s 9d to 1s 10d; greasy, average, 1s to 1s 0d; S. Aus., greasy, average, 9d to 10d; N.Z., scored, average, 1s 10d to 1s 10d; greasy, average, 1d to 1s; Cape, scored, super., 1s 10d to 1s 11d; fleece, average, 10d to 10 1/2d; greasy, average, 7d to 8d; Natal, scored, 1s 5d to 1s 6d; greasy, average, 8d to 9d. Crossbreds—Grs.—Vic., good to super, 1s 3d to 1s 4d; New Zealand fine, 1s 3d to 1s 4d; medium, 1s 1d to 1s 2d; coarse, 1s to 1s 1d.

## HOPS.

**Worcester, Saturday.**—The reports to hand today do not show any improvement in the state of the hops, and with few exceptions they look worse than ever. The amount of business done is limited, but prices rather tend upwards as stocks are getting reduced, and buyers find some difficulty in meeting their requirements. A few yearlings only have been weighed this week. —CHARLES FARHAM AND CO.

## TO-DAY'S MARKETS.

## CATTLE.

## Metropolitan Market, Islington.

Milch cows, per head, £16 to £21.

British arrivals include as follows:—Scotland, —; Eastern Counties, 163; Midland, Home, and Western Counties, 407; Devon, 10; Ireland, —.

We note to-day a decrease of 30 head in the number of beasts offered for sale compared with Monday last. There were again no arrivals from either Scotland or Ireland, the majority of the supply as usual at this season of the year arriving from the Midland Counties. For both prime and second quality fat beasts trade ruled slow but steady in regard to value, all sales being governed by last week's prices. A few Runts were offered for sale, and cleared early in the day at good money, whilst Lincolns met with a dull trade, heavy weights being very unsaleable. No store cattle were placed on the market to-day. Fat butchering cows and bulls, notwithstanding there being in shorter numbers, were slow of sale; nevertheless late rates were maintained.

The following are top quotations per 8 lb. (sinking the offal):—

|                 | To-day. |    | Monday, July 10, 1906. |    |
|-----------------|---------|----|------------------------|----|
|                 | s.      | d. | s.                     | d. |

| Fat Cows .....  | 3       | 4  | 3                      | 6  |

There was an increase of 620 in the number of sheep and lambs penned compared with Monday last. Trade for both wethers and ewes was of a fairly steady nature, salesmen experiencing no difficulty in maintaining late currencies. The Irish trade, on the other hand, was a poor one, whilst Scotch were in average supply, and sold steadily, rates favouring the seller, but not sufficiently so to quote any change in the prices. With regard to lambs, these were in excess of the demand, consequently a decline of 2d per 8 lb in value had to be accepted to force sales. The supply included 250 Scotch, 460 Irish, and 1,730 from the Eastern Counties.

Undermentioned quotations are at per 8 lb. (sinking the offal) and are for the best of each class penned:—

So few calves on offer that the trade is neither worth noting or quoting. No pigs on offer.

**St. Ives (Hunts), Monday.**—Beasts, 344; sheep and lambs, 1,931; pigs, 288. Fat and store cattle and sheep met a fair demand, and fat store pigs a good trade, whilst milch cows were in short supply, and met a fair trade. Prices:—Milch cows, £14 to £22; beef, 7s 3d to 7s 9d; mutton, 8s 2d to 9s 11d; lamb, 9d to 10d; pork, 7s to 7s 3d.

## FOREIGN.

**Deptford, Monday.**—Beasts, 831. To-day's supply compared with Monday last showed a decrease of 597 head compared with Monday last, and consisted of 711 from the United States and 120 from Canada. Trade, taken as a whole, was of a firm and steady nature at late currencies.

The best States on offer were quoted at from 3s 9d to 3s 11d, ex. 4s; seconds, 3s 7d to 3s 9d; Canadians, 3s 6d to 3s 8d. Besides the above, 160 more States cattle were withheld for Wednesday. On Saturday, 2,043 beasts from the United States were offered for sale, and, with a slow but firm trade, were quoted at from 3s 9d to 3s 11d, ex. 4s per 8 lb. (offal given in). Besides the above, 500 more were withheld.

**Liverpool, Monday.**—Larger supply of cattle. Demand slow, and late rates barely maintained. Large increase of sheep and lambs; demand slow early morning but improved as day advanced. Buyers, however, were not able to trade on much easier terms than last week. Prices: Beef, 6 1/2d to 4 1/2d; mutton, 9d to 6 1/2d; lamb, 9 1/2d to 8 1/2d. At market: 651 cattle and 11,553 sheep.

## OIL SEEDS.

**Mark Lane, Monday.**—The market for oil-seeds is now quiet but holders are fairly confident.

| LINSSEED per 40 lb.  |          | COTTONSEED per ton. |            |
|----------------------|----------|---------------------|------------|

## FRUIT AND VEGETABLES.

**Covent Garden, Saturday.**—Ample supplies of fruit and vegetables at market, the demand being fairly brisk. Quotations for English produce:—Grapes, 9d to 4s 6d; apricots, 8d to 10d per box; ditto, 1s 9d to 2s per case; black currants, 5s to 6s; red ditto, 6s to 7s 6d per half-sieve; strawberries (Kent), 2s to 4s per peck; ditto (Southampton), 9d to 1s 3d per basket; raspberries 6s to 9s per dozen punnets; peaches, 2s to 15s; nectarines, 2s to 12s 6d; green figs, 1s 6d to 6s per dozen; gooseberries, 2s 6d to 3s 6d; cherries, 3s 6d to 7s 6d; tomatoes, 4s to 6s; green peas, 1s 6d to 2s 6d per bushel; ditto, 3s to 5s 6d per bag; horse-radish, 9s to 12s 6d per dozen bunches; mushrooms, 6s to 10s per 12 lb; green onions, 1s 6d to 2s per dozen bunches; vegetable marrows, 3s to 5s; endive, 1s to 1s 3d per dozen; cucumbers, 5s to 7s per flat; cos lettuce, 1s 6d to 2s; cabbage, 2s to 4s per tally; turnips, 2s to 3s; carrots, 2s 6d to 3s 6d; parsley, 1s 6d to 1s 8d; mint, 1s to 1s 6d; radishes, 4d to 6d per dozen bunches; broad beans, 1s 6d to 2s; broad peas, 1s 6d to 2s per bushel; asparagus, 6d to 2s per bundle; potatoes (old), 5s 3s to 8s per ton; ditto (St. Malo, new), 4s 9d per cwt.

## POTATOES.

**Borough, Saturday.**—Good arrivals met a fair sale. New Cherbours, 4s 6d; St. Malo, 5s to 5s 6d; Jersey, 5s to 5s 6d per cwt; Dutch, 2s per molley.

**Carlisle, Saturday.**—Average supplies of potatoes at the public retail markets, and a steady trade at 5d to 6d per stone for old potatoes, 1s 4d to 1s 6d per stone for new home grown, and 1s to 1s 2d for foreign new. —

**Goole, Wednesday.**—Small attendance, and very little business doing in old potatoes. Jersey potatoes, 6s 6d to 7s 6d; ditto, English, 8s to 9s per cwt, or 1d per lb.

**Lancaster, Saturday.**—Small supply of old potatoes, which sold, retail, at 7d per stone; new ditto, 1d to 1 1/2d per lb.

**Manchester, Saturday.**—Yorkshire warps, 8s to 9s; Cheshire, new, rounds, 8s to 9s 6d; kidneys, 9s to 10s 6d per load (15 stone); Jersey, 6s; Norfolk Hebrons, 7s per cwt.

**Preston, Saturday.**—An average business was done in potatoes at 6s 6d per load of 20 lb.

**Spitalfields, Saturday.**—Heavy arrivals this morning met a somewhat quiet demand. Old potatoes, 2s to 2s 6d per cwt. New: Jersey, 5s to 5s 6d; Cherbours, 4s 9d to 5s; English whites, 5s 6d; reds, 5s per cwt.

**York, Saturday.**—Practically no business in the wholesale market. Old potatoes, of which there was a fair supply, made 3s per tub; new Kelfield potatoes, 6s 6d per hamper; retail, 6d to 8d; Jersey, 4 1/2d per 1/2 stone.

## LIVE STOCK AND MEAT TRADE REVIEW

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

### Trade in London.

The trade for home-bred cattle at Islington, of which the supply was chiefly drawn from the Midland, Home, and Western Counties, was of a slow nature for both prime and second quality, late currencies governing all transactions. We note an entire absence of any consignments from either Scotland or Ireland this week. On Thursday, trade was, as usual, confined to fat bulls and rough cattle. Fat butchering cows and bulls were little sought after by either town or country buyers; nevertheless, sellers were not willing to accept any decline in value.

At the Foreign Cattle Market, Deptford, there was a considerably larger supply during the week; notwithstanding there being no Canadian consignments, trade was of a firm and steady nature throughout the week with a slight upward tendency in value on Saturday. The total number on offer at both markets was 4,821, as against 4,018 during the preceding week, consisting of 620 British (decrease 230) and 4,201 foreign—increased, 1,033. The following were the top rates obtained 8 per lb. (sinking the offal): 90 stone Herefords, 4s. 6d. to 4s. 8d.; 90 stone Norfolks, 4s. 2d. to 4s. 4d.; 100 stone Lincolns, 3s. 10d. to 4s.; 90 stone States, 3s. 9d. to 3s. 11d.; 90 stone fat cows, 3s. 4d. to 3s. 6d. per 8 lb. sinking the offal.

In the sheep market at Islington on Monday, trade opened and continued throughout the day of a firm and steady nature, for both wethers and ewes, rates being well upheld; Scotch descriptions also shared in the general brightening up of trade, an advance of 2d. per 8 lb. being both asked and obtained for these; Irish, on the other hand, met with little inquiry, and were difficult to vend. With regard to the lamb trade, anything small and choice found ready buyers and cleared early in the day at good values, heavier descriptions, however, met with very little inquiry.

On Thursday the sheep trade was of a slow nature, but small grass-fed lambs again sold readily; other descriptions were in excess of the demand. At Deptford 149 Canadian sheep were consigned, but were not placed on the market, consequently no quotation or trade for these can be recorded. The total number on offer at both markets was 9,979, as against 10,840 during the previous week, consisting of 9,830 British (decrease 1,010) and 149 foreign. Best pens made per 8 lb. as follows (sinking the offal): 8 stone Scotch, 5s. 10d. to 6s. 2d.; 7½ to 8 stone Downs, 5s. 8d. to 5s. 10d.; 9 stone Downs, 5s. 4d. to 5s. 6d.; 10 stone half-breds, 5s. 2d. to 5s. 4d.; 19 stone Irish, 5s. to 5s. 2d.; 10 stone Down, 4s. 10d. to 4s. 12d.; 11 stone half-bred ditto, 3s. 10d. to 4s.; 5 stone grass-fed lambs, 7s. to 7s. 2d.; 6 stone half-bred ditto, 6s. to 6s. 2d. per 8 lbs (offal given in). Calves numbered seventy head, and on Thursday met with a firm trade at an advance of 2d. per 8 lb. in value.

Saturday, July 7, 1906.

### Trade in the West.

Supplies of store stock, especially of the plainer descriptions, continue to come very plentifully to hand, and as the demand is still largely confined to what is really of a serviceable character, the markets are somewhat glutted with what may be described as the more ordinary runs, for which it is difficult to find buyers. The bettermost grades of grazing cattle—anything showing even fair condition—meet a very fair trade at, as a general rule, from £24 to £28 per pair, it being only in exceptional cases that this figure is exceeded, but that is done occasionally. The more ordinary runs of stores are very difficult of disposal, prices for this class ranging from about £20 down to as low as £14 or £15 for bullocks that cannot by any means be classed as young, consisting largely of old cows, for which no other purpose can be found but to turn out preparatory to conversion into beef, such as it may be. There is a corresponding dullness in young stock, both yearlings and stirks, which are anything but saleable, despite the fact of there being now some prospect of the keep problem being, at least, temporarily solved. Milch beasts are likewise suffering, except in the case of the very best heifers or really good cows, in a similar degree from the prevailing inactivity, and while a few milch cows of exceptional character realise, from £17 up to £22, plenty of decent animals, both heifers and cows, are selling from £15 to £16 each, whilst anything decidedly plain can be bought in any quantity at any price between £9 and £14; and but a very small proportion find buyers at all.

The great summer sheep fairs have already com-

menced, and will very soon become general. So far the trade has favoured flockmasters but very little, and though in some cases they have been able to hold their own, they have only managed this with difficulty with the very best class of sheep, the tendency of the more ordinary runs being to lower values to the extent of from 1s. to 2s. compared with last year's rates, which is not encouraging in view of the shortage of sheep in the country and the many really necessitous buyers there are, but who, however, are only prepared, it seems to us, to give a certain price, and this they seem to think should be but from about 48s. up to 54s. or so for the best class of ewes, and from 48s. to 40s. or so for seconds. On these terms they seem willing enough to do business; but when asked to go beyond this range sales at once "hang fire." Lambs, too, are selling fairly well at from about 28s. to 38s. for keeping purposes, but trade is certainly not as brisk as could be desired, especially in view of the greatly improved keep prospect that there now undoubtedly is. Store pigs are keeping up exceedingly well, no doubt the result of the satisfactory price fat pigs are now making.

Considering that a good many grass fed beasts are now coming out, the beef trade has not been very auspicious for graziers, though a few good Devons as well as Shorthorns are realising 4s. 8d. per stone, this being for the very best steers and heifers (or from £18 to £23 10s.), secondary grades, which are slower and lower in price, selling at 4s. 4d. to 4s. 6d., and the coarser qualities 4s. to 4s. 2d., with anything but a good inquiry. Calves rule steady at 4s. 10d. to 5s. 4d. per stone. Mutton is decidedly lower except for very choice and well-finished tegs, which command 6s. to 6s. 4d., and seconds 5s. 6d. to 5s. 10d.; fat ewes very dull at 4s. to 4s. 2d. Well-finished lambs maintain their value, matured lots making 38s. to 48s. each (or 7s. to 7s. 4d. for the very ripest); seconds, 6s. 6d. to 6s. 8d.; and other qualities as low as 6s. Pigs, though keeping fairly steady, are not as dear as they were, very little in the way of the nearest porkers exceeding 10s. per score, and baconers 9s. to 9s. 6d. Heavier pigs are less saleable than of late at 7s. to 8s. for coarse weights.

### Trade in Scotland.

The number of fat cattle on offer this week has been larger, and trade better to the extent of 1s. to 2s. per cwt. Fat cows have been fewer, and they also have met a better market. Fat sheep have been shown in increased numbers, and they have met an improved trade to the extent of 2s. per head. A larger show of lambs also participated in the rise. Heavy ewes, however, on account of the warm weather, made less money. A large show of calves were easily sold at higher prices. Pigs in small numbers, and they were considerably dearer. Store cattle have been shown in rather smaller numbers than last week, and for the good conditioned bullocks and best class of stirks a clearance was easily effected at quite last week's prices, a number of the smaller stirks being left unsold. Milch cows have met an exceedingly quiet market at prices much lower than last week. Quotations: Top price of cattle per live cwt. 41s. 8d.; current, 36s. 6d. to 38s. 6d.; mutton, 8½d. to 10½d. per lb.—JOHN SWAN AND SONS, LTD.

### Trade in Ireland.

The Dublin market of last Thursday was well supplied with cattle, there being 1,986 on offer, or an increase of 322 on the week. The attendance of buyers was also good, and the larger supply of cattle did not affect prices, which were well maintained and slightly dearer in cases. Nice qualities of beef, but backward in condition, were brought up freely to finish off. The market opened strong for choice cattle, but secondary and coarse cattle were rather harder to move, with values tending in favour of buyers, but anything like a fall was averted by the large attendance of cross-Channel buyers. A good clearance was effected. The live weight price for choice beef ranged from 32s. 6d. to 35s. per cwt., and the dead weight prices were: Prime ox and heifer beef, from 55s. to 61s. 6d.; extra choice lots, good second-class, 30s. to 54s., and inferior from 44s. per cwt. upwards.

The number of sheep and lambs in market was only 8,824, or 460 less than the previous day. The demand was strong, and prices ruled in favour of sellers for prime sheep and lambs; coarse sheep neglected. For best home trade sheep the market was an excellent one, and wether mutton sold very freely at from 7d. to 8d. per lb.; good ewes, 6½d. to 7½d., and inferior from 5½d. up. Shippers did an active business, and there was a firm trade for export hoggets—the heavy class making from 45s. to 56s. each, and small to medium from 36s. to 44s. Lambs were in strong trade; good fat medium-sized lambs selling from 30s. to 34s. each, and larger, heavier sorts up to 40s. and 42s.; small, light lambs could be had at from 18s. upwards. Everything useful was sold up.

Veal of prime quality made from 6½d. to 8d., but inferior calves sold at from 4½d. to 6d. per lb.

The supply of dairy cows was large, but chiefly of a medium or inferior class, choice springers and newly-calved cows being scarce. Really choice cows were high, making from £18 to £23 each; ordinary cows sold at from £9 10s. upwards. Store cattle continue to sell well, as occasional showmen keep the pastures in fine form, and there is abundance of grass everywhere. At the country fairs in the south of Ireland, business for store cattle is brisk. At Clonmel on Thursday business was very active at higher prices. Good yearlings sold at from £8 to £8 15s.; two-year-olds, £10 10s. to £12 10s., and three-year-olds, £13 to £14 10s. Beef sold at from 52s. to 54s. per cwt. for best, and 40s. to 46s. for rough lots.

Mutton fetched from 7d. to 7½d. per lb. At Thurles, on the same day, some yearlings sold as high as £9 each, and three-year-olds (prime quality), £14 to £15 10s.

Short supply of pigs at Dub'n market, and prices advanced, as buyers were in big attendance. Prime bacon pigs paid 55s. to 56s. per cwt., and all other grades higher in proportion.

## LONDON.

**Central Market, Friday.**—Good supplies, and trade continues slow, with a lower tendency in values:—English beef, 3s 4d to 3s 7d; Scotch sides, 3s 10d to 4s; shorts, 4s 2d to 4s 6d; Deptford and Liverpool killed, 3s to 3s 5d; refrigerated hindquarters, best, 3s 2d to 3s 6d; ditto, seconds, 2s 8d to 3s; ditto, forequarters, 1s 10d to 2s; inferior beef, 2s 4d to 2s 8d; mutton, Scotch wethers, 5s to 5s 4d; ditto, tegs, 5s 8d; ditto, ewes, 3s 2d to 3s 8d; English wethers, 4s 4d to 5s; ditto, ewes, 3s 2d to 3s 8d; foreign sheep, 4s to 4s 10d; English lambs, 3s 4d to 3s 8d; veal, 3s 4d to 4s 8d; English pork, 4s to 4s 4d; Dutch ditto, 3s 8d to 4s 5d per 8 lb.

**Islington, Thursday.**—To-day's supply of beasts, which was exceedingly short, consisted entirely of fat butchering cows and bulls. Trade was practically at a standstill, though no lower quotations can be recorded. Top prices: Fat cows, 3s 4d to 3s 6d; fat bulls, 2s 10d to 3s 2d per 8 lb. A decrease of 100 in the number penned in sheep market. Trade for both wethers and ewes ruled firm, with an upward tendency in value, an advance of fully 2d per 8 lb. being made in some cases. Choice small lambs found ready buyers at a slight advance in value; heavier descriptions, however, were little wanted. Best pens made per 8 lb. as follows: 8 stone Down sheep, 5s 10d; 9 st ditto, 5s 6d to 5s 8½d; 10 st ditto, 5s 4d; 10 st half-breds, 5s 2d to 5s 4d; 10 st ewes, 4s 2d; 5-st fat grass lambs, 7s 2d; 6 st half-bred ditto, 6s. Calves met a firm trade, an early clearance being made. Quotations per 8 lb. sinking the offal: Beasts, 2s 10d to 3s 6d; sheep, 3s 10d to 5s 10d; calves, 3s 10d to 5s 10d; lambs, 3s 8d to 7s 2d. Total supply: Beasts, 10; sheep and lambs, 2,870; calves, 60; milch cows, 5.

## COUNTRY.

**Ashford, Tuesday.**—Beef sold rather better, at 4s 4d to 4s 8d for best beasts. Mutton a dull trade, half-bred wethers making up to 5s, and small Kents up to 5s 4d; inferior animals rather cheaper. Veal neglected. Best calves did not exceed 5s a stone. Pork dearer, and quoted up to 4s 2d per stone. English very dear, some making over a pound a head.

**Berwick, Saturday.**—Cattle numbered 530, 120 less than the previous week. Attendance of farmers and buyers small, quality of stock good, and trade bad. Calves, 15s 7s to £6 10s; heifers, £7 10s to £10 15s; stirks, £8 to £10 15s; two-year-olds, £12 to £14; three-year-olds, £13 to £14 15s; Shorthorn bulls, £10 10s.

**Birmingham, Thursday.**—Small supply of beasts, sheep, and pigs; trade fair for pigs, but slow for beasts and sheep. Quotations: Beef, 5d to 6½d per lb, mutton, 6d to 8½d. per lb; lamb, 9d to 9½d per lb; veal, 6d to 7d per lb; bacon pigs, 10s per score; cutting pigs, 10s to 10s 3d per score; sows, 7s to 7s 3d per score.

**Bristol, Thursday.**—At this market there was little enquiry for beef, which was in small supply, and less than average. Business was done at the rate. Mutton and lamb were in large quantities, and trade was quiet at last week's quotations, except for lamb, which declined to 9d per lb. Few pigs were on offer, and with limited enquiry, the price of baconers fell to 9s 6d per score.

**Caerne, Friday.**—Prices of pigs in lots of not less than ten, on rail within 100 miles, 3d. per score extra for delivery by road. Six s. to 8 s. 10 lb., no deduction for fat, 8s. 6d per score; 8 s. 10 lb. to 9 s. 10 lb., not over 2½ in., 8s. 6d per score; under 10 s., not over 2½ in., 9s. per score; under 11 s. 10 lb., not over 2½ in., 8s. 6d per score. Pigs outside these limits at their value.—C. & T. HARRIS & CO., LTD.

**Canterbury, Saturday.**—Very little inquiry for store stock and only a small supply. Cows

## MARKET SUPPLEMENT.

vii

and calves made from £14 to £20. The offering of Irish yearlings attracted little attention.

**Cattle.** Saturday.—About 500 Irish cattle were forwarded, and buyers attended in large numbers. Trade ruled brisk. Small heifers £7 10s to £10 10s; better sorts, £12 to £14; best descriptions, to £15 10s each; nice wintering heifers, £8 10s to £12 5s.

**Chester, Thursday.**—Supplies were not large, but far in excess of the demand, and the market was one of the quietest for some weeks. Prices did not materially differ from the last fair. Milch cows made £16 to £21; calves, £15 to £19; barrens, £10 to £13; stirks, £9 to £9; heifers, £9 to £14.

**Chichester, Wednesday.**—Lambs, which were shown in good "bloom," met a slow but steady selling trade, and, with the exception of a few lots, all eventually changed hands, prices generally being about the same as those realised at the corresponding sale last year. Fat cattle experienced a slow but firm demand, dairy cattle and calving beasts met a sharp trade at fully £1 to 30s more money. There was not much inquiry for store cattle, and a good many lots remained unsold. Stock at the market: Cattle, 379; sheep, 5,775; pigs, 367; calves, 139; horses, 22; mare foal, 1; bulls, 8; total, 6,691.

**Colchester, Saturday.**—There was a good trade, beef selling at from 4s 4d to 4s 6d per stone; mutton, 5s 6d to 6s; pork, 9s to 9s 6d per score; and lamb, 7s per stone.

**Derby, Tuesday.**—Good attendance, and a fair trade with little alteration in prices. Beasts, 6jd to 6jd; calves, 7d to 8d; sheep, 7d to 8d; lambs, 10d to 11d per lb.

**Doncaster, Saturday.**—Good average supply of cattle, chiefly stores, but trade was exceedingly dull, many farmers not having got rid of their stock. Late prices ruled. Milch beasts £17 to £22; bullocks, £12 to £17; heifers and drapes, £11 to £13 10s; stirks, £9 to £11 each. Better supply of sheep and little doing. Hogs, 40s to 48s; black-faced ewes, 40s to 45s each.

**Dorchester, Saturday.**—At the cattle market to-day there was only a moderate delivery of stock at either at Messrs. Duke's sale or at that of Messrs. Symonds and Thompson. Most of the stock was of a very plain character, but prices of milch beasts ruled a little firmer, and anything showing condition in the grazing line likewise met a very fair sale. Heifers and calves made from £14 10s to £18, and cows with calves from £8 10s to £12. The range for graziers was from £16 to £23 per pair. Fat bullocks, from scarcity, ruled a little firmer, heifers ranging from £17 to £21 each (or 11s to 11s 6d per score); fat cows, £12 to £15 (or 10s to 10s 6d). Mutton a very short delivery, prices being well maintained. Down ewes sold from 38s to 43s 6d each (or 6jd to 7jd per lb.). Lamb trade steady at from 28s to 34s, prices showing a decline at late rates.

**Dublin, Thursday.**—Numbers in market: Beasts 1,986, increase 322; sheep 8,824, decrease 400; calves 39, decrease 23. Notwithstanding increased numbers there seemed to be a better demand for cattle, at slightly improved prices. Secondary and inferior animals met with rather a dragging trade at about last week's rates. Sheep and lambs in fair request at last week's prices. Cattle—live weight (best), 3s to 3s 6d per cwt; secondary and inferior sorts, 2s to 3s per cwt. Mutton—dead weight, 6jd to 7jd per lb.—GASLY, SOX, and CO.

**Edinburgh, Wednesday.**—Very small supplies were forwarded. The only quotation for sheep was 28s for half-bred hogs. Conditioned cattle sold readily; two-year-old bullocks, £11 11s to £15 15s; stirks, £10 10s; Shorthorned cows, £20; Irish, £21s.

**Exeter, Friday.**—Not a large supply of fat cattle; quiet trade, late prices being barely maintained. Choice cattle, 15s to 11s 6d; second class, 11s; cows, 8s 6d. Best of best sold out. Small supply of sheep; very quiet trade. Small hogs, 8jd to 9d; large, 8d; ready sale for ewes; rams, 5d. Lambs, in wool, 10d to 11d; shorn, 10d.

**Glasgow, Wednesday.**—The market was moderately stocked and prices were steady. The warmer weather caused buyers to curtail purchases.—Top Scotch cattle, 63s to 64s; secondary, 57s to 60s; best Irish scarce at 55s to 58s; secondary, 54s per cwt; best home sheep, 10d to 10jd; secondary, 9jd to 9jd; top lambs up to 11d per lb.

**Gloucester, Saturday.**—Messrs. Bruton, Knowles, and Co. report their sales as follows:—A very short supply of all kinds of stock, with a short attendance of customers, but satisfactory sales resulted.

**Hereford, Wednesday.**—Owing to the hay harvest being in progress, the attendance in the cattle-market was small. There was a large alteration in prices: 1st best heifer and bullock beef made 6d to 6jd, cow beef 4jd to 5jd. Calves were a moderate supply, trade on veal being about 7d. Sheep were a short supply, and trade was firm.

Wether mutton made 8d. Lambs were scarce, and realised 9d, a trifle dearer than last week. Few pigs on offer, porkers being cheaper and not making more than 5d, heavy-weights making a little less. Stores were a trifle easier. The store cattle trade was poor.

**Ipawich, Tuesday.**—Messrs. Robert Bond and Sons report a good supply of fat cattle which came to hand in nice condition; trade was brisk and prices showed an improvement of about 6d per stone on the low rates ruling last week. Grazing cattle were in average supply, there was rather more demand owing to the recent rains, values remaining much the same. Shorthorn steers, eighteen months, in good condition, £9 15s to £8 12s 6d; sixteen to twelve months, £7 10s to £5 5s. Several cows and heifers were on offer, more buyers were present, and higher prices were obtained for those fresh calved or near. The best making from £21 5s to £17; fat lambs sold freely up to 4s 5s. Fat sheep were dull and prices weak, good shearlings going at from 57s to 50s, fat ewes up to 51s. At the special sale a large number of lambs were penned and buyers were in strong force, lambings were brisk and a good clearance was effected at very satisfactory prices, Suffolk ewe lambs from registered flocks, 12s to 36s; wethers, 30s to 28s; halfbreds, 31s 6d to 26s; young first cross lambs, 28s 6d to 27s 6d; Southdowns, 26s 6d to 25s. Fat swine were short, and a slight improvement in values was experienced. Numbers at sales and market, 460 cattle, 3,252 sheep, 590 swine.

**Leicester, Saturday.**—Full consignments of home-bred stock. Trade ruled sluggish, and prices declined 10s to 20s per head. Choice milch cows, £19 to £20; secondary, £15 to £17; heifers, £9 to £12; home-bred bullocks, £11 to £17 10s; Irish bullocks, £10 to £15; Welsh cattle, £9 to £13; young stock, £5 to £8; calves, 15s to 35s each.

**Lincoln, Friday.**—There was a limited supply of beasts, and business ruled dull. Yearlings, £8 to £10; strong beasts, £11 to £13; milch cows, £16 to £20.

**Lynn, Tuesday.**—Average show of fat beasts for time of year, trade very slow, 6s 9d to 7s per stone. Few stores, 4s to £12 each. Fat sheep, 8s 9d to 10s per stone. Cows, 40s to 47s, fat lambs, 30s to 40s, store, 25s to 30s each.

**Manchester, Friday.**—Beef, first class, 5jd; second class, 4jd to 5jd; third class, 3jd to 4jd. Mutton: First class Cheviots and Scotch, 8d, and others 7jd; second class, 6jd to 7jd; third class, 5jd to 6jd. Veal, first class, 6jd; second class, 5jd to 5jd; third class, 4jd to 4jd. Lamb, first class, 8jd; second class, 7jd to 8d.

**Newcastle, Tuesday.**—A slow, firm trade. Prime heifers, 8s to 8s 6d; second-class, 7s 6d to 7s 9d; steers, 8s to 8s 3d; coarse and inferior, 6s 6d to 6s 9d; pigs, 6s to 7s per stone; fleecy sheep, 6d to 9d; lambs, 9d to 11d; veal, 6d to 8jd. At market: Cattle, 1,565; sheep and lambs, 5,231; calves, 108; pigs, 375.

**Newport, Wednesday.**—A short supply, a good attendance of buyers, and a very good trade all round. Quotations: Best English beef, 6jd to 6jd per lb; secondary, 6d to 6jd; cows, 4jd to 5jd; best wether mutton, 8d to 8jd; ewes, 6jd to 7d; calves, 6jd to 7d; porker pigs, 10s to 10s 6d per score.

**Norwich, Saturday.**—The principal part of the fat beasts here to-day were submitted by auction, the numbers being large, the open market being very small. Trade was very firm, prices averaging from 7s to 7s 6d per 14 lb. There was scarcely any store cattle on offer, and the supply was composed chiefly of Irish stock, very poor, and quotations could scarcely be made. There was a small show of store sheep, lambs being in big proportion. Trade was steady at fully late rates. Lambs made 25s to 37s per head; breeding ewes, 45s to 60s. Fat sheep were in small supply and met with a ready sale at 8s 6d to 9s 6d per stone. Fat and store pigs were offered in limited numbers and a sharp trade was experienced, fat averaging 7s a stone.

**Nottingham, Saturday.**—There was not a large trade. In-calf heifers, £27; best cows, £15; yearlings, £8 to £9; and two-year-olds, £13. Sucking calves sold at 45s.

**Preston, Wednesday.**—There was a brisker demand for beef, and a slightly better trade. Mutton remained unaltered. Heifers and bullocks, 6d to 6jd; cows and bulls, 5d to 5jd; hogs, 8jd to 9jd; lambs, 10d; ewes, 7d to 8d; calves, 6d to 6jd per lb.

**Retford, Saturday.**—Milch beasts of good quality sold very well at £16 to £20 per head, but they were hard to meet with, and young stock was disposed of rather more easily at about previous rates.

**Romford, Wednesday.**—Large supply of fat beasts, trade a little better. Best, 4s 4d to 4s 6d; middlings, 4s to 4s 2d per stone. Calves in average supply, trade about the same, at 4s 10d to 5s 5d per stone. Sheep in average supply, trade rather better. Best small sheep, 5s 6d to 5s 8d;

large, 5s 2d to 5s 4d; ewes, 4s to 4s 2d per stone. Lambs in large supply, trade about the same, at 6s 4d to 6s 6d per stone. Very few store beasts on offer, owing to the dry weather. Pig trade rather better. Neat porkers, 4s 2d to 4s 6d; large hogs, 3s 8d to 4s per stone.

**Sheffield, Tuesday.**—More beasts than last week, and fairly good business. Good milch cows, £20 to £21; smaller lots, £16 to £18.

**Shrewsbury, Tuesday.**—Small supply of cattle, especially stores, which met a fair demand. Usual supply of calves, sheep, and pigs. Prices slightly easier. Quotations:—Beef, 6jd to 7d per lb; mutton, 7d to 8jd per lb; lamb, 8jd to 9jd per lb; veal, 6d to 7d per lb; porker pigs, 9s 6d to 10s per score; bacon pigs, 9s to 9s 6d per score. Numbers offered as follows:—Cattle 397, sheep and lambs 1,890, calves 109, pigs 363.

**Stockton, Wednesday.**—There were on offer 140 cattle, 110 sheep, and 185 pigs. An average show of the best cattle, which met with a slow trade at 8s to 8s 6d per stone, prices being firm, whilst poorer kinds sold at 6s 6d to 7s. Young sheep made 9d per lb; lambs, 10d and 11d; and cows, 6d and 7d per lb. The pig trade was quiet, and prices showed a reduction of 3d per stone all round.

**Thame, Tuesday.**—There was a very large attendance of buyers from all parts, which no doubt accounted for a greatly improved all round trade, Messrs. Bond and Burrows having an absolute clearance of everything. Best beef was in demand, and realised fully 4s 6d per stone, cows making up to 4s. Mutton and lamb selling better than for some years past. Bacon and pork at late rates. This firm's sale comprised 162 fat beasts, 210 fat sheep, 80 fat and weaning calves, and 101 fat store pigs. Fat oxen made from £15 15s to £21; fat heifers, £14 10s to £20 15s; fat wethers, 50s to 60s; fat ewes, 30s to 47s 6d; fat lambs, 28s to 44s 6d; fat calves, £3 to £4 12s; weaning cow calves, 20s to 50s; bull calves, 10s to 40s; bacon hogs, £3 to £4 10s; porkers, 28s to 50s.

**Truro, Wednesday.**—Attendance was good, and business fairly brisk. Fat bullocks, 58s to 60s; barreners add store bullocks, 40s to 55s per cwt; cows and calves, 20s to 45s each; rearing calves, 15s to 45s; wethers, 8d to 8jd per lb; ewes, 5jd to 6d; lambs, 9d; large pigs, smaller, and suckers, 14s to 33s each. Number in cattle market:—Bullocks, 303; calves, 75; sheep, 344; pigs, 186; horses, 5; and 1 dog.

**Wolverhampton, Wednesday.**—Short supply, with good demand. Quotations:—Beef 5d to 7d, mutton 8jd to 9d, lamb, 9d to 10d, calves 7d to 8jd per lb; bacon pigs, 10s to 10s 6d, porkers, 10s 6d to 11s, sows, 8s to 9s per score.

**Workop, Wednesday.**—Small show of beasts and sheep, with a sharp trade for mutton. Best beef 7s 6d; secondary, 6s 9d; best Southdown and crossbreds, 7s to 8d; ewes, 5jd to 6jd; lamb, 7jd, calf, 8jd per lb.

**Yeovil, Friday.**—Cows and calves, £16 15s to £20 5s; secondary, £14 5s to £15 15s; heifers and calves, £16 to £19 5s; barreners, £10 to £16 15s; yearling heifers, £8 10s to £8 5s; steers, £10 to £12 10s; slip pigs, 18s to 33s; stores, 37s 6d to 57s 6d; Down ewes, 42s 6d to 49s; Down wethers, 47s to 52s; Down wether lambs, 27s 6d to 33s; horn ewes, 44s to 50s; horn wethers, 48s to 53s; horn wether lambs, 33s to 35s; horn chilver lambs, 28s to 32s 6d.

**York, Thursday.**—A much lighter show of English and Irish store cattle, the season for which is nearly over. There was a very poor attendance. Last fortnight's rates were barely maintained. What little demand exists is chiefly for the best strong, fresh cattle, which sell from £13 10s to £15 10s. For poor two-year-old cattle there is no demand. A smaller show of calving and milch cows than last fortnight, and the improved prices of the last fortnight were not quite maintained, there being a drop of about 10s per head on cows at from 8s 4d to 8s 6d, and 10s per head on the best animals, which make £18 18s to £21. Secondary newly calved cows made from about £14 to £16 per head. An average show of sheep. A few lots made 50s each, others 38s to 2 guineas. A very slow trade, chiefly as a result of the high prices.

## FOREIGN.

**Yorkhill, Monday.**—Large supplies of Canadian cattle were on offer at the usual weekly sales held to-day, 1,049 head being penned. All the animals were from Montreal, and were delivered in good shape and condition. There was a large attendance of buyers, but business at the opening was somewhat quiet, and remained listless throughout the day, the large supply on hand causing buyers to operate cautiously with a view to securing reductions. In this they were successful, as following upon last week's break, prices for the best class of bullocks dropped from 28s to 3s per cwt. dead-weight, with secondary, middling, and inferior descriptions changing hands at prices somewhat in proportion. Of late, bulls have been some-

what scarce in this market, and values, especially for prime choice qualities, were about late rates. First-class bullocks of handy sizes and weights sold at about 54s per cwt. dead weight, secondary sorts down to 52s per cwt. and bulls from 44s to 46s per cwt. according to quality and condition.

### FEEDING STUFFS.

**Mark Lane, Monday.**—Linseed Cakes.—In spite of a small comparative demand, values continue to advance for prompt delivery, while in forward positions home manufacturers have practically retired from the market. Russian remain by far the best value at last week's quotations. East India seed purers offer at about late rates. American are held at prohibitive prices, while London-made attract rather more attention, and to-day's nearest value is 5s per ton more money. Cotton Cakes.—With the prospect of short supplies of Egyptian for some time to come, prices have a hardening tendency, and holders now ask £4 18s 3d to £4 17s 6d; while English are firmly held at £4 18s. 6d to £5 and Bombays at £4 5s. Decorticated: A limited quantity of American may still be bought at £7 12s 6d to £7 15s, and meal at £7 10s. Rape Cakes.—Scarce and dear. East India and Ravison unchanged. Maize Germ Meal.—A parcel of white American on the quay is procurable at last week's prices, but English makes command rather more money. Maize gluten meal is in good request at £5 15s per ton. Rice Meal.—Only a moderate business is passing with sellers at £4 13s 9d to £4 15s. for parcels of Rangoon in warehouse, and £4 11s 3d to £4 12s 6d, ex ship terms for arrival. Locust beans are fully as dear at £5 15s for whole, and £6 per ton for Kibbled. Nitrate of soda is unchanged at £10 17s 6d per ton ex quay.

—H. JONES LANGAR AND CO.

### WET AND DRIED GRAINS.

**London, Saturday.**—Wet Grains: The market continues without any particular change, notwithstanding that farmers are busy in the hay fields, and prices are slightly firmer at about 13s 6d ale, 10s 6d porter, 25s distillers, 32s 6d pressed white distillery meal. Dried grains are without change at ale, 92s 6d, mixed 80s 31, and distillers, 110s per ton on rail Rangoon; ale 93s, and mixed, 82s 6d per ton on rail at Barton. Oat feed, to arrive, 72s 6d; rice meal, 96s 3d; Calcutta rice meal, 89s 3d; fine ground rice husks, 63s; rice germ, 97s 6d per ton. All the above are free on rail, London. — HANLYN AND CO.

### ADVERTISEMENTS RECEIVED TOO LATE FOR CLASSIFICATION.

**Melton Ross, Barnetby Junction,  
LINCOLNSHIRE.**

### IMPORTANT SALE

OF

**PEDIGREE SHORTHORN CATTLE**

— AND —

**SOUTHDOWN SHEEP,**

*The Property of the late Mr. JONAS WEBB,*

**On FRIDAY NEXT, JULY 13, 1906.**

**Messrs. JOHN THORNTON & CO.**

will SELL BY AUCTION, at Melton Ross, about a mile and a quarter from Barnetby Junction, the late Mr. JONAS WEBB's old-established choice herd of Bates

### SHORTHORNS,

which comprises many fine specimens of the famous Duchess, Grand Duchess, Waterloo, Oxford and Thorndale Rose tribes, as well as several good animals of the Laurestina family. First-class bulls have been used, and the herd kept pure to the old Bates and prize Linton blood. Laureate 81433 by Mr. C. R. Lynn's Stroxton Prince from the champion cow Laurestina Maid, and his sons Melton Duke of Leicester 3rd 86605, Melton Grand Duke 2nd 89289, Melton Baronet 2nd 89285, and Melton Knightley 89290, are now in service, the three latter being included in the sale.

The herd has been bred with special regard to its milking properties. It contains a capital lot of good yearling heifers and calves; several of the cows have calves at foot. Prizes have been won at the Royal, the Smithfield Club, the Yorkshire, Nottinghamshire, Lincolnshire, and other County Shows, as well as at the International Show at Paris.

### SOUTHDOWN SHEEP.

The flock of Southdown Sheep, comprising about 200 Ewes and Yearling Ewes, will also be sold; they are bred from the old flocks at Babraham, and Strictly Ham rams from Mr. Adeane's celebrated prize flock have lately been used.

### SALE COMMENCES AT ONE O'CLOCK.

Catalogues may be had of Mr. HERBERT M. WEBB, Melton Ross, Barnetby, Lincoln; or JOHN THORNTON & Co., 7, Princes Street, Hanover Square, London, W., who will execute commissions.

### THE CLEVELAND AGRICULTURAL SOCIETY.

The 73rd ANNUAL SHOW will be held at Redcar on AUGUST 24, 1906. Over £400 Prize Money.

Schedules from

THOS. TURNER, Sec.,  
Lazenby Estate, R.S.O., Yorks.

### BOURNMOUTH HORSE SHOW.

AUGUST 21 AND 22, 1906.

£530 IN PRIZES.

ENTRIES CLOSE JULY 21, 1906.

Schedules and Entry Forms from

Municipal Offices,  
Bournemouth.

PRELIMINARY.

THE 21st ANNUAL SALE and LETTING of Mr. LAMBERT'S pure-bred HAMPSHIRE DOWN RAMS and RAM LAMBS will take place at CAMBRIDGE, on THURSDAY, AUGUST 2, 1906.

Messrs. CHALK, Auctioneers,  
11, Alexandra Street,  
Cambridge and Linton.

TUBE MILL.—Wanted 17 ft. by 4 ft. 3 in. or larger. Particulars to No. 102 MARK LANE EXPRESS OFFICE, 3, Wellington Street, Strand, London.

### JEE'S MILK BOOK.

By Post, 2/3.

London:

Published by W. A. MAY,

"MARK LANE EXPRESS" OFFICE

3, Wellington Street,

Strand, W.C.

### "A.B.C." TIME TABLE.

Those who find the use of the ordinary Railway Time Table difficult and complex, will welcome the new "A.B.C." Guide, which has been issued by the Great Northern Railway Company. In this Time Table are alphabetically arranged the train services from London to the numerous towns in the Midlands, Yorkshire, the North of England and Scotland, served by the Great Northern Railway. The book also contains the London Suburban Services, and is embellished by a good map. Copies may be obtained at any Great Northern Office, or from the Chief Passenger Agent at King's Cross. (Price 1d.)

### PRICE ONE SHILLING.

By Post 1s. 3d.

### RATIONAL PIG-KEEPING TO ENSURE PROFIT

(REVISED EDITION)

BY

W. J. MALDEN.

LONDON:

WM. A. MAY, Farm, Field & Field side Office,  
3, WELLINGTON STREET, STRAND  
1906.

VERMOREL'S KNAPSACK SPRAYERS for Fruit Trees, Rose Trees, Root Crops, &c.

Have won over 450 FIRST PRIZES and MEDALS.

"ECLAIR" Spraying Pump, price 35/6.

# Review of the British Corn Trade

DURING THE PAST WEEK

*Written exclusively for the Mark Lane Express.*

The promise of the growing wheat is rather good in certain districts, particularly in parts of Middlesex and Essex and of Suffolk. As we proceed north, however, the aspect does not improve, and the three great wheat counties of Norfolk, Lincoln, and York are not looking to reap a full average crop.

Barley made a poor start in the spring, but in some counties, notably in the north and west of England, the progress made since the end of May has been remarkable. Wales expects the best barley crop for some years, and the promise in Scotland is at least a full average.

Oats should be a good yield in Ireland and Scotland, and there are English counties where a full yield may yet be attained. But the season has not been in favour of this cereal in East Anglia or in the north counties, and it is only in the west and north-west that a satisfactory out-turn is anticipated.

Beans and peas show considerable improvement, and may be full average crops in the Fenland and Lincoln, in the Western Midlands, and again in N.W. Yorkshire, Lancashire, and the North. They are all likely to be good yields in Essex, Kent, Surrey, Sussex and Hampshire. Potatoes on their present promise are not hopeful in the great Midland district from Leicester to Gloucester.

The American wheat crop is officially put at 2 per cent. above that of last year, whereas it was thought that the returns would come out about that extent below 1905. The seasons do not apparently differ very materially. The States divide about as follows in their crop prospects:—

| Over Average. | Average.   | Under Average |
|---------------|------------|---------------|
| Pennsylvania. | Texas.     | Michigan.     |
| Indiana.      | Ohio.      | Kansas.       |
| California.   | Illin is.  |               |
| Iowa.         | Missouri   |               |
| Dakota.       | Nebraska.  |               |
| Washington.   | Oklahoma.  |               |
|               | Minnesota. |               |

It will be seen that returns are to hand from fifteen States only out of forty-four. But those included in the above list are all of very high rank as wheat producing regions.

Barley is reckoned 1 per cent. inferior to 1905. There is evidently no important difference between the seasons.

Oats are reckoned 3 per cent. inferior to 1905. The crop is clearly not up to the level of a year ago, despite isolated good yields in the states of New York, Michigan, Wisconsin, Minnesota, and Dakota.

## LONDON HAY TRADE.

**Saturday.**—With a continuance of shortness in supplies trade remains very firm with prices again slightly dearer. All classes of stuffs are very short, and with demand all round good, no difficulty is found in effecting clearances. A fair quantity of this season's clover and mixtures have come along, and for new stuff have made a fair price, about 75s. per ton being realised. So far there has been but little new hay sent along, which rather leads one to suppose that as there is a great shortness in this season's yield of this particular crop, senders are holding back in anticipation of higher prices. Best old hays are now the article in most request, and holders have been able to obtain an advance of 2s 6d per ton; ordinary and fair quality hays also find a better sale. Clover and mixtures are very firm, and full values are easily obtainable. The trade all round this week is decidedly strong, and supplies at all rails have dropped down to a very low ebb, salesmen also have had to make considerable inroads into their stocks, and unless more stuff is available during the coming week, there is every chance of prices going again dearer. The demand for straw is much better, and prices are 1s to 2s load higher. The trade for foreign is stronger this week, and we find a good demand for all qualities at hardening prices. Prices ruling are about as follows: English Best meadow hay, 80s to 82s 6d per ton; good meadow hay, 67s 6d to 75s per ton; inferior hay, 53s to 65s per ton. Best clovers, 90s to 92s per ton; inferior to good, 75s to 85s per ton. Best mixtures, 87s 6d per ton; good mixtures, 72s 6d to 82s 6d per ton; seconds mixture, 60s to 65s per ton; wheat straw, 28s per load; oat straw, 28s per load; barley straw,

Maize is only starting on its crop career. It appears to promise very well in Iowa, Oklahoma, Pennsylvania, Tennessee, and Virginia, but to be disappointing in Louisiana, Minnesota, and Texas.

The sales of British wheat at the statute market since harvest have been large, and the price, though somewhat lowered by the abundant offers, has not been so depressed as some had expected to see it.

This season 2,865,000 qr. at 28s. 7d. per qr.  
Last " 1,594,000 " 30s. 7d. "  
The sales of British barley since September 1 have been:—

This season 3,199,000 qr. at 24s. 4d. per qr.  
Last " 3,132,000 " 24s. 9d. "  
The supplies and prices in this instance will be seen closely to correspond. In the case of oats, small deliveries have given good prices:—

This season " 904,000 qr. at 18s. 5d. per qr.  
Last " 1,123,000 qr. at 17s. 0d. "  
Imports of the United Kingdom last week were as follows:—

Wheat..... 715,000 qr.: a colossal supply.  
Flour..... 112,000 sacks: a moderate importation.  
Barley ... 67,000 qr.: less than usual.  
Oats ..... 172,000 qr.: more than usual.  
Maize..... 315,000 qr.: a very heavy importation.  
The best prices for wheat last week were made in Sussex. The range was:—

|                                    |                   |
|------------------------------------|-------------------|
| Chichester .....                   | 31s. 11d. per qr. |
| Dorchester .....                   | 28s. 7d. "        |
| Gradient .....                     | 3s. 4d. per qr.   |
| Barley had a somewhat wider range. |                   |
| Mark Lane .....                    | 23s. 7d. per qr.  |
| Norwich .....                      | 19s. 1d. "        |
| Gradient .....                     | 4s. 6d. per qr.   |

It will be seen that nothing but feeding barley was on offer at any market.  
Oats were fairly good in price all over the country.

|                  |                   |
|------------------|-------------------|
| Reading .....    | 20s. 11d. per qr. |
| Nottingham ..... | 19s. 6d. "        |
| Gradient .....   | 1s. 5d. per qr.   |

The summer period is being borne by the trade in oilseeds with more fortitude than had been looked for. Linseed after a weak June, was evidently hardening as a market from the 1st to the 6th inst.; from the 7th to the 14th it has picked up in value about 1s. per qr. Cottonseed has not risen in price, neither has rapeseed, but both these staples are more saleable than they were in

June, and at the 30th June's full prices. Linseed oil at £20 5s. per ton is as dear as it was at mid-summer; cottonseed oil, crude, is firm at £20 per ton.

There is a rally in the market for beet sugar, for which 8s. 6d. per cwt. is now asked and 8s. 5d. paid. If the Government duties were properly adjusted the production of this concentrated and valuable feeding stuff on British farms might be greatly increased.

Feeding rice continues to sell at a steady 7s. 3d. per cwt. The price of recent years has varied between 6s. 9d. and 7s. 9d. per cwt., and the existing quotation is a fair average value. The use of rice for feed is undoubted, but it requires to be grown with discretion. It goes well in a ration which includes maize.

The supply of wheat on passage, though still heavy, shows a substantial decline on the week. Californian, 350,000 qr.; American, 215,000 qr.; Russian, 370,000 qr.; Indian, 700,000 qr.; Argentine, 650,000 qr.; Australian, 800,000 qr.; various, 50,000 qr. Total, 3,135,000 qr. Last week, 3,220,000 qr.

The supply of flour on passage has fallen from 322,000 to 302,000 sacks mainly as a result of reduced shipments from the United States.

The supplies of barley on passage are below the average:— Russian, 1,250,000 qr.; American, 80,000; Asiatic, 40,000; total, 215,000 qr.; a week ago, 285,000 qr.

Of maize 1,025,000 qr. are on passage. This is a large total, but the Argentine item is the sole cause of its appearing so heavy. Neither round or flat corn is likely to be in more than very moderate offer in August.

Other supplies on passage include 256,000 qr. of oats, 147,000 qr. of linseed, 27,000 qr. of rapeseed, and 22,000 tons of cottonseed.

American shipments last week were small. The chief items were: Wheat, 65,000 qr.; barley, 4,000 qr.; oats, 3,000 qr.; linseed, 16,000 qr.; maize, 75,000 qr.; and flour, 89,500 sacks.

Argentina sent off 145,000 qr. of wheat, 400,000 qr. of maize, and 45,000 qr. of linseed. The maize shipments are, of course, exceedingly large.

Russia shipped last week 200,000 qr. of wheat, 150,000 qr. of barley, 152,000 qr. of oats, and 5,000 qr. of maize, quantities supplemented by Roumania, Bulgaria, and Turkey, to the extent of 140,000 qr. of wheat and 50,000 qr. of maize.

India shipped 134,000 qr., and New Zealand 21,000 qr. of wheat, and there was in addition an exportation of 15,000 qr. of barley from Persia. No shipments were reported last week from Egypt, Asia Minor, or Cyprus.

is worth a fight, and there is consequently a pause in the trade.

Other cargo sales have comprised American oats at 16s. 3d. per 320lb., Smyrna beans at 30s. 9d. per 480 lb., and Indian white peas at 32s. 6d. per 504lb.

New York prices for prompt shipment are called at 29s. 6d. per 480 lb. for red winter wheat, 30s. 9d. for No. 1 Northern spring wheat, and 22s. 6d. for flat or mixed maize.

The London Corn Trade Association have made up standard samples of (1) choice white Kurrachee wheat; (2) soft red Kurrachee wheat; (3) choice white Delhi wheat, and (4) Indian white peas. Samples may be seen at the offices of the Association in St. Mary Axe, and are, of course, available for all uses and reference under the Association's contracts.

## WET AND DRIED GRAINS.

**London, Saturday.**—Wet Grains: The market continues without any particular change, notwithstanding that farmers are busy in the hay fields, and prices are firmer at about 13s 6d a cwt. 10s 6d porter, 25s distillers, 32s 6d pressed and distillery meal. Dried grains are somewhat higher at—ale, 92s 6d, mixed 85s 7d 3d; malt, 110s per ton on rail London. At 9s. 6d. 82s 6d per ton on rail Burton on Trent. Oat feed to arrive, 72s 6d; Rangoon rice meal, 95s 6d; Cuttack rice meal, 85s 3d; fine ground rice husks, 60s; rice germ, 97s 6d per ton. All the above are free on rail, London.—HAMLYN AND CO.

29s per load; bale wheat straw, 41s 6d per ton, all ex rail London. Foreign: Canadian mixture, 77s 6d to 80s per ton; good Dutch hay, 65s per ton; French 1st and 2nd cut clover, 77s 6d to 80s per ton; large bale wheat straw, 51s per ton; small bale wheat straw, 41s 6d per ton. These prices are by barge delivered alongside London Thames Wharf.—WALTER H. PRENTIS.

## THE BALTIC.

Wheat cargoes were depressed on the 10th, 11th, and 12th, but showed signs of recovery of tone on the 13th and 14th. Sales have included:—Rosario at 29s. 6d. per 480 lb., Bahia Blanca at 29s. 6d. per 480 lb., White Walla at 31s. per 500 lb., Blue Stem at 32s. 3d. per 500 lb., Roumanian at 28s. 9d. per 492 lb., Victorian at 31s. 3d. per 480 lb., and No. 1 Northern Manitoba at 30s. 3d. per 480 lb.

Maize cargoes are firm for everything except La Plata, and even this type, despite 850,000 qr. on passage, can scarcely be called depressed. Transactions have included Argentine at 22s. 6d., Novorossiisk at 21s. 9d., Galatz at 22s., Turkish at 21s. 9d., Bulgarian at 21s. 6d., and American at 22s., all per 480 lb. The New York price as called seems to make future shipments of American maize exceedingly difficult.

Barley cargoes are unchanged. Two for prompt shipment from Kustendje have been placed at 19s. per 400lb., and free offers of New Russian for October shipment come at 18s. per 400lb. There would be a good trade done if speculative sellers of the latter would accept 17s. 3d., which is the London bid; but the 9d. per qr. difference

# CORN MARKETS.

## LONDON.

**Mark Lane, Wednesday.**—Wheat: English firm, quiet, unchanged prices. Foreign held at Monday's rates, but in very poor request. South Russians, ex ship, quoted at 29s 6d to 33s; La Plata, landed, 30s 6d to 31s 6d; No. 1 Northern Manitoba, 32s 9d; No. 2 at 32s 3d; No. 3 at 32s, all ex ship to arrive. Flour quiet, unchanged. Maize slow for La Plata; steady, quiet, American; La Plata, ex ship, quoted at 29s 9d; landed at 21s 3d; mixed American, landed, at 22s 9d to 29s 3d. Barley dull, unchanged, late rates. Odessa-Nicolaïeff, ex ship to arrive, quoted at 18s 6d, landed at 19s. Oats: American steady, quiet, on small supplies in view; and other sorts dull at late prices.

**Mark Lane, Friday.**—Wheat: English firm, unchanged prices. Foreign sellers maintain late prices, but demand limited. South Russian, ex ship, quoted at 29s 6d to 33s, landed at 30s to 33s. Plate at 30s 6d to 31s 6d. Choice white Karachi at 30s 6d, red Karachi at 30s. No. 1 Northern Manitoba, at 32s 9d, ex ship to arrive. Flour steadily held, but inactive. Maize steady, quiet, at about late rates. Mixed American, landed, quoted at 22s 9d to 23s 3d. La Plata, ex ship, 20s 9d; landed 21s 3d. Barley firm, but quiet. Ojessi-Nico, ex ship, quoted at 18s 6d; landed at 19s. Oats quiet at late rates.

## COUNTRY.

**Ashford, Tuesday.**—Scarcely any English corn on offer; prices were checked by the indifference of millers. Wheat quoted at 32s to 34s; white oats, 21s to 24s; black oats, 20s to 23s; English feeding barley, 20s to 28s; foreign grinding barley, 21s to 23s; mangel beans, 32s to 34s; tick beans, 31s to 36s; round maize, 25s to 26s; flat maize, 26s to 27s; peas, 33s to 34s per qr.

**Berwick, Saturday.**—Small attendance, and practically no grain samples on offer. Wheat, 29s to 30s; oats, 22s to 23s.

**Bury St. Edmunds, Wednesday.**—Wheat is now in such extremely small supply that the few samples offered are cleared off by the inland millers at prices relatively higher than their value delivered at large centres. Prices are therefore rather nominal at about 32s per 504 lb. Feeding corns were not in large demand, but prices upon the whole were well maintained, excepting maize, which was 3d per qr lower for round at 22s per qr; flat was steady at 24s per qr. Linseed and cotton-cakes, also fine milling stuffs, were firmer; but bran was in very quiet demand at about 44 10s to 44 12s 6d per ton.

**Banbury, Thursday.**—Wheat, red, 30s 6d to 31s 6d per qr; barley, 26s to 30s per qr; beans 31s 6d to 32s 6d per qr; oats, 19s to 20s per qr; peas, 30s to 35s per qr.

**Birmingham, Thursday.**—Trade was very quiet, buyers purchasing very sparingly and for immediate needs only. Quotations: River Plate wheat, 30s 6d to 31s 6d per qr (45s lb) at Sharpness; Russian wheats, 31s to 32s per qr, also at Sharpness; scarcely any English wheat on offer. Plate maize was quoted at 21s per 480 lb at Sharpness; flat ditto, 22s 6d at Bristol. Grinding barley 18s 9d per 400 lb at Sharpness. English oats were more inquired for, and made from 22s 6d to 23s per 312 lb delivered. Beans no change.

**Bristol, Thursday.**—No English wheat offering; foreign firmer, with an occasional slight advance in some varieties; maize unaltered; barley 3d dearer; oats unchanged; flour firm, but trading difficult owing to smaller consumptive demand.—GRACE BROTHERS.

**Cambridge, Saturday.**—There was very little corn, and, if anything, wheat was the turn easier, last week's prices being scarcely maintained. Reports speak favourably of harvest prospects. Wheat is said to be pretty uniformly good; barley has very much improved since the rain, though still light on the chalk land; beans vary in districts.

**Canterbury, Saturday.**Supplies limited; slow trade. Red wheat, 19s to 24s per qr; English oats, whites, 20s to 23s; black, 19s to 21s; feeding barley, 25s to 27s per qr. The corn prospects are cheasterly, except for oats.

**Chesham, Saturday.**—There was a little better attendance. Trade continues quiet, and there is an easing off in the price of maize. Wheat and oats are firm at last week's rates. Quotations: New white and red wheat, 4s 7d to 4s 10d per 75 lb; grinding barley, 3s 6d to 4s per 64 lb; old beans, 6s 3d to 6s 6d, and new, 5s 6d to 5s 9d per 80 lb; old oats, 3s 2d to 3s 6d, and new, 2s 8d to 3s per 46 lb; old Indian corn, 12s 6d to 12s 9d, and new, 12s to 12s 6d per 204 lb; ditto River Plate, 12s to 12s 6d.

**Chichester, Wednesday.**—A small attendance, very little on offer, and practically no busi-

ness doing. Wheat, 33s to 33s 6d; ditto, 33s to 33s 6d; grinding barley, 19s to 19s 3d; oats, English, 19s to 23s; maize, 21s 6d to 22s 6d.

**Colchester, Saturday.**—A few samples of wheat offering at last week's prices. Very little other grain offering. Poor attendance.—JOSEPH WILES AND SON, LTD.

**Conventry, Friday.**—Only a moderate attendance, still few samples of English-grown corn offered. Prices ruled almost same as last week—viz.: Wheat, 11s to 11s 9d per 186 lb; barley, 23s to 34s per 448 lb; oats, 24s to 26s 6d per 352 lb; beans, 12s 6d to 13s; peas, 12s to 14s per 196 lb.

**Derby, Friday.**—There was no change to note in the value of any kind of grain. Wheat, new white, 31s to 32s; red, 31s to 32s; beans, old, 34s to 35s; oats, old, 24s to 25s; new, 22s to 24s.

**Devizes, Thursday.**—There was no change in prices. The following were the quotations:—New wheat, 15s to 17s; secondary, 13s 6d to 14s 6d; best barley, 20s to 32s; quotations, 20s to 24s; rye, 22s to 24s; old black oats, 22s to 24s; new ditto, 19s to 23s; malting barley, 26s to 32s; beans, 16s to 18s; fine flour, 24s to 26s; extra fine, 27s to 30s.

**Doncaster, Saturday.**—English wheat trade practically at a standstill, no samples being on offer. The attendance was very small, and the foreign trade was inactive, though late prices were firm. In other things supplies were meagre and trade dull, and last week's prices were repeated.

**Dorchester, Saturday.**—Very quiet as well as sparsely attended market, and but very little doing in any kind of grain. Home-grown wheat supplies have been coming in steadily, and, or very near so, there being but very little if any now offering; and as to prices, we must quote them as about the same. Barley about maintains late values, but was certainly no dearer. Oats about hold their own from scarcity, from 18s 6d to 22s being about a general run. Not much doing in maize, but flat was, if anything, rather firmer. Beans and peas bring full prices, as the supplies of home grown are nearly exhausted.

**Dublin, Friday.**—Foreign wheat very firm, but trade moderate at 18s 3d to 18s 6d; Australian, 18s 10d to 19s. Maize quiet and unaltered. American, 22s 3d; Plate, 21s 9d. Flour firm. Oats firm; black, 12s to 12s 9d; whites, 12s 6d to 13s 6d.

**Exeter, Friday.**—Trade dull. English wheat scarce and unchanged; foreign rather weaker. Barley and maize 3d to 6d dearer. Oats firm. Flour unaltered. English wheat, 3s to 4s; super fine flour, 25s to 27s; fine, 22s to 25s.

**Glasgow, Wednesday.**—The trade during the week has been quiet, with a limited business doing, and prices of breadstuffs have been rather the turn in favour of buyers. Maize, being in more plentiful supply, has been rather easier in price. Wheat remains steady, and foreign oats, owing to fair arrivals, have been the turn in buyers' favour. Home oats, owing to scarcity, are firmly held. Other articles remain unaltered. There was the usual attendance to-day at our Corn Exchange. Wheat and flour quiet, and unaltered on the week. Maize steady—mixed, 13s per 280 lb; round, 12s 6d to 12s 9d. Oats and barley unchanged. Beans firm. Pease unaltered. Oatmeal dull.—GIBSON AND CLARK.

**Gloucester, Saturday.**—No English wheat on offer. There was a better trade in foreign at fully 3d advance. Plate maize unchanged to 3d dearer; flat and Bessarabia unchanged. Barley 3d dearer. Oats scarce.—WATT, JAMES & CO.

**Grantham, Saturday.**—A poor attendance, with a limited supply of grain. Prices as last week.

**Hereford, Wednesday.**—A very small market, with absolutely nothing doing. Values remain unaltered. Wholesale quotations: Wheat, 3s 9d to 3s 10d per 62 lb; barley, 3s to 4s per 56 lb; Oats, 2s 6d to 3s 3d per 40 lb; beans, 4s to 8d per 65 lb; maize, 3s to 3s 3d per 60 lb.

**Ipswich, Tuesday.**—Wheat: An exceedingly small supply, and little or no trade. The nominal value of good reds is about 32s per 504 lb, delivered at Ipswich, and they are probably worth nearly as much at country stations. Oats scarce and firm at 21s 6d to 23s 6d per qr. Beans steady, 33s to 34s per qr. Maize, round, 3d per qr lower at 21s 6d; flat steady at 23s per qr. Linseed cakes firmer at £8 5s to £8 10s, and cottons, £5 5s to £5 10s per ton. Middlings were firm, but bran was quiet at £4 10s per ton.

**Leeds, Tuesday.**—Fine weather and weak American advices keep the trade on the easy side, reduced shipments and doubtful crop accounts from South Eastern Europe, however, induce holders of wheat to remain firm, so that practically there is no change in prices on the week, business ruling quiet. Maize slow at late rates. Beans and oats steady.—DUNN AND CO.

**Leeds, Friday.**—Small quantities of English wheat, which changed hands at yesterday's full

prices. Foreign wheats were plentiful, and with advices of further arrivals shortly rates favoured buyers. Foreign malting barley was in fairly supply, but not much doing owing to the high prices quoted. There was no change in feeding barley. Beans, peas, oats, and flour were in fair demand at late prices for finest descriptions.

**Leicester, Saturday.**—Buyers and dealers were fairly represented, but there were very short supplies of home-grown wheats, which met a dragging sale at 31s to 33s per 36 stones for reds, and 32s to 34s for whites; grinding barley slow, at unaltered rates; beans firm: fine, 23s to 25s per 36 stones.

**Lincoln, Friday.**—An exceptionally quiet market, trade being almost at a standstill. English wheats are practically exhausted; foreign were in good supply, and firm at unaltered rates. Feeding stuffs slightly dearer, but maize unchanged.

**Liverpool, Friday.**—At the market there has been a moderate attendance, but wheat meets a general improvement in demand, with a fair trade passing at 4d to 1d advance from last market day's rates. Flour—A quiet retail trade without change in values of either foreign or home-made brands. Maize—Mixed is quiet at 4d to 3d decline owing to fresh arrivals. Plate steady, with a fair demand at unchanged currencies. European grades are 4d lower with only a small inquiry. Barley—Malting steady, with a moderate business. Feeding steady, with more demand. Beans rather more inquiry, and firmly held at late rates. Peas very slow and occasionally rather easier. Oats firmly held at the quotations, but moving quietly. Oatmeal in slow request; no change in values. Oileake a very quiet trade at the quotations. Indian meal in improved demand at recent prices.—SEGAR AND TUNNICLIFFE.

**Maidstone, Thursday.**—Attendance at the market to day fairly good. The display of wheat samples not abundant, as stocks are running low as usual on the approach of harvest, sales were effected at about the same cost as last week. Barley is inclined to rather easier terms, and maize firm and inclined to a slight rise. Oats hardly as good value as recently. Beans or peas not in much request and move off slowly with no change in quotations. Not any alteration in tares, hemp, bran, or millst.

**Manchester, Thursday.**—English wheat unchanged; foreign was easier and occasionally 4d lower. Flour slow. Indian corn fully 1d lower on the week. Oats steady and unchanged. Barley scarce at late rates. Beans and peas command full rates. Bran, 4s, firm.

**Newark, Wednesday.**—Quiet market owing to the hay-making season. Wheat and beans a firmer feeling. Wheat, white and red, made 31s to 32s 6d; grinding barley, 22s to 24s; oats, white, 21s 6d to 23s; black, 21s to 22s; old beans, none; new ditto, 34s to 36s per qr.

**Newcastle-on-Tyne, Saturday.**—A quiet demand for wheats at our day's market, last week's price, however, was maintained. American maize ruled firm and slightly dearer. Plate, however, sold at last Saturday's quotations. Scotch oats dearer. Foreign unchanged. A fair demand for beans, and holders were firm at 6d advance on last week's prices. Peas remain unchanged.—J. POLLARD AND CO.

**Newport, Wednesday.**—There was very little business done in wheat. Other kinds of corn unchanged. Flour, fines, 24s per sack.

**Northampton, Saturday.**—Extremely poor attendance. Grain was in very small show, and practically no business was transacted; prices remained unaltered. Wheat, 31s to 32s; malting barley, 26s to 32s; new white oats, 22s to 22s 6d; new black oats, 18s to 20s; beans, 31s to 32s; peas, 20s to 35s; flour, 24s 6d to 28s 6d.

**Norwich, Saturday.**—There was hardly any wheat on offer at our market to-day, at former quotations. Fine weather prevails. Wheat, red, 32s to 32s 6d per qr, weight 63 lb per bushel imperial. Corn inspector's return for the week ending June 30, 1906:—Wheat, 918 qr, 30s 4d.—J. A. MILLS.

**Nottingham, Saturday.**—A limited attendance, farmers being busy with the hay. Only a very small supply of English grain, and no alteration in prices. Foreign market wheat met with rather more inquiry than about late rates. Maize had but a slow trade at last week's prices. Barley was 3d dearer, while oats were quiet.

**Nottingham, Saturday.**—Not a sample of English wheat offering; foreign held for slight advance. Grinding barley steady; oats and beans in small supply and prices in sellers' favour.—ROBERT HUBLE.

**Oxford, Saturday.**—The market was very poorly attended, and the demand generally ruled dull. Wheats were foreign, attractive, and values moved slightly in favour of buyers.

**Peterborough, Saturday.**—We had mostly fine but by no means forcing weather during the past week. Two or three samples of wheat at

# MARKET SUPPLEMENT.

iii

market made about last week's prices. Scarcely anything doing in spring corn, values nominally unchanged.—**Thomas Hill and Son.**

**Plymouth, Thursday.**—Market very slack. Wheat unchanged; maize ditto; oats rather firmer; Barley 1½d dearer.—**ORLANDO DAVIS AND CO.**

**Preston, Saturday.**—A rather better feeling has been apparent during the week, holders of wheat remaining firm. There was only a moderate attendance at to-day's market, and prices were nominally unaltered. Flour unchanged. Quotations:—Wheat, white, new, per windle of 220 lb, 13s 9d to 14s 3d; ditto red, 13s 6d to 14s; oats, old, per bushel, 3s 3d to 3s 4d; oatmeal, per load of 240 lb, 26s to 26s 6d; beans, per windle of 220 lb, 16s 6d to 17s.

**Reading, Saturday.**—There was an improved feeling. With trade more brisk wheat realised from 32s to 35s; oats, 18s to 25s; barley was scarce and dear, fetching 28s to 32s; old beans, 36s to 40s. Nothing doing in peas. Hay advanced 5s per ton all round.

**Retford, Saturday.**—Very little wheat, and trade dull. Prices about as usual, white making 38s 6d to 31s; red, 30s 6d to 30s 6d per qr. English beans 40s well, and 6d dearer on the week, being worth 33s to 33s 6d per 38 stones. No change in the value of maize; round made 24s, and flat 25s per 31 stone. Oats were again a small show, and a good trade, white selling at 23s to 24s, and black 21s to 22s per 24 stones.

**Ripon, Thursday.**—Small show of samples and little business passing. Prices:—Wheat, 29s 6d to 30s; wheat, foreign, 32s to 35s 6d; grinding barley, 23s 6d to 24s 6d; ditto, malting, 27s to 29s; oats, 21s to 23s 6d; maize, round, 23s to 24s; flat, 25s to 26s per qr.

**Sheffield, Tuesday.**—With the consumption very small the demand was of a retail character, and little business was transacted. The supply of English grain is very small, but with little inquiry prices were practically unchanged from those of last week. Quotations:—Wheat, white, 32s to 33s; ditto, red, 31s 6d to 32s 6d per 504 lb; oats, black, 21s to 21s 6d; ditto, white, 22s 6d to 23s per 336 lb; peas, grinding, 28s to 28s 6d; ditto, blue, 5s to 7s per 504 lb; beans, English, 36s 6d to 38s 9d per 532 lb; barley, grinding, 24s to 26s; ditto, malting, 28s to 28s per 448 lb; Indian corn, small, 24s to 24s 6d; ditto, Plate, new, 22s 3d to 22s 9d; ditto flat, 24s 6d to 25s per 80 lb.

**Shrewsbury, Saturday.**—Wheat, 13s 3d to 13s 9d per 225 lb; old oats, 14s to 15s per 225 lb; peas, 13s to 14s per 240 lb; beans, 14s 6d to 15s 6d per 240 lb.

**Stamford, Friday.**—Small attendance. Trade very quiet. Wheat, 31s to 32s; oats, 21s to 22s per qr. No inquiry for other grain.

**Stockton, Wednesday.**—There was no English wheat showing. The foreign wheat trade keeps quiet, and prices slightly easier. Oats firm, and maize a little easier.

**Sunderland, Saturday.**—Farmers being engaged with their hay, there is little grain offering, and no change to note in the value of wheat, barley, or oats. Arrivals:—Coastwise wheat, 2 30s qr; foreign, nil.—**E. AND F. RICHARDSON.**

**Warwick, Saturday.**—Scanty attendance. As far as prices go there is no change to be recorded, but practically no business is passing, farmers seemingly having disposed now of their produce.

**Wisbech, Saturday.**—Very little business doing on the corn exchange to-day. Late rates maintained. Red wheat, 32s per 504 lb; oats, 21s to 23s per 336 lb. Crops promising. Weather very favourable.—**JAMES FLETCHER.**

**Wolverhampton, Wednesday.**—Small attendance and very little business passing. Quotations were same as last week:—New wheat, 14s per 216 lb; flat corn, 25s; English beans, old, 13s 6d, new, 13s; oats, old, 18s, new, 15s.

**Workington, Wednesday.**—Small attendance. Wheat, white, 30s to 31s; ditto red, 29s to 30s; barley, malting, 28s; ditto grinding, 25s; oats, white, 22s to 24s; ditto black, 20s to 21s; flat maize, 24s to 25s; ditto round, 25s to 26s per qr.

**Yeovil, Friday.**—English wheat scarce, and made from 3d to 6d per quarter more money. Foreign in buyers' favour. Grinding barley selling more freely at last week's prices. Flat maize firm. English wheat, white, 28s to 32s 6d per qr; secondary, 28s to 29s; red wheat, 20s to 23s; foreign wheat, 32s to 34s; grinding barley, foreign, 18s 4½d; English, best, 25s to 27s 6d; secondary, 22s to 24s; oats, English, white, 21s 6d to 22s 6d; black, 21s to 22s; Irish, white, 21s 6d; black, 18s 9d; maize, round, 21s; flat, 22s to 23s; rye, 24s to 26s; beans, winter, 34s to 36s; spring, 35s to 37s; tares, winter, 5s to 6s; spring, 6s to 7s. Flour, quiet trade on the basis of 23s 6d for fines. Milling offals in good request from rates.

**York, Saturday.**—There was only a small tending on account of farmers busy haying.

Wheat sold at about 30s per qr. Oats, beans, peas, and maize were unchanged.

## FOREIGN.

**Hamburg, Saturday.**—Barley report: There are very satisfactory prospects about our new crop, and it is generally expected a full average crop will be reached, whilst the quality principally depends upon the weather at harvest time; so far it has been as favourable as could be wished. In Austria and Hungary prospects remain good, and in the latter country the barley is nearly ripe, so that cutting will commence next week; unfortunately the weather has turned unsettled, which, of course, will do harm.—**FRANCIS M. TH. DUNNE.**

**Hamburg Saturday.**—With the exception of a rainy day, we had fine sunny weather. Cutting of wheat has commenced; it promises to turn out a fine crop. Other cereals are also making satisfactory progress towards maturity. The crops are strong in the stem, and were able to withstand the heavy rains. Market quiet for all descriptions of grain without material alterations in values. Wheat not much inquired after. Fine Holstein and Mecklenburg has been sold at 30s 9d to 31s per 504 lb, f.o.b., and is still offering at this price; but there is not much left. Russian, Dniebian and River Plate is held at 27s 9d to 30s. New red winter No. 2 July-August from Baltimore at 27s to 28s. No. 1 Durham wheat Duluth inspection September-October, 28s 6d per 480 lb c.i.f. Hamburg. Russian rye in good supply, 9 10/15 Odessa. Nicolajeff is selling at 22s 6d, August shipment new crop is offering at 22s 3d, 9 15/20 alfalfa at 23s per 480 lb, c.i.f. Hamburg. Reports about the growing crop of barley in this country continue satisfactory; in Hungary there is not a heavy crop, but the plants are strong, and the ears well filled; cutting in the western districts will commence next week, and in the eastern districts a week later. Old stocks are quite exhausted. Feeding barley in fair demand, 60/61 Kg South Russian is selling at 17s 3d to 17s 6d per 400 lb c.i.f. Hamburg. Maize firm. River Plate and Danubian July-August is selling at 20s 6d; American mixed at 21s to 21s 3d per 480 lb c.i.f. Hamburg.—**JOHN TATLOCK.**

## CORN STATISTICS.

**Imports of Foreign and Colonial Corn.**  
Statement of the quantities of Foreign and Colonial Corn Imported into the United Kingdom in the week ended Saturday, July 14, 1906:—

|             | 1905.     | 1904.     | 1903.     | 1902.     |
|-------------|-----------|-----------|-----------|-----------|
| Wheat       | Cwts.     | Cwts.     | Cwts.     | Cwts.     |
| Wheat       | 2,410,100 | 1,761,900 | 2,046,227 | 1,393,688 |
| Wheat-flour | 141,300   | 171,600   | 312,035   | 436,211   |
| Barley      | 94,500    | 530,200   | 490,082   | 79,563    |

# TO-DAY'S MARKETS.

## THE CORN TRADE.

MARK LANE, MONDAY, July 16.

The market to-day was poorly attended, but the tone of business was not worse from last week. English wheat was scarce and firm. Foreign wheat was held with more confidence than might have been looked for considering the liberality of recent imports. Maize was decidedly firm for flat corn, but yellow and round sorts maintained previous prices with some difficulty. Barley was a firmer trade from Friday. English was extremely scarce, Russian was not abundant on spot, and Roumanian has sent us very little of late. But for the usual summer weakness of demand, the price of barley would have been definitely dearer. Oats were firmer for English, American, and New Zealand, but rather weak for Russian. Indian peas were occasionally obtainable at a slight decline. Beans were firm for all sorts.

## THE FLOUR TRADE.

MARK LANE, MONDAY, JULY 16.

There was a trifle more demand from bakers, and prices were well supported both for London and all country makes. The supplies are, however, somewhat in excess of an usual summer demand. American sorts lacked support, 24s 9d was about the best price paid. Hungarian did not go higher than 22s 6d, and for once undersells London top price. The offers of America to ship freely in August of new flour from winter wheat at 22s per sack naturally exert a powerful influence, and if the do not accentuate spot depression, the appear to limit hopes of recovery in the near future. Millers' offers to-day were decidedly firm, and with many mills not working between now and new crop deliveries there is some chance of middlings, bran and pollards going dearer soon. Meal in general never sells rapidly in July, but observers of this market feel justified in affirming that more is being consumed than in past years. Prices are well maintained for all the chief types.

## CLOSE OF THE MARKET.

THE MARKET CLOSED FIRMER THAN THE FINE WEATHER HAD LED HOLDERS TO EXPECT. THERE IS CERTAINLY NO DEPRESSION IN ANY BRANCH OF TRADE, THOUGH, OF COURSE, THERE IS A DEGREE OF SUMMER SLACKNESS IN INQUIRY.

## GRAIN AND FLOUR FACTORS REPORTS.

Flour.—Spring wheat flours unchanged, but winters for July shipment are offered at 9d per sack less on the week. Grain.—American corn is dull owing to liberal supplies of round corn, which is offered at 3d per boll lower. Scotch oats unchanged, but Manitobas, which are plentiful, are 3d to 6d lower. Feeding beans firm. Grinding beans held for 3d advance for July-August shipment. Barley steady. Poor demand for feeding-stuffs generally. Mill sales.—The difficulty in getting delivery of Thirls is most unusual at this season, and there is no difficulty in making higher prices. Bran remains unchanged and dull.—McKINNON AND McDONALD (Glasgow).

Offals.—Demand for bran fairly good; prices unchanged. Flour.—Quotations nominally the same; business, however, continues dull, and for most qualities very little doing.—GREENHILL BROS. (Belfast).

Wheat arrivals are large. Trade firm at full prices. Flour dull, unchanged. Maize and barley 3d. per qr. dearer. Oats steady, unchanged.—COVENTRY AND SHEPARD.

Milling Offal.—All offals are firm, with a good demand.—JOHN BAWCOMB AND CO.

Flour.—Trade to-day has been quiet but firm, at last week's full prices.—T. S. MEDILL AND SONS, LTD.

## THE BALTIC 1 p.m.

### STATE OF TRADE.

The market for cargoes is not without animation for new crop shipments. Prices are steady; certainly not more depressed from Saturday.

### BRISBANE DONE.

Wheat.—No. 2 Red Winter, 30s per 480 lb, August shipment (new crop); No. 2 Hard Kansas, 28s 9d per 480 lb, August shipment (new crop); No. 2 Manitoba, 29s 6d, per 480 lb, August shipment (old crop); No. 2 Hard Winter, 29s 6d, per 480 lb, August shipment (new crop); No. 2, Hard Winter, 29s 3d per 480 lb, September shipment (new crop); Roumanian Best, 6s 3d per 100 lb, prompt shipment; Roumanian secondary, 6s per 100 lb, prompt shipment; Kurrachee White (old), 5s 11d, per 100 lb, prompt shipment; Kurrachee White (new), 6s per 100 lb, prompt shipment.

Maize.—Argentine, 5s 3d per 100 lb, prompt shipment; Caucasian, 4s 8d per 100 lb, prompt shipment; Argentine, 20s 6d per 480 lb, prompt shipment.

Barley.—Californian, 25s 3d per 448 lb, September shipment (new crop); Californian, 25s per 448 lb, October shipment (new crop).

Oats.—Roumanian, 14s 9d per 304 lb, October shipment (new crop); Vologda, 15s 3d per 304 lb, August shipment (old crop).

Beans.—Syrian, 31s per 480 lb, prompt shipment.

Peas.—White Calcutta, 32s 6d per 504 lb, prompt shipment.

Linseed.—Calcutta, 41s 6d per 410 lb, prompt shipment; Argentine, 40s 6d per 416 lb, on passage; Duluth, 40s per 424 lb, August shipment.

Rapeseed.—Ferozepore, 45s 3d per 416 lb, July shipment; 45s per 416 lb, August shipment.

Cottonseed.—Egyptian, £6 8s 9d per 2,240 lb, July shipment.

Locust Beans.—Portuguese, £4 17s 6d per 2,240 lb, July shipment.

## TERM MARKET.

There is little purchasing for future delivery, but prices to-day may be quoted as follows:—

| Wheat |       | July delivery |   | 6s 8d per cental. |   |
|-------|-------|---------------|---|-------------------|---|
| "     | Sept. | "             | " | 6s 7d             | " |
| "     | Nov.  | "             | " | 6s 8d             | " |
| Maize | Sept. | "             | " | 4s 8d             | " |
| "     | July  | "             | " | 4s 7d             | " |
| "     | Nov.  | "             | " | 4s 8d             | " |

It will be seen that these prices in the cases both of wheat and maize may be said to amount to a prophecy that a period of some depression in September or October will be followed by recovery before the end of the year.

## POULTRY AND GAME.

Smithfield, Saturday.—Fair supply, but only a moderate demand. Surrey and Sussex fowls, 3s to 4s; Essex fowls, 2s to 2s 9d; Lincolnshire fowls, 2s to 2s 6d; Irish fowls, 1s 6d to 2s; goshawks, 5s to 6s; country ducklings, 2s to 2s 9d; Aylesbury ducklings, 2s 3d to 3s 3d; quails, 6d to 1s 3d; feathered pigeons, 7d to 9d; Bordeaux pigeons, 10d to 1s 1d; tame rabbits, 1s to 1s 6d; wild rabbits, 6d to 7d; live hens, 1s 6d to 2s each; Australian rabbits, 5s 6d to 7s per dozen.

## SEEDS.

London, Monday.—Market quiet beyond the usual demand for mustard and rape. Prices unchanged. The new trifolium, both English and foreign, is now appearing; there seems a bonafide crop of both, but growers' ideas are so far above buyers', consequently no business passing.—JOHN PICARD AND CO.

## MARKET SUPPLEMENT.

V

## EGGS.

**Thursday.**—Axminster: 8d to 9d per dozen Birmingham: 10 to 12. Brigg: 14 and 15. Devizes: 14 to 16. Driffild: 15 and 16. Evesham: 11½d to 18½d per dozen. Kidderminster: 14. Northtawton: 16. Penistone: 12 and 13. Penzance: 8d to 10d per dozen. Ripon: 13. Wetherby: 12 and 13.

**Friday.**—Altrincham: 10. Ashburton: 10d to 11d per doz. Barnstable: 12 to 14. Chester: 10 to 12. Camelford: 16. Crewe: 11 and 12. Dartmouth: 11d to 1s 1d per doz. Derby: 12 and 13. Helmsley: 14. Knutsford: 10. Leyburn: 14 and 15. Lincoln: 12 to 14. Lostwithiel: 16. Macclesfield: 10 and 11. Nantwich: 13. Northwich: 11. Oley: 11 to 13. Redruth: 9d per doz. Runcorn: 11. Stockport: 11. Tavistock: 11 to 13. Totnes: 11d to 1s per doz.

**Saturday.**—Appleby: 12 and 13. Berwick: 1s 1d to 1s 2d. Bridgnorth: 12 and 13. Carlisle: 11 and 12. Doncaster: 12. Grantham: 12 and 13. Howden: 13 to 15. Lancaster: 9 to 12. Malton: 12 to 14. Retford: 1s 6d to 1s 7d per score. Richmond (Yorks): 11 and 12. Shrewsbury: 12 and 13. Skipton: 13 and 14. Stokesley: 12 and 13. Whitby: 12 and 13. Worcester: 12. York: 12.

## BUTTER.

**Thursday.**—Axminster: 11d to 1s 1d. Birmingham: 1s 1d to 1s 2d. Brigg: 1s to 1s 3d. Carlisle: 1s 2d to 1s 3d. Driffild: 9d to 10d. Evesham: 1s to 1s 2d. Kidderminster: 1s to 1s 1d. Northtawton: 11d. Penistone: 1s 1d. Penzance: 8d to 10d. Ripon: 1s 6d to 1s 8d per 24 oz roll. Wetherby: 10d to 1s 1d.

**Friday.**—Altrincham: 1s 2d to 1s 3d. Ashburton: 1s to 1s 1d. Barnstable: 1s. Chester: 1s 1d. Camelford: 10d. Crewe: 1s 1d to 1s 2d. Dartmouth: 1s to 1s 2d. Derby: 1s to 1s 1d. Helmsley: 9d. Knutsford: 1s 2d. Leyburn: 1s to 1s 2d. Lincoln: 11d to 1s 1d. Lostwithiel: 10d. Macclesfield: 1s to 1s 1d. Nantwich: 1s. Northwich: 1s 1d. Oley: 1s 3d to 1s 6d per 24 oz roll. Redruth: 9½d. Runcorn: 1s 2d to 1s 3d. Stockport: 1s 1d. Tavistock: 1s to 1s 3d. Totnes: 1s 1d to 1s 2d.

**Saturday.**—Appleby: 10d to 1s; Berwick: 8d to 1s. Bridgnorth: 1s 1d to 1s 3d. Carlisle: 1s to 1s. Doncaster: 1s 1d to 1s 2d. Grantham: 11d to 1s 1d. Howden: 10d to 1s. Lancaster: 1s to 1s 1d. Malton: 1s. Retford: 1s 1d to 1s 3d. Richmond (Yorks): 10d to 11d. Shrewsbury: 10d to 1s. Skipton: 10d to 1s. Stokesley: 10d 11d. Whitby: 11d to 1s. Worcester: 10d to 1s 2d. York: 10d to 1s.

## CHEESE.

**Glasgow, Wednesday.**—Supply again liberal, with a sustained demand for Dunlops, which commanded 1s per cwt more for good grass lots. Smaller inquiry for Cheddars. Dunlops, 54s to 59s per cwt; Cheddars, 56s to 60s. Only a limited trade in Canadans.

**Highbridge, Tuesday.**—There were 22 tons of cheese pitched, and all were cleared, there being a large attendance of buyers. Best dairies realised up to 54s 9d per cwt; second dairies, 52s to 53s; and other dairies, 50s to 51s 6d. A few inferior lots failed to reach 48s. Cheddars made 63s to 67s; truckles, 60s to 61s 6d; doubles, 53s to 57s.

**Newport, Wednesday.**—About 8 tons pitched, and a good trade. Quotations:—Caerphillis, 48s to 58s per cwt; fancy dairies, 55s to 56s; truckles, 50s to 63s; Derbys, 64s.

## FRUIT AND VEGETABLES.

**Covent Garden, Saturday.**—A steady trade was transacted, good supplies of fruit and green-stuffs changing hands at the undermentioned prices. Quotations for English produce: cherries, 3s 6d to 12s 6d per half-sieve; grapes, 9d to 4s; peaches, 2s to 12s per dozen; strawberries, 2s 6d to 5s 6d per peck; ditto 5s to 7s per dozen punnets; melons, 9d to 2s 3d; figs, 1s 6d to 5s 6d per dozen; raspberries, 3s to 5s per dozen punnets; ditto, 1s to 2s per gallon; red currants, 2s to 5s 6d; black ditto, 5s to 6s; gooseberries, 2s to 4s per half-sieve; pineapples, 2s to 4s 6d each; tomatoes, 4s to 6s; lettuce, 1s 6d to 2s; cabbage, 2s 6d to 3s per tally; cucumbers, 4s 6d to 7s per tally; horse-radish, 9s to 12s 6d per dozen bunches; green artichokes, 1s 6d to 2s 6d; endive, 1s to 1s 3d per dozen; broad beans, 1s to 1s 3d; beet-root, 1s 6d to 2s per bushel; green peas, 1s 6d to 2s 6d per bushel; ditto, 3s to 5s 6d per bag; onions (green), 1s 6d to 2s per dozen bunches; mint, 1s to 1s 6d; sage, 1s to 1s 3d; turnips, 1s 6d to 2s 6d; carrots, 1s to 2s; radishes, 6d to 8d; parsley, 1s 6d to 1s 7d per dozen bunches; vegetable marrow, 3s to 3s 6d per dozen; cauliflowers, 7s to 8s 6d per tally; potatoes (old), 60s to 85s per ton; ditto (new), 4s 9d to 5s 6d per cwt.

| Pigs .....   | — .....   | — .....   | — .....   |

Milch cows, per head, £2 to £21.  
British arrivals include as follows:—Scotland, 1; Eastern Counties, 183; Midland, Home, and Western Counties, 612; Devon, 15; Ireland, —.

We note to-day a decrease of 230 in the number of beasts offered for sale here, compared with Monday last, the majority of the supply, as usual at this season of the year, consisting of grass-fed Herefords and Runts from the Midland Counties. Trade taken as a whole was of a firm and steady nature, anything choice selling readily; heavy descriptions, however, were a drag on the market. A small supply of Highland Scots were placed on the market and found buyers late in the day. The trade for fat butchering cows was slightly firmer, but fat bulls were very little sought after. A clearance is considered very doubtful.

The following are top quotations per 8 lb. (sinking the offal):—

|                 | To-day.           | Monday, July 17, 1906. |
|-----------------|-------------------|------------------------|
| s. d.           | s. d.             | s. d.                  |
| Scotch .....    | — .....           | — .....                |
| Devons .....    | — .....           | — .....                |
| Herefords ..... | 4 6 to 4 8 .....  | 4 4 to 4 6 .....       |
| Norfolks .....  | 4 2 to 4 4 .....  | 4 2 to 4 4 .....       |
| Runts .....     | 4 0 to 4 4 .....  | 4 0 to 4 4 .....       |
| Lincolns .....  | 3 10 to 4 0 ..... | 3 10 to 4 0 .....      |
| Irish .....     | — .....           | 4 0 to 4 3 .....       |
| Canadian .....  | — .....           | — .....                |
| Fat Cows .....  | 3 4 to 3 6 .....  | 3 6 to 3 8 .....       |

There was an increase of 950 in the number of sheep and lambs penned compared with Monday last. Trade opened briskly, but fell off as the day advanced. Nevertheless, up to the time of our report leaving, prices remained the same. There was a good inquiry for Scotch descriptions, these ruling firm, both in regard to tone and value. Irish were difficult to vend, even at a decline of 2d. per 8 lb. in value. With a fair average supply of lambs and a ready inquiry, trade ruled firm and steady, 2d. per 8 lbs. more money being easily obtained. The supply included 300 Scotch, 550 Irish, and 1,353 from the Eastern Counties.

Undermentioned quotations are at per 8 lb. (sinking the offal) and are for the best of each class penned:—

|                               | To-day.           | Monday, July 17, 1906. |

The cut trade was slow and the best on offer making from 5s 8d to 5s 10d per 8 lb (offal given in). No pigs on offer.

**London (Central), Monday.**—Fair supply. Average demand. Beef: Scotch, 4s 2d to 4s 6d. English, 3s 6d to 3s 8d; American, 3s 1d to 3s 4d. Mutton: Scotch wethers, 5s 4d to 5s 8d; ewes, 3s 4d to 3s 6d; English wethers, 4s 2d to 4s 8d; ewes, 3s to 3s 4d. Lamb: English, 5s 8d to 6s; New Zealand, 3s to 3s 6d. Veal, 3s to 4s 6d; pork, 3s 8d to 4s 2d per 8 lb.

**St. Ives (Hunts), Monday.**—Feasts, 2s 1; sheep and lambs, 2/03; pigs, 3s. Fat and store cattle and sheep, fair demand; fat and store pigs in good demand. Milch cows short; fair trade from £14 to £22; Beef, 7s 3d to 7s 9d; mutton, 8s 2d to 9s 11d; lamb, 9d to 10d; pork, 7s to 7s 3d.

## FOREIGN.

**Deptford, Monday.**—Beasts, 720. To-day's supply compared with Monday last showed a decrease of 111 head, and consisted entirely of shipments from the United States. Trade was of a firm and steady nature at an advance of 1d per 8 lb in value. The best on offer were quoted at from 4s to 4s 2; seconds, 3s 9d to 3s 11d per 8 lb (offal given in). On Saturday, 1,444 beasts from the United States and 299 from Canada were offered for sale, and met with a firm and steady trade. The best States on offer were quoted at from 3s 11d to 4s 1d; seconds 3s 9d to 3s 10d; Canadians, 3s 8d to 3s 10d; seconds, 3s 6d per 8 lb. (offal given in).

**Liverpool, Monday.**—More cattle in market. Demand fair, and last week's prices fully maintained. Fewer sheep and lambs; trade good for finished handy classes at hardening rates. Strong sorts also easier to sell, though prices were not notably different. Beef, 6½d to 4½d; mutton, 10d to 6½d; lamb, 9½d to 8½d per lb. At market: 703 cattle and 10,339 sheep.

## OIL SEEDS.

**Mark Lane, Monday.**—The market for linseed is rather dearer on the week. Other sorts of oilseeds are not altered in price.

| Linseed.        | per 416 lb. | Cottonseed.          | per ton.   |

## FEEDING STUFFS.

**London, Monday.**—As usual in July there is more demand for Linseed cake, and crushers have cleared. Offer some quantity during the past week to dealers for storing. Decorticated cotton cake and meal, with small supplies, continues firm. Cotton cake is also in better demand and rather dearer. The low price for dried grains induces buyers to make contracts for forward deliveries.

## POTATOES.

**Borough, Saturday.**—Good arrivals evidenced a slow sale. St. Malo and Jersey, 4s per cwt; English, new, 70s to 90s per ton; Dutch, 2s 4d to 3s per basket.

**Manchester, Saturday.**—Yorkshire warps, 8s to 9s; Cheshire, new, round, 6s to 7s; Kidney, 6s 6d to 8s per load; Scotch, 7s to 8s per load; Jersey, 5s 6d to 6s; Norfolk Hebrons, 6s 6d to 7s per cwt.

**Spitalfields, Saturday.**—Later arrivals were in better request. St. Malo, 4s to 4s 4d; Cherbou, 3s to 3s 6d; Jersey, 3s 6d to 4s; English whites, 3s 6d to 4s; reds, 3s 6d per cwt; Dutch, 3s per bag.

## LIVE STOCK AND MEAT TRADE REVIEW

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

### Trade in London.

For fat beasts of both prime and second quality trade was confined entirely to Monday, and with a slight decrease in the number on offer, consisted principally of consignments from the Midland, Home, and Western Counties, with a few Devons there being no arrivals from either Scotland or Ireland. Trade opened and continued throughout the day of a slow nature, but steady in regard to value, all sales being governed by the previous week's currencies; a few Hunts were offered for sale, and sold early in the day at good money; whilst heavy Lincolns were very unsaleable, even at a decline in value. No store cattle were placed on the market. On Thursday, as usual, trade was confined to fat bulls and rough cattle, and was of a very sluggish nature; nevertheless, late rates governed all transactions.

At the Foreign Cattle Market, Deptford, markets were held, as usual, on Monday, Wednesday, and Saturday, the majority of the beasts arriving from the United States. Trade commenced of a firm and steady nature, and though of a slow nature on Wednesday maintained Monday's prices, becoming firmer on Saturday at an advance in value. The total number of beasts on offer was 3,589, as against 4,321 during the preceding week, consisting of 600 British (decrease 20) and 2,989 foreign (decrease 1,215), these latter comprising 2,567 from the United States and 419 from Canada. The following were the top rates obtained per 8 lb. (sinking the official):—90 to 95 stone Herefords, 4s. 4d. to 4s. 6d.; 90 stone Norfolk, 4s. 2d. to 4s. 4d.; 95 stone runts, 4s. to 4s. 4d.; 100 stone Lincolns, 3s. 10d. to 4s.; 90 stone States, 3s. 10d. to 4s.; 95 stone Canadians, 3s. 8d. to 3s. 10d.; 90 stone fat cows, 3s. 4d. to 3s. 6d.

The sheep trade, which was confined to the Islington market, for both wethers and ewes was of a fairly steady nature, salesmen experiencing no difficulty in maintaining late values, the same remark is also applicable to Scotch descriptions, but not so with the Irish sheep, these were somewhat difficult to vend. On Thursday trade was of a dull and dragging nature for all descriptions of wethers: ewes, however, were firm. The lamb trade on Monday was a disappointing one, sales having to be forced even at a decline of 2d. per 8 lb. in value, but on the second market day of the week it became firmer. At Deptford no sheep were shown. The total number penned was 10,450 as against 9,979 during the preceding week. Best pens made per 8 lb. as follows (official given in):—7½ to 8 st. Downs, 5s. 8d. to 5s. 10d.; 9 st. ditto, 5s. 6d. to 5s. 8d.; 10 st. half-breds, 5s. 2d. to 5s. 4d.; 10 st. Irish, 5s. to 5s. 2d.; 10 st. Down Ewes, 4s. to 4s. 2d.; 11 st. half-bred ditto, 3s. 10d. to 4s.; 5 st. fat Down Lambs, 6s. 10d. to 7s.; 6 st. half-bred ditto, 5s. 8d. to 5s. 10d. per 8 lb. (official given in).

Calves were in good supply and met with a firm and steady trade, the best making from 5s. 8d. to 5s. 10s. per 8 lb.

No pigs on offer.

### Trade in the West.

The markets continue to be glutted with stores of a decidedly plain description, for which there is a quiet sale; graziers, with the dry spell of hot weather we are having, being very chary about making purchases of this class of stock, though there is no such hesitation about the better descriptions, which, from being none too plentiful, are quickly caught up on, on the whole, satisfactory prices.

Very few milch beasts just now make over £20 or £21, and it takes a real good one to do that, a more average range for the most servicable milchers at present on the market being from £16 up to about £19. Below this figure there are any number offering at the different centres, but they are mostly distinctly "plain," and can be had from £15 down to as low as £8 or £9 for those on the point of being turned out.

Young stock, unless of distinct promise, have recovered but little in price, and though occasionally a few yearlings, as well as storks, that are fancied bring fairly satisfactory prices (from £6 up to £10 or £11), the major portion meet a very poor inquiry indeed at disappointing values.

There is nothing very special in any of the grazing cattle we have come across of late, but where animals show both quality and condition there is little difficulty in finding buyers at prices ranging from about £24 up to £28 per pair (which is just now an outside quotation), and the more ordinary runs from £18 to £22, though should the drought continue, there will certainly be a further decline in present values, and owners of this class

of stock are preparing themselves for such a contingency.

Store sheep are finding a very satisfactory market, and those who consider themselves competent to express an opinion on the subject do not hesitate for a moment to say that they consider flockmasters, who have sold at the ruling prices, have done the right thing, as the keep problem is not a question to be ignored where a large herd of sheep is concerned. And they consider the course all the wiser seeing what a good return they are getting for their wool, even if the sheep have not produced the outside farthing that had been expected. But when ewes make from 46s. to 53s. apiece, and lambs 34s. to 40s., things are not so very bad after all. Calves for rearing are also keeping steady, and there is, so far, but a very trifling decline in store pigs.

The 17 trade is keeping fairly firm for all the ripest grass-fed beasts now coming, whether steers or heifers, which are making quite 11s. 6d. per score for the market weights, though we know the more ordinary runs are by no means so saleable, despite the fact that they can be bought from 1s. to 2s. per score under what the prime grades bring; cows only making 9s. to 10s., and coarser bullocks of heavy weights 8s. to 8s. 6d. Veal is scarcely so buoyant as it was; and only the very ripest calves bring 8d. per lb., and plenty of the more ordinary ones no more than 7d. to 7½d.

The quality tegs keep up very well in price, 7½d. to 8d. (shorn); but ewes, except very young sheep and nicely done, are a much slower trade at not more than 7d. to 7½d., older sheep selling at 6½d. Down lambs and half-breds are making late currencies—10d. to 10½d.; but anything lacking finish meets a dragging trade at not more than 9d.

Porkers keep steady at 10s. per score; but the coarser weights are against sellers, from 8s. 6d. to 9s. 6d. per score being the range for hogs, and coarser weights, 7s. 6d. to 8s.

### Trade in Scotland.

The number of fat cattle on offer this week has been about an average. Trade has been rather quieter, and prices have fallen about 15s. per head. Sheep have been shown in fair numbers. These have also met a quieter trade at nearly 2s. per head down. There was a very large supply of lambs, for which a decidedly worse market was got at prices about 3s. a head less than the exorbitant prices of last week. Fat calves made rather less money, while pigs were just about the same. There were rather more store sheep shown, mostly of a very indifferent class. Anything good got easily and well sold, but part of the secondary sheep were left over. For the time of year there was a large supply of store cattle. The best descriptions got well sold out, but a portion of the secondary two-year-olds and smaller storks were left over, prices in this department being slightly lower. Milch cows met rather a worse trade at a shade less money. Quotations:—Top price of cattle per live wt., 39s. 8d.; current, 35s. 6d. to 37s.; mutton, to 9½d. per lb.—JOHN SWAN and SONS, LTD.

### Trade in Ireland.

There was a better attendance of buyers at last Thursday's Dublin market, but the supply of stock was also increased, the cattle numbering 2,243, or 257 more than the previous market day, and the sheep 10,042 or 2,118 more. The increase in buyers did not seem to do much good, as business generally was slower. The cattle market opened with a fairly good inquiry for choice sorts at prices about on a par with last week, but subsequently business eased down, and the prices of the early hours could not be maintained. Things got worse as the day wore on, and towards the close of the market, cattle could only be disposed of at concessions a good deal under the figures of the morning, the fall being about 10s. per head. More business was done in the shipping way than on the previous market day. Some exceedingly fine cattle were offered for sale, but the best did not make the top price of last market, though the average returns do not show much change. The live weight price for best bullocks and heifers ranged from 32s. 6d. to 34s. 6d. per cwt. The approximate dead weight prices were:—Prime ox and heifer beef, 55s. to 60s. per cwt.; good second-class beef, 50s. to 54s.; and inferior from 44s. to 47s. 6d.

The trade in mutton was of a very cautious character from start to finish. London buyers found the prices too near in touch with those at home to speculate largely, and local butchers were able to buy on easier terms. Good fat lambs met with a steady trade, but other sorts had a

slow and tedious sale at lower prices. Wether mutton made from 7d. to 7½ per lb.; ewe ditto 6d. to 7d., and inferior sheep from 5½d. upwards. Heavy hoggets made from 45s. to 56s. each; and small to medium ditto from 33s. to 34s. Small lambs sold at from 18s. to 24s., and fat lambs from 28s. to 40s. each. A good number of pens of coarse sheep remained unsold at the close of the market.

Veal of prime quality sold at from 7½. to 7½d. per lb., and very prime made up to 8½d. per lb., while other sorts were very irregular at from 4½d. per lb. upwards.

A fair supply of dairy cows on offer, with slow demand, dairymen requiring considerably less cows to supply their customers on account of the vast improvement in pasture lands of late. A few choice freshly-calved cows met with a fair inquiry at late rates—£17 to £20 each; medium and coarser cows hard to sell at £16 down to £9. Stores in good request at much improved prices, and likely to continue at high rates while the grass is so good as it is.

The supply of pigs was moderate, with a good attendance of buyers, but trade was cautious and prices hardly up to last week's. Choice light-weight pigs in the up to 5½ and 5½, and a heavier sort from 52s. to 54s. per cwt. Coarse pigs from 33s. per cwt. upwards.

### LONDON.

Islington, Thursday.—The supply of beasts consisted chiefly of fat butchering cows and bulls, middling quality predominating, for which trade ruled sluggish, with a downward tendency in value, though barely sufficient to quote. Few prime quality cattle offered met no inquiry, and were unsaleable. Top prices paid per 8 lb.: Fat cows, 3s 4d to 3s 6d; fat bulls, 2s 10d to 3s 2d. An increase of 4½ in the number penned in sheep market, supply consisting entirely of Downs and half-breds. Trade for wether sheep ruled dull, at a reduction in some cases of fully 2p per 8 lb. Ewes, however, met a fairly good inquiry, last Monday's quotations being well maintained. A good demand for lambs, except for heavy descriptions, salesmen both asking and obtaining a slight advance on late values. Best pens made, per 8 lb., as follows: 8 stone Down sheep, 5s 8d; 9 st ditto, 5s 6d; 10 st ditto, 5s 4d; 10 st half-breds, 5s 2d to 5s 4d; 10 st ewes, 4s 2d; 5 st fat grass lambs, 7s; 6 st half-bred ditto, 6s. Calves in larger numbers, and met a firmer trade. Quotations per 8 lb. sinking the official: Beasts, 2s 10d to 3s 6d; sheep, 3s 8d to 5s 8d; calves, 3s 10d to 3s 6d; lambs, 4s 8d to 7s. Total supply: Beasts, 20; sheep and lambs, 2,810; calves, 70; milch cows, 5.

Central Market, Friday.—Fair supplies, and trade decidedly better; beef and mutton firmer.—English beef, 3s 4d to 3s 8d; Scotch sides, 3s 10d to 4s; shorts, 4s 2d to 4s 6d; Deptford and Liverpool killed, 3s 3d to 3s 7d; refrigerated hindquarters, best, 3s 6d to 3s 9d; ditto, seconds, 3s to 3s 2d; ditto, forequarters, 2s to 2s 4d; inferior beef, 2s 4d to 2s 8d; mutton, Scotch wethers, 5s 4d to 5s 8d; ditto, tegs, 5s 10d to 6s; ditto, ewes, 3s 4d to 3s 8d; English wethers, 4s 4d to 5s; choice small, 5s 4d; ditto ewes, 3s 4d to 3s 10d; foreign sheep, 4s to 5s; English lamb, 5s 4d to 5s 4d; veal, 3s 4d to 4s 8d; English pork, 3s 10d to 4s 4d; Dutch ditto, 3s 8d to 4s per 8 lb.

### COUNTRY.

Ashford, Tuesday.—Trade dull all round. Best beef made up to 4s 6d per stone; choice Down mutton up to 6s; and best Kent wethers 5s to 5s 4d; barren sheep, 3s 6d to 4s; pork made 4s to 4s 4d; and six-weeks old pigs fetched high prices, going up to 14s.

Basingstoke, Wednesday.—At Raynbridge and Son's sale yard there was a good attendance to meet a supply of 42 fat beasts, 35 calves, 147 pigs, 500 fat sheep and lambs, and 71 head of dairy and store cattle, for which the following prices were realised:—Fat Devon steers made from £17 to £22 10s; cows, £15 to £16 10s; Shorthorn steers, £16 10s to £19 15s; cows, to £16 10s; Polled steers, £17 10s to £20 10s; fat calves, 60s to £5; smaller ditto, 22s to 55s; fat porkers, 28s 6d to 41s; stores, to 27s 6d; dairy cattle, £11 5s to £20 10s; eighteen-months-old Down wethers and ewes made from 52s to 58s 6d; half-bred ditto, 48s 6d to 50s; cross-bred Scotch, 36s; oil Down ewes, 34s to 40s; Exmoor ewes, 36s to 27s; Cheviot ewes, 31s; ditto tegs, 40s; six-months-old Down lambs, 40s to 50s 6d; 2nd class and small, 36s to 36s; cross-bred Scotch lambs, 28s to 32s 6d. The consignments of fat beasts included some very good Devon steers, Shorthorn steers and heifers, and Polled steers, for which there was a dull trade without much change from last week's prices. The best quality fat wethers and young ewes and fat lambs met a good inquiry at last week's figures, second class lambs were lower, and a very dull trade for old fat ewes, and sales could only be made at a considerable reduction in price.

### OIL AND GAS ENGINES

are growing more and *arer* in demand, and would be still further "boomed" if regularly advertised in the "Mark Lane Express."

## MARKET SUPPLEMENT.

vii

There was a larger supply of milch cows on offer, with an improvement in prices, the best class cows being in demand. Store cattle trade continues very slow. Fat calves met a clearance at late rates. Fat porkers were in short numbers, and sold at last week's prices; store pigs continue a good trade, with satisfactory returns. Ruling values:—Best beasts, 61d to 7d; second class do., 6d to 6½d; bulls, cows, and inferior, 5d to 5½d per lb; best fat sheep, 8½d to 9d; second class do., 7½d to 8d; old ewes, rams, and inferior, 6d to 7d; choice fat sucking lambs, 10d to 10½d per lb; fat calves, 6½d to 7½d per lb; fat porkers, 9s to 10s per score.

**Berwick, Saturday.**—There was a falling off in the number of beasts, the total, 341, being over 200 short of that of the previous week. Attendance of farmers and buyers small, quality of stock fair, and trade dull. Calves, 45 10s to 45 10s; heifers, 47 10s to 49 10s; stirs, 47 10s to 49 10s; two-year-olds, 41 10s to 43; three-year-olds, 42 10s to 44 10s; Shorthorn bulls, 21s.

**Birmingham, Thursday.**—Small supply of beasts, sheep, and pigs; trade good for pigs; fair trade for beasts and sheep. Quotations: Beef, 5d to 6½d per lb; Herefords, 6½d per lb; mutton, 6d to 8½d, per lb; lamb, 9d to 9½d per lb; veal, 6d to 7d per lb; bacon pigs, 10s 3d per score; cutting pigs, 10s 5d to 10s 6d per score; sows, 7s 6d per score.

**Bristol, Thursday.**—There was average business in beef, which was in fair supply at late rates. Mutton was plentiful, as was lamb, but inquiry was not brisk, and only moderate trade was done, without any alteration of prices. Pigs were not numerous, and with limited demand quotations for porkers fell to 10s 6d per score.

**Calne, Friday.**—Prices of pigs in lots of not less than ten, on rail within 100 miles, 3d. per score extra for delivery by road. Six se. to 8s. 10 lbs., net deduction for fat, 10s. per score; 8 se. 10 lb. to 9 se. 10 lb., net over 2½ in. 10s. per score; under 10 se., not over 2½ in. 9s. 6d. per score; under 11 se. 10 lbs., not over 2½ in. 9s. 6d. per score. Pigs outside these limits at their value.—C. & T. HARRIS & Co., Ltd.

**Canterbury, Saturday.**—There were a few lots of sheep sold to-day, but the supply was extremely limited, and the attendance small.

**Carlisle, Saturday.**—There was a good show of useful cattle, between 500 and 600 being forwarded. A number of buyers put in an appearance, and a fair trade was done at 47 10s to 49 10s for wintering heifers, and up to 46 10s for heifers for feeding off.

**Chster, Thursday.**—The supplies were small, but in excess of the demand. Farmers were thinly represented, and most of the trade was done by dealers. Prices were practically unchanged. Milch cows were quoted at 44 to 42; calves, 45 to 43; barren cattle, 40 to 47; stirs, 46 to 49; and heifers, 49 to 44.

**Colchester, Saturday.**—Fat bullocks not quite so good as last week. A few ripe cattle sold fairly well. A good entry of fat sheep and lambs, which sold freely. Good sheep and lambs wanted. Pork trade dull. Heifers down calving sold fairly well. Trade for store cattle slightly better. Beasts made 41s to 42 10s; sheep, 57s to 53 6d; fat lambs, 44s to 38s; hogs, 50s to 40s; store cattle, 48 15s to 45 11s; fat calves, 44 to 42 10s.

**Derby, Tuesday.**—A fair attendance. Sheep and lambs dearer than last week, there being a general scarcity of better class animals. Beasts, 54d to 6½d; calves, 8d; sheep, 7½d to 9d; lambs, 10d.

**Doncaster, Saturday.**—Smaller supply of cattle than usual, but a small attendance, and trade dull. Milch beasts, 47 10s to 42; bullocks, 42 to 47; heifers and drapes, 41 to 44; stirs, 47 to 49 each. Barely an average show of sheep, which made late rates. Shearlings, 40s to 48s each. A small supply of lambs, which ranged from 31s to 32s each.

**Dorchester, Saturday.**—Moderately good supplies of stock, both fat and store, came to hand at Messrs. Duke and Son's, and also at Messrs. Symonds and Sampson's sale to-day, but there was only a limited offer of sheep, anything useful in the store line fully maintaining late values, but secondary grades continued a dragging trade at low rates. Milch beasts, as a general range, made from 41s to 49s, seconds finding a restricted demand at prices ranging from 41s down to 41s or 42s, many of these being of a low sale at from 42s to 45s or 46s as a general rule, and very plain lots from 41s to 49s, for which there was but a small sale. Fat bullocks, of which some useful animals were included, met a steady to fairly firm demand from 41s 5s to 42 10s each (or 10s 6d to 11s 6d per score), others selling from 41s to 48s for cows (or 9s to 10s). Mutton inactive, except for choice wethers, these making up to 8d per lb, though a more general quotation may be given as from 6½d to 7½d. Lamb found buyers at from 9d to 10d.

**Dublin, Thursday.**—Numbers in market: Beasts 2,243, increase 257; sheep 10,942, increase 2,118; calves 46, increase 7. With a further increase in number of cattle, buyers secured their wants at slightly better rates, and except for very choice heifers a reduction had to be made in order to effect a clearance. The demand for sheep and lambs was well sustained for all suitable lots, though a reduction had to be made on last week's prices, as buyers were most cautious seeing the larger supply to hand. Cattle—live weight (best), 31s to 33s per ewe; exceptional, 34s per ewe; secondary sorts, 27s to 30s per cwt. Mutton—deadweight, 6d to 7½d per lb.—GANLY, SONS, and Co.

**Edinburgh, Wednesday.**—There were larger supplies of store sheep and cattle, but trade was slow. Quotations:—Horned bullocks to 41 10s; polled bullocks to 41 10s; stirs, 40 10s; best Shorthorns, to 42s; and Ayrshire cows to 41 10s; grey-faced sheep, 38s; Cheviots, 32s; black-faced sheep, 21s; and half-bred hogs, 33s 6d.

**Exeter, Friday.**—255 beast; good demand for best quality. Steers and maiden heifers up to 11s 6d; cows, 10s to 10s 1d; 1,025 sheep; quieter trade; mall hogs, 8½d to 9d; large, 8d; ewes, 6d; lambs, in wool, 10d to 11d; shorn, 9d to 9½d; all at best cleared. There were several keeping sheep on offer, but no demand. Fifty-one calves, 7½d.

**Glasgow, Wednesday.**—In view of Glasgow holidays business was slower and prices less firm. Large arrivals of Canadian and States cattle were against the home trade. Top Scotch cattle, 62s to 64s; secondary, 58s to 60s; top Irish, States, and Canadian, which embraced many choice animals, fetched 52s to 53s per ewe. Sheep steady at 10d to 10½; best lambs, 10½d to 11d per lb.

**Hereford, Wednesday.**—Store cattle were not so much in evidence as last week, and only sold slowly. Fat beasts went fairly well, best bullock and heifer making from 10 to 6½d per lb, cow beef 4½d and bull beef 4d. The calf trade was good. Veal made 7d per lb. A good supply of sheep sold briskly, fat wethers realising 8d to 8½d per lb, fat ewes 6½d. Fat lambs were in good demand at 8d to 9d per lb. The pig trade was firm, porkers at 5d per lb, and store pigs were dear.

**Leicester, Saturday.**—Restricted consignments of home-bred bullocks, and trade was sluggish, and prices in favour of buyers. Milch cows, 44 to 47; shorthorn bullocks, 41 to 44; Irish cattle, 42 to 45 10s; Welsh stock, 48 to 49; young stock, 45 to 47; calves, 15s to 35s each.

**Lincoln, Friday.**—Cattle were in plentiful supply, and business was moderate. Yearlings, 48 to 40; milch cows, 46 to 42; lambs, 33s each.

**Lynn, Tuesday.**—Small show of store beasts, and scarcely any trade, at 46 to 43 each. Fat beasts in smaller supply, prices ranging from 6s 9d to 7s 3d per stone. Average supply of sheep, trade very slow, stores making 40s to 46s each. Fat sheep, 8s 9d to 9s per stone. Store lambs, 25s to 35s, fat lambs, 25s to 40s each.

**Manchester, Friday.**—Beef: firsts, 5½d; seconds, 4½d to 5d; thirds, 3½d to 4d. Mutton: firsts, 8d; seconds, 7d to 7½d; thirds, 6d to 6½d. Veal, firsts, 6½d; seconds, 5½d to 5½d; thirds, 4½d to 4½d. Lamb: firsts, 8d; seconds, 7d to 7½d.

**Newcastle, Tuesday.**—Heavier supply and prices favouring buyers. Prime heifers, 8s to 8s 3d; second-class, 7s 6d to 7s 9d; steers, 7s 9d to 8s; coarse and inferior, 6s 3d and 6s 9d; pigs, 6s to 7s 3d per stone; sheep, 5d to 9d; lambs, 9d to 10d; veal, 6d to 8½d. At market:—Cattle, 1,858; sheep and lambs, 7,135; calves, 85; pigs, 390.

**Norwich, Saturday.**—Fat beasts were again offered in limited supply, and met with a quiet trade at 7s to 7s 6d per stone of 14 lb. The show of store cattle was exceedingly small, and was composed of stock of entirely secondary descriptions. Very little business was doing, and not sufficient to justify quotations. There was a good supply of store sheep and lambs, and trade was quiet at about late rates. Lambs made from 24s to 38s per head, and breeding ewes 44s to 49s. Fat sheep were offered in limited supply, and met with a dull sale at 8s 6d to 9s 6d per stone. Both fat and store pigs were in fair average supply, and a brisk trade resulted in a clearance. Values for fat pigs were largely maintained, prices averaging 6s 9d per stone; small stores ranged from 14s to 24s; big ditto, 30s to 50s; and sows, 50s to 70s a head.

**Nottingham, Saturday.**—Smaller supply of stock. Best in-calf cows made 41s to 42 10s; in-calf heifers, 41s to 41 10s; and inferior quality, 41s to 43s; two-year-old barren heifers and steers to 42 10s. Calves met with a slower trade, selling at 25s to 45s each.

**Preston, Wednesday.**—Good supplies of beef and mutton were forward, mutton being in good demand, and beef rather slow, although the best beasts made slightly more money. Cows and bulls, 5d to 6d; heifers and bullocks, 6d to 6½d;

lambs, 9d to 9½d; hogs, 8½d to 9d; ewes, 7d to 8d; tups, 6½d; fat calves, 6½d to 7½d per lb. Calves were in good demand.

**Sturford, Saturday.**—About an average lot of milch beasts, both as to number and quality. Values practically the same as before, at 44 to 45 to 48 per head. Very few grazing stock in the market, but there was little or no demand, steers and heifers making 45 to 42, and calves 40s per head.

**Romford, Wednesday.**—Large supply of fat beasts, principally of a middling description. Best, 44 4d to 44 6d; middlings, 4s to 4s 2d per stone. Calves in large supply, trade very bad at 7s 10d to 5s per stone. Sheep in average supply, trade slow. Best small sheep, 5s 8d to 6s; large, 5s to 5s 2d per stone. Ewes in average supply; trade about the same at 4s to 4s 2d per stone. Lambs in shorter supply, trade a little better at 6s 6d to 7s per stone. A few store beasts on offer met a very slow demand. Small supply of pigs, trade about the same.

**Sheffield, Tuesday.**—A moderate show of milch beasts, which met with a better demand than last week, good milch cows making 20 to 22 10s, and secondary qualities, 17 to 18 10s.

**Shrewsbury, Tuesday.**—Very small supplies, owing to farmers being busy with the hay harvest. Little demand for store cattle, but usual trade for fat stock. Quotations:—Beef, 6½d to 7d per lb; mutton, 6½d to 8½d per lb; lamb, 9d to 10d per lb; veal, 6d to 7d per lb; porket pigs, 10s to 10s 6d per score; bacon pigs, 9s to 10s per score. Numbers offered as follows:—Cattle 269, sheep and lambs 1,341, calves 71, pigs 185.

**Stockton, Wednesday.**—There were offered 181 cattle, 149 sheep, and 123 pigs. About the usual supply of best cattle, which met with a slow trade at 8s to 8s 3d per stone, whilst rougher kinds made 6s to 7s. Lambs sold at 10d to 11d per lb; ewes, 7d; tups, 6d; and young sheep 8½ to 9d. The pig trade was steady in consequence of smaller supplies, whilst prices were about the same.

**Thame, Tuesday.**—There was again a capital all-round supply of stock, the quality of the beef being better than late markets, and included several very choice Hereford beasts, which made from 22l to 23 15s. There was again an excellent demand, and a clearing trade throughout, although there is practically no demand for cows. Sheep were a particularly choice lot, and met a ready trade. Lambs scarce and dear, every lot being disposed of. Pork and veal sold readily.

**Tonbridge, Saturday.**—Messrs. Bond and Burrows sale comprised 74 fat beasts, 299 fat sheep, 60 fat and weaning calves, and 86 fat and store pigs. Fat oxen made from 41 10s to 42 15s; fat heifers, 41s to 42s; fat wethers, 48s to 58s 6d; fat ewes, 40s to 54s 6d; fat lambs, 28s to 40s; fat calves, 43s to 44 10s; weaning cows, 28s to 50s; bullocks, 44s to 48s; porkers, 28s to 42s; bacon hogs, 43 15s to 44 10s; store pigs, 12s to 24s.

**Truro, Wednesday.**—Fat bullocks, 55s to 60s per cwt.; barrenness and store bullocks, 40s to 45s; cows and calves 40 to 44 each; rearing calves, 20s to 44s; wethers, 7½d to 8d per lb; ewes, 5½d to 6d; lambs, 8½d to 9d; pigs, 15s to 32s; beef, 6d to 8d per lb; mutton, 6d to 8d; lamb, 9d to 1s; veal, 6d to 8d; pork 6d to 9d; bacon (uncured), 6d to 7½d; ditto (cured), 7d to 9d; pork (cured), 5d to 5½d. Number in cattle market:—Bullocks, 332; calves, 65; sheep, 306; pigs, 93; horses, 3. Business fairly brisk. Attendance very fair.

**Wolverhampton, Wednesday.**—Short supply, with steady demand. Quotations:—Beef, 5½d to 7d per lb; best mutton, 8½d to 9d per lb; lamb, 9d to 10d per lb; calves, 7d to 8½d per lb; bacon pigs, 10s to 10s 6d per score; porkets, 10s 6d to 11s per score; sows, 8s to 9s per score.

**Worsop, Wednesday.**—Moderate supply of beef, with a poor trade. Best beef, 6s 9d to 7s; secondary, 6s to 6s 9d per stone; best Southdown wethers and crossbreds, 8d to 8½d; ewes, 6d to 7d; lamb, 8d; veal, 8½d per lb.

## FOREIGN.

**Yorkhill, Monday.**—Large supplies of United States and Canadian cattle and sheep were on offer at the usual weekly sales, 1,120 head of cattle being penned. All the animals, with the exception of twelve, were from Montreal, and were landed in good shape and condition. There was a large attendance of buyers, but business during the greater part of the day was slow, the heavy supplies inducing buyers to hold off for reductions, which were obtained in the case of bulls as to the extent of 18s to 2s per cwt. and bulls from 2s to 4s per cwt. as compared with recent sales. Bullocks were numerous, and at all the stables nice ranges of light, medium, and heavy weights were shown. For bullocks of the better classes of useful weights and sizes a steady selling trade was experienced, prices ranging from 52s to 53s per cwt. dead weight, while rough and heavy qualities were slow to cash from 48s to 51s

### FEEDING STUFFS.

**London** Thursday.—Lineds has declined about 6d per qr during the week, but at the decline there seems to be more consumptive inquiry. Importers of Plate and Calcutta are still very reserved, but America continues to offer freely. London—spot, 41s 3d; afloat, 41s 3d; July/August, 41s 3d; August/September, 41s 3d. Rapessed rather firmer; still very little offered. July/August shipment, yellow Guzerat, 49s; brown Cawnpore, 47s 6d; brown Cawnpore, 45s 6d; Penang, 45s; Provost, 45s; Malacca, 45s; Java, 45s; Ceylon, 45s; Java, 45s; June, 42s 6d. Cottonseed has been quiet, but the close the tendency is rather downwards. London—July has been sold at £6 12s 6d; sellers now, £6 11s 3d; August offers at £6 12s 6d; November-January quoted £6 5s. Hull—spot and passage, £6 10s; July, £6 11s 3d; November—

—H. JONES LANGAR AND CO.

**Canterbury, Saturday.**—Trade not brisk. Kent fleeces 13½d; lamb wool, 9d; half-breds 14d; and Downs, 14½d to 15d per lb.

**Halifax, Saturday.**—In home grown wools tendency is against the buyer. Fine Down wools up to 16d; for Lincoln hogs 15d quoted—a distinct rise. North hogs 16d, and Yorkshire 1½d less. Merinos steady. Yarns firm, with satisfactory business.

**Nottingham, Wednesday.**—Fair supply, which met with a slow sale. Quotations:—Inferior to good hay, 65s to 75s; prime ditto, 80s to 95s; inferior to good clover, 65s to 75s; prime ditto, 85s to 100s; wheat straw, 50s to 55s per ton.

**London, Tuesday.**—The fourth series of London sales of Colonial wool commenced to-day, with catalogues comprising 7,775 bales out of an available total of 112,000 bales. There was a large attendance from all quarters, but the tone was rather hesitating. Compared with the close of last series merino wool sold at from par to 5 per cent. decline. Greasy crossbreds show no change, but scoured crossbreds and slips sell at from 5 to 7½ per cent. below May. Among Capes there was no change for combing wools, but short and inferior grades are 1½ to 2½ per cent. lower. The irregularity. The list was closed on the 2nd inst., when the fresh arrivals amounted to 176,265 bales (135,816 bales Australasian and 40,449 bales Cape). Deducting what has been forwarded direct, but adding the wools held over from last series, the

# Review of the British Corn Trade

## FURING THE PAST WEEK

*Written exclusively for the Mark Lane Express.*

Winter oats are being cut in the forward districts of the home counties, and some rye has been reaped in Essex. The wheat harvest will not begin in earnest before August 1 this year even in the south-east, but it is not so late as seemed likely a month ago. It will probably be mid-harvest about mid-August for wheat and oats, and even barley should with fine weather be secured before September arrives. The promise of the three crops is much better from a month ago, and the showers of the past week have done much good.

The "Agricultural Buff Book" (Cd 3,061), issued on the 21st, contains a memorable preface of seventy pages from the pen of Major Craigie. This introduction is practically a history of crop returns and cultivated areas since 1871, and is a masterly document, summarising the tendencies as well as chronicling the chief events of a period during which our cereal interests sank to their lowest state of depression—from 1879 to 1896—and have for the last nine years been manifesting a slight and hesitant, but still, on the whole, sustained improvement.

There are, of course, losses to arable to record. In thirty-five years the cultivated land in Great Britain has increased from a total of 31,120,000 acres to one of 32,280,000 acres, a clear win to agriculture of 1,160,000 acres, or perhaps a million sterling annually to our national wealth. On the other hand, arable has fallen from 18,210,000 acres to 15,080,000 acres, thereby increasing our dependence on the foreigner, and decreasing our reserves of healthy countrymen to speak with all too possible enemies in the gate. If the increased expenditure on the Navy could be set against the gain to consumers by cheaper corn is very doubtful if the thirty-five years have not witnessed an economic loss.

A most curious point which Major Craigie makes and is, as far as I can recall, the first to make, is that the decline in arable shows the strangest diversities. It amounts in a group of counties (synchronised on page xii. of the preface) to 30 per cent., and in another group to 10 per cent. Now it is clear that if the latter figure was that of areas exposed to the full competitive and import difficulties of the former area 10 per cent. only of losses is arable need be regarded as inevitable; in other words, substantial areas might yet be regained.

The Russian wheat crop is put by fairly good judges at 10 per cent. less than last year, the heavy rains of this month, following on a very dry and hot June, having represented exceedingly trying conditions to the crops. Some very heavy

yields of spring wheat on landowner's well-farmed estates will be the probable result if the weather from now till harvest is hot and fine. But such estates are a very small proportion of the total area under wheat in Russia. Assuming a 10 per cent. depreciation from 1905, crops will be as follows:—

|            |                            |
|------------|----------------------------|
| 1906 ..... | 71,100,000 qr. (estimate). |
| 1905 ..... | 79,000,000 qr. (return).   |
| 1904 ..... | 82,820,000 qr. (return).   |
| 1903 ..... | 76,470,000 qr. (return).   |
| 1902 ..... | 75,685,000 qr. (return).   |
| 1901 ..... | 53,268,000 qr. (return).   |

The 1905 wheat crop will be found at the end of the cereal year to have allowed of a full 19,000,000 qr. being exported. At this rate home wants will stand at 60,000,000, and the crop of 1906 will receive an exportable surplus of 11,000,000 qr. The Russian barley crop is said to be fully an average this season.

Prices at New York with the new wheat crop coming into liberal offer are watched with interest. The latest values cabled are as follows:—

|                                 |                  |
|---------------------------------|------------------|
| New winter wheat delivered..... | 28s. 6d. per qr. |
| " " " within a week.....        | 29s. 3d. "       |
| " " " Aug delivery.....         | 28s. 3d. "       |
| " " " autumn.....               | 30s. 6d. "       |
| " " " winter.....               | 30s. "           |

There is no very strong expectation of price change between now and December, in fact speculators are said to be "giving what a rest," there not appearing to be those gradients or margins which afford scope for the energies of the adventurous. Mark Lane will certainly hear with no regret that New York contemplates a few months of quiet healthy trade. Spring wheat of the old crop is held for 31s. at New York. The supply is naturally within a narrow compass. The new crop will not be in anything like free supply before mid-September. Maize in America is firm; 22s. is the latest average cabled.

The sales of British wheat at the statute markets have dropped to a summer level, but are still substantially larger than at this time last year. Since harvest, sales have been as follows:—

|                  |                                   |
|------------------|-----------------------------------|
| This season..... | 2,873,000 qr. at 28s. 8d. per qr. |
| Last .....       | 1,590,000 .....                   |

The sales of British barley for the two seasons agree rather closely. Prices have now been low for two successive years:—

|                  |                                   |
|------------------|-----------------------------------|
| This season..... | 3,199,000 qr. at 24s. 4d. per qr. |
| Last .....       | 3,132,000 .....                   |

The sales of British oats have been small, and the price has risen in consequence of buyers' limited choice.

mixture, 77s 6d to 80s per ton; good Dutch hay, 65s to 67s 6d per ton; French 1st and 2nd cut clover, 77s 6d to 80s per ton; large bale wheat straw, 51s per ton; small bale wheat straw, 41s 0d per ton. These prices are by large delivered alongside London Thames Wharf.—WALTER H. PRENTIS.

### THE BALTIC.

Wheat cargoes all the week were the subject of a quiet and steady trade. Sales included:—Manitoba at 30s. 3d. per 480 lb. for best No. 2. Hard Winter at 28s. 9d. per 480 lb., Odessa-Ghurka at 30s. 6d. per 492 lb., New South Wales at 31s. 6d. per 480 lb., White Kurrahee at 28s. 9d. per 492 lb., Red Kurrahee at 28s. 6d. per 492 lb., and Argentine at 29s. 9d. per 480 lb.

Maize cargoes are a steady trade and sale. Recent business has included Argentine at 20s. 6d., Galatz at 21s. 9d., and American at 21s. 6d. all per 480 lb.

Barley is not in request; for any very near dates, but a good business of a speculative character is being done in Russian new crop for autumn shipment. The price asked by the Russian firms at Odessa, Taganrog, and Nicolaieff is 18s. 3d. to 18s. 6d., the price offered by buyers here 17s. 9d. to 18s. per 400 lb. It is reported that several cargoes for September, October, and November shipments have been "put through" at a compromise price of 18s. 13d. Evidently profits prospective and actual are being cut very fine in this trade.

Other cargo sales of the week include Vologda oats at 15s. 6d. per 304 lb., Roumanian oats at 14s. 9d. per 304 lb., Calcutta white peas at 32s. 6d. per 304 lb., Smyrna beans at 30s. 6d. per 480 lb., Turkish Canary seed at 48s. per 454 lb., and Persian dari at 21s. 6d. per 480 lb.

This season ... 905,000 qr. at 18s. 5d. per qr.  
Last ... 1,125,000 .....

The imports of the United Kingdom last week were as follows:—

Wheat, 524,000 qr.; a large supply.  
Flour, 76,900 sks.; a small supply.  
Barley, 91,000 qr.; a moderate arrival.  
Oats, 205,000 qr.; heavy arrivals.  
Maize, 156,000 qr.; less than usual.

Sales since harvest of imported breadstuffs have been as follows:—

|             |                 |
|-------------|-----------------|
| Wheat ..... | 19,041,000 qr.  |
| Flour ..... | 4,295,000 ..... |

Total ... 23,246,000 qr.  
Of maize the sales have been 9,398,000 qr.

The supply of wheat on passage has now fallen below 3,000,000 qr., a change which is welcomed by all holders of grain actually in granary. Actual quantities on 21st were as follows:—  
California, 275,000 qr.; American, 200,000 qr.; Indian, 780,000 qr.; Russian, 300,000 qr.; Australasian, 725,000 qr.; Argentine, 625,000 qr.; various, 70,000 qr.; total, 2,975,000 qr. A week ago, 3,135,000 qr.

The quantity of barley on passage has seldom of recent years been so small as it is at the present moment:—

Russian, 90,000 qr.; American, 55,000 qr.; Asiatic, 25,000 qr.; total, 170,000 qr.

Of oats, 236,000 qr. are on passage; of linseed, 142,000 qr.; of rapeseed, 32,000 qr.; and of cottonseed, 31,000 tons.

Despite the large exports from La Plata, the total supply of maize on passage does not rise above a million qr. It is now 910,000 qr., including 810,000 qr. of Argentine, American and Russia are very small shippers; and though Roumania is doing rather more than usual, that country is not large enough to play a leading part in the maize trade.

American shipments last week included 112,000 qr. of wheat, 4,000 qr. of barley, 3,000 qr. of oats, 75,000 qr. of maize, and 71,000 sacks of flour; while Argentina sent off 100,000 qr. of wheat, 378,000 qr. of maize, and 20,000 qr. of oilseeds.

Turning to the Old World we find Russia easily at the front with shipments of 230,000 qr. of wheat, 100,000 qr. of barley, 151,000 qr. of oats, and 3,000 qr. of maize. Roumania shipped 45,000 qr. of wheat, 10,000 qr. of barley, and 40,000 qr. of maize. India exported wheat rather more freely than had been anticipated, 164,000 qr. being shipped. The Australasian wheat shipments amounted to 14,000 qr.

The speculative trade in linseed, according to *Beerholm's List*, began the week firm on a small shipment, but closed rather easier. Prices given by the shipping organ are Calcutta 41s. 9d. per 410 lb., Duluth 40s. 9d. per 424 lb.; Argentine, 40s. per 416 lb., and Riga, 39s. per 416 lb.

The London Corn Trade Association (L.C.T.A.) and its quotations for the settlement of rejection and difference in weights on wheat under Rule No. 4 of the Association East Indian wheat contracts, are as follows, viz.:—

Choice white Kurrahee wheat ... 30s. 0d.  
Soft red Kurrahee wheat ... 29s. 6d.  
These prices, which were fixed on Friday, will remain in force until further notice.

The arrivals of grain and seed-laden vessels at ports of call since last review have been two, as will be seen by the following table:—

| Cargo.         | Total. | Chili. | Total. | Since Jan. 1, 1906. | Total same time 1905. |
|----------------|--------|--------|--------|---------------------|-----------------------|
| Wheat .....    | 2      | 2      | 2      | 166                 | 241                   |
| Maize .....    | —      | —      | —      | 3                   | —                     |
| Barley .....   | —      | —      | —      | 3                   | 21                    |
| Beans .....    | —      | —      | —      | —                   | 1                     |
| Linseed .....  | —      | 1      | —      | 20                  | 35                    |
| Valonia .....  | —      | —      | —      | 3                   | —                     |
| Sundries ..... | —      | —      | —      | 2                   | 3                     |
| Total .....    | 2      | 2      | 3      | 197                 | 307                   |

### HOPS.

Canterbury, Saturday.—Unsatisfactory crop prospects have caused prices to advance, and market is firm. The yield is expected to be less than that of 1904.

### LONDON HAY TRADE.

**Saturday.**—With a continuance of shortness in supplies, trade rules very firm, with prices again dearer, the demand all round is good, and salesmen find great difficulty in keeping customers supplied. A good quantity of the supplies now consist of new stuffs, and it is noticeable that most of it is of very good quality and in splendid condition, and for which a very fair price is obtainable. Best old hays and clovers are the qualities in most request, and find eager buyers at more money. There is also a good and sustained demand for ordinary stuffs, which make full values. Best mixtures are also the turn better, with a good business passing. Straw is a steady trade, with prices ruling very firm. With the shortage in English stuffs there is a big business doing in foreign imports, and we hear of large quantities of Canadian mixtures coming along, the demand for which is very brisk. Dutch hays are also more in request, and with good crops in Holland there looks like being large importations during this season.

Sellers of English hay should keep the fact well before them that with dearer prices for home-grown stuffs the foreigner will flood our London market, and thus prices are about as follows:—  
English best meadow hay, 80s to 82s 6d per ton; good meadow hay, 70s to 77s 6d per ton; inferior, 50s to 65s per ton. Best clovers 92s 6d per ton; inferior to good, 77s 6d to 87s 6d per ton. Best mixtures, 87s 6d to 90s per ton; good mixtures, 75s to 85s per ton; seconds mixture, 60s to 70s per ton; wheat straw, 28s per load; oat straw, 28s per load; barley straw, 29s per load, all ex rail London. Foreign: Canadian

## CORN MARKETS.

## LONDON.

**Mark Lane, Wednesday.**—Wheat: Both English and foreign steadily held at late rates, but the hot forcing wheat checks all demand, and prices are nominally unchanged from Monday last. Flour quiet, unchanged. Maize steady, unchanged. Mixed American, ex ship, to arrive, quoted at 22s 4½d, landed at 22s 6d to 23s 3d; La Plata, ex ship, quoted at 21s to 21s 3½d, landed at 21s 6d. Barley firm but quiet; Odessa-Nicolaieff, ex ship, to arrive, quoted at 18s 6d, landed at 19s. Oats steady, quiet. Russian quoted at 15s 6d to 16s; American, 17s, to 17s 6d.

**Mark Lane, Friday.**—Wheat: English firm, but quiet, on small supplies. Foreign steadily held, but inactive. South Russian, ex ship, quoted at 23s 6d to 33s, landed at 30s to 35s. Persian landed at 31s 3d to 32s 6d. Red Karachi, ex ship, at 30s; choice white Karachi, ex ship, at 30s 3d. No. 1 Northern Manitoba, ex ship, at 32s 9d; landed at 33s 6d. Australian, landed, at 32s 9d; ex ship at 32s. Flour quiet, unchanged. Hungarian quoted at 25s; Minnesota Patents at 25s; Bakers at 20s. Maize dull, unchanged. Mixed American, ex ship, to arrive, quoted at 22s 4½d; landed, 22s 9d to 23s 3d. River Plate, ex ship, at 21s to 21s 3½d; landed at 21s 6d. Barley firm, but quiet. Odessa-Nicolaieff, ex ship, to arrive, quoted at 18s 6d; landed at 19s. Oats steady, but quiet. Rigas quoted at 15s 6d to 19s; Americans, 17s to 17s 6d.

## COUNTRY.

**Ashford, Tuesday.**—Very little English corn was on offer, and the attendance of buyers being limited trade was almost at a standstill; values, however, were nominally maintained, wheat being quoted at 32s to 34s; peas, 33s to 34s; English feeding barley, 21s to 23s; mazag in beans, 32s to 34s; tick beans, 31s to 33s; white oats, 21s to 23s; black oats, 20s to 23s; flat maize, 20s to 27s; round maize, 23s to 26s; foreign barley, 21s to 23s.

**Banbury, Thursday.**—Wheat, red, 31s to 31s 6d per qr; barley, 27s to 30s per qr; beans 31s to 32s per qr; oats, 20s to 23s per qr; peas, 30s to 33s per qr.

**Berwick, Saturday.**—There was hardly any change on this market. Wheat, 29s to 30s; oats, 22s to 23s.

**Birmingham, Thursday.**—There was a firmer tone about the business at the market, and an improved demand for foreign wheat, which made occasionally 3d per qr more money. Scarcely any English wheat offering. Grinding barley has advanced 6d per qr since last market day, the price being 19s 3d per 40 lb at Sharpness. Both Plate and flat maize remain at last week's prices. English oats and beans no change.

**Brighton, Thursday.**—There was a small attendance owing to the show at Preston Park, and a very little business doing. Prices as last week. Quotations:—Old white wheat, 33s to 34s; old red ditto, 33s to 34s; barley, 28s to 33s; grinding ditto, 22s to 24s; oats (English), 19s to 22s; peas, 30s to 31s; beans, 33s to 34s.

**Bury St. Edmunds, Wednesday.**—Wheat nominally unchanged at about 32s per 504 lb. Very small supply. Oats firm at 22s 6d to 23s 6d per qr; foreign, 22s 6d to 23s per qr. Maize unchanged; round at 22s 6d, flat at 24s per firm. Feeding stuffs a small trade, but generally firm.

**Bristol, Thursday.**—Still no English wheat on offer. Foreign unchanged, holders being very firm; maize unaltered; barley 9d to 1s dearer; oats unchanged; flour steady.—GRACE BROTHERS.

**Cambridge, Saturday.**—This attendance; very few samples of wheat offering, and prices 31s to 32s per 504 lb. Beans, 31s to 32s per 38 stone.

**Canterbury, Saturday.**—Beans are in better demand, and some exceptionally fine ticks have been sold at 38s; Mazagans, 32s per qr. Winter oats have been cut, but are not yet on offer. Best wheats are still making 34s. Oats firm.

**Carlisle, Saturday.**—Only one lot of oats shown in our market to-day. Slow sale at 22s per 336 lb, owing to inferior quality.—THOMAS ROBINSON.

**Chester, Saturday.**—There are no material changes to be noted in prices. A slight improvement in trade was noticeable, American mixed maize being the turn dearest. Farmers are still busy in the hayfield, and the attendance was poor. Quotations: White and red wheat, 4s 7d to 4s 10d per 75 lb; new grinding barley, 3s 6d to 4s per 64 lb; old beans, 6s to 6s 6d, and new, 5s 6d to 5s 10d per 80 lb; old oats, 3s 3d to 3s 6d, and new, 2s 8d to 3s 1d; Indian corn, old, 12s 6d to 12s 9d, and new, 12s to 12s 6d; per 204 lb: ditto River Plate, new, 12s to 12s 6d.

**Chichester, Wednesday.**—Fair attendance. Very little on offer, and only small business done.

Wheat, 33s to 33s 6d; grinding barley, 19s to 19s 3d; English oats, 19s to 23s; maize, 21s 6d to 22s 6d.

**Colchester, Saturday.**—Slow market, unchanged prices for old wheat, new wheat offered at 29s when threshed. Feeding stuffs unaltered.—JOSEPH WILES AND SON, LTD.

**Coventry, Friday.**—There was but a quiet trade and short supply. Wheat was firm; oats scarce. Beans but a slow trade at previous quotations. Prices: Wheat, 11s 6d to 12s 6d per 160 lb; barley, 20s to 34s per 448 lb; oats, 14s to 20s 6d per 352 lb; beans, 12s 9d to 13s 3d per 160 lb; peas, 12s to 14s per 196 lb.

**Devizes, Thursday.**—There was no change in prices at to-day's market. The following were the quotations:—New wheat, 15s to 17s; secondary, 13s 6d to 14s 6d; best barley, 26s to 32s; secondary, 20s to 24s; rye, 22s to 24s; old black oats, 22s to 24s; new ditto, 19s to 23s; malted barley, 26s to 32s; beans, 10s to 18s; fine flour, 21s to 26s; extra fine, 27s to 30s.

**Dorby, Friday.**—There was a very small supply of wheat, which sold quietly at late rates. Spring corn sold slowly, without any alteration in price. Quotations:—Wheat, white, 32s to 34s; red, 31s to 32s; old beans, 34s to 35s; oats, old, 21s to 25s; new, 22s to 24s.

**Doncaster, Saturday.**—A small supply of English wheat, which was a shade dearer. Prices ranged from 11s 6d to 12s per load of 3 bushels. Foreign wheat was firm to an advance of 3d per qr. on the week, with an improved demand. Oats were firm. New oats have been cut in several districts about Doncaster, but no definite reports yet to hand. Maize about the same as last week, and other things unchanged.

**Dorchester, Saturday.**—Only a small market to-day either as regards attendance or supply. Business generally ruled inactive, very little passing. Home-grown wheats are quite cleared out, and prices remain practically unchanged for both English and foreign from what was quoted at previous market. Barley maintains its value and oats keep steady, with occasionally a trifle more paid for very special samples.

Maize generally about the same, though one sort from scarcity realising rather more money. Beans and peas scarce and dear. The crop are making good progress in this district, but sun is wanted badly.

**Dublin, Friday.**—Flour in quiet demand, but prices firm. Wheat quiet, and supply nominal. Values for oats firmly maintained. Oatmeal firm. Quotations:—Wheat, 19s to 20s; malted barley, 14s 6d to 15s; grinding ditto, 12s 9d to 14s; oats, 12s 6d to 13s 6d; oatmeal, extra pinhead, 12s 6d to 14s 6d; flour, 10s to 11s 6d; pollard and bran, 6s to 6s 6d.

**Exeter, Friday.**—Trade slow. English wheat firm, unchanged; foreign steady. Barley, 3d to 6d advance. Maize and oats, no change. Flour firm. English wheat, 4s to 4s 6d; superfine flour, 25s to 27s; fines, 22s to 25s.

**Glasgow, Wednesday.**—There was a small attendance at our Corn Exchange to-day. Wheat and flour quiet at late rates. Maize and corn, 1½d per boll cheaper since last Wednesday. Barley moves slowly at unchanged prices. Oats quiet for both home and foreign, with a slow trade passing. Beans and peas quietly firm. Bran and thistles remain unaltered. Oatmeal firm, with a slow sale.—GIBSON AND CLARK.

**Glasgow, Friday.**—Market quiet all round, and prices unaltered. American maize, 12s 10d per 280 lb; round, 12s 3d to 12s 6d. Barley, peas, and beans quiet. Oats steady for both home and foreign. The first red winter flour expected next month.

**Gloucester, Saturday.**—No English wheat on offer. Foreign unchanged except Russians, which quote 3d to 6d dearer. Maize unchanged. Barley a little firmer. English oats scarce, unchanged; foreign, 3d to 6d lower.

**Grantham, Saturday.**—The supply of last season's corn is about exhausted in the district, scarcely any business being done. One sample of new oats was exhibited, and this was in good condition, but not offered for sale.

**Hereford, Wednesday.**—A small market. There was no English wheat on the market, and prices were nominally unchanged. Foreign wheats quietly steady. Oats remained firm. Nothing doing in beans or peas. Maize unchanged. Wholesale quotations:—Red wheat, 3s 9d to 3s 10d per 62 lb; barley, 3s to 4s per 56 lb; oats, 2s 6d to 3s 3d per 40 lb; beans, 4s to 4s 3d per 63 lb; maize, 3s to 3s 3d per 60 lb.

**Ipswich, Tuesday.**—Wheat nominally unchanged; hardly sufficient samples offered to test the market. Reds worth about 32s per qr. Oats: English very scarce and firm at 22s 6d to 24s per qr, fine Libas, 23s 6d, fair, 21s 6d to 21s 9d per 336 lb. Beans and peas a small but firm trade. Maize unchanged; round, 21s 6d, flat 23s to 23s 6d. White steamed germ, £5 15s per ton. Oats like firm and unaltered.

**Leeds, Tuesday.**—The trade has gained strength owing to reduced shipments and un-

favourable weather for the harvest in Southern Russia. Millers, however, still complain of the unsatisfactory state of the flour trade, and business in wheat remains, therefore, restricted, any advance being obtained with difficulty. Indians are held for 6d over last week and Russians more difficult to buy. Maize a shade better. Beans and oats steady.—DUNNS AND CO.

**Leeds, Friday.**—Small supplies of English wheat, which made fully Tuesday's prices; all kinds of foreign were a turn dearest owing to arrivals falling short of expectations. No change in malting or feeding barley. Beans, peas, oats, and maize firmly held. There was a better demand for the cheaper kinds of flour, which average from 23s to 25s per sack of 20 stone.

**Leicester, Saturday.**—Good average attendance, with small supplies of home-grown wheats, which met a dragging sale, and prices were supported with difficulty. Red wheats, 31s to 33s; white wheats, 32s to 34s per 36 stones; grinding barley slow; beans firm: fine oats, 23s to 25s per 280 stone.

**Liverpool, Friday.**—At the market there has been a moderate attendance, and wheat is very steady, with a fair inquiry at slightly better prices for Manitoba and Plates; Australian in quiet demand at unchanged prices. Flour—A moderate trade for both home-made and foreign brands, without quotable change in prices. Maize—Mixed is firm at 4d to 4½d advance, with a moderate business doing at the higher prices. European steader and the turn dearest, but quiet. Plate in smaller supply, and held firm at 4½d advance. Barley—Malting steady but quiet. Feeding firmer for American and Odessa, with a fair demand. Beans firm at late rates, but demand restricted. Peas steady, with a quiet demand at the quotations. Oats in moderate demand at about recent rates. Oatmeal steady but very inactive. Oilcake a very quiet trade at late prices. Indian Meal is a better sale owing to smaller quantities of green feed available; prices maintained.—SEGAR AND TURNER.

**Lincoln, Friday.**—There was only a thin attendance at market, and no English wheat on offer. Foreign wheats were 6d per qr dearer on the week. Feeding stuffs firm.

**Maidstone, Thursday.**—We had a quiet market to-day, not an unusual occurrence in hot weather. The trade in wheat barely so strong as last week, so that any attempt to exceed the cost did not succeed. Barley is a slow business, and prices inclined to recede. Oats are fairly steady, but to push sales sellers had to give way. Flat maize realises former quotations, but round can be purchased for less than recently. An exception to dropping tendency is that of beans, stocks of which being used up, buyers must either pay an advance or not obtain them. Very little trade in peas; the new crop expected early this year. There is no alteration to chronicle in tares, rye, hemp, bran, sergo, or millet.

**Manchester, Thursday.**—Very little English wheat on spot, and prices nominal, and foreign occasionally ½d dearer for certain sorts. Flour in rather more inquiry, but little business passed. Indian corn: Plate about ½d lower on the week; primo old mixed American unchanged. Foreign barley about ½d lower, and English unchanged. Beans and peas very steady. Bran, &c., firm.

**Newark, Wednesday.**—Market thinly attended; trade inactive; wheat and beans firmer. White and red wheat, 31s to 32s 6d; grinding barley, 22s to 24s; white oats, 22s to 23s; black oats, 21s to 22s; new beans, 35s to 36s per qr.

**Newcastle-on-Tyne, Saturday.**—A firm tone prevailed at our to-day's market for wheats of all descriptions, holders making fully last week's prices. Foreign oats remain steady at late rates, Scotch firm and dearer. American maize firm, and in sellers' favour. Plate steady values remain unchanged. Beans and peas remain unchanged.—J. J. POLLARD AND CO.

**Newport, Wednesday.**—There was no change in wheat, maize, and oats. Barley 6d higher on the week. Other corn unchanged. Flour, fines, 24s per sack.

**Northampton, Saturday.**—Small attendance. There was scarcely a sample of corn on offer, and business was almost at a standstill. The corn supply is practically exhausted. Wheat, 31s to 32s; malting barley, 26s to 32s; new white oats, 21s to 22s 6d; new black oats, 19s to 20s; beans, 31s to 32s; peas, 30s to 35s; flour, 24s 6d to 28s 6d.

**Nottingham, Saturday.**—English wheat about cleared. Foreign held for slight advance. Grinding barley steady trade; full prices. Oats and beans but few offering, and values well maintained.—R. HUBBLE.

**Peterborough, Saturday.**—The weather during the last week has been very favourable for the growing crops. We have had a very small market, and what little business changing hands was at late rates.—THOMAS HILL AND SON.

**Plymouth, Thursday.**—There was a fair attendance on our market to-day, when wheat

# MARKET SUPPLEMENT.

iii

was firm, maize and oats 3d dearer, barley scarce, 6d to 9d dearer.—**ORLANDO DAVIS** and Co.

**Reading, Saturday.**—A limited attendance, with small trade. Prices: Wheat, 32s to 34s; barley for grinding, 25s to 28s; oats, 21s to 23s 6d; beans, 31s to 36s; peas, 30s to 32s.

**Retford, Saturday.**—An unusually quiet market, the attendance being thin, and the supply of all kinds of grain small, without any variation from the prices current last Saturday.

**Ripon, Thursday.**—On account of the Festival very little business was done. Prices:—Wheat, 29s 6d to 30s; ditto, foreign, 32s to 35s 6d; grinding barley, 23s 6d to 24s 6d; ditto, malted, 27s to 29s; oats, 21s to 22s 6d; round maize, 23s to 24s; ditto, flat, 25s to 26s per qr.

**Sheffield, Tuesday.**—There was a rather better inquiry, but prices showed little change from last week. Wheats scarcer, and 6d per quarter more money. Maize and oats showed more firmness, with, in some cases, a slight advance in price. Beans and peas in very small supply, and 6d to 1d per quarter more than a week ago. Millers' feeding stuffs without change. Quotations:—Wheat, white, 32s 6d to 33s; ditto, red, 32s 6d to 33s per 504 lb; oats, black, 21s to 21s 6d; ditto, white, 22s 6d to 23s per 336 lb; peas, grinding, 32s to 32s 6d; ditto, blue, 5s to 7s per 504 lb; beans, English, 37s to 37s 6d per 532 lb; barley, grinding, 24s to 24s 6d; ditto malted, 28s to 32s per 448 lb; Indian corn, small, 24s to 24s 6d; ditto Plate, new, 22s 3d to 22s 9d; ditto flat, 24s 6d to 25s per 480 lb.

**Shrewsbury, Saturday.**—Wheat, 13s 3d to 13s 9d per 225 lb; old oats, 14s to 15s per 225 lb; peas, 13s to 14s per 240 lb; beans, 14s to 15s 6d per 240 lb.

**Stockton, Wednesday.**—No local wheat showing. Foreign wheat 3d and 6d dearer upon the week, which rather checked business. Oats steady, maize quiet.

**Stamford, Friday.**—Trade almost at a standstill. Wheat at 30s 6d 31s 6d; oats, 21s to 22s; beans, 33s 6d. No oats expected in the course of a week.

**Sunderland, Saturday.**—Little grain offering. Wheat made full prices, owing to scarcity. Spring corn unaltered. Arrivals:—Coastwise wheat, 2,138 qr; foreign, nil.—**E. AND F. RICHARDSON.**

**Warwick, Saturday.**—Very little grain of any kind on offer. Feeding stuffs are a shade dearer, but other samples are practically unaltered in value.

**Winchester, Saturday.**—English wheat scarce and held firm at last week's prices. Foreign unaltered. Barley 9d dearer. Maize and oats unchanged. Flour a fair consumptive trade at last week's prices.—**W. L. CORLETT** and Co., Ltd.

**Wisbech, Saturday.**—A small attendance at market. Scarcely any English grain offering. Prices unchanged from last Saturday. Weather continues favourable.—**JAMES FLETCHER.**

**Wolverhampton, Wednesday.**—A small attendance, the farmers being engaged in the hayfields. Quotations practically unaltered.

**Workop, Wednesday.**—White wheat, 30s to 31s 6d; red wheat, 29s to 30s; barley, 25s to 28s; white oats, 22s to 23s; black oats, 21s to 22s; flat malt, 26s; round maize, 24s per qr.

**York, Saturday.**—Hardly a sample of grain on offer, and the extreme scarcity makes it necessary to pay more money. Fine white wheat quoted 31s to 32s, and red and mixed 30s to 31s per qr of 32 stone. Feeding barley 24s to 26s per qr of 32 stone. Oats firm, white Tartary realising 19s to 20s, black 20s to 21s, and White Garton 21s to 22s per qr of 21 stone. Rye 24s to 25s, and beans 32s to 33s per qr of 36 stone.

**Yeovil, Friday.**—Home-grown wheat sold at last week's advance. Foreign and strong grinding barley sold at 1s per quarter more money. Maize in buyers' favour. Oats a fair trade. English wheat of best quality, white, 29s to 32s 6d; secondary, 26s 6d to 28s; red, 26s to 30s; foreign wheat, 32s to 34s; grinding barley, 19s 3d to 19s 6d; English, best, 25s to 27s 6d; secondary, 22s to 24s; oats, English, white, 21s 6d to 22s 6d; black, 21s to 22s; Irish, white, 21s 6d; black, 18s 9d; maize, round, 21s; flat, 22s to 23s; ryes, winter, 54s to 62s; spring, 62s to 67s 6d; tares, 24s to 26s; beans, winter, 34s to 35s 6d; spring, 34s 6d to 36s. Flour quiet; fine from 23s 6d to 25s per sack. Millers' offals, good demand at late rates.

## FOREIGN.

**Hamburg, Saturday.**—Barley report: Prospects of our crop remain satisfactory, and a full average is generally expected, whilst the quality entirely depends upon the further course of weather. So far, the rain has done no harm, but fine weather is now urgently needed, as the barleys are soon ripe. In Hungary cutting has already commenced, and will be general next week. The weather has been disappointing, and most of the barleys housed so far will be of a rather yellow colour.—**FRANCIS M. TH. DUNE.**

**Hamburg, Saturday.**—Weather boisterous and rainy. Dry weather is now desirable for the rye crop. Wheat and barley still look promising, while oats, on heavy soil, have been badly lodged. Potatoes have a healthy appearance. A heavy crop of hay was secured in fine condition. There is a fair trade doing in all descriptions of grain without material alterations in values. Fine Holstein and Mecklenburg wheat is getting scarce, and 30s 6d to 31s per 504 lb, f.o.b. is being paid. Russian, Danubian and River Plate is offering at 28s to 30s. Red winter No. 2 from Baltimore at 28s guaranteed free from garlic at 29s per 480 lb c.i.f. Hamburg. 9 10/15 South Russian rye on the spot is selling at 22s 6d to 22s 9d; 9 15/20 new crop August shipment is offering at 23s, 9 10/15 Kg Sept.-Oct. at 22s 3d per 480 lb, c.i.f. Hamburg. The barley crops in the Saale, in Moravia, and in Bohemia are making satisfactory progress towards maturity. From Hungary we expect to get soon the first samples of new barley. Feeding barley at hand in good demand, while autumn shipments were rather easier. 60/61 Ko South Russian July old style is selling at 17s 9d, Sept.-Oct. offering at 17s 3d per 400 lb c.i.f. Hamburg. Maize on the spot in scanty supply. Mixed American is selling afloat at 21s. River Plate July-August at 20s 3d to 20s 6d per 480 lb c.i.f.—**JOHN TATLOCK.**

## CORN STATISTICS

### Imports of Foreign and Colonial Corn.

Statement of the quantities of Foreign and Colonial Corn Imported into the United Kingdom in the week ended Saturday, July 21, 1906:—

|  | Wheat          | Wheat-flour | Barley   | Oats      | Maize     |
|--|----------------|-------------|----------|-----------|-----------|
|  | 1,851,900 cwt. | 219,400 "   | 29,500 " | 271,900 " | 717,900 " |

And in the corresponding weeks of previous years, viz:—

# TO-DAY'S MARKETS.

## THE CORN TRADE.

MARK LANE, MONDAY, JULY 23.

The was so small a choice of English grain samples to-day that full prices without either or delay. The demand for English beans, peas, and tares was in excess of the supply, and prices favoured sellers with a rapid clearance of anything on spot offer. Foreign produce was a far less satisfactory market. Indian and Argentine wheat did not go into use very readily even where 6d. decline was allowed, while at old prices Australian, Californian, and Walla sorts were very much out of favour. The firmest sort of foreign wheat was red American. Maize was quiet, but prices were supported. Barley was a slow trade, Russian sorts rather favouring buyers. Oats were 3d. cheaper for Russian and Argentine, but firm for American and New Zealand. Foreign beans and peas were scarcely on offer.

### BRITISH GRAIN (Off Stands).

|                                          | July 23. | s. | s. |

## THE FLOUR TRADE.

MARK LANE, MONDAY, JULY 23.

The market to-day was very quiet, and London makes of flour declined 3d. per sack to cash buyers. The purchasers on credit and delivery terms were not able to obtain any concession. Country flour was a good supply considering the very late period of the cereal year. But the inquiry is also good, and value is not lower from a week ago. There are a good many country mills shutting down from Monday next until new crop deliveries, so that the by-products of the mill are very well held to-day, and may easily go dearer between now and September 1. American flour was in comparatively little favour on spot, but there were buyers of new American from the new winter wheat crop at 22s. c.i.f. for August shipment. A dull market was all that could be recorded for Hungarian, French, or Australian flour; prices were nominally as before.

### London Flour.

## CLOSE OF THE MARKET.

THE MARKET, THOUGH DULL, CLOSED RATHER MORE FIRMLY THAN ONE MIGHT HAVE EXPECTED FROM THE FINE WEATHER AND SLACK INQUIRY.

## SEEDS.

London, Monday.—The usual demand passing in rape and mustard. Prices high but firm. Holders of the new crop trifolium, both English and foreign, having considerably reduced prices, business is now passing.—JOHN PICARD AND CO.

## THE BALTIC 1 p.m.

STATE OF TRADE.

Barley and maize cargoes are not quite so easy to place as on Saturday, but wheat and oat futures are a little livelier. Oilseed cargoes are firmly held, especially those of Egyptian cottonseed for early shipment.

### BUSINESS DONE.

Barley.—Kustenje, 19s 3d per 400 lb, Aug. shipment; Odessa, 18s 9d per 400 lb, prompt shipment.

Oats.—Roumania, 14s 9d per 304 lb, October shipment; Archangel, 15s 31 per 304 lb, on passage; Libau, 15s 6d per 304 lb, arrived; Argentine, 15s per 304 lb, on passage.

Linseed.—Calcutta, 41s 9d per 410 lb, arrived; Bombay, 41s 3d per 410 lb, Aug. shipment; Duluth, 40s 9d per 424 lb, prompt shipment.

Rapeseed.—Ferozepore, 46s 0d per 416 lb, prompt shipment; Brown Cawnpore, 46s per 416 lb, August shipment.

Cottonseed.—Egyptian, £6 13s 9d per 2,240 lb, prompt shipment.

## GRAIN AND FLOUR FACTORS REPORTS.

Flour.—Demand continues moderate; not much doing; prices remain unchanged.—GREENHILL BROS. (Belfast).

Offals.—Bran continues in steady demand with rather more firmness in prices.—GREENHILL BROS. (Belfast).

Flour.—The American markets continue easy, with lower prices for winter wheat flours for shipment. Grain.—Round and flat corn in quiet demand. Supplies of round are liberal. The outlet for Scotch oats is small owing to the fine quality and low price of Manitoba oats. Beans unchanged. Owing to wet weather in Russia new-crop barley is dearer. Oilcake quiet. Canadian oatmeal firm. Mil stuffs.—The mills having been shut down on account of the fair holidays, it is impossible to get delivery of thirds promptly. Bran, however, remains quiet.—MCKINNON AND McDONALD (Glasgow).

Milling Offals.—The continued warm and dry weather and short supply are making offal firmer.—JOHN BAWCOW AND CO.

Flour a dull trade, prices unchanged. Maize and barley a great trade at late prices. Oats firm and favouring sellers.—COVENTRY AND SHEPPARD. Flour has met a very quiet trade to-day at about last week's prices.—T. S. MEDILL AND SONS, LTD.

## TERM MARKET.

The demand for futures has been slow. Prices at to-day's call were:—

|            |                                  |
|------------|----------------------------------|
| Wheat..... | July delivery, 6s 7d per cental. |
| ".....     | Sept. " 6s 7d "                  |
| ".....     | Nov. " 6s 8d "                   |
| Maize..... | July " 4s 7d "                   |
| ".....     | Sept. " 4s 6d "                  |
| ".....     | Nov. " 4s 7d "                   |

American cables come rather lower both for wheat and for maize.

## OIL SEEDS.

Mark Lane, Monday.—Prices show a slight fall on the week in American and Argentine linseed, in the Indian poppyseed and cottonseed and in Turkish Canaryseed, but Egyptian cottonseed is scarcer and dearer, and there is a firm market for rapeseed despite the liberal supply on passage.

| LINSEED, per 416 lb.         | COTTONSEED, per ton.         |
|------------------------------|------------------------------|
| Dutch ..... 47 to 49         | Egyptian..... 137 to 139     |

| Ferozepore..... 44 to 46     | English..... 50 to 52        |
|                              | Spanish..... 82 to 86        |
| POPPYSEED, per 377 lb.       | Turkish..... 47 to 48        |
| Indian..... 44 to 45         | Argentine..... 47 to 48      |

## MARKET SUPPLEMENT.

V

## POTATOES.

**Berwick, Saturday.**—The only potatoes on the market are Dutch and Ayrshire, for which there is a good demand. Dutch, £3 to £4 per ton; Ayrshire 70s to 80s per ton. Local supplies are expected on Market in about a fortnight.

**Borough, Saturday.**—Supply and demand good. English Puritans, 4s; Duke of York, 4s; Beauty of Hebron, 3s 6d to 4s. per cwt.; Dutch, 2s 9d to 3s per bag.

**Carlisle, Saturday.**—There were average supplies of potatoes at both retail markets, and a steady demand was at 7d to 8d per stone.

**Doncaster, Saturday.**—Plenty of potatoes, and a good demand, prices being a little cheaper and from 3s 6d to 4s per cwt.

**Lincoln, Friday.**—Good supply of new potatoes. Prices declined 1d per ton on the week, making £4 per ton on the ground.

**Manchester, Saturday.**—Yorkshire warps, 8s to 9s; Cheshire, new, rounds, 5s 6d to 6s 6d; kidneys, 6s to 7s 6d; Bedford, 5s 6d to 6s per bag; Jerseys, 5s 6d; Norfolk Hebrons, 6s 6d to 7s per cwt.

**Retford, Saturday.**—The potato market well supplied. Best new lots made 8s to 9s per load.

**Stockton, Wednesday.**—Jersey potatoes, 5s 2d; Lincolnshires, 5s 3d per cwt.; old potatoes, £2 10s per ton.

**Spitalfields, Saturday.**—Good supplies were quietly entertained. English Puritans, 3s 6d to 4s; Duke of York, 3s to 4s; Early Rose, 3s to 3s 6d; Beauty of Hebrons, 3s to 3s 6d; Dutch, 3s per cwt.

**Workop, Wednesday.**—New potatoes, 9d to 10d; old potatoes (scarce), 4s to 5s per load of 18 stones; gooseberries, 1s 6d to 1s 9d; red currants, 2s; cherries, 5s to 6s per stone; strawberries, 4d per lb.

**Whitby, Saturday.**—Old potatoes, 6d; new home grown potatoes, 1s 4d per stone.

**York, Saturday.**—Lincolnshire and Cheshire potatoes are coming in, in good condition. Home-cum sorts are rather small. Prices are about 3s per hamper 6 stones. Old potatoes are altogether at a discount.

## BREWERS' AND DISTILLERS' GRAINS.

**London, Saturday.**—Wet Grains: The market shows a stronger tendency, at about 1s per ton more money:—14s 6d ale, 11s 6d porter, 25s distillers, 32s 6d pressed white distillery, meal per ton. Other articles without change as follows:—Dried ale, 92s 6d, mixed 86s 3d, and distillery, 110s per ton on rail London; ale 90s, and mixed, 82s 6d per ton on rail Burton-on-Trent. Oat feed, to arrive, 72s 6d; Rangoon rice meal, 96s 3d; Calcutta rice meal, 86s 3d; fine ground rice husks, 60s; rice germ, 97s 6d per ton. All the above are free on rail, London.—HAMLYN AND CO.

## HOPS.

**Borough, Monday.**—The market is again advanced. The plant is still infested with vermin, even those grounds that have been persistently washed are not clean. The burr is now coming out, so it seems certain that the crop will be produced on the short bone of to-day, consequently it must be a small one.—W. H. AND H. LE MAY.

**Worcester, Saturday.**—To-day's reports from the plantations are not satisfactory. Even the best yards that have been repeatedly washed are attacked by blight. Where no washing has been done the state is deplorable, and few hops will be grown. There has been rather more inquiry this week, but no growers' hops have been weighed. Merchants' stocks are very small, and the requirements of buyers are met with difficulty.—CHARLES FARM & CO.

## PROVISIONS.

**London, Monday.**—Bacon: The arrivals of bacon last week were from Ireland 2,344 bales, and from foreign ports 12,256 bales. There was a firm market for bacon during last week: Irish, 62s to 68s up to 74s; Danish, 60s to 66s up to 74s; Canadian, 62s to 65s up to 6s. Butter: Danish, 113s to 116s; Russian, 84s to 106s; Dutch, 104s to 106s; Irish, 92s to 107s; Canadian, 96s to 106s; Australian, 82s to 106s; New Zealand, 80s to 108s; American, 82s to 98s. Lard: A slow market. Irish, 54s to 62s; American, 45s to 46s 6d; Danish, 48s to 54s, up to 58s.

## TO-DAY'S MARKETS.

## CATTLE.

## Metropolitan Market, Islington.

|                                           | Monday, July 23, 1906. | Monday, July 24, 1906. |

| Quotations per 8 lb. (sinking the offal). | —                      | 60                     |

## ENGLISH.

|              | Inferior. | Second. | First. |
|--------------|-----------|---------|--------|
|              | s. d.     | s. d.   | s. d.  |
| Beasts ..... | 2 10      | 3 6     | 4 8    |
| Sheep .....  | 4 10      | 5 4     | 6 0    |
| Lambs .....  | 5 4       | 6 0     | 7 0    |
| Calves ..... | 3 8       | 4 10    | 5 8    |

Milch cows, per head, £16 to £21. British arrivals include as follows:—Scotland, nil; Eastern Counties, 119; Midland, Home, and Western Counties, 741; Devon, 30; Ireland, nil.

We note to-day an increase of 80 head in the number of beasts offered for sale here, compared with Monday last. The supply of Devons was rather larger than of late; these cleared early in the day, and commanded our top quotations. Trade, taken as a whole, was of a very slow nature, sellers in some cases having to accept a decline of 2d per 8 lb. in value to effect sales. No Scotch or Irish cattle were consigned to-day. Fat butchering cows and bulls shared in the general depression, the former barely making late currencies. A clearance will not be made in this part of the market to-day.

The following are top quotations per 8 lb. (sinking the offal):—

|                 | To-day.     | Monday, July 24, 1906. |
|-----------------|-------------|------------------------|
|                 | s. d. s. d. | s. d. s. d.            |
| Scotch .....    | 4 6 to 4 8  | 4 6 to 4 8             |
| Devons .....    | 4 4 to 4 6  | 4 6 to 4 8             |
| Herefords ..... | 4 2 to 4 4  | 4 4 to 4 6             |
| Norfolks .....  | 4 0 to 4 4  | 4 0 to 4 6             |
| Runts .....     | 3 8 to 3 10 | —                      |
| Lincolns .....  | —           | 4 0 to 4 3             |
| Irish .....     | —           | —                      |
| Canadian .....  | —           | —                      |
| Fat Cows .....  | 3 4 to 3 6  | 3 4 to 3 6             |

There was an increase of 600 in the number of sheep and lambs penned compared with Monday last. Trade throughout the day was of an extremely slow nature for both wethers and ewes, sellers of the former in some cases having to accept a decline of 2d. per 8 lb. in value. Scotch sheep, on the other hand, met with a fairly good inquiry, late rates governing all transactions. Irish were difficult to vend, the tendency in regard to value ruling in favour of the buyer, though barely sufficient to warrant our quoting any lower rates. Small choice grass lambs sold readily at good money, whilst Irish descriptions were more difficult to vend. The supply included 200 Scotch, 690 Irish, and 1,634 from the Eastern Counties.

Undermentioned quotations are at per 8 lb. (sinking the offal) and are for the best of each class penned:—

|                               | To-day.     | Monday, July 24, 1906. |
|-------------------------------|-------------|------------------------|
|                               | s. d. s. d. | s. d. s. d.            |
| 8 st Scotch .....             | 5 8 to 6    | 5 8 to 5 10            |
| 7 1/2 st Down Doves .....     | 5 6 to 5    | 5 6 to 5 8             |
| 9 st. Downs .....             | 5 4 to 5    | 5 4 to 5 6             |
| 10 st Halfbreds .....         | 5 0 to 5    | 5 0 to 5 4             |
| 10 st Yorkshires .....        | —           | 4 4 to 4 6             |
| 12 st Lincoln Halfbreds ..... | 4 10 to 5   | —                      |
| 10 st Irish .....             | 4 10 to 5   | 0 5 to 0 5 2           |
| 10 st Down Ewes .....         | 4 0 to 4    | 2 4 to 0 4 2           |
| 11 st Halfbred ditto .....    | 3 10 to 4   | 0 6 to 0 6 2           |
| 5 st Grass Lambs .....        | 7 0 to 7    | 2 6 to 4 6 6           |
| 6 st Halfbred ditto .....     | 5 10 to 6   | 0 6 to 0 6 2           |

There was a small supply of calves, trade for which ruled slow but firm, the best on offer being quoted at from 3s 6d to 5s 8d per 8 lb (offal given in).

**London (Central), Monday.**—Good supply. Fair demand. Beef: Scotch, 4s 6d to 4s 8d. English, 3s 7d to 3s 9d; American, 3s 5d to 3s 9d. Mutton: Scotch wethers, 3s 4d to 3s 6d; ewes, 3s 6d to 3s 8d; English wethers, 4s 4d to 4s 10d; ewes, 3s 4d to 3s 8d. English lamb, 5s 2d to 5s 8d; New Zealand, 3s 2d to 3s 6d. Veal, 3s to 4s 4d; pork, 3s 8d to 4s 4d per 8 lb.

## FOREIGN.

**Deptford, Monday.**—No market held here to-day on account of the non-arrival of boats. On Saturday, 1,880 beasts from the United States were offered for sale, and met with a firm and

steady trade at an advance of 1d per 8 lb in value.

The best on offer were quoted at from 4s 1d to 4s 3d; seconds 3s 10d to 4s per 8 lb (offal given in). **Liverpool, Monday.**—Larger supply of cattle and a good demand at fully late rates. Increased supply of sheep and lambs, trade for which was not quotably different in values from last week for finished sorts; strong and rough classes in buyers' favour. Prices: Beef, 6½d to 4½d; mutton, 9d to 6½d; lamb, 9½d to 8½d.

## FEEDING STUFFS.

**London, Monday.**—Linsed Cake: The continued drought has made the market firmer with more demand. Decorticated cotton cake and meal still very scarce on the spot, so that both command high prices. Ordinary cotton cake also rather dearer. The low price of dried pulse ale grains is attracting the attention of buyers.

English Linsed Cake .. ex mill £7 15 0 to 8 0 0  
American Calcutta Linsed Cake .. ex quay —

## LIVE STOCK AND MEAT TRADE REVIEW

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

### Trade in London.

With an increase in the number of beasts offered for sale on Monday at Islington Trade opened on that day of a firm and steady nature, anything really choice selling readily at good money; heavy-weighted beasts on the other hand, were extremely unsaleable, even at a decline in value; the majority of the supply consisted of grass-fed Hereford and Runts, chiefly consigned from the Midland Counties. There was also a few Highland Scots, which were placed on the market; these found buyers, but not until late in the day. Fat butchering cows met with a slightly firmer trade and meet with slightly more inquiry; on the other hand, fat bulls were very little sought after. On Thursday trade, as usual, was confined to fat cows and rough cattle.

At the Foreign Cattle Market, Deptford, there was a fair supply throughout the week with a firm and steady trade, sellers both asking and obtaining 2d. per 8 lb. more money. The total number of beasts offered for sale at both markets was 4,403, as against 3,586 during the preceding week, consisting of 860 British (increase 200) and 3,543 foreign (increase 557), comprising 3,399 from the United States and 153 from Canada. The following were the top rates obtained per 8 lb. (sinking the offal)—90 to 95 stone Herefords, 4s. 6d. to 8s. 8d.; 90 stone Norfolks, 4s. 2d. to 4s. 4d.; 95 stone Runts, 4s. to 4s. 4d.; 100 stone Lincolns, 3s. 10d. to 4s.; 90 stone Scots, 4s. to 4s. 2d.; 95 stone Canadians, 3s. 10d. to 4s.; 90 stone fat cows, 3s. 4d. to 3s. 6d.

The sheep trade, which was practically confined to the Islington Market, opened briskly, but became slower as the day advanced, although prices remained about the same; Scotch descriptions sold readily at good money, whilst Irish, on the other hand, were difficult to vend, notwithstanding sellers being willing to accept a decline of 2d. per 8 lb. On Thursday trade was an extremely slow one for both wethers and ewes, nevertheless late currencies governed all transactions. There was a ready inquiry for lambs on Monday, sellers asking 2d. per 8 lb. more money. On Thursday trade became a little slower, but nevertheless anything choice sold well. The total number penned was 10,150, as against 10,450 during the preceding week. Best pens made per 8 lb. as follows:—7½ to 8 stone Downs, 5s. 8d. to 5s. 10d.; 8 stone Scotch, 5s. 10d. to 6s.; 9 stone Downs, 5s. 6d. to 5s. 8d.; 10 stone Half-breds, 5s. 2d. to 5s. 4d.; 11 stone Lincoln Half-breds, 4s. 10d. to 5s.; 11 stone Irish, 4s. 10d. to 5s.; 10 stone Down ewes, 4s. to 4s. 2d.; 11 stone Half-bred ditto, 3s. 10d. to 4s.; 5 stone Fat Grass Lambs, 7s. to 7s. 2d.; 6 stone Irish ditto, 5s. 10d. to 6s.

Calves were in rather larger supply on both market days; trade was of a slow nature, with a decline of 2d. per 8 lb. in value on the second market day of the week, the best on offer were quoted at from 5s. 8d. to 5s. 10d. per 8 lb. (offal given in).

### Trade in the West.

There is still no great activity in the market for stores of any class but the very best, which are quickly caught up at about late rates; but the plainer descriptions still remain a drug on the market. Prices are not so good as they were, being from 20s. to 30s. a head even for the best, it being a very rare occurrence to find a milder realising as much as £21 during the past week, a more average range for the best class of heifers being from £16 to £19 or £20, and for cows from £14 to £18, more ordinary runs being procurable in any quantity at from £14 down to as low as £10 or £11, and these are most difficult to cash, those in want of dairy beasts having no eye for anything that is lacking in the essentials for making up the most serviceable animals and such as will pay their way when drafted into the dairy. Low prices are evidently no temptation to buyers. What they prefer is something of promise and which can be easily turned to account. This they do not consider to be the case with stores that can be had at such low values as from £14 to £20 a pair. Sticks are likewise still slow of sale, and, in the great majority of cases, yearling heifers even more so. The sheep trade continues fairly firm, and sales on the whole are pretty good; but there is very trifling fluctuation in prices—in fact so trifling as scarcely to justify quoting for, while ewes in some cases fetch a trifle more than last year, in others lambs hardly sell so well, and *vice versa*.

Generally speaking, the fat stock markets continue very dull and inanimate, and in the majority of cases prices rather favour buyers, though as a

rule only to a very trifling extent. The consignments of fat beasts are coming out, consisting as they do principally of grass-fed animals, are, as a rule, of a very excellent stamp, many of the steers and heifers being really choice; but prices continue slow at slightly reduced rates, 4s. 10d. per stone being now the outside figure for the best Devens, whilst a more general range for really well-finished bullocks is from 4s. to 4s. 8d. Good quality mutton—medium weights in tugs, young ewes, and nice ripe lambs—finds a ready sale at about late values; but both secondary grades of mutton and secondary lambs are against sellers. The choicest breed of sheep are making 6s. to 6s. 4d. per stone; but anything coarse or weighty are less saleable at from 5s. to 5s. 8d., whilst ewes cannot be quoted higher than 4s. to 4s. 4d. Really choice lamb makes 6s. 10s. to 7s. 2d., with a quick sale at the price; but the more ordinary grades only make 6s. 2d. to 6s. 8d. Calves keep up in price from scarcity of good qualities, which are quite as dear as of late; but anything plainer is rather cheaper to buy. The best porkers are still making 10s. and occasionally 10s. 3d.; but heavy baconers are much slower at 9s. to 9s. 6d. a class.

### Trade in Ireland.

There was a large attendance of buyers—many of them from cross channel—at Thursday's Dublin Market, and business opened briskly, but afterwards slackened off, and finished weaker than last day. The increase of nearly 300 head of cattle proved rather too much for the buyers to keep up prices to the highest, but, all round, sellers could not complain. The number of beasts penned was 2,525, an increase of 283 on the previous market, and nearly 300 more than the corresponding week of 1905. Several shippers got off good drafts of cattle early in the day. Prime bullocks were more in favour, and well-finished heifers sold very satisfactorily in the early part of the day, bringing previous currencies. Plainer descriptions of beasts met with rather a cautious trade, and fat cows were a trifle more difficult to turn into cash. Live-weight prices for choice Hereford and Aberdeen-Angus crosses ranged from 32s. 6d. to 34s., and Shorthorns from 30s. 6d. to 32s. per cwt., and the approximate dead-weight prices were:—Choice ox and heifer beef 55s. to 60s. for very fancy, good second-class 50s. to 54s., and other descriptions from 44s. per cwt. upwards.

There was a good inquiry for choice sheep for Dublin butchers and North of Ireland firms, and for the right sort former prices were maintained, but it was more difficult to get off heavy and coarse sheep; 9,940 were offered for sale, which was a decrease of over 1,000 on the previous Thursday's number, and this decrease barely saved the situation and averted a sharp slump in prices. Shipping hoggets met with a poor sale at about 2s. per head less money, but lambs were a very good trade, and a large decrease in supplies facilitated a clearance at satisfactory prices. Best wether mutton made from 7d. to 8d. per lb.; ewe ditto, 6½d. to 7d.; and inferior sheep from 5½d. per lb. upwards. Best fat lambs sold from 3½s. up to as much as 44s. each; other sorts from 20s. to 28s. Hoggets averaged from 45s. to 55s. each.

There was a slow inquiry for veal. Best sold at from 7d. to 8d., but coarse calves were let go at from 4½d. per lb. Dairy cows made a fair show; choice springers and freshly-calved cows making from £17 to £22 each, medium cows from £13 to £16, and small and inferior from £9 to £12. A small supply of pigs on offer, and with lots of buyers an active business was at once done for suitable pigs at 5s. per lb. upwards. Best fat lambs sold from 3½s. up to as much as 44s. each; other sorts from 20s. to 28s. Hoggets averaged from 45s. to 55s. each.

Store cattle was still selling at high rates, with good demand. Mr. Gavin Low held a large sale of about 1,000 head at his yard on Thursday. Scotch buyers were in large attendance, and several Englishmen were also present. The former were the principal buyers of the Polled animals, and the Shorthorns fell mostly to English buyers, and there was a very keen competition for good strong bullock and heifers. The live-weight prices for forward beasts in thriving condition range from 29s. 6d. to 34s. per cwt. Horned cattle of two-and-a-half years made from £10 to £13 15s.; three-year-olds, £12 to £13 15s. Polled cattle, two-and-a-half to three-year-old made from £11 to £14 5s., and some good Horned cross made as high as £16. Horned yearlings sold at from £6 10s. to £7 10s.; Aberdeen-Angus and Herefords from £6 10s. to £13— which latter seems an extravagant price to give for cattle of this age, and keep them with the hope of profit. The top live-weight price was given for

a consignment of very choice Herefords, which made 31s. per cwt.

### LONDON.

**Central Market, Friday.**—Fair supplies, and market clearing, trade being firm for beef. English beef, 3s 6d to 3s 10d; Scotch sides, 4s to 4s 2d; shorts, 4s 4d to 4s 8d; extreme, 4s 9d; Deptford and Liverpool killed, 3s 6d to 3s 10d; refrigerated hindquarters, best, 3s 8d to 3s 10d; ditto, seconds, 3s 4d to 3s 6d; ditto, forequarters, 2s 4d to 2s 6d; inferior beef, 2s 4d to 2s 6d; mutton, Scotch wethers, 5s 4d to 5s 8d; ditto, ewes, 3s 6d to 3s 8d; English wethers, 4s 4d to 5s; ditto ewes, 3s 6d to 3s 10d; foreign sheep, 4s 4d to 4s 8d; English lamb, 5s 8d to 6s 4d; veal, 3s 4d to 4s 8d; English pork, 3s 8d to 4s 4d; Dutch ditto, 3s 8d to 4s per 8 lb.

**Islington, Thursday.**—To-day's supply of beasts consisted chiefly of fat butchering cows and bulls, with a few calves, ruled slightly firmer, with an upward tendency in value. Small consignments of fat beasts. Norfolks were also offered, but met with no demand, and were unquotable. Top prices paid: Fat cows, 3s 6d; fat bulls, 2s 10d to 3s 2d per 8 lb. An increase of 212 in the number penned in sheep market. Sheep trade owing to the early morning being wet, ruled slow and dragging; nevertheless, no quotable decline in value can be noted, choice small sheep being scarce and dear, and much sought after. Lamb trade very slow, prices tending in favour of buyers, though not quotably so. Best pens made, per 8 lb., as follows: 8 stone Down sheep, 5s 10d; 9 stone ditto, 5s 6d; 10 stone ditto, 5s 4d; 10 stone half-breds, 5s 2d to 5s 4d; 10 stone ewes, 4s 2d; 12 stone Lincoln half-breds, 5s; 5 stone fat grass lambs, 7s to 7s 2d; 6 stone half-bred ditto, 5s 10d to 6s. Calf trade very slow, and prices 2d per 8 lb. lower. Quotations per 8 lb., sinking the offal: Beasts, 2s 10d to 3s 6d; sheep, 3s 10d to 5s 10d; calves, 3s 8d to 5s 8d; lambs, 5s 4d to 7s 2d. Total supply: Beasts, 59; sheep and lambs, 3,022; calves, 80.

### COUNTRY.

**Ashford, Tuesday.**—Beef trade very dull and much left unsold; best beef did not exceed 4s 4d per stone, and many of good quality went for less. Mutton about 2½ per stone cheaper, best Downs not exceeding 5s 10d. A quiet trade for veal and lamb at late rates. Pork, owing to small supply, realised full values, roasters making up to about 4s 6d per stone.

**Barnstaple, Wednesday.**—At Raynbird and Son's sale, yard there was a fair attendance of buyers to meet a supply of 33 fat beasts, 50 calves, 432 fat sheep and lambs, 83 pigs, and 44 head of dairy and store cattle, for which the following prices were realised:—Prime quality two-year-old Devon steers sold readily at from £17 15s to £21 10s; Shorthorn steers, from £17 to £21 10s; heifers, £12 to £18; and bulls to £13; fat calves, 60s to 65s; smaller ditto, 25s to 57s 6d; fat porkers, 28s to 55s; stores, to 22s 6d; dairy cattle, 20s to £20; eighteen-months-old Down wethers and ewes made from 51s to 60s; smaller, 48s to 52s; Down and Leicester cross-bred ditto, 50s to 52s; old Down ewes, 35s to 42s; Southdown ditto, 40s; fifteen-months-old Black Face wethers, 40s; six-months-old Down lambs, 38s to 49s; three-months-old suckling lambs, 38s to 42s; cross-bred Scotch, 27s. A clearance was nearly made at late rates of the supply of fat beasts. The hot weather had an adverse effect on the trade for over-fed heavy sheep. For all other classes of sheep prices were well maintained. Choice suckling lambs made extreme prices. Good quality lambs and sheep of moderate weight had the best of the trade. Dairy cows of the best class found buyers at late prices; secondary sorts met a dull trade. Store cattle met no inquiry. Fat calves a fair trade at late rates. Fat porkers, with a short supply, realised more money; store pigs were a slow trade throughout, and late prices could not be made. Ruling values:—Prime Devon beasts, 61d to 7d; ditto Shorthorn ditto, 6d to 6½d; bulls, cows, and inferior, 5d to 5½d per lb; best sheep, 8½d to 9d; second class ditto, 7½d to 8½d; ewes, rams, and inferior, 6d to 7d; choice suckling lambs, 10d to 11d per lb; fat calves, 6½d to 7½d per lb; fat porkers, 3s to 10s per score.

**Berwick, Saturday.**—This market wore a holiday appearance, only 142 beast beings penned. Only bullocks and Shorthorn bulls were sold, the former realising to £12 10s, and the latter £13. Cows realised £18 to £22.

**Birmingham, Thursday.**—Small supply of beasts, and pigs. Fair supply of sheep and lambs. Trade slow. Quotations: Beef, 5½d to 6½d per lb; fat Herefords, 6½d per lb; mutton, 6½d to 8½d, per lb; lamb, 8½d to 9½d per lb; pigs, bacon 10s 6d per score; cutting pigs, 10s 6d per score; sows, 7s 6d per score.

**Bristol, Thursday.**—To-day's supply of fat cattle was unusually small, and with limited in-

## MARKET SUPPLEMENT.

vii

quiry trade was quiet at late rates. Sheep and lambs were numerous, but not in much request, and average business was done at current quotations. Pigs were again scarce, and prices rose, porkers to 10s 9d per score, and baconers to 10s per score.

**Caime, Friday.**—In lots of not less than ten, on rail within 100 miles, 3d per score extra for delivery by road. Prime stores, six s. to 8s. 10 lb., no deduction for fat, 10s. per score; 8s. 10 lb. to 9s. 10 lb., not over 2½ in. 10s. per score; under 10s., not over 2½ in., 9s. 6d. per score; under 11s. 10 lb., not over 2½ in., 9s. 6d. per score. Pigs outside these limits at their value.—**CHARLES AND THOMAS HARRIS & CO., LTD.**

**Canterbury, Saturday.**—A fair commencement has been made with the lamb trade; half-bred lambs are making from 20s 6d to 32s 6d; Kent lambs average about 25s; draft ewes, 27s to 36s per head.

**Carlisle, Saturday.**—The supplies were smaller, and chiefly good cattle. A rather slower market was experienced. Wintoring heifers made £8 10s to £10s 10s, and the better descriptions, £11 10s to £12 10s; bullocks to £10 10s.

**Chester, Wednesday.**—Fat cattle experienced a fair demand at late prices. Freshly-calved and autumn-calving cows and heifers met a ready sale at advanced prices. Store cattle trade was dull, except for a few lots of forward condition cattle and well-bred heifers. Quotations:—Beef, 4s 6d to 4s 10d; veal, 4s 6d to 5s; lamb, 7s to 7s 6d; ewes, 4s 2d to 4s 6d; Southdown sheep, 6s 2d to 6s 6d; West Country ditto, 5s to 6s 2d; pork, 3s 8d to 4s. Stock at the market: Cattle, 374; sheep, 3,784; pigs, 631; calves, 198; horses, 24; bullocks, 9.

**Chester, Thursday.**—Supplies were on an average, but buyers were again scarce and the demand slow. Sheep were in larger supply, but the inquiry was indifferent. Prices generally were irregular, but on the whole were unchanged. Quotations:—Milch cows, £17 to £22; calves, £15 to £19; barren £10 to £12; heifers, £9 to £14; storks, £6 to £10; and sheep, 18s to 22s each.

**Colchester, Saturday.**—There was a good supply of stock. Beef 4s 4d to 4s 6d, mutton 5s 6d to 6s, pork 9s 6d to 10s.

**Doncaster, Saturday.**—Small supplies of cattle and sheep, and few buyers present, trade being merely nominal. Young stock, £8 to £11; heifers, £11 to £14; bullocks, £12 to £17; milch beasts, £17 to £22; sheep, 40s to 46s.

**Dorchester, Saturday.**—Moderately good offerings, for the time of the year, came to hand at to-day's market, at which sales were held by Messrs. Duke and Son, and also by Messrs. Symonds and Sampson. Milch beasts found a steady selling trade at from £15 to £19 10s each for best heifers, and calves, secondary milch cows, £11 to £14; in calves, £11 to £11 10s each. Barreners made up to £28 per pair for the fresher condition bullocks, ranging down to £22; plainer from £16 to £20; yearlings £10 to £12 10s per pair. Fat beasts: £15 to £18 for heifers; bulls, £11 to £16 (or for the best 10s 6d to 11s, and for secondary grades 9s to 10s). Mutton trade slow, the plainer grades selling as low as 4s 6d, and better qualities up to 5s 6s. Lamb trade quiet, season being almost at an end, from 25s to 34s apiece.

**Edinburgh, Wednesday.**—There was a very small show both of cattle and sheep, owing to the Highland show at Peebles, and a poor attendance of buyers, practically no business being done. Bullocks, £13 7s 6d; half-bred sheep, 38s to 42s; Shorthorn cows to £23; crosses to £22; Ayrshires to £17.

**Exeter, Friday.**—Large attendance, fair trade. Maiden heifers and steers, 11s 6d to 11s 8d; cows, 10s 6d to 11s; small hogs, 8½d to 9d; large ditto 8d; ewes, 6d; fat lambs, 10d to 11d in wool, 9d to 10d shorn; breeding ewes, 4s; calves, 7s 9d.

**Glasgow, Wednesday.**—Trade was slow, but prices steady to firm. Quality an average. Scotch beef, 62s to 64s; secondary, 57s to 60s; Irish, 56s to 58s; Canadian, 2s to 3s dearer at 53s to 56s per cwt. Sheep were in good supply and met a better demand at 5½d to 10d; and lambs, 10½d to 10½d per lb.

**Gloucester, Saturday.**—Messrs. Bruton, Knowles, and Co. report their sales as follows:—Short supply (50) cows and calves, which sold well; very small supply store cattle, all cleared.

**Hereford, Saturday.**—Buyers were firm, but the sale of fat stock was fairly brisk, but bullock and heifer beef made 6½d per lb., cow beef, 4½d to 5½ lb., and bull beef 4½ lb. The calf trade was brisker, veal making 7d to 7½d per lb. A large supply of sheep sold well; wether mutton made 8d to 8½d per lb., while ewe mutton fetched 7d per lb. Lambs sold briskly at 9d to 10d per lb. Pigs were scarce. Bacon made 3d to 3½d per lb. Stores were firm and dear.

**Leicester, Saturday.**—Large consignments of home-bred bullocks. Buyers were moderate, but represented and trade ruled sluggish at 10s to 20s per head decline. Choice milchcows, £19 to

£21; good lots, £16 to £18; secondary, £14 to £15; Shorthorn cattle, £12 to £15; choicer Irish bullocks, £18 to £19; good lots, £13 to £15; Welsh Hunts, £10 to £15; young stock, £5 to £7; calves, 15s to 34s each.

**Lincoln, Friday.**—Limited supply of beasts, and a fair business. Yearlings, £8 to £10; milch ewes, £16 to £20; drupe ewes, 3s each.

**Lynn, Tuesday.**—Very few store cattle, trade very slow, £6 to £12. Fat beasts average show for time of year, making 6s 9d to 7s 6d per stone. Small supply of store sheep, prices 4s to 4½s each. Fat sheep, average show, firm trade, 8s and 9s up to 9s 6d for small choice sheep. Store lambs, 26s to 35s, fat lambs, 25s to 40s each.

**Manchester, Friday.**—Beef: first class, 5½d; second class, 4½d to 5½d; third class, 3½d to 4½d. Mutton: first class, 7½d; second class, 6½d to 7½d; third class, 5½d to 6½d. Veal, first class, 6½d; second class, 5½d to 6½d; third class, 4½d to 4½d. Lamb: first class, 8d; second class, 7d to 7½d per lb.

**Newcastle, Tuesday.**—There was a lighter show of cattle. Prime heifers, 8s to 8s 6d; second class, 7s 6d to 7s 9d; prime steers, 7s 9d to 8s; coarse and inferior, 6s 3d to 6s 9d; pigs, 6s to 7s 3d per stone; sheep, 5d to 9d; lambs, 9d to 9½d; veal, 6½d to 8½d per lb. At market:—Cattle, 1,717; sheep and lambs, 7,803; calves, 88; pigs, 313.

**Newport, Wednesday.**—A larger supply, a good attendance of buyers, and a good trade all round. Quotations: Best English beef, 6½d per lb.; secondary, 6d; cows, 4½d to 5½d; best wether mutton, 8½d; ewes, 4½d to 7½d; lambs, 9½; calves, 6½d to 8d; porker pigs, 10s 6d to 10s 9d per stone.

**Norwich, Saturday.**—Quite a holiday tone prevailed at the market. Fat beasts were again offered in limited supply, and prices remained about the same as last week—7s to 7s 6d per stone of 14 lb. There was a very small show of store cattle, practically the only supply on offer being a few lots left over from last week. Very little business was doing, and not sufficient to justify quotations. There was a full average supply of sheep and lambs, and trade was steady at about late rates. Sheep, 4s 2d to 4s 6d; lambs, 5s 2d to 5s 6d; and breeding ewes 4s 2d to 4s 6d. There was a quiet trade in fat sheep, prices ranging from 8s 6d to 9s 6d per stone of 14 lb. Brisk demand for both fat and store pigs, and all the lots were sold, a full show being on offer. Prices for fat pigs averaged 6s 9d per stone; small stores ranged from 1s 4s to 2s 4s per head; big pigs, 28s to 45s; and sows, 60s to 80s.

**Nottingham, Saturday.** The smallest supply of cattle and sheep during the season, and a poor attendance of farmers. Trade nominal, and prices unchanged. Cows and calves, £17 to £22; bullocks, £12 to £17; heifers and drapes, £11 to £13 10s; young stores, £6 to £9 each. Sheep made from 38s to 43s each.

**Preston, Wednesday.**—There was a large supply of cattle, sheep, and calves, but demand was not equivalent to the show. Beef was bad to sell, and prices were in favour of buyers. Fat calves were in excellent request. Quotations:—Heifers and bullocks, 6d to 6½d; cows and bulls, 5d to 5½d; hogs, 8½d to 9d; lambs, 8½d to 9½d; ewes, 6½d to 7½d; tups, 5½d to 6d; fat calves, 5½d to 6d per lb.

**Reford, Saturday.**—Milch cows of first-class quality were scarce and dearer, being worth £18 to £20, and secondary sorts £14 to £17 per head. There was also an improved tone in the demand for healthy young stock, two-year-old steers and heifers realising £10 to £12; yearlings, £6 to £8; and calves, 40s per head.

**Romford, Wednesday.**—Average supply of fat beasts; trade unchanged: Best, 4s 4d to 4s 6d; middlings, 4s to 4s 2d per stone. Calves in average supply. Trade slow at 4s 8d to 5s per stone. Sheep in good supply; trade unchanged: Best small 5s 10d to 6s; large, 5s to 5s 2d; ewes, 4s to 4s 2d per stone. Lambs in average supply; trade about the same, at 6s 6d to 6s 8d per stone. No store beasts on offer. Pig trade slow: Neat porkers, 4s 2d to 4s 4d; large hogs, 3s 8d to 3s 10d per stone.

**Sheffield, Tuesday.**—A fairly good show of milch cows, and a slightly more brisk trade than last week. The best beasts made £21 to £22 10s; smaller beasts, £17 10s to £20.

**Shrewsbury, Tuesday.**—Small market, but a good attendance of butchers and dealers. Good business for fat cattle, and strong demand for sheep and lambs, prices being in advance of last week. Bisk trade for milking cows, and pigs also sold well. Quotations:—Beef, 6½d to 7d per lb; mutton, 7d to 8½d per lb; lamb, 9½d per lb; veal, 6½d to 7½d per lb; porker pigs, 10s to 10s 9d per score; bacon pigs, 9s 6d to 10s per score. Milking cows up to £23. Numbers offered as follows:—Cattle 397, sheep and lambs 1,475, calves 88, pigs 222.

**Skepton, Wednesday.**—Number in market: Cattle, 197; sheep and lambs, 118; pigs, 187.

There was a small show of best cattle, and trade was slow at 8s to 8s 3d per lb. Rougher kinds made 6s 6d to 7s per stone. Sheep met a fair trade. Lambs were quoted at 10d to 11d per lb., young sheep 8½d to 9d, and ewes 6½d to 7d per lb. Pigs were also in fair demand at 5s 9d to 6s per stone for large, and 6s 6d to 7s per stone for small animals.

**Thame, Tuesday.**—Large attendance of buyers including many from long distances. There was a good average supply of very ripe beef and mutton but a scarcity of fat pigs and cattle. Trade ruled remarkably brisk throughout, with an advance upon previous prices, every thing finding ready purchasers. Messrs. Bond and Burrows sale comprised 73 fat beasts, 296 fat sheep, 60 fat and weaning calves, and 55 fat and store pigs. Fat oxen made from £16 to £21 7s 6d; fat heifers, £14 10s to £20 15s; fat wethers, 48s to 50s 6d; fat ewes, 38s to 52s; fat lambs, 30s to 51s; fat calves, £3 to £4; weaning cow calves, 30s to 51s; bull calves, 10s to 48s; fat hogs, £3 to £4 5s; porkers, 30s to 50s; store pigs, 15s to 25s.

**Turo, Wednesday.**—Attendance very good, and business fairly good. Fat bullocks, 58s to 60s per cwt.; barreners and store bullocks, 40s to 45s; cows and calves, 40 to £16 each; rearing calves, 15s to 60s; wethers, 8d to 8½d per lb; ewes, 5½d; lambs, 7d to 8d; pigs, 15s to 32s; beef, 6d to 8d per lb; mutton, 6d to 8d; lamb, 8d to 9d; veal, 6d to 8d; pork 6d to 8d; bacon (uncured), 6d to 7½d; ditto (cured), 7d to 9d; pork (carcases), 5d to 5½d. Number in cattle market:—Bullocks, 334; calves, 82; sheep, 300; pigs, 156; horses, 4.

**Workshop, Wednesday.**—Small show of cattle, which made about 3s per stone more than last week. Good supply of mutton, which met a good trade. Best beef, 7s to 7s 6d; secondary quality, 6s 3d to 7s per stone; best Southdown wether and crossbreds, 8d to 8½d; prime hogs, to 9d; ewes, 6d to 7d; lamb, 8d to 9½d; veal, 8d per lb.

**York, Thursday.**—Quite a holiday market. Farmers being busy with the hay, there were very few buyers present. A good few Irish beasts for the time of the year, but fewer English and no demand. Nice bullocks sold up to £14 10s. A small show of calves and milch cows, and for the best of these, which made up to £21 each, there was a fairly good trade, though late sheep rates were barely maintained on the day. The smallest show of this year, and a slow trade. Best shearlings made up to 30s., others 44s to 48s. About 200 West country lambs on offer, which made 25s. to 28s 6d a head.

**Yeovil, Friday.**—Cows and calves, £16 10s to £20 10s for best; secondary, from £14 to £15 15s; heifers and calves made £16 10s to £19 10s; barreners, £9 10s to £16 10s; steers, £9 15s to £13 5s; yearling heifers, £7 to £8 15s; ewes, 48s to 48s 6d; Down wethers, 40s to 51s; Dorset wether lambs, 27s to 32s 6d; horn ewes, 43s to 50s; horn wethers, 47s 6d to 52s 6d; horn chivver lambs, 27s 6d to 32s 6d; slip pigs, 17s 6d to 32s 6d; stores, 35s to 60s.

## FEEDING STUFFS.

**Liverpool, Friday.**—There is the usual sum-inactivity in the trade for litters and feeding stuffs, yet values of the latter remain without change:—

—H. JONES LANGR AND CO.

**Mark Lane, Monday.**—Linseed Cakes.—The demand continues of the usual summer description, but with small quantities value remains firm at the late advance. Russian are the best value at the moment and can still be had £7 7s 6d £7 8s 9d

in mats and £7 10s to £7 12s 6d in bags. East India seed pures still quoted at £7 7s 6d to £7 10s. American are unchanged at £7 2s 6d to £7 5s. London-made are in more request at £7 15s to £7 17s 6d per ton ex mill. Cotton Cakes.—Stocks in warehouse are practically exhausted and supplies continue to come to hand very sparingly, with the result that needy buyers are compelled to pay full values of £4 16s 3d to £4 17s 6d. English are not very freely offered and manufacturers are firm in their demands of £4 18s 9d to £5. Decorticated.—Only a small quantity of American is to be had, for which holders ask £7 11s 3d ex dock, with meal at £7 10s. Rape Cakes.—Unchanged. East India, £5s; Ravison, £4 15s. Maize Germ Meal.—White American on the quay is still obtainable at £5 13s 9d; while some forward business for July-August shipment has been done at £5 10s; c.f. and i. terms. English is still quoted at £5 7s 6d to £5 10s per ton ex mills. Rice Meal.—Parcels of Rangoon in warehouse find little inquiry at £4 13s 9d to £4 15s, although the demand still continues on a moderate scale for autumn shipments at £4 11s 3d to £4 12s 6d, ex ship terms. Locust beans firm and unchanged at £5 15s, with Kibbled at £6. Nitrate of soda quiet and unaltered at £10 17s 6d per ton ex docks.

## WOOL.

Canterbury, Saturday.—In view of lower prices at Colonial wool sales, many staplers will not exceed 13d for Kent wool, while others bid 13½d only for best lots. Growers, however, hold out against reduction, and ask 14d, and 10d per pound for lamb wool; consequently not much trade done. Downs and half-bred fleeces unaltered.

London, Friday.—The concluding auctions of the present series of London Colonial wool sales were held this evening, catalogues, comprising 10,440 bales. Sales closed with fairly brisk competition at current rates. Short and faulty scoureds, as well as poor and heavy grease, were difficult of sale, and ruled 10 per cent. below last auction currency. Fine greasy cross-bred realised fully late rates, and were occasionally dearer; whilst medium to good realised last sales' average prices. Low and heavy stots, however, declined 5 per cent., and scoured and coarse slipe descriptions 10 per cent. South African wools were generally fully 7½ per cent. cheaper than in May.

London, Saturday.—English—per lb of 240 lb. —Fleeces, South Down hogs, £14 10s to £15 10s; half-bred hogs, £14 5s to £14 15s; half-bred wethers, £14 to £14 10s; Kent fleeces, £13 10s to £14;

South Down ewes and wethers, £14 10s to £15 10s; Leicester ewes and wethers, £13 to £13 10s; Colonial—per lb.—Vic., fleece super., 2s to 2s 10d; scoured, good, 2s 1d to 2s 2d; scoured, average, 1s 10d to 1s 11d; greasy, average to fair, 1s 2d to 1s 3d; N.S.W., second, average, 1s 8d to 1s 9d; greasy, average, 1s to 1s 0½d; S. Aus., greasy, average, 9½d to 10d; N.Z., scoured, average, 1s 9d to 1s 10d; greasy, average, 11d to 1s; Cape, scoured, super., 1s 9½d to 1s 10d; fleece, average, 10d to 10½d; greasy, average, 7½d to 8½d; Natal, scoured, 1s 5d to 1s 7d; greasy, average, 8d to 9d. Crossbreds—Grs.—Vic., good to super, 1s 3d to 1s 4d; New Zealand fine, 1s 3d to 1s 4d; medium, 1s 1d to 1s 2d; coarse, 1s to 1s 1d.

## BUTTER.

Thursday.—Aminster: 1s. Birmingham: 1s 1d to 1s 2d. Brigg: 1s to 1s 2d. Devizes: 1s 2d to 1s 4d. Driffield: 10d. Kidderminster: 1s. Northtawton: 1s. Penistone: 1s 2d. Penzance: 10d to 1s 1d. Plymouth: 1s to 1s 2d. Ripon: 1s 6d to 1s 8½d per 24 oz roll. Scarborough: 1s 1d. Wellington (Salop): 1½d to 1s. Wetherby: 1s 1d to 1s 2d.

Friday.—Altrincham: 1s 2d to 1s 3d. Ashburton: 1s to 1s 1d. Barnstable: 1s to 1s 1d. Chester: 1s 1d. Camelford: 10d to 11d. Crewe: 1s 1d. Dartmouth: 1s to 1s 2d. Derby: 1s 1d to 1s 2d. Helmsley: 10d to 11d. Knutsford: 1s 2d to 1s 3d. Leyburn: 1s 1d to 1s 2d. Lincoln: 1s to 1s 1d. Lostwithiel: 10d. Macclesfield: 1s to 1s 1d. Nantwich: 1s. Northwich: 1s. Otley: 1s 4d to 1s 6d per 24 oz roll. Redruth: 9½d. Runcorn: 1s 2d to 1s 3d. St. Austell: 11d. Stamford: 1s 3d. Stockport: 1s 1d. Tavistock: 1s to 1s 2d. Totnes: 1s 1d to 1s 2d.

Saturday.—Appleby: 10d to 1s. Berwick: 10d to 1s. Bridgnorth: 1s 1d to 1s 3d. Carlisle: 11d to 1s. Doncaster: 1s 2d. Grantham: 1s 1d to 1s 2d. Howden: 10d to 1s. Lancaster: 1s to 1s 1d. Malton: 1s to 1s 1d. Pontefract: 1s 1d. Retford: 1s 1d to 1s 2d. Richmond (Yorks): 10d to 11d. Shrewsbury: 11d to 1s. Skipton: 11d to 1s 1d. Stokesley: 11d to 1s. Whitby: 11d to 1s. Worcester: 10d to 1s 2d. York: 1s to 1s 2d.

## EGGS.

Thursday.—Aminster: 10d per dozen. Birmingham: 10d to 12. Brigg: 13 and 14. Devizes: 14 to 16. Driffield: 15 and 16. Evesham: 1s 0½d per dozen. Kidderminster: 12. Northtawton: 14. Penistone: 12 and 13. Penzance: 10d to 11d per dozen. Plymouth: 12 and 14. Ripon: 13. Scarborough: 11d, Wellington (Salop): 12 and 13. Wetherby: 12 and 13.

Friday.—Altrincham: 10d and 11d. Ashburton: 10d and 11d per doz. Barnstable: 12 to 14. Chester: 11 and 12. Camelford: 10. Crewe: 11. Derby: 11 and 12. Helmsley: 13 and 14. Knutsford: 10 to 12. Leyburn: 13 and 14. Lincoln: 14. Lostwithiel: 16. Macclesfield: 11 and 12. Nantwich: 12 and 13. Northwich: 11 and 12. Otley: 12 and 13. Redruth: 10 per doz. Runcorn: 11. St. Austell: 16. Stamford: 12. Stockport: 10 and 11. Tavistock: 11 to 13. Totnes: 11d to 1s per doz.

Saturday.—Appleby: 12 and 13. Berwick: 1s to 1s 2d per doz. Bridgnorth: 12 and 13. Carlisle: 16 and 11. Doncaster: 12. Grantham: 12 and 13. Howden: 13 to 15. Lancaster: 8 to 11. Malton: 12 and 13. Retford: 1s 7d to 1s 8d per score. Richmond (Yorks): 11. Shrewsbury: 12 and 14. Skipton: 12 and 13. Stokesley: 12 and 13. Whitby: 12. York: 12 to 14.

## CHEESE.

Glasgow, Wednesday.—Prices a shade dearer, demand good. Top Cheddars 62s; secondaries, 60s; Dunlops, best, 60s; secondary, 58s per cwt.

Highbridge, Tuesday.—There were 22 to 25 of cheese pitched, and with a large attendance all were cleared. Best dairies realised up to 63s per cwt; secondary dairies, 57s 6d to 53s;

and other dairies, 55s 6d to 57s. A few inferior lots failed to reach 5s. Cheddars made 62s to 61s 6d; truckles, 60s to 64s; doubles, 52s to 55s.

Newport, Wednesday.—There was about 8 tons pitched, and a good trade. Quotations:—Caerphillis 48s to 50s per cwt; fancy dairies, 57s to 60s; truckles, 60s to 63s; Derbys, 61s to 65s.

## FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Varied supplies of fruit and greenstuffs on offer, the demand being brisk. Prices for English produce:—Peaches, 2s to 8s per dozen; melons, 9d to 2s; black currants, 6s to 7s 6d; red ditto, 5s to 6s 6d per half-sieve; green figs, 1s to 3s 6d; nectarines, 2s to 8s per dozen; raspberries, 3s to 5s per dozen punnet; ditto, 1s to 1s 6d per gallon; strawberries, 5s to 9s per dozen punnets; apricots, 9d to 1s per box; tomatoes, 3s 6d to 4s 6d; endive, 1s to 1s 3d; vegetable marrows, 9d to 2 per dozen; co. lettuce, 1s 6d to 2s; cabbages, 2s to 3s 6d per tally; green peas, 1s 6d to 2s 6d per bushel; ditto, 2s 6d to 4s 6d per bag; hardy, 1s 6d to 1s 9d; mint, 1s to 1s 6d; carrots, 1s to 2s; turnips, 1s to 2s 6d; green onions, 1s 6d to 2s per dozen bunches; cauliflowers, 7s to 9s per tally; cucumbers, 4s 6d to 6s 6d per flat; horseradish, 9s to 14s per dozen bundles; mushrooms, 6s to 10s 6d per 12 lb; beetroot, 2s; broad beans, 1s to 1s 6d per bushel.

## HAY AND STRAW.

Bi mingham, Friday.—Small supply; trade quiet. Quotations: Hay, £4 5s per ton; clover, £4 10s per ton; straw, 2s 9d per cwt.

Bristol, Friday.—Old clover hay, 85s to 90s; old meadow hay, 75s to 85s; wheaten straw, 50s to 55s per ton.

Hereford, Wednesday.—A very slow trade without quotable change in values. Quotations: Hay in stack, 55s to 60s per ton; straw in bulk, 35s to 40s per ton.

Lancaster, Saturday.—Meadow hay, 4½d; clover, 7d; wheat straw, 4½d; oat straw, 4d per stone.

Leeds, Tuesday.—Haymaking is general in the district, and so far the weather has been favourable. The supply of old hay and straw is diminishing, and quotations in the warehouses are firm as follows:—Meadow hay, 7d; clover hay, 7½d; wheat straw, 5½d; oat straw, 5d; and rye straw (retail), 8½d per stone; green clover, 3½d per bundle (retail).

Lincoln, Friday.—Old hay and seeds, £4; new hay and seeds, from 55s; old straw, 40s per ton on the ground.

Manchester, Friday.—Clover, old, 7½d to 7d; ditto, new, 5½d to 6½d; oat straw, 4½d per stone.

Nottingham, Wednesday.—Small supply at market, which met with a good demand. Quotations:—Inferior to good hay, 7½s to 80s; prime ditto, 90s to 100s; inferior to good clover, 70s to 80s; prime ditto, 90s to 100s; wheat straw, 55s to 60s per ton.

Shafield, Tuesday.—Business was quiet at late prices. Choice old seeds, £5 to £5 5s; prime meadow hay, £4 10s to £4 15s; second, £3 15s to £4; straw, £3 10s to £3 12s 6d; green fodder, 18s to 20s per ton.

## POULTRY AND GAME.

Smithfield, Saturday.—Fair supplies, but quiet demand. Prices: Surrey and Sussex fowls, 3s to 4s; Essex fowls, 2s 3d to 2s 9d; Lincolnshire fowls, 2s to 2s 6d; Irish fowls, 1s 6d to 2s; goslings, 5s to 6s; country ducklings, 2s to 2s 9d; Aylesbury ducklings, 2s 6d to 3s; quails, 6d to 1s; feathered pigeons, 7d to 8d; Borden, pigeons, 10d to 1s 1d; tame rabbits, 1s 2d to 1s 4d; wild rabbits, 7d to 8d; live hens, 1s 6d to 2s each; Australian rabbits, 5s 6d to 6s 6d per dozen.

## ADVERTISEMENTS RECEIVED TOO LATE FOR CLASSIFICATION.

## HACKNEY STUD BOOK VOL. XXIV.

ENTRIES CLOSE at Single Fee on AUGUST 1, 1906 (late Fee to SEPTEMBER 1).

Applications for Entry Forms, stating whether for Colts or Fillies, should be sent at once to

FRANK F. EUREN,  
Secretary,  
Hackney Horse Society.

12 Hanover Square,  
London, W.

ANGLESEY COUNTY AGRICULTURAL SHOW.  
HOLYHEAD, AUGUST 14, 1906.  
OPEN LEAPING COMPETITION.  
£26 IN ONE CLASS.

No entrance fee for horses entered on or before July 30.

Schedules from SECRETARY, Bryn-cubelyn, Llanerchymedd.

TO LET.—First-class Corner House and Shop, situated centre of Upper Norwood. A 21 years' lease, unexpired; now shut up. Been a Corn Business for 76 years.—Apply to JAMES BRIGALL, "Withdean," Wellingington, Surrey.

General Manager.

# Review of the British Corn Trade

## DURING THE PAST WEEK

*Written exclusively for the Mark Lane Express.*

The rainfall of the past week has been raised by short electrical downpours to a full inch in Kent, Essex, and the south-east of England, but it has not exceeded a third of an inch in some of the Midland shires. In the North there has been a succession of welcome showers. The sun has not been extraordinarily hot as a rule, though in the Thames Valley 124 deg. *in vacuo* has been twice recorded. Winds have veered daily, but for the chief portion of the week there was sufficient north in the current to refresh the animal world both in human and quadruped. The harvest has begun in earnest with the general cutting of winter oats, and some winter barley has also been cut, especially in the Wye and Severn valleys, where a very early variety has latterly won favour with growers because, being dead ripe by July 20 or 21 in an ordinary season, it leaves the ground clear for a catch crop to be put in early in August. The wheat harvest will begin in another week's time, and 31 bushels is now a general expectation against 33 bushels last year and 30 in an ordinary season, or to speak with official accuracy 29.91 bushels.

Latest official averages of yield of wheat per acre are as follows:—

United Kingdom, 29.91 bushels; United States, 13.07 bushels; Argentina, 10.65 bushels; Australia, 7.88 bushels; Austria-Hungary, 17.44 bushels; Canada, 19.00 bushels; France, 19.22 bushels; Italy, 12.75 bushels; Russia, 9.68 bushels; Spain, 12.98 bushels.

These figures are interesting, and are apparently in accordance with trade experiences. On the other hand we cannot readily accept the Belgian Minister of Agriculture's estimate of an average wheat yield of 34.46 bushels, neither is it likely that the somewhat poor soil of Germany produces 28.24 bushels to the acre. An estimate which is probably 2 to 3 bushels under the mark is that for Uruguay, which is officially credited with only 8.39 bushels to the acre.

The price of English wheat last week showed the following range:—

|          |     |     |                  |
|----------|-----|-----|------------------|
| Reading  | ... | ... | 32s. 0d. per qr. |
| Lincoln  | ... | ... | 27s. 7d. "       |
| Gradient | ... | ... | 4s. 5d. "        |

The price of English barley is extremely level, the cause being an utter exhaustion of fine quality samples:—

|              |     |     |                  |
|--------------|-----|-----|------------------|
| Mark Lane    | ... | ... | 23s. 4d. per qr. |
| Peterborough | ... | ... | 2s. 1d. "        |
| Gradient     | ... | ... | 1s. 1d. "        |

The price of English oats is generally good just now:—

|           |     |     |                  |
|-----------|-----|-----|------------------|
| Reading   | ... | ... | 21s. 5d. per qr. |
| Doncaster | ... | ... | 19s. 10d. "      |
| Gradient  | ... | ... | 1s. 7d. "        |

Lincoln quoted a level sovereign, and Doncaster was the only leading market under that price.

No official averages are struck for English beans, peas, or rye, but 33s for common spring beans, 33s also for common dun peas, and 26s for old rye may be mentioned as values ruling all over England, whereon samples of these three crops are to be met with at all. The supply is practically limited to six or seven counties in the east and south-east. In Lincolnshire some English ryepeas is on offer at 62s. per qr, but we have not seen any English linseed for some time.

The sales of English wheat since harvest have for forty-seven completed weeks of the cereal year been much above the average. We may with some confidence look forward, therefore, to complete returns in September next, showing that the cereal year 1905-6 was one of quite exceptional supply.

This season..... 2,881,000 qr. at 28s. 8d. per qr.  
Last ..... 1,005,000 ..... 30s. 8d.

The sales of English barley have been a little above those of the preceding season, but since July came in scarcely any business has passed.

This season..... 3,199,000 qr. at 24s. 4d. per qr.  
Last ..... 3,132,000 ..... 24s. 9d.

The sales of English oats have been small. Evidently farmers have wanted more of their produce than usual for actual use on the farm and in the neighbourhood without sending to market.

This season..... 906,000 qr. at 18s. 6d. per qr.  
Last ..... 1,282,000 ..... 17s. 1d.

The imports of the United Kingdom last week were as follows:—

Wheat, 433,000 qr.: a good supply.  
Flour, 87,650 sks.: a small arrival.  
Barley, 8,200 qr.: the smallest imports of this cereal in any complete week since the new currency.

Oats, 100,000 qr.: a moderate supply.  
Maize, 168,000 qr.: less than usual.

The imports of cereals since harvest have been 19,473,000 qr. of wheat, 2,418,960 qr. of barley, 5,173,000 qr. of oats, and 9,566,000 qr. of Indian corn.

For two or three days after the suppression of the Russian Parliament there was a disposition to hold back Russian grain. Prices were 6d to 1s dearer, and the tone of trade very firm. But the Russian people, who rise in formidable revolt on very obscure pretences, have taken this *comp d'Etat* very placidly, and the markets closed on Saturday with the natural revulsion from previous ideas. Prices tended to decline, and were especially weak

for future delivery. There were free offers to ship Russian new barley in the autumn at 18s 3d, Russian new oats at 15s, and Roumanian offers for corresponding dates also came at very low prices. The market for Argentine maize became coincidentally cheaper, owing to colossal shipments, so that with wheat, barley, oats, and maize all weakened in position between the 23rd and the 25th; the situation from grain holders' point of view is changed somewhat markedly for the worse. There are, however, some salient exceptions. English produce is as dear as ever through scarcity; bran, middlings and pollard are held for 2s. 6d. per ton advance. There is also a rise of 1s. per cwt. in linseed, and a recovery of 3d. per cwt. in beet sugar, signs that the currents which have been making against value in other directions are not the only influences which have to be considered.

The supplies of wheat on passage on 25th inst. were not very much above the average of 24 millions.

Californian, 300,000 qr.; American, 155,000 qr.; Russian, 210,000 qr.; Indian, 800,000 qr.; Argentine, 500,000 qr.; Australasian, 600,000 qr.; Various, 30,000 qr.; total, 2,355,000 qr.

The supply of flour on passage has fallen to 200,000 sacks, or two-fifths of an average.

The supply of maize on passage is large:— Argentine, 920,000 qr.; American, 70,000 qr.; Russian, 70,000 qr.; total, 1,060,000 qr.

On the other hand, 180,000 qr. of barley on passage is a very small total. The supplies of oil-seeds on passage are:—Linseed, 112,000 qr.; rapeseed, 20,000 qr.; and cottonseed, 21,000 tons.

The shipments of American last week were moderate. The largest item was 98,000 qr. of maize, then came 94,000 qr. of wheat, and then 74,000 sacks of flour. Exports of barley and oats were insignificant.

Argentina, on the other hand, surprised the trade by a materially increased exportation of all leading articles. The maize shipments were 465,000 qr., those of wheat 212,000, and of linseed 21,000 qr.

Russia shipped last week 195,000 qr. of wheat, 123,000 qr. of barley, 267,000 qr. of oats, and 7,000 qr. of maize; these are, with the exception of rice, decidedly heavy exports for a week when old crops are practically played out in an average season. Roumania supplemented Russian exports with 9,000 qr. of wheat, 6,000 qr. of barley, 5,000 qr. of oats, and 32,000 qr. of maize.

India shipped 150,000 qr. of wheat (all from Kurrachee), and 29,000 qr. of linseed. Australia shipped 7,000 qr. of wheat and 5,000 sacks of flour. There were no grain shipments last week from Persia or Egypt.

The sailings of grain and seed-laden vessels from ports-of-call for the week were 6 wheat, 1 Birkenhead, 1 Cardiff, 1 Cork, 2 Dublin, 1 London.

Since January 1, 1906, the total arrivals have been 188 wheat, 2 barley and wheat, 1 barley, 3 maize, 1 locust beans and 22 linseed: total, 217.

Last year during the same time the arrivals were 239 wheat, 2 wheat and oats, 1 flour and wheat, 13 barley and wheat, 1 wheat and linseed, 2 flour, 8 barley, 5 maize, 1 beans, 4 locust beans, and 58 linseed: total, 311.

The London Corn Trade Association c.f. and quotations for the settlement of rejection and difference in weights on wheat under Rule No. 4 of the Association East Indian wheat contracts are as follows, viz.:—Via Canal, Crop 1905: Choice white Kurrachee, 3s. 6d.; soft red Kurrachee, 2s. 6d. per 492 lb. These prices will rule until further notice.

## BREWERS' AND DISTILLERS' GRAINS

London, Saturday.—Wet Grains: The market shows a stronger tendency, at about 1s per ton more money:—15s to 16s ale, and 12s to 13s porter, 25s distillers, and 32s 6d pressed white distillery meal per ton. Other articles without change as follows:—Dried Grains: Ale, 92s 6d, mixed 80s 3d, and distillers 110s per ton on rail London; ale 90s, and mixed 82s 6d per ton on rail Burton-on-Trent. Oat feed, to arrive 72s 6d; Rangoon rice meal, 96s 3d; Calcutta rice meal, 94s 3d; fine ground rice husks, 60s; rice germ, 97s 6d per ton, free on rail, London.—HAMLYN AND CO.

## LONDON HAY TRADE.

**Saturday.**—There is a continued shortage of supplies, and with a good demand trade keeps very firm, with prices again the turn dealer. Stocks of 8d appear to have got down to a very low level, and deliveries have been of a very sparse character, in consequence the larger supplies of new crop coming along have found a better trade at more money, the condition and quality of which being so good, it looks as if before long values of both new and old will be very much on the same level. At present the market value of new is about 10s to 13s ton below old. The demand for straw keeps steady with no change in prices to report. There is a big business passing in foreign hay, and during the last few days. Canadian mixture is a firm trade at more money. Dutch hay is also much inquired for. We hear of large arrivals of Algerian hay, and during the last week over 1,000 tons have come forward for which a fair price has been obtainable. Prices ruling are about as follows:—English old crop best meadow hay, 8s to 82s 6d per ton; good meadow hay, 72s 6d to 77s 6d per ton; inferior, 60s to 67s 6d per ton. Good clovers 92s 6d to 95s per ton. Good Best mixtures, 90s per ton; good mixtures, 75s to 85s per ton; seconds mixtures, 60s to 70s per ton; wheat straw, 28s per load; oat straw, 28s per load; barley straw, 29s per load, all ex rail London. Foreign: Canadian mixtures, 80s per ton; good Dutch hay, 65s to 67s 6d per ton; Algerian hay, 65s to 67s 6d per ton. French 1st and 2nd

cut clover, 80s per ton; large bale wheat straw, 50s per ton; small bale wheats, 41s per ton. These prices are by large delivered alongside London Thames Wharf.

## THE BALTIC.

The cargo trade has lost tone since the 24th. Wheat cargo sales show about 31 decline. They include Kurrachee White at 29s. 9d. per 492 lb., Kurrachee Red at 29s. 3d. per 492 lb., New South Wales at 30s. 3d. per 480 lb., Fine Victorian at 37s. 6d. per 480 lb., No. 1 Northern Manitoba at 30s. 9d. per 480 lb., Red Walla at 31s. per 500 lb., Rosario at 29s. 9d. per 480 lb., Blue Stem at 32s. per 500 lb., and White Walla Walla (arrived) at 31s. 6d. per 500 lb.

Maize cargoes decidedly favour buyers. Sa'es—all per 480 lb.—include American at 21s. 9d. and 22s., Roumanian at 20s. 9d. and 21s., and Argentine at 20s. 6d. and 20s. 9d. The higher price was in every case that had not earlier in the week. Some offers to ship from Caucasian ports at 21s. 9d., and from Bulgaria at 21s., are repented, but we do not hear that there are buyers at the prices indicated.

Other cargo sales include Kuznetzkiye barley at 19s. 6d. per 416 lb., White Sea oats at 15s. 6d. per 304 lb., Argentine linseed at 41s. per 416 lb., and Bombay cottonseed at 55s. per ton.

The arrivals of grain and seed-laden vessels at ports-of-call for the week were 22 wheat (1 Adelaide, 1 Bahia Blanca, 1 Buenos Aires, 1 Geelong, 3 Melbourne, 1 Port Germain, 3 Port Pirie, 1 Rosario, 2 Seattle, 2 Sydney, 2 Tacoma, 4 Wallaroo); 1 linseed (Rosario)—total 23.

# CORN MARKETS.

## LONDON.

**Mark Lane, Wednesday.**—Wheat: English firm, but quiet, on short supplies. Foreign sellers maintain late rates, but demand very slow; South Russian landed quoted at 30s 3d, 33s 3d; No. 1 Northern Manitoba ex ship at 32s 6d. Flour quiet, unchanged. Maize steady, quiet. Mixed American, ex ship, quoted at 21s 10½d, landed at 22s 6d; La Plata, ex ship, at 21s, landed at 21s 6d. Barley firm, inactive. Odessa-Nicolaieff, ex ship, quoted at 18s 3d, 18s 6d; landed at 19s 3d. Oats rather firmer, but quiet.

**Mark Lane, Friday.**—Wheat: English steady, quiet, at late rates. Foreign sellers ask late currencies, but demand very poor. South Russians, ex ship, quoted at 29s 9d to 33s 3d, landed at 30s 3d to 33s 3d. Persian landed at 31s to 32s 6d. Choice white Karachi, 30s; reds at 29s 9d. No. 1 Northern Manitoba at 32s 6d, No. 2 32s, No. 3 at 31s 9d, all ex ship, to arrive. Flour quiet, unchanged prices. Hungarian quoted at 29s; Minnesota patents at 24s 6d; bakers' at 20s. Maize dull. Only a limited business passing, at about late rates. Mixed American quoted at 21s 10½d, ex ship, and 22s 6d ex quay; River Plate, ex ship, at 21s; landed at 21s 6d. Barley steady, but quiet. Odessa-Nicolaieff, ex ship, quoted at 18s 3d; landed at 19s 3d; American at 18s 6d. Oats quiet, unchanged.

## COUNTRY.

**Ashford, Tuesday.**—There was again a small attendance, and not much corn was offered. A few samples of English wheat were held for 34s. English oats were scarce, and very dear, white making 22s to 24s; and black, 20s to 23s. Other quotations: English feeding barley, 26s to 28s; foreign grinding barley, 21s to 23s; Mazagan beans, 32s to 34s; tick beans, 34s to 36s; peas, 33s to 34s; round maize, 24s to 25s; flat maize, 25s to 26s per qr.

**Banbury, Thursday.**—Wheat, red, 31s to 31s 6d per qr; barley, 26s to 30s per qr; beans, 32s to 33s per qr; oats, 20s to 25s per qr; peas, 30s to 34s per qr.

**Birmingham, Thursday.**—Small attendance at this market. Foreign wheats were firm at last week's full prices, and met with more inquiry. No English wheat offering. River Plate maize was 3d lower, at 20s 9d per 480 lb Sharpness; flat maize was unchanged at 22s 6d per qr Bristol; grinding barley was firm, at 19s 3d per 400 lb at Sharpness; English oats, 22s to 22s 6d per 312 lb; beans, 13s 3d to 13s 6d per 196 lb delivered.

**Brighton, Thursday.**—There was a slow trade at last week's prices and a small attendance. No buyers of old crop wheat; waiting for the new, which, with this fine weather, should be on sale next week. One large farmer starts cutting to-day. Quotations:—Barley, 28s to 33s; grinding ditto, 22s to 24s; English oats, 19s to 22s; peas, 32s to 33s; beans, 33s to 35s.

**Bristol, Thursday.**—English wheat, still none on offer. Foreign wheat firmly held for late rates. Flat maize 3d lower on spot owing to heavy arrivals; other positions unchanged. Flat maize unchanged. Barley very firm at 6d advance. Oats unaltered. Flour, consumption slow, unchanged in values.—**GRACE BROTHERS.**

**Canterbury, Saturday.**—Oats in brisk demand at 19s to 23s per qr. The few remaining lots of choice wheat moved off slowly at 34s. Beans firmly held at recent values.

**Carlisle, Saturday.**—Small supply of oats in our market to-day. Quick sale at pull prices, 22s 6d to 23s per 336 lb.—**THOMAS ROBINSON.**

**Chichester, Wednesday.**—There was practically no corn on offer, and, with a small attendance, trade was almost at a standstill. One sample of new white wheat was offered at 22s. The price of peas was 34s per qr., and flour from 25s to 27s per sack.

**Colchester, Saturday.**—Small attendance, farmers busy harvesting, no corn offering, prices unchanged.—**JOSEPH WILES AND SON, LTD.**

**Coventry, Friday.**—Not a large attendance. Wheat shown sparingly and firm at last week's quotations. Old spring corn unchanged. Beans were very scarce, and a shade dearer. A sample of new oats shown. Quotations: Wheat, 12s to 12s 6d per 186 lb; barley, 28s to 34s per 448 lb; oats, 25s to 26s 6d per 352 lb; beans, 12s 9d to 13s 3d; peas, 12s to 14s per 196 lb.

**Derby, Friday.**—There was very little business and prices remained unaltered. White wheat made 32s to 34s; red, 31s to 32s; old beans, 34s to 35s; new, 22s to 24s.

**Devizes, Thursday.**—There was no change in prices. The following were the quotations:—New wheat, 15s to 17s; secondary, 13s 6d to 14s 6d; best barley, 26s to 32s; secondary, 20s to 24s; rye, 22s to 24s; old black oats, 22s to 24; new ditto,

19s to 23s; malting barley, 26s to 32s; beans, 16s to 18s; fine flour, 21s to 26s; extra fine, 27s to 30s.

**Dorchester, Saturday.**—Farmers being now busy in the harvest field, there was by no means a large attendance, and there was also a limited offer of samples, stocks of most things being evidently largely, if not wholly exhausted, wheat being more scarce than we ever remember seeing it before. Prices of English wheat remain practically unchanged, and foreign was very quiet at about late rates. Barley with a little more demand brought enhanced values, from 3d to 6d per qr more. Maize made late rates, with a rather firmer feeling for one or two varieties, which are somewhat scarce. Beans and peas brought late rates. Flour quiet at recent values.

**Dublin, Friday.**—There was a moderate attendance. Market quiet but firm. Flour in fair demand. Outmeal firm. Bran and pollard in small supply. Quotations:—Wheat, 19s to 20s; malting barley, 14s 6d to 15s; grinding ditto, 12s 9d to 14s; oats, 11s to 14s; flour, 10s to 11s 6d; pollard and bran, 6s to 6s 6d.

**Glasgow, Friday.**—Flour slow for spot parcels, but sellers accepted 6d per sack less for forward positions. Wheat steady; home millers slow, with no inclination for business, as they cannot compete with American rates. American maize scarce on spot at 13s per 280 lb; round steady at 12s 7½d to 12s 9d. Other articles quietly steady and in retail request.

**Grantham, Saturday.**—Harvest operations having commenced in the district, there was only a small attendance of farmers, and practically no business was done.

**Hereford, Wednesday.**—No English grain offering, and quotations in wheat nominally unchanged. In oats there was a moderate amount of business passing, while maize went slowly at last week's prices. The barley trade held up, a few offers being received for moderate quantities. Wholesale quotations: Wheat, 3s 9d to 3s 10d per 62 lb; barley, 3s to 4s per 56 lb; oats, 2s 6d to 3s 3d per 40 lb; beans, 4s to 4s 3d per 65 lb; maize, 3s to 3s 3d per 60 lb.

**Ipswich, Tuesday.**—Wheat: Only a few samples on offer; prices nominal. At 32s to 32s 6d per qr. Oats were firm at 22s to 23s 6d per qr. A nice sample of new winter oats was on the market, and ultimately sold at 19s per qr on the line. Maize unchanged, round 21s 6d to 22s, and flat 23s per qr. Other feeding corns in quiet demand at unaltered prices.

**Leeds, Friday.**—English wheat was still in short supply, and prices were the firm higher. There was also less foreign on offer, and as a result values were up 3d per qr. Feeding and malting barleys maintained fully late quotations. Beans, peas, oats, and maize were without change. Flour was in better demand, with a rising tendency for ordinary descriptions.

**Lincoln, Friday.**—Small attendance, but prices were inclined to be a trifle higher. Oats were in small supply, and experienced a fair demand at late rates. Maize was 3d per qr dearer on the week. Beans unchanged.

**Liverpool, Friday.**—The market there has been in small attendance, but wheat meets a fair inquiry, which has resulted in a moderate business at last market day's currencies. Flour—A very quiet trade and occasionally rather easier to buy for foreign, but no change is made in English-made brands. Maize—Mixed is quiet and occasionally ½d lower to sell. Plate is firm at full prices, with a moderate trade. European sorts quiet with a small trade. Barley—Malting quiet, unchanged. Feeding firm, with more doing at ½d to ¾d advance. Beans firmly held, but demand restricted. Peas slow at late rates, but steady. Oats steady with a moderate demand. Outmeal a difficult sale, but no change is made in quotations. Oileak a slow business at about recent currencies. Indian meal is more firmly held, but moves very quietly at the quotations.—**SEGAR AND TUNNICLIFFE.**

**Leeds, Tuesday.**—The bad crop and political news from Russia and the small shipments and shrinking quantity afloat, have apparently less effect on the trade than the glowing harvest reports from America, and good prospects in France, Germany, and this country. Markets have shown a sagging tendency, millers showing no intention to increase stocks, and with a limited consumptive demand to-day, last week's rates are barely maintained. Maize and other feeding stuffs the turn lower.—**DUNN AND CO.**

**Leicester, Saturday.**—Average attendance of buyers and dealers, with small supplies of home-grown wheats, which met a dragging trade at rather weaker prices. Red wheats, 31s to 32s 6d; white wheats, 32s to 33s 6d per 36 stones; grinding barley quiet; beans firm: fine oats, 23s to 25s per 26 stones.

**Manchester, Thursday.**—English wheat scarce and dearer, and foreign unchanged. Little doing in flour. Indian corn about ½d dearer on the week. Oats slow and unchanged,

Foreign feeding barley unchanged, and English nominal. English beans 6d per qr dearer. Peas firm. Bran about 3d dearer.

**Newark, Wednesday.**—Trade inactive; prices little change. New oats shown, 21s offered; wheat, white and red, 32s to 33s 6d; barley, malting none, grinding 22s to 24s; oats, white, 22s to 23s 6d, black 21s to 22s; beans, old none, new 34s 6d to 36s per qr.

**Newcastle-on-Tyne, Saturday.**—A quiet demand prevailed at our to-day's market for wheats of all descriptions. Prices, however, remained firm at last week's quotations. Maize, both American and Plate, was firm and dearer for spot parcels, steady to arrive. A fair demand for beans at fully late rates; peas slow at late quotations. Foreign oats remain steady at fully late week's quotations; fine qualities Scotch were firm and in sellers' favour; common qualities, however, were neglected.—**J. POLLARD AND CO.**

**Northampton, Saturday.**—Very poor attendance. No new corn on offer. Wheat, 31s to 32s; malting barley, 26s to 32s; white oats, 21s to 23s; black oats, 20s to 21s; beans, 31s to 32s; peas, 30s to 35s; flour, 24s 6d to 28s 6d.

**Nottingham, Saturday.**—The few samples of English wheat made full prices, foreign 3d higher. Grinding barley firm. Oats and beans in small supply and made full rates.—**RON HURBLE.**

**Notley, Friday.**—Wheat, English, 33s to 34s, barley, 28s to 30s; oats, 24s to 25s; Indian corn, 24s to 25s per qr.

**Peterborough, Saturday.**—A week of fine weather has brought the crops on rapidly, and several pieces of winter oats are cut in this district. There has been very little corn of any kind showing to-day; the small business done was at about late rates.—**THOMAS HILL AND SON.**

**Plymouth, Thursday.**—Owing to the Kingsbridge Fair, there was a very small attendance to-day. Wheat, unchanged. Barley, 3d to 6d dearer. Maize firmer. Oats, 3d dearer.—**ORLANDO DAVIS AND CO.**

**Reading, Saturday.**—There was a small attendance, with very little trade doing at the following prices:—Wheat, 30s to 34s; oats, 18s 6d to 24s; grinding barley at late rates.

**Retford, Saturday.**—A quiet market, the show of grain being small and the attendance thin. Some samples of new oats from the Ramshill district were shown for the first time. Transactions in wheat were few, and prices a shade lower, the top figure being 30s 6d. Small lots of grain for feeding purposes changed hands at the rates of the previous week, maize making 24s 6d to 25s; English beans, 34s 6d; white oats, 23s to 24s; black ditto, 22s to 23s per qr.

**Ripon, Thursday.**—No English wheat on offer. Prices:—Wheat, 28s 6d to 30s; wheat, foreign, 32s to 35s 6d; barley, grinding, 23s 6d to 24s 6d; barley, malting, 27s to 29s; oats, 21s to 22s 6d; maize, round, 23s to 24s; maize, flat, 25s to 26s per qr.

**Sheffield, Tuesday.**—With a rather better demand, there is still little change to report in the trade from last week. Wheat makes 6d per qr more on the week. Beans and oats remain at full late prices. Foreign oats and maize quoted unaltered. Quotations:—Wheat, white, 33s to 33s 6d; ditto, red, 33s to 33s 6d per 504 lb; oats, black, 21s to 21s 6d; ditto, white, 22s 6d to 23s per 336 lb; peas, grinding, 32s to 32s 6d; ditto, blue, 55s to 70s per 504 lb; beans, English, 37s to 37s 6d per 532 lb; barley, grinding, 24s to 24s 6d; ditto malting, 28s to 32s per 448 lb; Indian corn, small, 24s to 24s 6d; ditto Plate, new, 22s 3d to 22s 9d; ditto flat, 24s 6d to 25s per 480 lb.

**Shrewsbury, Saturday.**—Wheat, 13s 3d to 13s 6d per 225 lb; old oats, 14s to 15s per 225 lb; peas, 13s to 14s per 240 lb; beans, 14s 6d to 15s 6d per 240 lb.

**Stamford, Friday.**—Fair attendance, many farmers being busy with the harvest. Wheats, 31s to 31s 6d; beans, to 33s. Maize and feeding stuffs unaltered.

**Stockton, Wednesday.**—No local wheat showing. Owing to brilliant weather for the coming crops foreign wheat very quiet, and the tendency regarding prices rather easier. Oats and maize quiet.

**Sunderland, Saturday.**—Small supply of grain. Wheat steady at last week's prices. Barley and oats quiet. Arrivals:—Coastwise wheat, 60s qr; foreign wheat, 56s, 58s.—**E. AND F. RICHARDSON.**

**Warwick, Saturday.**—Very quiet market, and practically no business passing. Prices for grain and feeding stuffs unaltered.

**Winchester, Saturday.**—Supply of English wheat almost exhausted. Foreign very firm. Barley 3d advance on the week. Maize and oats unaltered. Flour a fair demand and fully late rates.—**FEAR, COLEBROOK AND CO., LTD.**

**Wisbech, Saturday.**—Small attendance at market. No samples of English grain offering. Harvest expected to commence next week.—**JAMES FLETCHER.**

## FOREIGN.

**Hamburg, Saturday.**—We have fine weather now, and it is to be hoped that our crops will be housed in fine condition. A few samples of new barleys shown so far are highly promising, and also Bohemia will probably secure a fine crop. On the other hand, Hungary is not so favourable, and the samples shown of the usual mercantile barleys are defective in colour, however the Chevaliers have been housed later, and these undoubtedly will turn out inferior. — FRANCIS M. TH. DUNNE.

**Hamburg, Saturday.**—Weather dry and sunny, favouring harvest work. Market quiet for wheat and rye, but there is a fair demand for feeding stuffs, the consumption of which, owing to the increase of live stock in this country, is constantly improving. Fine red Holstein wheat is getting scarce, and is held at 30s 6d to 31s, 61 lb new Holstein and Saale wheat, Aug.-Sept. delivery, is selling at 28s 9d to 29s 6d per 504 lb, f.o.b., duly deducted. American red winter No. 2, alfalfa, is offering at 28s 9d; hard winter No. 2, Aug.-Sept., at 29s; Australian, on the spot, at 31s per 480 lb. Rye quiet, but offers from Russia are not lower, 9 10/15 Nicolait alfalfa is held at 22s 6d, 9/20 loading at 23 per 480 lb, c.i.f. Hamburg. The first samples of new barley received from Bohemia show a stout grain of light colour, but wanting mellowness. There are good crops in Austria, Hungary and Germany, but quality will vary according to the state of the weather when secured. Feeding barley in fair demand; 60/61 Ko South Russian alfalfa is selling at 17s 9d, Aug., Sept.-Oct. at 17s 3d to 17s 6d per 408 lb c.i.f. Hamburg. Maize quiet, American mixed is held at 21s 3d to 21s 6d; River Plate July-August at 20s 6d per 480 lb c.i.f. Hamburg. — JOHN TATLOCK.

## CORN STATISTICS

### Imports of Foreign and Colonial Corn.

| Statement of the quantities of Foreign and Colonial Corn Imported into the United Kingdom in the week ended Saturday, 7 July 28, 1906.— |                |  |  |  |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------|--|--|--|
| Wheat .....                                                                                                                             | 1,927,300 cwt. |  |  |  |
| Wheat-flour .....                                                                                                                       | 245,200 "      |  |  |  |
| Barley .....                                                                                                                            | 193,800 "      |  |  |  |
| Oats .....                                                                                                                              | 513,300 "      |  |  |  |
| Maize .....                                                                                                                             | 905,000 "      |  |  |  |

## HAY AND STRAW

**Birmingham, Friday.**—Small supply; trade quiet. New hay, £3 per ton; old hay, £4 5s per ton.

**Derby, Friday.**—Best clover, 8s to 9s per ton; best hay, 7s to 8s 9d; second, 6s to 7s; wheat straw, 6s to 7s; pressed, 5s to 6s; chop straw, 5s to 5s 6d; peat moss, 3s to 4s.

**Hereford, Wednesday.**—The hay trade was slow, no business having transpired. The straw trade exceedingly dull. Last week's figures maintained. Hay (in stacks), 5s to 6s per ton; straw (in bulk), 3s to 4s per ton.

**Lancaster, Saturday.**—Meadow hay, 6d; clover, 7d; wheat straw, 4d; oat straw, 4d per stone.

**Lincoln, Friday.**—New hay, 5s to 6s; old ditto (very scarce) 7s to 8s; seeds unchanged; straw, 4s per ton on the ground.

**Manchester, Friday.**—Hay, new, 4d to 5d; clover, new, 5d to 6d; straw, oat, 3d to 4d per stone.

**Sheffield, Tuesday.**—Moderate supply, and a quiet market, with prices inclined to sellers' favour. Choice old seeds, £3 to £5 5s; choice meadow hay, £4 10s to £5; straw, £3 5s to £3 10s per ton.

## CHEESE.

**Newport, Wednesday.**—About 8 tons pitched, a good attendance of buyers, and a brisk trade. Quotations: Cheddar, 4s to 5s per cwt; fancy dairies, 5s to 5s 6d; Derbys, 6s to 6s 6d.

## BUTTER.

**Thursday.**—Aminster: 10d to 1s. Birmingham: 1s 2d to 1s 3d. Bridgton: 1s to 1s 2d. Devizes: 1s 2d to 1s 4d. Driffield: 11d to 1s. Evesham: 10d to 1s 3d. Kidderminster: 1s 1d. North-tawton: 11d. Penzance: 8d to 11d. Ripon: 1s 7d to 1s 9d per 24 oz roll. Scarborough: 1s 3d. Wellington (Salop): 1s 1d to 1s 2d. Wetherby: 1s 1d to 1s 2d.

**Saturday.**—Appleby: 11d to 1s 1d; Berwick: 10d to 1s 1d. Bridgton: 1s 1d to 1s 3d. Carlisle: 11d to 1s. Doncaster: 1s 1d to 1s 2d. Grantham: 1s 2d to 1s 3d. Howden: 1s to 1s 2d. Lancaster: 1s to 1s 3d. Mutton: 1s 1d to 1s 2d. Penzance: 1s 1d to 1s 2d. Retford: 1s 3d to 1s 4d. Richmond (Yorks): 11d to 1s. Shrewsbury: 1s to 1s 2d. (Skips): 1s to 1s. 1s. Stokesley: 11d to 1s. Whitby: 1s 1d to 1s 2d. Worcester: 1s to 1s 2d. York: 1s to 1s 2d.

# TO-DAY'S MARKETS.

## THE CORN TRADE.

MARK LANE, MONDAY, JULY 30.

The market to-day was but a shadow of a really busy Monday in the autumn. There will not be many leading operators on the exchange between now and August 13, but after the Bank Holiday a certain number of millers are likely to look in on the 10th to see if any new wheat is up. To-day 34s 6d was paid for rough chaff, 35s for fine white fluffs.

The show of English wheat was very small, but there are perhaps 1,000 qr. in all at the railway depots. Maize wheat was 6d. lower in some instances, but no regular change in prices could be quoted. Indian was perhaps the weakest, American the firmest sort, with Argentine and Manitoba fairly steady.

Maize was the turn lower for Argentine and foreign oats were obtainable at 3d to 6d reduction wherever the weight fell below 32 lb. Foreign Barley was dull, but not weak. Values for Beans and Peas were higher than ever, but Dari, with liberal imports, was a little cheaper to buy.

## THE FLOUR TRADE.

MARK LANE, MONDAY, JULY 30.

There was much difficulty experienced to-day in placing country and London makes, but holders did not abate the terms asked, which, since the 23rd inst. have been exceedingly moderate.

American Spring Patents were 3d. to 6d. lower on the week, a concession which led to a slight increase of business. Manitoba Patents made 24s. 6d. for finest, 24s. for ordinary, 20s. for good bakers' grade, and 19s. for common. These are all low prices on the quality of the respective types. Hungarian flour receded 6d. for the finer makes.

Australian, Argentine, Belgian, and French sales of flour unregistered as on the 23rd, but there was scarcely sufficient business doing to test quotations. Bran, middlings, and pollard were 2s. 6d. per ton decrease on the whole, but maize flour declined 6d. per sack.

## CLOSE OF THE MARKET.

THE MARKET CLOSED CHEAPER FOR OATS, 6d. DEARER FOR BARLEY, AND UNCHANGED FOR WHEAT AND MAIZE.

## SEEDS.

London, Monday.—The demand for rape and mustard is increasing. Prices unchanged. New rape is now appearing on the market. Business passing in tritium singularly limited for the time of the year.—JOHN PICKARD AND CO.

## GRAIN AND FLOUR FACTORS REPORTS.

Flour.—The American markets continue easy, with lower prices for winter wheat flours for shipment. Grain.—Round and flat corn are 1 1/4d per boll dearer. Foreign oats are steadier at the decline. Beans, after easing, are again dearer for shipment. Pease, owing to the high price, are in very little demand. Barley is firm. Oatmeal, steady. Oatmeal quiet. Mill Stuffs.—Thirds are as scarce as ever, and bran is also more in demand now.—MCKINSON AND McDONALD (Glasgow).

Flour.—Trade continues dull, and prices at the moment somewhat irregular.—GREENHILL BROS. (Belfast).

Offals.—No change to report in bran; demand, however, not quite so active.—GREENHILL BROS. (Belfast).

Wheat arrival are large, and the trade is quiet; prices are unchanged. Flour slow at late prices. Maize steady. Barley on spot scarce and 6d dearer. Oats large arrivals, and common qualities 3d per qr lower.—COVENTRY AND SHEPPARD.

Flour.—A quiet trade at about last week's prices.—T. S. MEDILL AND SONS, LTD.

Milling Offals.—All ofal very scarce and firm and great difficulty is experienced in getting delivery, and an advance of 2s 6d to 5s per ton is well maintained all round.—JOHN BAWCOMB AND CO.

## OIL SEEDS.

Mark Lane, Monday.—There is an improved inquiry for oilseeds despite the weather being so fine. Value for linseed is 1s up on the week.

## TERM MARKET.

The market for futures is dull, with American wheat at 6s. 7d. per cental for August to November delivery, and American maize at 4s. 7d. per cental, also for these dates. The one new feature is the offer of Argentine maize for September delivery at 4s. 3d. per cental.

## THE BALTIC 1 pm.

### STATE OF TRADE.

There is a general disposition to take rather less money for cargoes near at hand as the offers for autumn shipment are numerous, and at very moderate prices.

### BUSINESS DONE.

Wheat.—Santa Fe, 29s 9d per 480 lb. on passage; Bahia Blanca, 30s 6d per 504 lb. on passage; Bahia Blanca, 30s per 504 lb. September shipment; Roumanian, 29s 6d per 492 lb. September shipment (new crop); Roumanian, 29s 3d per 492 lb. October shipment (new crop); No. 2 Red Winter, 29s 6d per 480 lb. prompt shipment (new crop); 29s 6d per 480 lb. August shipment (new crop); Hard Winter, 28s 9d per 480 lb. August shipment (new crop); best Manitoba, 30s 6d per 480 lb. August shipment; best Manitoba, 30s 9d per 480 lb. September shipment; red Kurache, 27s 3d per 492 lb. September shipment; Australian, 31s per 480 lb. on passage.

Maize.—Galatz, 21s 9d per 480 lb. on passage; Argentine, 20s per 480 lb. prompt shipment; Roumanian, 21s per 480 lb. prompt shipment; Poti, 21s 3d per 480 lb. prompt shipment.

Barley.—Pots, 19s 9d per 400 lb. prompt shipment; Odessa, 19s 6d per 400 lb. prompt shipment; Odessa, 18s 3d per 400 lb. Oct. shipment (new crop); Californian, 25s per 400 lb. Oct. shipment (new crop).

Oats.—Vologda, 15s 6d per 304 lb. prompt shipment; Archangel, 15s 3d per 304 lb. prompt shipment; Petersburg, 14s 9d per 304 lb. prompt shipment; White Libau, 14s 9d per 304 lb. prompt shipment.

Linseed.—Calcutta, 42s 3d per 410 lb. on passage; Duluth, 40s 9d per 424 lb. October shipment; Petersburg, 40s 6d per 416 lb. prompt shipment.

# MARKET SUPPLEMENT.

## FRUIT AND VEGETABLES.

**Covent Garden, Saturday.**—Fruit in good supply and steady demand. Greenstuffs also sold readily, ample supplies being on offer. Quotations:—Apples (English), 2s 6d to 5s per half-sieve; ditto (Australasian), 10s to 12s 6d; ditto (French), 4s 6d to 6s; ditto (Lisbon), 7s to 9s per case; pears (French) 3s to 5s 6d per case; peaches, (English), 2s to 9s per dozen; ditto (French), 2s 6d to 4s per crate; tomatoes (English), 3s to 3s 6d; ditto (Channell Islands), 2s 6d to 3s per 12 lb; ditto (Valencia), 7s to 9s per case; black currants, 6s 6d to 8s 6d; red ditto, 3s to 4s 6d per half-sieve; white ditto, 3s 6d to 4s 8d per 12 lb; raspberries, 3s 6d to 5s per dozen punnets; green figs, 1s to 3s 6d; nectarines, 2s to 8s per dozen; gooseberries, 2s 6d to 4s 6d; cherries, 3s 6d to 12s per half sieve; melons (English), 9d to 2s; ditto (French Rock), 2s to 3s 6d each; ditto (Valencia), 9d to 10s per case; plums (French), 3s to 5s 6d per half sieve; greenhouses, 9d to 1s 3d per box; ditto, 4s 6d to 6s per half sieve; green walnuts, 5s to 6s per bushel; scarlet runners, 3s 6d to 4s per half sieve; broad beans, 9d to 1s; beetroot, 1s 6d to 2s per bushel; green onions, 1s 6d to 2s per dozen bunches; ditto (Port), 7s to 8s per case; green peas, 2s to 3s per bushel; ditto, 4s to 5s 6d per bag; parsley, 1s 6d to 1s 9d; sage, 9d to 1s; mint, 1s to 1s 6d; carrots, 1s to 2s; turnips, 1s to 2s 6d per dozen bunches; vegetable marrows, 9d to 1s; endive, 1s to 1s 6d per dozen; cabbages, 2s 6d to 3s 6d per tatty; cucumbers, 4s 6d to 6s per flat; mushrooms, 6s to 12s 6d per 12 lb; horse-radish, 8s to 13s per dozen bundles; potatoes, 60s to 90s per ton.

## POTATOES.

**Borough, Saturday.**—Good deliveries evidenced quiet support. English Puritans, 60s to 70s; Duke of York, 60s; Beauty of Hebron, 60s to 65s per ton; Dutch, 2s per bag.

**Carlisle, Saturday.**—There were fair supplies of potatoes in the public retail markets, and a steady demand at 6d per stone.

**Doncaster, Saturday.**—Plenty of potatoes offered and a good trade. Prices from 3s 3d to 3s 9d per 8 stones.

**Goole, Wednesday.**—A large attendance of farmers, but no potatoes on offer. Buyers are sending to Lancashire and Cheshire for their potatoes, on account of the small amount here. Selbys make 6s 9d per load.

**Lancaster, Saturday.**—Good supply of potatoes, which met a ready sale at 8s to 9s per load, and 9d per stone.

**Malton, Saturday.**—Good home-grown potatoes, 1s 4d; imported, 8d to 10d per stone.

**Manchester, Saturday.**—Yorkshire warps, 8s to 9s; Cheshire, new, rounds, 4s to 5s; kidneys, 5s to 6s per load; Bedford, 5s to 6s 6d; Norfolk Hebrons, 5s 6d to 6s per cwt.

**Spitalfields, Saturday.**—A fair quantity met a slow sale. English Puritans, 60s to 70s; Duke of Yorks, 60s to 65s; Early Rose, 55s to 65s; Beauty of Hebrons, 60s; Blacklands, 60s per ton; Dutch, 2s 9d per bag.

**Stockton, Wednesday.**—Lincolnshire potatoes 4s to 4s 5.

**Whitby, Saturday.**—New potatoes (home grown), 1s per stone.

**Workop, Wednesday.**—New potatoes, 8s to 9s per load of 18 stones.

**York, Saturday.**—Yorkshire grown new potatoes, which are a light crop, make 50s to 55s per ton, the prices being kept down by the abundant supplies from Lancashire, South Lincolnshire, and Scotland, where there has been more rain. In the retail market the prices are 2s 6d to 2s 9d per hamper of 6 stones.

## POULTRY AND GAME.

**Smithfield, Saturday.**—Fairly good supply; trade good. Surrey fowls, 3s to 4s; Lincolnshire fowls, 1s 9d to 2s 9d; Essex fowls, 2s to 2s 9d; Irish fowls, 1s 6d to 2s 3d; quails, 1s 4d to 2s; feathered pigeons, 9d; Bordeaux pigeons, 9d to 1s 2d; tame rabbits, 1s to 1s 3d; wild rabbits, 7d to 8d; Aylesbury ducklings, 2s 3d to 3s; country ducklings, 2s to 2s 9d; goslings, 4s to 5s 6d; live hens, 1s 9d to 2s each; Australian rabbits, 5s 6d to 6s 6d per dozen.

## HOPS.

**Canterbury, Saturday.**—Well-managed plantations on best lands look fairly well, but when washing has not been efficient the hot suns are turning the plant black. The bine is now in blossom, and it is clear that the yield must be under half an average. Market firm.

**Worcester, Saturday.**—Our reports to-day are far from satisfactory, and many say the well-cleaned hops look worse, and others can do nothing. Under these influences holders have advanced their prices, but still keep in advance of the ideas buyers, so that little business can be done.—CHARLES FARM & CO.

# TO-DAY'S MARKETS.

## CATTLE.

### Metropolitan Market, Islington.

|            | Monday, July 30, 1906. | Monday, July 31, 1906. |
|------------|------------------------|------------------------|

| Milch Cows | 30                     | 30                     |

Quotations per 8 lb. (sinking the offal).

|        | Inferior. | Second. | First. |
|--------|-----------|---------|--------|
|        | s. d.     | s. d.   | s. d.  |
| Beasts | 2 8       | 3 6     | 4 6    |
| Sheep  | 4 8       | 5 4     | 6 0    |
| Lambs  | 5 4       | 6 0     | 7 4    |
| Calves | 4 8       | 5 4     | 5 10   |
| Pigs   | —         | —       | —      |

Milch cows, per head, £16 to £21. British arrivals include as follows:—Scotland, 10; Eastern Counties, 100; Midland, Home, and Western Counties, 955; Devon, 25; Ireland, 10.

We note to-day an increase of 200 head in the number of beasts on offer to-day, compared with Monday last; as, usual, the majority of the supply was drawn from the Midland Counties. A small consignment of black-pollled Dublins found ready buyers at good values. Both prime and second quality English cattle ruled, dull and dragging, the tendency in regard to value being a downward one, though not quotably so, this depression of the trade here is partly accounted for by the bad trade which has been experienced in the Dead Meat Market the last few days. Fat butchering cows and bulls shared in the general depression, and met with little country demand. A clearance will not be made.

The following are top quotations per 8 lb. (sinking the offal):—

|                   | To-day.     | Monday, July 31, 1906. |
|-------------------|-------------|------------------------|
|                   | s. d.       | s. d.                  |
| Scotch            | —           | —                      |
| Devons            | 4 4 to 4 6  | 4 4 to 4 6             |
| Herefords         | 4 4 to 4 6  | 4 6 to 4 8             |
| Black Polls       | —           | —                      |
| Norfolks          | 4 2 to 4 4  | —                      |
| Runts             | 4 0 to 4 4  | 4 0 to 4 4             |
| Lincolns          | 3 8 to 3 10 | 3 10 to 4 0            |
| Black Polled Dub- | —           | —                      |
| lin Irish         | 4 4 to 4 6  | 3 10 to 4 2            |
| Lincolns          | —           | —                      |
| Fat Cows          | 3 4 to 3 6  | 3 2 to 3 4             |

In the sheep market there was an increase of sixty in the number of sheep and lambs penned, compared with Monday last. Trade was of an extremely slow nature for wethers, rates favouring the buyers in some cases to the extent of 2d per 8 lb.; ewes on the other hand were quoted 2d higher. The supply from Scotland was smaller the season for which is now on the wane, these shared in the general downward tendency in regard to value, as also did Irish. The lamb trade was firm and steady, 2d per 8 lb. more money being both easily asked and obtained. The supply included 200 Scotch, 600 Irish, and 1,411 from the Eastern Counties. There is very little prospect of a clearance being made to-day.

Unmentioned quotations are at per 8 lb. (sinking the offal) and are for the best of each class penned:—

|                         | To-day.     | Monday, July 31, 1906. |

| 6 st Halfbred ditto     | 6 0 to 6 2  | 5 10 to 6 0            |

There was a fair supply of calves, with a slow, but steady trade, the best on offer were quoted at from 5s 8d to 5s 10d per 8 lb (offal given in.).

## FOREIGN.

**Deptford, Monday, Beasts, 656.** To-day's supply consisted entirely of beasts from the United States. Trade was of a firm and steady nature; late currencies governing all transactions. The best on offer were quoted at from 4s to 4s 2d; seconds, 3s 8d to 3s 10d per 8 lb (offal given in.). On Saturday 2,131 beasts from the United States and 455 from Canada were offered for sale and met with a firm trade. The best on offer were quoted at from 3s 11d to 4s 2d for the former, and from 3s 10d to 4s for the latter; seconds, 3s 8d to 3s 10d.

Besides the above, 800 States were withheld: 127 Canadian sheep were offered for sale, and were quoted at from 3s 10d to 4s per 8 lb.

## FEEDING STUFFS.

**London, Monday.**—For linseed cake the market tends to higher prices, and demand is good for the smaller lines. Decorated and ordinary cotton cake are very firm. Dried ale grains can be had at a reasonable price. English Linseed Cake, ex mill 7 16 6 to 8 2 6; American Calcutta Linseed Cake, ex quay —; American Western Linseed Cake, ex quay 7 7 6 to 7 10 6; American Western Linseed Cake (to arrive), ex quay 7 10 0; Russian Oil Cake, ex quay 7 7 6 to 7 15 0; Decorated Cotton Cake, ex quay 8 0 0.

Decorated Cotton Cake Meal, ex quay —; London-made „ Cake (best ex mill), 5 0 0 to 5 2 6; Egyptian „ „ (in bags), ex quay 4 17 6 to 5 0 0; Burton Desiccated Ale Grains on rail, Burton 4 10 0; 41b lb ex warehouse 2 8 0 to 2 10 0; Calcutta Linseed (in bags) per 41b lb, ex warehouse 2 4 0; La Plata Linseed (in bags) per 41b lb (screened) ex warehouse 2 4 0 to 2 10 0; American Linseed (in bulk) per 41b lb, ex warehouse 2 4 0.—ROBT. & JOHN HEWETSON.

## PROVISIONS.

**London, Monday.**—Bacon: The arrivals of bacon last week were from Ireland 2,092 hales, and from foreign ports 12,037 hales. There was a quiet market for bacon last week, but it closed steeper, with prices ranging: Irish, 62s to 69s up to 74s; Danish, 60s to 66s up to 74s; Canadian, 61s to 63s up to 67s. Butter: Butter was a steady market. French, 92s to 104s; Danish, 114s to 116s; Russian, 84s to 102s; Dutch, 104s to 106s; Irish, 92s to 108s; Canadian Finest, 104s to 108s; Australian, 82s to 106s; New Zealand, 80s to 108s; American, 88s to 98s. Lard: The lard market was quiet. Irish, 54s to 62s; Danish, 48s to 58s; American, 44s 9d to 46s 3d.

## LIVE STOCK AND MEAT TRADE REVIEW

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

### Trade in London.

Notwithstanding there being a fair average attendance of buyers at the Islington Cattle Market on Monday, trade opened and continued throughout the day of a very slow and disappointing character, sellers, in some cases, having to accept a decline of 2d. per 8 lb. in value to effect sales. The supply included a rather larger consignment of Devons; these commanded our top quotation, and cleared early in the day. No Scotch or Irish cattle were offered for sale, there being no arrivals from either of these countries. Fat butchering cows and bulls shared in the generally slow trade which was experienced on Monday, but became a trifle firmer on Thursday, although not quotably so. As is more often than not the case, trade for fat beasts was confined to Monday.

At the Foreign Cattle Market Deptford, there was no market held owing to the non-arrival of steamers, but on Wednesday and Saturday a firm trade was experienced at an advance in value on the previous day, and a slight decline on the latter. The total number on offer at both markets was 4,124, as against 4,403 during the preceding week, consisting of 950 British (increase 90) and 3,174 foreign (decrease 369) these latter comprising 2,419 from the United States, and 755 from Canada. The following were the top rates obtained per 8 lb. (sinking the offal):—80 to 90 stone Devons, 4s. 6d. to 4s. 8d.; 90 to 95 stone Herefords, 4s. 4d. to 4s. 6d.; 90 stone Norfolks, 4s. 2d. to 4s. 4d.; 95 stone Runts, 4s. to 4s. 4d.; 100 stone Shorthorns, 3s. 8d. to 3s. 10d.; 90 stone States, 4s. 1d. to 4s. 3d.; 95 stone Canadians, 3s. to 4s. 2d.; 90 stone fat cows, 4s. to 4s. 2d.

The sheep trade was almost entirely confined to the Islington Market, and opened on Monday of an extremely slow nature, with a downward tendency in value. Scotch descriptions, on the other hand, were fairly well sought after at late values, whilst Irish sheep were extremely difficult to vend. Trade remained about the same throughout the week with the exception of ewes, these being quoted 2d. dearer on Thursday. Small choice grass lambs met with a ready sale on both days, on Thursday sellers being able to ask and obtain a rise of 2d. per 8 lb. in value. Irish descriptions were more difficult to vend. The total number penned at both markets was 10,707, as against 10,159 during the previous week. A small consignment of Canadian sheep were consigned this week, and were quoted at 4s. Best pens made per 8 lb. as follows (sinking the offal):—7½ to 8 stone Downs, 5s. 6d. to 5s. 8d.; 8 stone Scotch, 5s. 2d. to 6s.; 9 stone Downs, 5s. 4d. to 5s. 6d.; 10 stone ditto, 5s. 2d. to 5s. 4d.; 10 stone half-breds, 5s. to 5s. 2d.; 12 stone Lincoln half-breds, 4s. 10d. to 5s.; 10 stone Irish, 4s. 10d. to 5s.; 10 stone Down ewes, 4s. to 4s. 2d.; 11 stone half-bred ditto, 3s. 10d. to 4s.; 3 stone fat grass lambs, 7s. to 7s. 2d.; 6 stone half-breds, 5s. 10d. to 6s.

Calves numbered 100, and ruled firm throughout the week, the best on offer being quoted at from 5s. 8d. to 5s. 10d. per 8 lb. (sinking the offal).

### Trade in the West.

The want of grass keep in most districts, despite the rain we have had, still tends to keep the price of most stores, except the very best, at a disappointingly low price. Good useful milchers, both heifers and cows, are once again selling freely from £17 up to £21, which may be taken as fairly representing the value of anything really serviceable wanted for the dairy; those of a secondary description making £14 to £16 10s., and anything really plain from £13 downwards, as low as £10 or £11, mostly for old cows of little further use for dairying purposes.

Barreners, which are doing very well, as is usually the case in dry seasons, meet a very fair sale for the best at from £24 up to £30 and over for good bullocks in at all forward condition, this being the only class of stock on which graziers are at all very keen, the more ordinary runs being much neglected, though this would be quickly altered once keep becomes at all plentiful again, which is not at all improbable many think, and even rough things would then soon become once more remunerative. In-calvers are selling a little better than they were, a good many having changed hands within the last few days at from £11 up to £14 each, whilst there is a trifle more inquiry for yearlings at from £4 17s. 6d. up to £7 5s. each.

Store sheep are generally reported to be keeping very healthy, and also to be doing well, and, although prices have in some cases scarcely come

up to buyers' expectations, trade is on the whole considered by most flockmasters, especially in view of the enhanced price wool is bringing, to be not altogether unsatisfactory. Both ewes and lambs are bringing a very fair return, and, though there is not very marked difference in present prices compared with those of last year, the outlook as to the root crop is much more reassuring than last season, and, as a rule, all anxiety on this score is now allayed. Since Stockbridge, sheep, as a rule, have been selling a trifle better, and, though the improvement is not very marked, yet it is distinctly in the right direction, and there are good hopes for its still further continuance.

In the fat stock markets there still continue to be good deliveries, but more particularly of beasts (including many grass-fed animals of the best class) than of sheep. Devons and Shorthorns continue to largely monopolise the attention of leading purveyors, who readily catch up all the neater weights at from 4s. 8d. to 4s. 10d. per stone, this being an outside quotation at present; whilst secondary grades make 4s. 4d. to 4s. 6d., and anything rough or coarse, 4s. to 4s. 2d. A general range for best bullocks may be given as from £18 up to £22 or £23, this being for heifers and steers; smaller weights range from £15 to £17 10s.; choice wether sheep of medium weights rather favour sellers again, in some cases to the extent of 2d per stone, the best occasionally realising 6s. 4d. to 6s. 6d., though a more average rate is from 5s. 8d. to 6s.; whilst ewes of the best class rule steady at from 4s. 2d. to 4s. 6d.; rougher grades selling as low as 4s. and even under for very old sheep; small lambs of nice finish are scarce and dear at 7s. 4d. to 7s. 8d., and occasionally rather more, second selling at 7s. to 7s. 2d., whilst those of ordinary finish, of which the great bulk consists, meet a dragging sale at 6s. 2d. to 6s. 4d. The veal trade keeps steady for small calves at outside figures; but coarse, heavy weights are affected by the weather and at present money. Neat handling porkers are also bringing full rates—9s. 6d. to 10s. 3d. per score—but baconers are a quieter sale at 8s. 9d. to 9s. 3d., and coarser weights a very poor trade still at 7s. to 8s.

### Trade in Scotland.

The number of fat cattle on offer has been under an average. A good demand has been experienced, and the prices of the previous week were easily maintained. Fat cows made decidedly more money. Fat sheep in smaller numbers, and these have met a good inquiry at prices as nearly as possible without change. Ewes, if not too heavy, maintained late rates. Lambs in much shorter supply, and they have made quite previous prices. Fat calves met a moderate trade, while pigs continue to sell well. There was a small supply of store cattle. Anything of a good class got easily and well sold. Rather more store sheep on offer. These met a quiet trade at prices just the turn lower. There was a small show of milch cows, and they met a slow trade. Quotations: Top price of cattle per lb. ewt., 41s. 6d.; current, 37s. to 40s.; mutton to 9½d. per lb.—JOHN SWAN AND SONS, LTD.

### Trade in Ireland.

Last Thursday's Dublin market had increased supplies of both cattle and sheep, and though the attendance of buyers was large, business in both departments was slower with reduced prices to the tune of 10s. per head for cattle, and 2s. to 3s. per head for sheep.

The number of cattle offered for sale was 2,723, or 197 more than the previous market. In the morning a very fair business was done, but it dulled off as the day advanced, and towards the close a reduction of 10s. per head had in most cases to be made to facilitate business. The live weight prices for Shorthorns would range from 30s. 6d. to 32s. per cwt., and for choice Aberdeen-Angus and Hereford crosses from 33s. to 34s. 6d.

For coarser sorts of cattle and sheep, however, there was a fairly good finish, but for cow beef trade was slow and prices cheap and irregular. The approximate deadweight prices were:—Prime ox and heifer beef from 55s. to 58s., and for very choice up to 60s. per cwt; good second quality beef from 50s. to 54s.; and inferior from 44s. to 47s. 6d. per cwt. Shippers were very cautious in their purchasing, which was strange, considering that the beef market in England has been encouraging of late.

On the sheep department trade was uncertain and generally worse than for the last few markets. The number of sheep offered for sale was 10,317, an increase of 377 on the previous market. Some small lots of prime sheep made up to last day's rates, and best shipping hoggets sold well, some extra fancy ones of the Duke of Leinster's making up to the fine price of 66s. each. For ordinary shipping hoggets suitable to the Liverpool and Manchester markets trade was slow, owing to the very large arrivals of foreign

mutton—it being said that considerably over 80,000 ewt. of chilled mutton had been received, as against 68,000 ewt. for the corresponding week of 1905. Choice wether mutton sold at from 5d. to 8d. per lb.; ewes, ditto, 6½d. to 7½d.; and coarse sheep from 5½d. per lb. upwards. Hoggets sold at from 36s. to 56s. each, according to size and quality. For lambs, trade was slower at from 2s. to 3s. per head less money, and a clearance could not be effected, as exporters were very cautious. Prime veal in good demand at fair prices, but the supply was in excess of requirements, and of the eighty calves sent in not half found purchasers. The best sold at 7½d. to 9d. per lb.; other sorts from 5½d. per lb.

A small market of dairy cattle, with prices much the same, and only really tip-top cows inquired for at firmer rates—prime cows selling at from £17 to £20; other sorts from £9 upwards. Prices for store cattle still run very high, and at large sales held by L. Cuffe and Sons, and R. and J. Wilkinson, fine prices were realised. At the country fairs the farmers are well pleased at the figures they are selling their stores at, though buyers are grumbling a bit, and wondering they are going to make out of them.

The Pig Market in Dublin on Thursday was a small one, and all suitable hogs sold up early at slightly stiffer rates. Both English and local buyers in good attendance, but were not able to fill their commissions on account of the short supply. For coarse pigs business was dull, and a clearance difficult to effect. Store pigs in great demand. Choice light weight pigs made from 54s. to 57s. 6d. per cwt., coarse from 45s. to 50s., and inferior from 38s. per cwt. upwards.

### LONDON.

**Central Market, Friday.**—Good supplies; trade slow; beef lower. English beef, 3s 8d to 4s; Scotch sides, 4s to 4s 2d; shorts, 4s 4d to 4s 8d; Deptford and Liverpool killed, 3s 6d to 3s 10d; refrigerated hindquarters, best, 3s 10d to 4s; ditto, seconds, 3s 6d to 3s 8d; ditto, fore-quarters, 2s 4d to 2s 6d; inferior beef, 2s 8s to 3s; mutton, Scotch wethers, 5s to 5s 4d; ditto, ewes, 3s 4d to 3s 8d; English wethers, 4s 4d to 5s; ditto ewes, 3s 6d to 3s 10d; foreign sheep, 4s 4d to 4s 8d; English lamb, 5s 4d to 5s 8d; veal, 3s 4d to 4s 6d; English pork, 4s to 4s 4d; Dutch ditto, 3s 10d to 4s 2d per 8 lb.

**Islington, Thursday.**—Moderate arrivals experienced a slow sale at recent prices. Heavy bulls quoted 2s 8d to 3s 2d. Sheep, in fair supply, evidenced a quiet demand, but prices showed no alteration; 7½ st. 8 st. Down wethers, 5s 8d; 9 st. ditto, 5s 6d; 10 st. ditto, 5s 2d to 5s 4d; 10 st. half-breds, 5s 2d; 10 st. Down ewes, 4s 2d; 11 st. half-breds, 4s. Lamb trade quiet at recent quotations; 5 st. Downs, 7s; 6 st. Dorset half-breds, 5s 10d to 6s. Calves experienced a slow inquiry, best selling at 5s 8d to 5s 10d per 8 lb. offal given in. No pigs received. Total supplies:—60 beasts, 2,650 sheep and lambs, 90 calves.

### COUNTRY.

**Ashford, Tuesday.**—Trade was again slow for beef and mutton, but last week's reduced rates were not lowered. Best bullocks made up to 4s 4d; Down and half-bred wethers up to 5s 10d; Kent wethers up to 5s 2d; and lamb up to 7s 4d. Pork not quite so brisk; best making just over 4s a stone.

**Berwick, Saturday.**—There was a very small show of cattle, 107 beasts being penned, against 142 the previous week. The market was of a holiday character, practically no farmers being present, and no sales were effected.

**Birmingham, Thursday.**—Short supply of beasts, but an improved demand. Sheep and lambs offered in good numbers, and a steady inquiry. Best Herefords, 7d; Shorthorns, 6d to 6½d; bulls and cows, 4d to 5½d; wether sheep, 8d to 8½d; ewes and rams, 5½d to 6½d; lambs, 9d per stone.

**Bristol, Thursday.**—Beef in short supply, and trade slow; best, 56s to 58s; other sorts, 54s per cwt. Sheep and lambs made a moderate show; Down wethers, 8d; prime light wethers, 7½d; heavy ditto, 7½d; ewes, 6d; lamb, 9d per lb.

**Caerne, Friday.**—In lots of not less than ten, a rail within 100 miles, 3d per score extra for delivery by rail. Prime stores, 6s 8d to 8s. 10 lb., no deduction for fat, 10s. per score; 8s. 10 lb. to 9s. 10 lb., not over 2½ in. 10s. per score; under 10s., not over 2½ in. 8s 6d per score; under 11s. 10 lb., not over 2½ in. 9s per score. Pigs outside these limits at their value.—CHARLES AND THOMAS HARRIS & CO., LTD.

**Canterbury, Saturday.**—Prices scarcely so high; rough working lambs, 11s 6d to 20s per head; best, 21s to 28s; useful good toothed ewes, 32s to 40s; cows and calves, £12 to £17.

**Carlisle, Saturday.**—The supply on the Sands showed a considerable falling off as compared with recent weeks, between 300 and 400 being penned.

## MARKET SUPPLEMENT.

vii

Buyers were scarce, and the demand for beasts was quiet. Wintering heifers £7 10s to £10s 10s, heifers for fogging purposes, £12 10s to £15 10s.

**Chester, Thursday.**—Farmers brought in fair supplies of stock, but owing to the protracted drought the demand was slack, and a quiet trade resulted for cattle at unchanged rates. Sheep 18s to 35s, milch cows £17 to £22, calves, £15 to £19, barren cattle £10 to £12, heifers £9 to £14, and stirks £6 to £10.

**Doncaster, Saturday.**—Very light supply both of cattle and sheep; not many pens required owing to the continued drought, and there was a poor attendance. Milch beasts, £16 to £22; bullocks, £12 to £16 10s; heifers and drapes, £11 to £13 10s; young stores, £7 to £9 each; sheep trade continues quiet, and late prices ruled; ewes, 42s to 46s; shearlings, 44s to 50s; lambs, 30s to 32s 6d each.

**Dorchester, Saturday.**—There was, for the time of the year, a very good delivery of those kinds of fat and stock at Messrs. Ensor's depository sale to day, the shortest offer being of fat sheep. A good enquiry for all the better class descriptions of milch beasts at an advance of 30s to 40s a head, but grazing cattle and other stores met a very quiet trade owing to the scarcity of grass keep, though the late rain have greatly benefited the pastures. The best class dairy beasts sold from £16 to £20 each, and others from £13 15s to £15 15s. The best barren cow sold up to £26 per pair, ranging down to £14 for old cows. A few store bulls made £10 to £12. Fat bullocks sold steadily from 10s 6d to 11s per score for the best (or up to £19 each); seconds £16 to £19 (or 10s); fat bulls, to £13 to £16 (or 9s). Mutton trade fairly steady, there being no great fluctuation in values.

**Dublin, Thursday.**—Numbers in Market—Beasts 2,723, increase 197; Sheep 10,317, increase 377; Calves 81, increase 19. There was a good attendance of buyers but a weaker tendency was shown in the demand for cattle, and prices were on the average lower all round. A good clearance however was effected. Sheep and lambs were rather a dragging trade, and to effect sales a slight reduction had to be made even for best qualities, while rough and inferior things were hard to place to advantage. Cattle: live weight (best) 30s to 32s per cwt. Exceptional for choice crosses up to 34s per cwt. Mutton: dead weight, 6d to 7d per lb. Extreme 8d per lb.—GAILY, SONS & CO.

**Edinburgh, Wednesday.**—Trade quiet. Half-bred gimmers brought to 49s; half-bred wethers, to 44s 6d; grey-faced sheep, to 42s 6d; Cheviot Dimmotts, to 32s; lambs, to 33s; polled coloured cattle, to £13 5s; black, to £12; stirks, to 8s; Shorthorns, to £25; Ayrshires, to £18 15s.

**Exeter, Saturday.**—Steers and maiden heifers up to 11s 6d; cows, 10s 6d to 11s; best quality sold out. Large supply of sheep, mostly breeding ewes. Small hogs—good demand, 8d to 9d; large, 8d; ewes, 6d. The trade for breeding ewes slow, 42s to 45s; lambs, in wool, 11d; shorn, 10d; best cleared; calves, 7d.

**Glasgow, Wednesday.**—Supplies were an average and the tone firm as a result of the high prices paid early in the week for States and Canadians, which brought 60s to 62s; the highest this year; secondary, 58s to 58s; best Scotch 63s to 64s; secondary, 60s to 62s per cwt. Irish still scarce and dear. Best home sheep made 10d to 10½, and lambs, 10½ to 10½ per lb.

**Gloucester, Saturday.**—Messrs. Bruton, Knowles, and Co. report the sales as follows:—Fair supply of cows and calves, with good trade, the best selling up to £22. Store cattle very short supply, few changing hands.

**Hereford, Wednesday.**—Beef: A fairly large supply, with a good demand at last week's prices; best bullock and heifer at about 6½d to 7d per lb, cow beef, 5d to 5½d per lb. Sheep, a moderate supply went off well; fat wethers at 8d to 8½d per lb, ewes 6d to 7d per lb. A larger supply of lambs, both fat and store, than for weeks past, fat ones realising 9d to 9½d per lb, and stores also slow, 42s to 45s. Welsh stock, 28s to £12; Irish cattle, £12 to £15; Welsh stock, 28s to £12; young stock, 45s to 6d; calves, 15s to 40s each.

**Lincoln, Friday.**—At this store stock market there was a small consignment of beasts, and the demand was moderate. Yearlings, £8 to £10; milch cows, £10 to £16. For sheep a fair trade was experienced. Lambs to 33s, wethers to 35s each.

**Lynn, Tuesday.**—Average show of fat beasts,

6s 9d to 7s 6d, per stone; very few stores, scarcely any trade, £6 to £12 each. Average show of fat sheep made late rates, 8s 9d to 9s 6d, per stone. Few stores, 40s to 45s; fat lambs, 25s to 40s; store lambs, 25s to 35s each.

**Manchester, Friday.**—Beef: first class, 5½d; second, 4½d to 5½d; thirds, 3½d to 4½d. Mutton: Cheviots, Scotch, 7½d; others, 7½d; seconds, 6½d to 7d; thirds, 5½d to 6d. Veal: firsts, 6d; seconds, 5d to 5½d; thirds, 4d to 4½d. Lamb: firsts, 7½d; seconds, 7d to 7½d.

**Newcastle, Tuesday.**—Heavier supply and prices drooping. Primo heifers, 7s 9d to 8s 3d; second-class, 7s 6d to 7s 9d; steers, 7s 6d to 7s 9d; course and inferior, 6½d; pigs, 6s to 9s per stone; sheep, 5d to 9d; lambs, 8½d to 9½d; veal, 6d to 8½d per lb. At market:—Cattle, 1,509; sheep and lambs, 7,394; calves, 138; pigs, 296.

**Newport, Wednesday.**—A larger supply, and a marked improvement in trade all round. Quotations: Best English beef, 6½d per lb; secondary, 6d; cows, 4½ to 5½d; best wether mutton, 8½d; ewes, 6½d to 7½d; lambs, 9d; calves, 6½d to 8d; porkets pigs, 10s 3d to 10s 9d per score.

**Nottingham, Saturday.**—Fair show, with the prices for nearly all stock well up to average. In-calf cows fetched from about £18 10s, to £22, and in calf heifers, £14 to £16. Plenty of calves were shown, and prices ranged from 38s to 47s, a moderate demand being experienced. Very few pigs were on sale, and hardly any sheep or lambs were shown.

**Preston, Wednesday.**—There was a good supply of beasts, and the attendance was larger than for some weeks past. Trade ruled slow. Heifers made 6d to 6½d; cows, 5d to 5½d; lambs, 9½d; hogs, 8½d to 9d; tups, 5½d to 6d; ewes, 6½d to 7½d; fat calves, 5d to 6d per lb.

**Reford, Saturday.**—All kinds of stock were low in value, and sales were made slowly at considerable reductions. It was said there was likely to be a shortage of keep in the near future.

**Romford, Wednesday.**—Average supply of fat beasts, and trade for best animals a little better. Best, 4s 4d to 4s 6d; middlings, 4s to 4s 2d per stone. Calves in very large supply. Trade very bad at 4s 8d to 4s 10d per stone. Sheep in average supply; trade about the same: Best small 5s 8d to 6s; larger, 5s 2d to 5s 4d; ewes, 4s 2d to 4s 4d per stone. Lambs in large supply; 7s 6d to 8s, at 6s 6d to 6s 10d per stone. A very few store hogs on offer; slow demand. Small supply of pigs; trade unchanged.

**Sheffield, Tuesday.**—About an average supply of milch cows, which met with a fair demand at £19 to £21 10s; secondary lots, £16 to £18 10s.

**Shrewsbury, Tuesday.**—Small supply of store cattle, but usual supplies of fat cattle, sheep, pigs, and calves. Very fair trade, especially in sheep and lambs. Prices slightly less than last week. Quotations:—Beef, 6d to 6½d per lb; mutton, 7½d to 8½d per lb; lamb, 9d to 9½d per lb; veal, 6d to 7½d per lb; pigs, 9s to 9½d per lb; bacon, 10s to 11s per lb. Numbers offered as follows:—Cattle 423, sheep and lambs 1,865, calves 70, pigs 323.

**Thame, Tuesday.**—There was a very large entry of stock in this market, the quality of the beef being exceptionally good, and with buyers attending from London, Oxford, Wycombe, Aylesbury, Grandborough, Risborough, Abingdon, Wallingford, Newbury, Missenden, Bicester, Henley, Maidenhead, Reading, and surrounding villages. There was a clearing trade throughout, the improved prices of late markets being fully maintained. Practically every beast was disposed of, choice heifers realising up to 4s 8d per stone. Mutton and lamb still continue to sell satisfactorily with no noticeable change on late rates. Pork and bacon finding ready purchasers, but veal slightly lower. Messrs. Bond and Burrows sale comprised 109 fat beasts, 343 fat sheep, 70 fat and weaning calves, and 83 fat and store pigs. Fat oxen made from £16 to £23 10s; fat heifers, £14 to £22; fat wethers, 45s to 58s; fat ewes, 40 to 54s; fat lambs, 30s to 40s; fat pigs, 23s to £4 15s; weaning cow calves, 20s to 70s; bul calves, 10s to 50s; porkers, 26s to 42s; small store pigs, 10s to 21s; strong stores, 26s to 36s.

**Truro, Wednesday.**—Attendance very good, and business fairly brisk. Fat bullocks, 56s to 58s per cwt.; barreners and store bullocks, 40s to 45s; cows and calves, £10 to £15 each; rearing calves, 25s to 45s; wethers, 7d to 7½d per lb; ewes, 5½d; lambs, 32s 6d to 42s 6d each; large and small pigs, and suckers, 14s to 31s. Number in market:—Bullocks, 420; calves, 65; sheep, 536; pigs, 107; horses, 1.

**Wolverhampton, Wednesday.**—Fair supply all round; slow trade. Quotations: Beef, 5½d to 7d per lb; mutton, 6½d to 8½d per lb; lamb, 9d to 9½d per lb; veal, 6½d to 7½d per lb.

**Workop, Wednesday.**—Short supply of beef, with trade fair, and a large supply of mutton, the latter selling at ½d per lb less than last week.

Best beef, 7s to 7s 6d; secondary, 6s 3d to 7s per stone; best Southdown wether and crossbreds, 7d to 8d; ewes, 5½d to 6½d; lamb, 8d to 9d; veal, 8d per lb.

## FEEDING STUFFS.

**Liverpool, Friday.**—Prices all round are firm, but practically there is no business to report.

—H. JONES LANGAR AND CO.

**Hull, Tuesday.**—Oilseed Cakes.—Linsed are 2s 6d per ton dearer, both English and foreign. Cotton.—Quiet, but very firm in all positions.—KIRKPATRICK, MAXTED, AND CO.

**Mark Lane, Monday.**—Linsed Cakes.—There is a decidedly better tone in the market and values are rather dearer for all descriptions, with little offering from the other side, and buyers here inclined to purchase their future requirements, although the demand for spot continues quiet. Russian may still be had at about late rates. East India seed pures are held for rather more money. American are scarce and dear. London made meet a fair trade and are unchanged. Cotton Cakes.—Supplies come to hand very sparingly and stocks in warehouse being practically exhausted buyers are compelled to pay full prices, while a fair trade has been done for November-April shipments. English sell quietly and makers demand full values. Decorticated are only sparingly offered and are very firmly held at £7 11s 3d to £7 12s 6d, with meal at £7 11s 3d. Rape Cakes.—Unaltered. East India, £5s; Ravison, £4 15s. Maize Germ Meal.—Parcels of White American in warehouse are to be had at last week's prices, while shippers ask more money in forward positions. English is again dearer. Rice Meal.—There is very little demand for landed parcels, which are still quoted at £4 13s 9d to £4 15s. per ton ex quay, but there is more inquiry for autumn shipments, and business has again been done at £4 11s 3d to £4 12s 6d usual ex ship terms. Locust beans scarce and firm at £5 15s, with Kibbled at £6. Nitrate of soda a slow sale and unchanged at £10 17s 6d per ton ex quay. Per ton.

St. Louis Exhibition, 1901. 10 sheep exhibited—all won class prizes, besides Grand Champions, Reserve Grand and Champions. **Annual Ram Sale, August 3, 1906—full particulars on page 155 of this issue.** One lamb let for 255 gs., the record price; 78 averaged £29 16s. each. Selections always for sale.

**CARY COLES, MANOR HOUSE, WINTERBURN STAKE, SALISBURY.**

# Review of the British Corn Trade

DURING THE PAST WEEK

*Written exclusively for the Mark Lane Express.*

The splendid weather of July has done great things for the crops, and the change in the aspect of the fields since May is a transformation scene beyond that which the most sanguine could have ventured to believe possible. The wheat crop had tilled well, was regular if backward, and covered the ground well; but the barley and oats on June 1 looked as unpromising as we ever remember seeing them. The change from that appearance to the look of these spring crops on August 1 will be a fortunate memory for all farmers for many years to come, as they will feel that a most discouraging outlook at the end of May is capable of a truly wonderful amelioration as the result of two successive good months. Our record of weather thus far this year is as follows:—

| Month.       | Rainfall. | Sunshine. | Warmth. |
|--------------|-----------|-----------|---------|
| Inches.      | Hours.    | Degrees.  |         |
| January ...  | 3.70      | 30        | 46.0    |
| February ... | 3.75      | 89        | 45.0    |
| March ...    | 1.08      | 85        | 47.0    |
| April ...    | .70       | 201       | 48.0    |
| May ...      | 1.71      | 121       | 49.0    |
| June ...     | 3.06      | 225       | 57.5    |
| July ...     | 1.01      | 261       | 62.5    |

The sunshine record is a magnificent one.

The first wheat fields which we saw this year invaded by the self-binding harvester were near the pleasant little Middlesex capital of Uxbridge, and the day was the appropriate Lammis, or August 1. Several farmers, as we hear, had commenced wheat harvest in Hertfordshire on the Monday, July 23, and in Thetford wheat cutting was in full progress on the 2nd inst. or three or four adjacent farms. Thus the ingathering of the great white crops is fully started. The promise is of full average wheat and barley yields, and if oats are short in Eastern and Southern England, some large returns from the South and North will do a good deal to redress the balance. These remarks, of course, referred to the grain alone, for the straw crops of 1905 will be under an average in almost every instance. Only in fens and on land which would ordinarily be used as water meadows will straw bulk heavily or largely, and such lands are naturally not, as a rule, employed for growing white crops at all.

The foreign crop news is not indicative of large yields in Russia, but Austria-Hungary has rather over an average crop, and France probably has a clear 40,000,000 qrs. of wheat, together with a fairly good crop of rye, and nearly an average of barley. The French oat crop, however, is deficient. In Spain a fairly good wheat yield has been recorded, and the great dearth of last year has happily become a memory only. Italy has a fair crop, especially in the Lombardy plain.

An interesting Government return just issued shows that the chief wheat markets for amount of business done are as follows for the thirty-five English counties; thirty-five only, because Middlesex, Westmorland, Cheshire, Derby, and Rutland have only one statute market apiece, and therefore there is no competition. In Sussex Chelmsford, of course, is the first wheat market, and the record goes out as follows:—Hertfordshire, Hitchin; Bedfordshire, Bedford; Hunts, St. Ives; Cambridgeshire, Cambridge; Suffolk, Ipswich; Norfolk, Norwich; Lincolnshire, Lincoln; Yorkshire, Hull; Nottinghamshire, Nottingham; Leicestershire, Leicester; Northamptonshire,

Peterborough; Warwickshire, Birmingham; Oxfordshire, Banbury; Bucks, Aylesbury; Berks; Reading; Surrey, Guildford; Kent, Canterbury; Sussex, Chichester; Hampshire, Basingstoke; Dorset, Dorchester; Devonshire, Exeter; Cornwall, Truro; Somerset, Bristol; Wiltshire, Salisbury; Gloucestershire, Gloucester; Monmouth, Chepstow; Herefordshire, Hereford; Worcestershire, Worcester; Shropshire, Shrewsbury; Staffordshire, Wolverhampton; Durham, Stockton; Northumberland, Newcastle; Cumberland, Cocker mouth; Lancashire, Manchester. There are, of course, few wheat markets of any consequence in Wales, those which attain a fair size being Welshpool, Cardiff, and Wrexham. In Scotland, Glasgow, Edinburgh, Perth, Aberdeen, and Haddington are, perhaps, the leading markets for wheat, but no returns of quantities sold are available.

The average prices made for Colonial and Indian wheat are thus officially returned for the last two years:—

|                 | s. | d. | 1905.   | s. | d. | 1904.   |
|-----------------|----|----|---------|----|----|---------|
| Canada ...      | 31 | 8  | per qr. | 30 | 10 | per qr. |
| India ...       | 29 | 8  | "       | 28 | 7  | "       |
| Australia ...   | 32 | 4  | "       | 31 | 4  | "       |
| New Zealand ... | 30 | 1  | "       | 29 | 7  | "       |

The New Zealand prices are somewhat lower than we had expected to find them.

The imperial averages for July in England show a rise of 21. in oats and a fall of 31. in barley, while wheat has remained stationary. The average price of town household flour has fallen 3d. per sack on the month.

Some price comparisons for August 1 are as follows:—

|                                                                        |  |
|------------------------------------------------------------------------|--|
| American winter wheat, 1904, 32s. 6d. per qr. ; 1905, 31s. 6d. per qr. |  |
| Good English potatoes, 1906, 60s. per ton ; 1905, 68s. per ton.        |  |
| Best sugar, 1905, 8s. 7d. per cwt. ; 1905, 10s. 5d. per cwt.           |  |
| Rangoon rice, 1905, 7s. 6d. per cwt. ; 1905, 6s. 9d. per cwt.          |  |
| Calcutta linseed, 1906, 42s. 3d. per qr. ; 1905, 40s. per qr.          |  |
| Argentine linseed, 1906, 41s. per qr. ; 1905, 39s. per qr.             |  |

The sales of British wheat at the statute markets for the forty-eight completed weeks of the cereal year have been larger than usual, the price as a consequence having been a little depressed.

This season 2,889,000 qrs. at 28s. 9d. per qr.  
Last season 1,613,000 qrs. at 30s. 9d. per qr.

The sales of British barley at the statute markets have been about an average; the price has been 9d. below the mean.

This season 3,109,000 qrs. at 24s. 3d. per qr.  
Last season 3,132,000 qrs. at 24s. 9d. per qr.

The sales of British oats have been smaller than usual; where firm, prices have benefited.

This season ..... 907,000 qrs. at 18s. 6d. per qr.  
Last season ..... 3,131,000 qrs. at 17s. 1d. "

The imports of the United Kingdom last week were as follows:—

|                                              |  |
|----------------------------------------------|--|
| Wheat, 450,000 qr. ; a large supply.         |  |
| Flour, 97,300 sks. ; a very moderate supply. |  |
| Barley, 54,000 qr. ; half an average.        |  |
| Oats, 190,000 qr. ; a large arrival.         |  |
| Maize, 212,000 qr. ; above the average       |  |

coming along, and less money has been accepted, Canadian Mixture and Algerian hay being 2s 6d per ton down. Prices ruling are about as follows:—English old crop best meadow hay, 80s to 82s 6d per ton; good meadow hay, 72s 6d to 77s 6d per ton; inferior, 60s to 67s 6d per ton. Best clovers, 92s 6d per ton. Good clovers, 80s to 90s per ton; inferior clover, 70s to 80s per ton. Best mixtures, 87s 6d to 94s per ton; good mixtures, 75s to 85s per ton; second mixtures, 60s to 70s per ton; wheat straw, 27s per load; oat straw, 28s per load; barley straw, 24s per load, all ex rail London. Foreign: Canadian mixtures, 75s 6d per ton; good Dutch hay, 65s per ton; Algerian hay, 62s 6d to 65s per ton. French 1st and 2nd cut clover, 75s to 80s per ton; large bale wheat straw, 51s per ton; small bale wheat and straw, 41s per ton. These prices are by large delivered alongside London Thames Wharf.

London estimated sales of produce (grain) for the past seven months of 1906 are as follows:—

|           | Wheat.  | Barley. | Oats.   | Maize.  | Flour.  |
|-----------|---------|---------|---------|---------|---------|
|           | qr.     | qr.     | qr.     | qr.     | sks.    |
| Jan. ...  | 201,000 | 51,000  | 121,000 | 121,000 | 350,000 |
| Feb. ...  | 276,000 | 99,000  | 273,000 | 257,000 | 380,000 |
| March ... | 199,000 | 74,000  | 221,000 | 152,000 | 278,000 |
| April ... | 371,000 | 49,000  | 362,000 | 135,000 | 291,000 |
| May ...   | 229,000 | 55,000  | 228,000 | 95,000  | 205,000 |
| June ...  | 438,000 | 31,000  | 450,000 | 208,000 | 303,000 |
| July ...  | 433,000 | 21,000  | 400,000 | 110,000 | 211,000 |

The business done in July last, with the one exception of the practically suspended trade in barley, been much more extensive than the market circulars, with their reiteration of extreme dulness, would lead one to suppose. But the readers of this journal will have become aware that what such circulars call dulness means, in nine cases out of ten, the absence of speculative purchases or of any transactions outside the ordinary. A thoroughly sound, healthy, non-speculative business for actual consumption is quite compatible with a long series of dull circulars. In our own reports of the exchanges we endeavour to signalise when a sound, non-speculative trade is passing.

Supplies on passage to the United Kingdom on August 1 thus compare with the like date a year ago:—

|                        | 1906.     | 1905.     |
|------------------------|-----------|-----------|
| Wheat, qrs. ....       | 2,320,000 | 2,370,000 |
| Flour, sks. ....       | 170,000   | 93,000    |
| Barley, qrs. ....      | 170,000   | 175,000   |
| Oats, qrs. ....        | 236,000   | 350,000   |
| Maize, qrs. ....       | 1,000,000 | 1,140,000 |
| Linseed, qrs. ....     | 143,000   | 230,000   |
| Rapeseed, qrs. ....    | 25,000    | 15,000    |
| Cottonseed, tons. .... | 23,000    | 25,000    |
| Rice, tons ....        | 20,000    | 30,000    |

The wheat includes 670,000 qr. of Indian and 575,000 qr. of Australasian, the flour 105,000 sacks of American, the barley 90,000 qr. of Russian, the oats 240,000 qr. of Russian, the maize 90,000 qr. of Argentine, the linseed 83,000 qr. of Argentine, the rapeseed 21,000 qr. of Indian, the cottonseed 22,000 tons of Egyptian, and the rice 15,000 tons of Burmah.

The shipments from America for July were as follows:—Wheat, 378,000 qr.; barley, 22,000 qr.; oats, 36,000 qr.; maize, 320,000 qr.; and flour, 356,000 sacks. In the last six days of July the shipments were:—Wheat, 154,000 qr.; oats, 17,000 qr.; maize, 65,000 qr.; and flour, 55,000 sacks.

The Argentine shipments of maize since the new crop became available for exportation have been quite exceptionally heavy, as will be seen from the following figures for the three past months:—

|               | Wheat.    | Oats.  | Maize.    | Linseed. |
|---------------|-----------|--------|-----------|----------|
| May, 1906 ... | 1,389,000 | 32,000 | 1,186,000 | 258,000  |
| June ...      | 1,193,000 | 47,000 | 1,796,000 | 147,000  |
| July ...      | 532,000   | 15,000 | 1,493,000 | 140,000  |

Russia during July was a heavy shipper of oats and a fair shipper of wheat. Of barley much less than usual was shipped. The following are the figures:—Wheat, 1,526,000 qr.; barley, 448,000 qr.; oats, 1,050,000 qr.; and maize, 22,000 qr. Roumania added 254,000 qr. of wheat, 18,000 qr. of barley, 15,000 qr. of oats, and 192,000 qr. of maize.

Other July shipments were 587,000 qr. of wheat and 138,000 qr. of linseed from India, 64,000 qr. of wheat from Australia, and 12,000 qr. of wheat from European Turkey.

## POULTRY AND GAME.

**Smithfield, Thursday.**—A moderate amount of business was effected for the fairly good supplies brought forward. Quotations:—Yorkshire fowls, 2s 3d to 2s 9d; Boston, 2s to 2s 6d; Sussex, 2s 9d to 3s 3d; Surrey, 3s to 3s 6d; Essex, 2s 6d to 2s 9d; Welsh, 2s 3d to 2s 6d; Irish, 1s 8d to 1s 10d; goslings, 5s to 6s; country ducks, 2s to 2s 3d; Aylesbury, 2s 6d to 2s 9d; Boreas pigeons, 10d to 1s; feathered ditto, 7d to 9d; quail, 9d to 11d; tame rabbits, 1s 3d to 1s 9d; wild ditto, 4d to 6d each; Australian, 6s to 8s per dozen.

## FEEDING STUFFS.

**Hull, Tuesday.**—Oatmeal Cakes.—Linseed oil firm at threepence advance. Cotton.—The market is 2s 6d per ton dearer on the week for both here and Bombay, with a firm tone.—**KEIGHTLEY, MAXTED, AND CO.**

## LONDON HAY TRADE.

**Thursday.**—The trade the last few days shows signs of falling off, owing a good bit to larger supplies of new crops and the near approach of the holidays. Salesmen and dealers are holding out for last week's currencies, but it is impossible to maintain full values, and to effect sales lower money would have to be accepted. Although prices have steadily advanced during the last few months, and supplies have been coming along very short, it is not a big business that has been pressing, and any falling off in the demand is sure to cause a reaction. Certainly with the poor crop in the south this season prices cannot go back to their old low level, but as the consumption in London appears to be falling off, any larger bulk of supplies on our market is sure to have more of an adverse effect than would have been possible a few years ago. There is a large quantity of foreign hay

# CORN MARKETS.

## LONDON.

**Mark Lane.**—The attendance was meagre, and with brilliant weather a quiet tone prevailed throughout. Quotations for English varieties are nominal, while foreign grades attract but little attention and last quotations: No. 1 Northern Manitoba offers at 32s 3d, and No. 2 at 32s., while 33s 3d is asked for hard Duluth and hard Manitoba; for La Plata 31s to 31s 3d is asked; for Australian 32s is required, and 30s for choice white Karachi. Maize dull, and prices show but little alteration; for mixed American landed 22s 6d is asked, and 21s 9d for ex ship; La Plata ex quay is obtainable at 21s, and ex ship at 20s 6d, while 21s 6d to 21s 9d is wanted for Odessa, and 21s to 21s 3d for Danubian. Flour continues quiet, and values have an easier tendency; for Iron Dukes 20s 9d is wanted. Barley firmly held, but actual business is slow; for Odessa-Nicolaeff 19s 6d to 19s 9d is asked, and 18s to 18s 6d for Persian. Oats meet a poor inquiry at unchanged prices; 38lb Russian offer at 15s 3d to 17s 6d, and American at 17s; for La Plata 15s 8d is asked, and 15s to 15s 3d for Turkish. Imports: Wheat 55,970 qr, flour 21,500 sks, oats 45,290 qr, maize 28,900 qr.

**Ipswich, Tuesday.**—A very slow market, with a poor demand for feeding corns, &c. There was hardly sufficient wheat offering to test the market. A sample or two changed hands at 32s to 32s 6d per quarter. Millers generally are holding off until the new crop comes upon the market, which will probably be in about a fortnight's time. Oats, maize, and other feeding corns unchanged on the week. Lined cakes a small but firm trade at £8 5s to £8 10s per ton. Bran inclined to be dearer, especially for forward delivery.

## COUNTRY.

**Ashford, Tuesday.**—A good attendance but trade slow, although last week's prices held. Wheat, 32s to 34s; peas 32s; English feeding barley, 20s to 28s; Magazon beans, 32s to 31s; tick beans, 34s to 36s; English oats, white, 22s to 24s; black, 20s to 23s.

**Banbury, Thursday.**—Wheat, red, 31s to 31s 6d per qr; barley, 26s to 30s per qr; beans, 32s to 34s per qr; oats, 20s to 25s per qr; peas, 30s to 34s per qr.

**Birmingham, Thursday.**—The was a small attendance at the market, and only a very limited trade passing, buyers being scarce. Foreign wheats were about unchanged on the week and met with a poor inquiry. Plate maize was 3d dearer at 21s per 480 lb at Sharpness. Flat maize was unchanged at 22s 6d Bristol. Grinding barley was unaltered at 19s 3d per 400 lb Sharpness. English oats and beans a slow sale at late values.

**Bury St. Edmunds, Wednesday.**—Wheat was hardly offered, and nominally unchanged at about 32s per 504 lb. The cutting of the new crop has commenced in a few early districts, but we shall probably not see much at market until Wednesday fortnight.

**Devizes, Thursday.**—The first new corn appeared at the market to-day, winter oats of good quality being offered. The quality of all descriptions of corn will be exceptionally good. There was no change in prices. The following were the quotations:—New wheat, 15s to 17s; secondary, 13s 6d to 14s 6d; best barley, 26s to 32s; secondary, 20s to 24s; rye, 22s to 24s; old black oats, 22s to 24; new ditto, 19s to 23s; malting barley, 26s to 32s; beans, 16s to 18s; fine flour, 24s to 26s; extra fine, 27s to 30s.

**Driffield, Thursday.**—The wheat trade is about over until after the harvest, and therefore very little doing. Wheat, 22s 6d to 30s; oats, 21s to 22s per qr. Several fields of early oats have been cut in the neighbourhood.

**Glasgow, Wednesday.**—The trade during the week has been dull, and prices of wheat are rather the turn in buyers' favour, but there has been little or no business passing to test values. Flour has been the turn lower. Maize has also been the turn in buyers' favour. Barley is firm in price, and foreign oats are about 3d per boll lower. Other articles remain nominally unaltered. There was the usual attendance at our Corn Exchange. Wheat steady and unchanged. Flour easier, and in buyers' favour. Barley 1½d per boll dearer. Indian corn 1½d dearer on the week, but Maize unchanged. Oats, beans, and peas without quotable change on the week. Oatmeal steady, but little business passing.—GIBSON AND CLARK.

**Hereford, Wednesday.**—Small attendance. Only one or two samples of old wheat were on offer, finding buyers at full late rates. New oats were discussed for early delivery, although no actual samples were shown, but a parcel of new barley was sold. Maize was quoted nominally at last week's prices. Beans remained a very firm market. The barley was the first lot of new grain

handled in this district. Wholesale quotations:—Wheat, 3s 9d to 3s 10d per 62 lb.; barley, 3s to 4s per 56 lb.; oats, 2s 6d to 3s 3d per 40 lb.; beans, 4s to 4s 3d per 65½ lb.; maize, 3s to 3s 3d per 60 lb.

**Leeds, Tuesday.**—The weather has continued fine and hot, a heavy thunderstorm this morning bringing welcome rain. Trade has been slow and inactive during the week, though prices have been fairly maintained. Offers from Russia are limited, and limits prove beyond the views of buyers, other descriptions of wheat being preferred; but demand is far from general, the general desire being to await events. Maize from 3d at advance. Other feeding stuffs unchanged.—DUNN AND CO.

**Maidstone, Aug. 2.**—Wheat cutting has begun in the valley of the Medway. No old wheat at market. Old oats made 21s per 336 lb.—(Special M.L.E.)

**Maidstone, Thursday.**—Brilliant summer weather, intense heat produces disinclination for business, with anticipation of early harvest. Wheat trade, therefore, very slow indeed, not enough transacted to furnish a compendium of prices. Barley is slightly dearer, as the foreign arrivals lately have been remarkably low. Oats are not in much request, and can be obtained at less cost than recently. Beans are scarce, and buyers can only get what they require by paying more money than in last month. Maize is slightly weaker, except for choice lots. There is no alteration to register in the value of bran, hemp, tares, sago, or other food material.

**Manchester, Thursday.**—Little or no English wheat on spot. Foreign shows no change, but rather easier, with the exception of fine sorts. Flour quiet. Indian corn 4d to 1d lower. Oat 1d to 1d per bushel lower. Barley: American feeding 4d higher, English scarce. English peas in short supply. Beans do not show any quotable change. Bran, etc., steady, unchanged.

**Newark, Wednesday.**—Better attendance, but trade inactive. A few samples of new wheat offered. Quotations: White and red wheat, 31s 6d to 33s; grinding barley, 22s to 24s; white oats, 22s 6d to 24s; new oats, 18s 6d to 20s; beans, 35s to 36 3d per qr.

**Newcastle, Tuesday.**—Demand for wheat limited, and late rates not supported. Maize firm: American flat, 23s. Oats steady; Scotch 21s 6d to 23s. Norfolk beans, 36s. A slow trade for flour; millers' fines 23s, superfines 24s, extra 26s, and patents 28s.

**Plymouth, Thursday.**—The attendance on market to-day was very good. Wheat, unchanged. Maize unchanged. Oats scarce, 3d advanced. Barley on spot scarce, 6d advanced.

**Ripon, Thursday.**—Market firm all round. English wheat scarce and making more money. A good attendance. Prices:—Wheat, 30s to 31s; wheat, foreign, 32s to 35s 6d; barley, grinding, 23s 6d to 24s 6d; barley, malting, 20s to 25s; oats, 21s to 22s 6d; maize, round, 23s to 24s; maize, flat, 25s to 26s per qr.

**Sheffield, Tuesday.**—With very little English grain offering and harvest near at hand, there was only a limited trade at the Exchange to-day, and prices were about unchanged. Maize, oats, and peas firm at late rates. Beans scarcer, and in some cases 6d per qr dearer. Grinding barley quoted at 6d advance. Millers' offers in improved demand at last week's prices. Quotations:—Wheat, white, 33s to 33s 6d; ditto, red, 31s to 33s 6d per 504 lb; oats, black, 21s to 23s 6d; ditto, white, 22s 6d to 23s per 336 lb; peas, grinding, 32s to 33s 6d; ditto, blue, 55s to 70s per 504 lb; beans, English, 37s to 37s 6d per 532 lb; barley, grinding, 21s to 24s 6d; ditto malting, 28s to 32s per 448 lb; Indian corn, small, 24s to 24s 6d; ditto Plate, new, 22s 3d to 22s 9d; ditto flat, 24s 6d to 25s per 480 lb; bran, 8s 5s; fine sharps, 12s; broad bran, 10s 5s per ton.

**Stockton, Wednesday.**—There was no local wheat showing. The fine weather keeps the foreign wheat market quiet, and though prices are nominally the same as last week, to do business 3d to 6d less money had to be taken. Oats and maize quiet.

**Wolverhampton, Wednesday.**—There was a small attendance, and but little business was transacted. Quotations: New wheat, 14s per 216 lb; flat corn, 25s; English beans, 15s 6d; oats, 16s.

**Workop, Wednesday.**—Small attendance, and very little wheat on offer, but sufficient to meet all requirements. An odd sample of new black winter oats made 18s 6d per qr; white wheat, 31s 6d; red wheat, 30s 6d; barley, 25s to 28s; old white oats, 22s to 23s; old black oats, 21s to 22s; new black ditto, 18s 6d; flat maize, 25s; round maize, 24s per qr.

## HOPS.

**Farnham, Friday.**—Last night's washing rains will have greatly benefited the hop gardens. Wheat harvest will begin generally on Tuesday next.—M. L. E. Telegram.

## THE BALTIC.

The market for wheat could not be put on a gone any material change since last Monday, and the holiday adjournment was welcomed by those who wish for a little time in which to study the situation. There is a small quantity of No. 1 Manitoba afloat, for which 31s. 6d. is asked and 31s. 3d. offered. This will arrive in the course of August. There is a fair quantity of No. 2 available for August shipment at a level 30s., but 29s. 6d. was the best offer from buyers. Australian is held for 30s. 6d., and there are three arrived cargoes on sale at this price. Bahia Blanca for August shipment is offered at 29s. 9d. per 480 lb. Russian cargoes are offered for prompt shipment at 32s. finest Azima, 31s. Odessa-Ghurka, 30s. Hard Taganrog, and 29s. common, all per 492 lb.

Maize cargoes are in buyers' favour. Sa'es since Monday include—Potsi at 29s. 10½d. per 480 lb., Argentine at 20s. 1½d., Galatz at 21s. 6½d., Roumanian at 21s., and Novorossk at 21s. 9d. per qr. There are above buyers' notions by 1s. per qr.

Barley cargoes have reached 3d. for futures, 18s. 6d. to 18s. 9d. for September and for September shipment from Russia and Roumania of the old crop. New crop barley, October and November shipment, is quoted 18s. per 400 lb.

Lined cargoes are quiet. Calcutta on Thursday made 42s. 3d. per 410 lb., and Argentine made 41s. 3d. per 416 lb. Rapeseed cargoes are firm with 46s. 9d. per 416 lb. made for brown Cawpore.

Cottonseed is well maintained in value for old crop. The new Egyptian crop is speculatively offered for December shipment at £6 16s. 3d. per ton, and the new Indian is offered for January shipment at £5 3s. per ton.

The London Corn Trade Association authorities have just made up standards of the April shipments which follow:—Plate wheat of the Province of Santa Fe, f.a.q., 58°80 lb., 59°55 lb., 60°45 lb., 61°35 lb., 62°25 lb.; at time of discharge. Barletta 4/ or Russo wheat at Buenos Aires, 63°15 lb.; at time of discharge. Barletta wheat at Buenos Aires, 62°55 lb., 63°65 lb.; at time of discharge. Barletta 4/ or Russo wheat at Bahia Blanca, 61°55 lb., 62°70 lb., 63°65 lb.; at time of discharge. Russo wheat at Bahia Blanca, 63°45 lb.; at time of discharge. Hongrois wheat, 60°75 lb., 62°25 lb.; at time of discharge. Northern Plate wheat, 61°65 lb.; at time of discharge. Yellow La Plata maize. La Plata oats. These standard samples can be inspected at the association premises, No. 26, St. Mary Axe (next door to the Baltic).

## WOOL.

**Liverpool, Wednesday.**—The fourth series of periodical auctions for this year began on the 23rd ult., East India wool being catalogued on that and the five following days, and sundry descriptions yesterday and to-day. The new arrivals of East India reached the large total of 36,100 bales, and importers had 1,330 bales left out of the 2,277 bales withdrawn in May. With a few secondhand parcels, 37,995 bales were catalogued and 23,800 bales changed hands, leaving merchants with 14,195 bales. The home trade secured 15,000 bales, France 4,300 bales, and America 4,500 bales. The selection could scarcely be called good, although there was a fair choice of the better growths of whites, yellows being exceptionally scarce, while coarse whites were plentiful, and medium and lower qualities of both whites and colours were generally in very wasty condition.

There was a fair attendance of home and foreign buyers, but the large quantity available, and frequency of stiff limits of price put on by shippers tended to restrict competition. Compared with May currency, we quote the decline on good whites at 7½ to 10 per cent., good yellows 5 to 10 per cent., piecy yellows and fine greys, &c., 10 to 15 per cent., middling and coarse whites, as well as greys were quite 10 per cent., dirty parcels even 15 to 20 per cent. cheaper; and native skin and goat hair receded proportionately.—RONALD AND RODGER.

**Glasgow and Leith, Wednesday.**—In the Scotch wool trade the month of July was characterised by much activity owing to the summer sales and markets, where large quantities of wool changed hands at full prices. At both London and Liverpool prices opened on a lower level, but the undertone was very steady, and the opening rates were fully maintained throughout the sales. Buyers are holding out for full rates for tops and yarns, as they realise the strong position the raw material occupies. The supply of carpet wools especially is small all over the world, and stocks are well held. Whitefaced wools are easier in sympathy with London, but buyers are operating more freely, and the month closes with a firm tone.—J. AND W. GREGG.

## LIVE STOCK AND MEAT TRADE REVIEW

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

### Trade in London.

Owing to our having to go to press earlier on account of the August Bank Holiday, our review of the week must necessarily be somewhat curtailed. With an increase in the number of beasts on offer at the Cattle Market, Islington, trade opened and continued through the day of a dull and dragging nature, rates favouring the buyer, though not sufficiently so to warrant our quoting any decline. As usual of late, the majority of the supply consisted of grass-fed cattle from the Midland Counties; a small consignment of black-pollled Dublins found a ready sale at good value. The bad trade which has been experienced lately at the Dead Meat Market is in some ways accountable for the sluggishness here. On Thursday no fat beasts were offered for sale. Fat butchering cows and bulls on both days met with a slow trade, at a downward tendency in value.

At the Foreign Cattle Market, Deptford, up to the time of our going to press, only one market had been held, namely, Monday, no sales whatever being made on Wednesday, trade on the first day of the week was firm and steady at late currencies. The total number penned up to and including Thursday was 1,766, consisting of 1,110 British (increses 160), and 656 from the United States. The following were the top rates obtained per lb. (sinking the offal):—80 stone Devons, 4s. 4d. to 4s. 6d.; 90 stone Herefords, 4s. 4d. to 4s. 6d.; 90 Black Polled Norfords, 4s. 2d. to 4s. 4d.; 95 stone runts, 4s. ex. 4s. 4d.; 100 stone Lincolns, 3s. 8d. to 3s. 10d.; 80 to 90 stone Black Polled Dublins, 4s. 4d. to 4s. 6d.; 90 stone States, 4s. to 4s. 2d.; 90 stone fat cows, 3s. 4d. to 3s. 6d.

In the sheep market trade was confined to the Islington market, and on both market days ruled slow for wethers, whilst ewes ruled firm and steady at good money. Scotch sheep were in smaller numbers, and shared in the decline in value, as also did Irish. The lamb trade was firm and steady on both market days, late currencies being well maintained. The total number penned at Islington was 10,340, as against 10,150 during the preceding week, showing a decrease of 40. Best pens made per 8 lb. as follows, sinking the offal:—7½ to 8 stone Downs, 5s. 6d. to 5s. 8d.; 9 stone Downs, 5s. 4d. to 5s. 6d.; 10 stone half-breds, 5s. 2d. to 5s. 4d.; 12 stone Lincoln half-breds, 4s. 10d. to 5s.; 10 stone Irish, 4s. 10d. to 5s.; 10 stone Down ewes, 4s. 2d. to 4s. 4d.; 11 stone half-bred ditto, 4s. to 4s. 2d.; 5 stone Down lambs, 7s. 2d. to 7s. 4d.; 6 stone half-bred ditto, 6s. to 6s. 2d.

Calves numbered 90, and on Monday met with a slow but steady trade, but on Thursday were dull and dragging at a considerable decline; the best were quoted at from 5s. 8d. to 5s. 10d. per 8 lb. on the first day of the week, and from 5s. to 5s. 4d. on the second.

No pigs on offer.

### Trade in the West.

The rain which has fallen since our last report, although not altogether general, has been sufficient to benefit in some measure not only the pastures, but equally so the growing crops, though more is still wanted before it will have any very appreciable effect on grass keep prospects or on prices of keeping stock, either cattle or sheep. That is just the position at present. Cattle of some kinds are selling a little better than they were, but this improvement is confined almost exclusively to the very best class of dairy beasts, which are undoubtedly worth from £1 to £2 apiece more than they were a fortnight or three weeks since, and arises more from a want of milk in many districts than to anything else. Grazing cattle, on the other hand, are still seriously affected by the shortage of keep, and, though the prospect now is certainly better than it has been, it is the difficulty of providing for present needs that is handicapping the grazing industry just for a time and keeping business at a standstill. From £22 up to £28 per pair may be given as the present range for the very best class of barreners, the only ones for which practically there is anything like an inquiry, whilst plainer ones are offering at any price from £20 down to £14 or £15.

With respect to dairy stock, the past week has developed a greatly increased demand, with, as we have already indicated, a considerable upward turn in prices, good heifers or cows now making from £17 up to £21 and over, the highest figure we have heard touching in the district being £25 3s. for a rare cow; but there are only very few of them to be found. In calves, too, where presenting anything like promise, are engaging considerably more attention at from £9 to £15, and year-

lings are also selling a little better at from £4 up to £7 10s. each.

### Trade in Ireland.

Holiday interruptions on the other side of the Channel had a bad effect on the attendance of buyers at Thursday's Dublin market, and the requirements of those present, owing to the sultry weather, were of limited dimensions both for home and export. In the cattle section, too, there was an increase of nearly 200 head, and the number—2,917—was large for this season of the year, and trade proved slow and disappointing. Buying opened with a cautious inquiry, with prices at least 10s. under those of the previous market, while towards the close of the market the fall must be written down to from 15s. to 20s. under last day per head, and coarse cattle might be said to be almost unsaleable. The dullness in the beef trade is attributable in a great degree to the heavy arrivals of beef and live cattle at the English ports during the past week, over 190,000 cwt. of frozen beef having been landed, and 13,263 cattle. This quantity of beef is a record one, and must, of course, greatly affect trade. The new rule as to Army and Navy beef also had a very bad effect, as foreign dead beef can now be bought at between 2d. and 3d. per lb., and the prospect for rough cattle look very gloomy for the remainder of the season. Home buyers purchased very timidly, evidently waiting to see how exporters would trade.

Live weight prices were from 1s. to 1s. 6d. less than those of last day, the top price for Short-horns being from 29s. to 31s. per cwt., and for Aberdeen-Angus and Hereford crosses from 32s. to 33s. per cwt. Cow beef sold very regularly, but a good many were purchased for contrast purposes. Dead weight prices, prime ox and heifer beef, 55s. to 60s. per cwt.; good second quality beef, from 47s. to 53s.; and inferior from 42s. per cwt. upwards.

Sheep were in much smaller supply, there being a decrease of 1,665 head, the number offered for sale being 8,662. Trade was very bad at a reduction per head of from 2s. to 3s. with a slow, dragging sale. As in the beef department, the large importations of foreign sheep and mutton in English ports during the week quite upset dealings here. Chilled mutton to the extent of 137,000 cwt. having been landed in English ports. Sheep suitable to the home trade suffered proportionately to shipping grades. Lambs also met with a disappointing sale, all except first-class being about 2s. per head lower. Lambs worth from 36s. to 40s. continued to hold their own pretty well.

### Trade in Scotland.

The number of fat cattle on offer this week has been larger. For the best quality trade nearly equal to the previous week has been obtained; but the secondary descriptions, which comprised a large proportion of the cattle on offer, made decidedly less money at about an average fall of 15s. per head. Sheep have been shown in full numbers. A fairly steady trade has been got at prices just in favour of the buyer of lambs, of good quality, selling well. A very large show of calves made less money. Pigs in short supply and very dear. There was a small supply of store sheep, and these met a quiet trade without change in value. There was a larger and better show of store cattle. Anything of a good class got fairly well sold, but a few of the inferior descriptions were left over. A small show of milch cows met a slightly better trade. Quotations: Top price of cattle per live cwt., 39s. 9d.; current, 36s. to 37s. 6d.; mutton, 7½d. to 9d. per lb.—JOHN SWAN AND SONS, LRP.

## LONDON.

**Central Market, Thursday.**—Fair supplies delivered again met a slow demand. Beef arrivals included 40,000 Scotch, 390 Liverpool sides, 1,900 American refrigerated hindquarters, and 900 forequarters; also 900 Argentine chilled hindquarters and forequarters. Quotations:—Beef: Scotch short sides, 4s 4d to 4s 6d; English, 3s 6d to 3s 7d; American (Deptford killed), 3s 5d to 3s 7d; Liverpool sides, 3s 4d to 3s 6d; American refrigerated hindquarters, 3s 6d to 4s; forequarters, 2s 3d to 2s 4d; New Zealand hindquarters, 2s 3d to 2s 4d; forequarters, 1s 5d to 1s 6d; River Plate hindquarters, 2s to 2s 3d; forequarters, 1s 4d to 1s 5d; Argentine chilled hindquarters, 2s 10d to 3s; forequarters, 1s 9d to 1s 11d. Mutton: Scotch wethers, 5s to 5s 2d; ewes, 3s 8d to 3s 10d; English wethers, 4s 4d to 4s 10d; ewes, 3s 4d to 3s 6d; New Zealand, 2s 3d to 2s 6d; River Plate, 2s 1d to 2s 3d. Lamb: English, 5s 8d; New Zealand, 3s 2d to 3s 6d. Veal: English and Dutch, 2s 8d to 4s. Pork: English, 3s 10d to 4s 4d; Dutch, 3s 8d to 4s 2d per 8 lb.

**Islington, Thursday.**—Beast consignments were of small extent, and met a quiet sale at previous quotations. Heavy bulls 2s 8d to

3s 2d per 8 lb. A fairly good number of sheep offered experienced a slow demand, prices, however, ruling steady: 7½ to 8 stone Down wethers, 5s 8d; 9 stone, 5s 6d; 10 stone, 5s 4d; 10 stone half-breds, 5s 2d; 10 stone Down ewes, 4s 2d; 11 stone half-breds, 4s. Lamb trade quiet, unchanged; 5 stone Downes, 7s 6d; 6 stone Dorset half-breds, 5s 10d to 6s. Calves in fair request, best selling at 5s 8d per 8 lb., offal given in. No pigs offered. Total arrivals: 20 beasts, 2,550 sheep and lambs, 70 calves.

## COUNTRY.

**Ashford, Tuesday.**—Trade good for beef and mutton, at last week's prices. Lamb and veal cheaper by 4d to 8d per stone. Best beef, 10s 6d to 11s; cows, 9s to 10s. Mutton out of wool: Small half-breds, 5s to 5s 2d; large, 4s 6d; barrens, 3s 6d to 4s. Lamb, 6s 4d to 6s 8d. Veal, 4s 8d to 5s. Pork: Roasters, 10s to 10s 6d; a score, 9s; larger hogs, the same. Pork supply was short.

**Birmingham, Thursday.**—Fair supply of pigs. Small supply of beasts and sheep. Trade slow. Quotations: Beef, 7d to 6½d per lb.; mutton, 6½d to 8½d per lb.; lamb, 8½d to 9½d per lb.; veal, 6d to 7½d per lb.; bacon pigs, 10s 6d per score; cutting pigs, 10s 6d per score; sows, 7s 6d to 7s 9d per score.

**Bristol, Thursday.**—The market was of a holiday character, with less than average business doing. Fat cattle were plentiful, and trade quiet at late rates. Sheep and lambs also were numerous, and changed hands slowly at recent values. Pigs were again scarce, and small business was done at current quotations.

**Chester, Thursday.**—Supplies were up to the average in number, but sound stock was scarce. More buyers attended than for weeks past. The demand both for store and dairy cattle showed great improvement. Quotations: Milch cows, £18 to £22; calves, £16 to £21; heifers, £9 to £13; heifers, £8 to £14; storks, £7 to £9; bullocks, £7 to £13.

**Dublin, Thursday.**—Demand for cattle was of a slow and dragging nature, and prices must be written lower from 10s to 2s per head, at which reduction the market did not clear. With a large reduction in numbers of sheep and lambs prices were in favour of buyers, and to effect sales a slight reduction had to be made even on best qualities, and a clearance could not be effected. Cattle: live weight (best) 29s to 31s 6d per cwt. Secondary and inferior sorts 26s to 28s 6d per cwt. Mutton: dead weight, 6d to 7½d per lb.—GAINLY, SOSS & CO.

**Hereford, Wednesday.**—A fairly large supply of beef, and trade being firmer, best quality bullock and heifer made 6½d and 7½d; cow beef, 4½d to 5d per lb. Sheep were a moderate supply; fat wethers at 8d to 8½d per lb.; fat ewes, 6d to 6½d per lb. Lambs were in short supply, and were hardly so dear as wethers, making 8d to 9d per lb. There was a demand for good store lambs. A large number of calves were on offer, and had a quick clear at 7d per lb. The supply of pigs was better than last week, and the pork trade a trifle better, prices ranging from 5½d to 6d for best quality. The trade for store pigs was firmer. There were few store cattle and trade was at a standstill.

**Sheffield, Tuesday.**—Slow trade, and only a poor poor attendance of dealers. Good milch beasts most in demand, and made £19 to £21 10s; secondary lots, £14 to £15 10s.

**Shrewsbury, Tuesday.**—Quotations:—Beef, 5½d to 6½d per lb.; mutton, 7d to 8½d per lb.; lamb, 8d to 9d per lb.; veal, 6d to 6½d per lb.; porker pigs, 9s 6d to 10s per score; bacon pigs, 9s to 10s score. Cows with calves up to £22 10s. Numbers offered as follows:—Cattle 384, sheep and lambs 1,818, calves 113, pigs 322. Very small supplies, but a good trade. Cows with calves met a ready trade.

**Workop, Wednesday.**—Very fair all round market. A moderate supply of beef, best qualities making from 6s 9d to 7s 3d; secondary qualities, 6s 3d to 6s 6d per stone. Better supply of sheep than last week. Southdown wether and crossbreds making from 8d to 8½; ewes and other sorts, 6d to 7d; lamb, 8½d to 9d per lb.

**York, Thursday.**—A fair show of shearing sheep for the time of year, and the best twice-crossed made up to 54s; others, 48s to 50s; best Mashams, up to 50s; others up to 49s each. About 500 twice-crossed lambs on offer, which made from 2½s to 3s each, most being sold. Prices in the sheep trade were slightly easier, owing to the continued dry weather. The drought affected the store cattle trade more seriously, and dealers accurately gauged the requirements for English, for whilst about only one lot was shown; there were absolutely no buyers. Irish cattle were also in small offer, and there was practically no trade. Moderate show of calving and milch cows. Newly calven cows met with a fair trade up to £21 each, secondary sorts from £10 to £18 10s.

## LATEST MARKETS.

## THE CORN TRADE.

MARK LANE, FRIDAY, 1.30 P.M.

Some rubbed out new wheat has landed round as a curiosity, and showed a fine, plump, and level sample. Prices for the new crop are suggested at 30s. for red and 31s. for white, but no sales of any bulk are likely for a fortnight. Old English wheat made 34s. 6d. for rough chaff, 32s. 6d. for common Essex red. The price of chicken wheat could not be given. Those who must have wheat for their poultry will evidently between now and harvest have to pay for millers' wheat. Foreign wheat made 32s. 6d. for fine Azima, 30s. for White Kurrahee, and 29s. 6d. for Red Kurrahee. Maize declined 6d. for Argentine, which was obtainable at a guinea for common samples, and 21s. 9d. for special lots. Barley was neglected as a rule, but some new Syrian made 22s. per qr.

Oats were held for old prices, but there were no buyers, and the tone was against sellers.

## THE FLOUR TRADE.

MARK LANE, FRIDAY, 3 P.M.

The event of the day was the fall in the top-price from 30s. to 29s. After several months' stability this concession was noteworthy. The fall in fine Hungarian in July, however, had prepared the way for it. Town Whites and Town Households were not notably lower, but the sales were very small. Country flour made 24s. for best patents, 22s. for ordinary roller whites. Where more money than this was demanded, trade could not be done. American Winter wheat flour was offered at 23s. per sack c.f.i. prompt shipment. Belgian flour made 26s. for best grade. Australian touched but did not exceed 23s. 9d. per sack. Granardia flour was offered for delivery in September at 25s. 3d. per sack.

Sago flour met with a small but steady demand at 9s. per cwt. for cash. Oat flour made 17s. to 18s. per cwt. for Mitholthin, 12s. 6d. to 13s. for Deside, and 15s. 6d. to 16s. for Gramian. Canadian groats made 11s. 6d. to 12s. per cwt., and "Rolled Oats" as they are called, the same price. Rye flour realised 20s. 6d. per sack for the best grade, and rye meal 19s. per sack for ordinary. Farina costs 11s. per cwt. This is fine potato flour and has many legitimate uses.

## HOPS.

## The Crop Prospects.

ENGLAND.—After careful examination of numerous reports that have reached me from the hop-growing counties, I am compelled to conclude that little if any improvement has been accomplished in the general condition of the plantations. The scorching heat is rapidly developing the burr, but the necessity of rain is painfully evident, and without it no real progress can be made. Indeed, it is now very questionable whether any change for the better is possible, and most observers have accepted the inevitable, looking forward only to less than an average harvest.

The average yield per acre, as given by the Board of Agriculture for the past sixteen years, including the three heavy years of 1894, 1899, and 1901, and the exceptional crop of last year, comes out at 8.68 cwt. Accepting this figure for our present guidance, we may perhaps reckon upon an average of 6½ to 7 cwt. for this season, and on this basis may expect a crop of 320,000 to 340,000 cwt. I cannot think we can possibly exceed the latter figure, and am rather inclined to quote the former as being the nearest to the mark.

I have not space for all the details in my possession, but regret to note that the blight is still in full evidence in many gardens, and that the costly washing has in the majority of cases failed in cleansing the plants. I am not surprised to hear that in the Faversham and Setting districts some very good pieces of bine are to be seen, knowing that energy and skill are there always exercised. Again from Sittingbourne I hear good news, and the general outlook round about Canterbury seems to be fairly good for the year. Some advancement is to be met with at Paddock Wood, although there are some striking contrasts between the healthy appearances at Beltring and some of the neighbouring grounds. There is also promise of fair results in the Tonbridge and Wateringbury districts, but here there is also much variation.

In the Farleighs and the Medway Valley a goodly number of acres present a fair prospect, but their excellence is sadly discounted by other pieces that will yield but few hops. Surrey growers report that where washing has been persevered in there is some hope of a small crop, but many gardens will be absolutely destitute. The Sussex crop is small, according to the opinion of those best able to judge of the present condition of most of the plantations, and when we travel to the Midlands we hear most discouraging estimates.

Both in Worcester and Hereford the outlook is almost as bad as it can be. Opinions differ as to which county is in the worst condition, but it appears to be settled that the average of the two will not go beyond 3 to 4 cwt. per acre. Even the best and most attentive growers are surprised and disappointed, and are anxiously looking for high prices to remunerate them.

UNWASH.—Hitherto the reports from Hallertau and Spalt have been sufficiently favourable to warrant the expectation of a good average crop, but the continuance of hot, dry weather has changed the prospect, and growers are now very dubious as to the final results. In other districts the variations of temperature have encouraged vermin, and the plants are on the whole not looking so well as formerly. From Tettnang I hear that while the crop cannot exceed half that of last year, the quality will be very variable, not above one-third promising to be choice. In the other districts I am advised that the yield will not exceed one-sixth of last year. From Alsace there are similar complaints, not above one-third of a good crop being anticipated, and the quality will be only medium.

BOHEMIA.—The prospects have changed for the worse, and it is now confidently assumed that the harvest will not exceed one-third of that of last year.

FRANCE.—The continuance of bright sunshine, with a few showers, have rather raised the hopes

## MARKET SUPPLEMENT.

V

of the planters in Burgundy. The plants are generally healthy, and are rapidly coming into flower. There are some very promising grounds, but others are rather poor. On the whole a fair crop is expected, and of good quality. In the northern districts the conditions are very similar to those in Belgium.

Belgium.—Very little improvement has been effected, although the weather is fairly favourable to progress and development. Rain is wanted to assist the flowering, which is making its appearance, but it is now almost too late for any enlargement of the crop, that must be disappointing to planters.

AMERICA.—Recent reports confirm the previous

estimates of a record crop in all the hop-growing States. The only exception I have met with is a statement that about Cohoeskill (New York) there is vermin in some yards, and that on the whole the indications do not point to a yield quite equal to last year. The *Waterloo Times* says that the yards are looking bright and clean and free from vermin, and as the weather has been very favourable, a good crop of excellent quality is practically assured. The Pacific Coast reports are uniformly promising, but there are those who say that exaggeration is part of the nature of Oregon planters, and that we may be prepared for some modification of the present brilliant outlook as the season advances.

## The Royal Lancashire Show at Lancaster.

After a lapse of eighteen years, Lancaster was last week once again the scene of the show of the Royal Lancashire Agricultural Society; and what a wonderful change has taken place between the two visits! The society has progressed with extraordinary rapidity, and whereas in 1888 the entries at Lancaster were a trifle over 1,500, last week they reached the magnificent total of 3,399, not including dogs, which is above the average entry of the past five years, although not so numerous as some recent shows. Including dogs, the total was 4,458 as against 4,803 at Liverpool a year ago, 4,072 at Southport in 1904, 3,850 at Manchester in 1903, and 3,093 at Liverpool in 1889. Compared with the phenomenal figures at Liverpool, cattle and light horses showed a decrease, but were just above the five years' average. Sheep, which nowadays form a valuable asset on a farm, constituted a record for some years, and Shire horses and pigs, numerically, compared favourably with Liverpool. As is well known, Lancaster has an agricultural show every year of its own, but in view of the county society coming there the local exhibition was merged in the present exhibition, whilst the Lancaster Society has contributed some £1,400 as a first subscription towards the county expenses, and it is intended to raise a total of £2,000, so that the Lancaster Agricultural Society has had a good deal to do with the success of the exhibition, the principal sections of which are dealt with below.

### Horses.

The display of Hunters was without doubt one of the best ever seen at a Royal Lancashire show, especially as regards the quality. Stallions, which made a fine show, were headed by Sir Walter Gilbert's Merry Matchmaker, Mr. J. A. Mullens's (Glenossal) coming second, and Mr. H. L. Storey's Underbred third. There was a wonderful class of brood mares, but Mr. F. B. Wilkinson's (Glasgow) had little trouble in securing first prize, while later she was awarded the Manchester Challenge Cup for the best Hunter brood mare or filly. Next to her in this class was Rosalind, belonging to Mr. A. J. Brown, the veteran Yorkshire breeder and exhibitor. The prizes for foals, which were also of good calibre, went to Mr. Wm. Brown, of Lancaster, Sir H. F. de Trafford, and Mr. Wilkinson. The heavy-weight carriers formed a beautiful ring picture, embracing three famous animals in Mr. J. H. Stokes's Madrid and Patrician, and Mr. W. A. Simpson-Hinchliffe's Shigo, which received the second prize. Mr. J. H. Stokes's well-known prize winner, Whiskey, appeared fresh with his Darlington honours, and he again met Mr. A. J. Brown's Ribby, which he once beat for first place, and later secured, as last year, the champion prize, offered by the Manchester (1903) Local Committee, for the best Hunter mare or gelding of four years and upwards. The judging of the three years' olds was, so far as Mr. E. Hodgson's (Bridlington) Sportsman and Mr. Wilkinson's Destruction went, a confirmation of the Peterborough verdict. Two-year-olds, like the preceding class, mustered well, and the trio of premiums for yearlings got to as many counties—Notts, Derbyshire, and Lancashire. The medals of the Hunters' Improvement Society induced a smart competition. The gold award fell to Mr. H. Tennant's mare Birch Rod, from Fairfield, Buxton, and the others to Mr. Stokes's Black Pearl and Mr. F. B. Wilkinson's His Grace.

Hackneys made a somewhat small display but quality was good, some Royal winners being forward, and they succeeded in maintaining their positions. Among the aged stallions shown were Administrator and Daim, Duke and I in the two-year-old class Mr. Arthur Hill's Copmanthorpe Performer maintained his unbeaten record, also securing the Ainscough Gold Challenge Cup for the best Hackney stallion. Administrator, who won this handsome 50 guinea trophy last year, was now reserve, after a sharp tussle. Of two yearling stallions catalogued, only one was favoured—Mr. W. Mathieson's (Horsforth) Executor, but this promising son of Administrator

has such rare quality and good action that he was at once handed the red card.

Brood mares were topped by the celebrated Rosadora and Mitre, with a Lancashire dam third. Rosadora repeated her performance of last year by again winning the Royal's challenge cup for the best Hackney mare or filly in the show. The progeny of the Lancashire mare just mentioned was the chief of the foals. Three-year-old fillies were made all the more attractive by the presence of Mr. F. W. Buttle's Boquhan Sunrise, which was not only beautiful, but a fine mover. She, too, has a clean certificate. Angram Queen, the property of Mrs. E. Fletcher, of York, was a nice, short-legged yearling filly, with the best of action, and merited the first prize given her by the judges.

In the riding and driving class Mrs. Hartley Batt, of Hyde Park, London, was, as usual, to the fore, winning premier honours for harness pair of geldings or mares, with Hopwood Spark and Hopwood Horse, a pair of beautiful animals. In the harness pony, mare or gelding class, Tissington Kit Kat, belonging to Mr. Howard Frank, of Wimbledon Common, succeeded in maintaining its practically unbroken record; Mr. W. S. Cunard's Queen Go Bang being placed second. The leaping competitions were, as usual, a centre of attraction.

The Shire horses were fewer in number than might have been expected in the open classes, but the local section was well filled. Although there was a certain meagreness in some classes, some representative horses were shown by Lord Rothschild, Lord Egerton, and others. There were only a few yearling fillies, and these were hardly regarded as distinguished for quality, though there was little fault to find with Earl Egerton's Tatton Abbas, who was put at the head. In the two-year-old class an old-standing contest was waged by the two fillies at the top of the class—namely, Mr. R. Whitehead's Peak Polly and Earl Egerton's Tatton May Queen, which were placed in the order named. The three-year-old filly class was very small. Only three competitors appeared in the ring, and the best was Lord Rothschild's, which beat both Lord Egerton's and Mr. Gold's exhibits. The first prize winner was, a new aspirant for show-yard honours—namely, Lord Rothschild's Belle Cole, a handsome short-legged, thick filly, which moves as true as a die. It was her action which practically won her the Greenall Challenge Cup. The judges differed over her and Mr. Robert Whitehead's Peak Dolly, and Mr. Peter Blundell was called in to settle the difference. The referee favoured Belle Cole, the reserve ticket going to Peak Dolly. Among the foals, however, Lord Egerton was deservedly first, followed by Mr. Victor Cavendish with another animal of conspicuously good points. The mares were a fairly good class. The younger exhibits in the Shire stallions were larger in number than hitherto. In the two-year-old class there was not a large number of exhibits, but quality was very good indeed, and the class provided the male champion, Lord Egerton's Tatton Day King, who was given the Earl of Derby's 50 guinea Challenge Cup.

### Cattle.

The cattle section was again one of the most attractive features of the show. All the leading prize winners in the country were entered, and competition was exceedingly keen, the judges occasionally finding considerable difficulty in deciding the placing of the animals. Mr. Frank Miller, of Birkenhead, with his high-priced yearling champion bull Baptin Viceroy, again beat all comers, winning the championship prize, the Derby challenge cup for the best bull in the show, while the same exhibitor's three-year-old bull Linkfield Champion was reserve for the championship. Sir Oswald Mosley, Bart., Rolleston Hall, with his two-year-old heifer Rolleston Spier, secured the Derby challenge cup for the best cow or heifer in the show, his three-year-old heifer Proud Duchess being given the reserve ticket. For the best cow or heifer in the show bred by the exhibitor in the County Palatine.

the winner was Mr. Thomas Atkinson, Bury, with Jenny 19th, a prettily modelled roan heifer of a good Shorthorn type. The whole of the Shorthorns were a very even class, and in quality generally were superior to last year. Two-year-old bulls were led by Mr. George Harrison's smart, improving Royal Eusign, which was third at the Royal, and he was accompanied in the prize-list by Mr. Miller's Broadbinks Champion, and Mr. John Handley's Pearl King 2nd. Cows in milk or in calf were few in number, but good in quality. The leader was Lord Calthorpe's Sweetheart, a champion winner in the South. She is a very sweet animal, with a capital udder, but less wear about her than Mr. Harrison's Ursula Raglan, the second prize taker. The Gainsford Hall representative was the reserve at the Royal, and first and first and champion at the Highland, and first at the Northumberland shows.

Shorthorn dairy cows were disappointing, for there were only about half-a-dozen animals in the two open classes. Jerseys were better represented, the old cow class being especially good. The Blythwood Challenge Bowl for the best cow or heifer in milk bred in Great Britain or Ireland, was won by Lady de Rothschild with Pearl 2nd, the trophy thus going to the same exhibitor for the third year in succession. The winner is a very useful type of cow and a noted milker. The pretty little Dexter cattle made a good show, the challenge cup for the best animal in the show going to Mr. Godfrey J. B. Chetwynd with his four-year-old Don Gentian, a winner at the Royal and all the other leading shows. In the class for Dexter cow or heifer, calved in or before 1903, there was a numerous entry, and the winner was Sprucefield Edna, belonging to the Countess of Sefton.

### Sheep.

The entries in the sheep classes were over the average; quality showed improvement. In Shropshires Sir R. P. Cooper, Bart., Lichfield, was the chief prize-winner. He won the silver cup for the best pen of three shewling ewes, first prize in the class for rams, first for ewes, second for ram lambs, and second for ewe lambs. The Right Hon. Victor Cavendish, M.P., was also a successful competitor in the section, he taking the first and third prizes for ram lambs, first for ewe lambs, and second for shewling rams. The silver cup for the best Oxford Down was taken by Miss Alice C. de Rothschild, with a really high-class pen of shewling ewes, and for the best exhibit amongst the Wensleydales, a strong section, Lord Henry Bentinck was an easy winner. In the class for the best Wensleydale ram lamb, however, his lordship was beaten by a local farmer, Mr. R. H. Milner, of Mowbrick, near Lancaster. The silver cup for the best Hardwick ram was secured by Mr. James Todd, of Rougholme, Cumberland; and for the best Longhorn silver cup was awarded to Mr. David Hagk, Clitheroe.

### Pigs.

There was an exceedingly fine show of pigs, in fact, the section was admittedly a marked feature of the year's exhibition. Probably the best class was that for Large White boars, which included some of the finest animals in the kingdom. Sows were also strong, and there were among them Royal Show winners. The principal prize takers for Large and Middle Whites were Sir Gilbert Greenall and Messrs. Sanders Spencer and Sons, the first-named taking no fewer than 18 first, second, and third prizes; whilst Messrs. Sanders Spencer took two firsts, one second, and two thirds. There was keen competition in the young pig classes, especially of Middle Whites, and it was made evident that Lancashire farmers are giving more and more attention to this class of exhibit. In Berkshires, Mr. G. F. Inman, of Henley-on-Thames, was the chief winner, he taking three firsts, two seconds, and one third, as well as the British Berkshire Pig Society's special—this being secured with Highmore Mikado. Mr. R. Abbottson swept the board in the Tamworth section, winning all the first prizes, and, in addition, three seconds, two thirds, and the special award; whilst for large blacks, which were well represented, Mr. K. M. Clark and Mr. R. R. Rothwell shared.

After paying interest to customers and all charges, making provision for bad and doubtful debts, and allowing £23,715 0s. 8d. for rebate on bill not due, the net profits of the London and County Banking Company for the half year ending June 31 amount to £294,017 8s. 7d. From this sum have been deducted £25,000 transferred to premises account, and £50,000 carried to reserve fund (raising it to £1,500,000), leaving £219,017 8s. 7d., which, with £73,317 14s. 3d. balance brought forward from last account, leaves available the sum of £292,335 2s. 14d. The directors have declared a dividend for the half-year of 10 per cent., which will require £290,000, leaving the sum of £97,335 2s. 14d. to be carried to the profit and loss new account. The dividend, £2 per share, free of income tax, will be payable at the head office, or at any of the branches, on or after Monday, August 13.

## SHEEP SALES AND FAIRS.

## The Marham Hall Cotswolds.

The fifty-third annual letting of pedigree Cotswold rams, belonging to Messrs. J. Brown and Sons, took place at Marham Hall Farm, Downham Market, in perfect weather, and attracted a company of considerably over 200 of the best known West Norfolk farmers and flockmasters. Mr. H. Salter, of Messrs. Salter, Simpson and Sons, conducted the letting, submitting in all a total of 200 rams, 120 lamb rams, and 80 shearlings. As in previous years, the splendid condition of the sheep on offer excited general complimentary remarks, and satisfactory prices were realised, the ram lambs averaging £8 6s. 3d., as compared with last year's average of £7 15s., whilst shearlings sold at an average per head of £9 8s. 8d., last year's figure being £9 13s.

## Airesford.

There was a large supply of sheep and lambs, as well as a great many finely-bred ram lambs at Airesford Fair, and there was a very large attendance of farmers, dealers, and others. The continued drought had considerable effect, without doubt, on the trade, and there was not that improvement which might have been confidently expected had a fall of rain occurred to improve the prospects of feed. As it was, the prices realised at Overton Fair were generally maintained, although the demand were hardly as brisk. This applies equally both to the auctions and to the open fair.

Messrs. Waters and Rawlence, of Salisbury, had the letting and selling of the annual draft of ram lambs from the Long Sutton House flock of Hampshire Downs, owned by Mr. J. A. K. Falconer. The catalogue comprised sixty lambs, four for letting and fifty-six for sale, and fifty-five of these were disposed of, at an average of £8 4s. 6d. a head, the best being let and hired at 17 guineas, 15 guineas, and 14 guineas respectively. The chief prices for the selling lambs were 19 guineas, 13½ guineas, 12½ guineas, 11½ guineas, two at 10½ guineas, and one 10 guineas, others fetching from 9½ guineas to 4½ guineas. On the whole an excellent sale was effected, at rather better prices than was the case last year.

Messrs. Waters and Rawlence had also entrusted to them, for the first time, a draft of twenty-six ram lambs and one shearing ram from the registered Swanmore House flock of Hampshire Down sheep, owned by Mr. W. H. Myers. The rams were all by sires from the celebrated Chilmark Flock, and, for a first draft, attracted a good deal of notice. For the whole twenty-seven lots were disposed of, at prices ranging from 5 to 9 guineas, and working out at an average of 6 guineas each.

Messrs. J. Harris & Son, of Winchester disposed of the annual draft of ram lambs from the flock of Mr. Donald Nicoll, of Burntwood, and succeeded in disposing of the whole of the thirty-six lots at good prices. The rams were knocked down at bids ranging from 3½ to 10½ guineas. Two lambs made the last-named figure, one 9 guineas, one 8 guineas, one 7½ guineas, four 6½ guineas, one 6 guineas, one 5½ guineas, five 5 guineas, three 4½ guineas, eleven 4 guineas, and four 3½ guineas.

Messrs. Harris also disposed of over 10,000 ewes and lambs from various flocks at the following prices:—Ewes: Grazing, 27s. to 34s. 6d.; wethers, 35s. to 41s.; draft, 34s. to 55s. 6d.; mixed, 35s. 6d. to 46s.; two-tooth, 44s. to 55s.; four-tooth, 49s. 6d. to 55s. 6d.; six-tooth, 44s. to 51s.; fat ewes, 45s. Lambs: Wethers, 28s. to 51s. 6d.; ewes, 32s. 6d. to 40s.; mixed, 17s. 6d. to 39s.; and fat lambs to 49s. 6d.

Messrs. Hall, Pain, and Goldsmith, of Petersfield, conducted the annual sale of ram lambs from Mr. James Goldsmith's Blendworth flock of Hampshire Downs, and succeeded in effecting a complete clearance at prices ranging from 4 to 18 guineas. Two lambs made the top price, 18 guineas, another fetched 16 guineas, three 14 guineas, two 13 guineas, and three 12 guineas.

## Ailford.

At the Ailford Lamb Fair on Tuesday there was an increase in the number of lads penned, and a fairly good trade was experienced. Prizes offered by the Ailford Bull Fair Committee were won as follows:—For occupiers of under eighty acres—Mr. W. J. Humphreys, Ailford. For occupiers of between eighty and 150 acres—Mr. T. J. Parker, Markby. Open—Messrs. J. Ranby and Son, Bilsby. The lambs in the winning pen in the open class realised the top price of the fair, 41s. 6d. per head. Other prices and sales were:—Mr. Robinson, Bilsby, 36s. 6d. and 37s.; Mr. Kelk, Woodthorpe, 37s. and 36s. 6d.; Mr. Parker, Moorhorpe, 36s.; Mr. E. Simons, Willoughby, 32s. 6d.; Mr. Hildred Willoughby, 31s. 6d.; Mr. G. Shipley, Ayls, 31s.; Mr. E. A. Young, Ailford, 30s.; Mr. W. J. Humphreys, Ailford, 34s.

## Ipswich.

The annual two day sale of Suffolk sheep held at Ipswich by Messrs. Hart, Bond and Sons took place in Gippeswyck Park last week. The first day (Wednesday) was, as usual, devoted to the disposal of ewes, of which there was a splendid entry both in number and quality. There was a brisk demand, and good prices realised, there being an improvement in this respect upon last year of 5s. or 8s. per head. Mr. John Cracknell, Wickham Market, sent a splendid lot of shearing ewes, Mr. S. R. Sherwood giving the top price of the day, viz., £46 for ten; another ten went to Mr. C. F. Mannier at 56s., and fifteen to Mr. Kenneth M. Clark at 78s., the forty-five averaging 90s. 10d. The highest priced pen last year was Mr. Herbert Smith's—82s. 4d.

On Thursday about 300 rams from various and well-known flocks came under the hammer, and the upward tendency which characterised the disposal of the ewes was again apparent, as the following details of the sheep sales will show:—Mr. M. G. Hale consigned fifteen, the highest prices paid being for five ram lambs by Claydon Cheveley 2nd. One sold for £16, three at £14, and one at £13, the fifteen averaging £19 8s. 8d., as against £7 7s. for the same number last year. Mr. J. W. Eagle sent thirty-six ram lambs from his flock at Walton-on-Naze, a choice lamb by Walton Burton 3rd, making 29 guineas, one by Beaumont Lion 18 guineas, and others 16 (twice) and 17 guineas, the thirty-six averaging £10 11s. 9d., against £9 12s. 6d. for the same number last year. Mr. S. R. Sherwood had a consignment of twenty-seven ram lambs, four by Playford Model 3rd going at 25 guineas, 20 guineas, 24 guineas, and 15 guineas, and the same number by Playford Model 5th, 25 guineas, 20 guineas, and 15 guineas (twice). Moreover, a prize-winning lamb by Playford Model 4th, was secured by Mr. D. Price Powell, Radwinter, at 28 guineas, while another by Playford Model 5th fetched 21 guineas, and a grand lamb by Playford Sibton 34 guineas, to Messrs. Webb and Sons, Combs. The twenty-seven averaged £17 9s. 7d., against £12 4s. 8d. for twenty-three last year. Mr. D. Abbott Green's consignment of eighteen made the satisfactory average of £18 8s., against an average last year of £12 0s. 3d., the top price being 41 guineas, given by Mr. C. S. Wentworth-Reeve for a lamb by Grange Persimmon 9th, Mr. Lomas, Herringeswell, gave 28 guineas for the ram lamb by Ringinghoe Grange 1st, Mr. Henry Dunn (for the Marquess of Bristol) gave 25 guineas for another by the same sire, while Mr. A. Smith purchased one at 26 guineas. Mr. Thomas Keeble sent eighteen ram lambs, one by Bentley Bugler, being purchased by Mr. Cattle for Mr. Walter Greene, at 25 guineas. Mr. H. Lilley, Clacton, secured another at 23 guineas, Colonel Groome, Stiffkey, one at 25 guineas, Sir E. Walter Greene one at 22 guineas, and Mr. Giles another at 22 guineas. Mr. J. R. Keeble, Bramham Hall, sent nine ram lambs, which averaged £10 8s. 10d., the same number last year averaging £10 4s. 2d.

Mr. Herbert E. Smith, Walton Grange, was, as usual, one of the largest consignors. A nice ram lamb by Grange Bismarek 6th—in the first prize pen at the Royal Show—was purchased by Mr. W. F. Paul, Kirtton Lodge, at 36 guineas, and Mr. A. Charles, Leicestershire, gave 31 guineas for a lamb by Grange Earl 14th, also in the first prize pen at the Royal. Mr. Clement C. Smith, Trimley, paid 29 guineas for one by Grange Bismarek 8th, and 30 guineas for another by Grange Persimmon 10th; Mr. Walters a like sum for one by Grange Bismarek 6th; twenty-four making the good average of £16 10s. 9d., against an average of twenty last year of £16 18s. 1d. Mr. Thomas Goodchild, Great Yeldham Hall, sent nine, which averaged £11 18s. against an average for five last year of £5 19s. 8d. One of Thursday's consignments, a ram lamb by Gunhoe, was purchased by Mr. Rowbottom for the Hon. A. E. Fellowes, at 18 guineas. Mr. Arthur H. Stanton, Beaumont Hall, had a nice lot of nine which averaged £13 13s. 8d., against £8 8s. for the same number last year; one lamb, by Dedham Premier 2nd, going on this occasion to Mr. Wentworth-Reeve at 25 guineas, and another to Mr. J. H. Dawson at 23 guineas. Mr. Clement C. Smith, Trimley, sent seven ram lambs, which averaged £12, against an average of £5 14s. 2d. for five last year.

## Dryfield.

Several lots of gimmer shearlings of the Leicester type for breeding purposes, were sold at Dryfield Cattle Market on Wednesday. Messrs. F. Cook and Sons sold four pens from Mr. Featherstone, of Langtoft, which made 49s. to 50s., two pens from Mr. Harrison's flock at Broachdale

realised 51s. 6d., and 40 from Mr. F. Cook's Nab Farm, Fimber, made 48s. to 49s. 6d. each. Messrs. Horby and Wilberfoss sold consignments of gimmer shearlings from Mr. A. B. Borton, Garton-on-the-Wolds, at 49s. to 50s. 6d., and a lot from Mr. T. Kay, of Garton, made up to 54s. each.

#### Tiverton.

The annual sale of Devon long-woolled rams, the property of well-known breeders in the Tiverton district, was held in the Tiverton show field on Tuesday, and attracted a big company of buyers. Mr. R. Cook, of Chevithorne Barton, Tiverton, sold 22 rams at an average price of £16 16s. One fine animal was knocked down to Mr. Skinner, of Bishop's Lydeard, for 35 guineas, and another to Mr. E. Chave, of Widhaye, Tiverton, for 36 guineas. Mr. Thorne, of Williton, was a purchaser at 27 guineas. Mr. Hawkins, of Honiton Clay, 22 guineas, and Mr. Hartley, of Ottery St. Mary, at the same figure. Of Mr. J. G. Pedler's 18 rams the best price was 20 guineas. Mr. Beedell, of Newton St. Cyres, being the purchaser. Mr. R. Fowler sold 7 rams, top price, 8 guineas; Mr. R. Pearce disposed of 16, making from 5½ to 12½ guineas; Messrs H. and W. Sprague sold four at from 6½ to 11 guineas; and Mr. J. Rowell four at from 5½ to 8 guineas.

#### Weyhill.

About 9,000 sheep and lambs were penned at Weyhill Sheep Fair, which is a most popular one in the South, and, as usual, was largely attended. Most of the animals were sold by auctioneers. Messrs. Waters and Rawlence, of Salisbury, held as usual a series of important ram sales, including consignments from the well-known Hampshire Down flocks belonging to Mr. H. C. Stephens Marquis of Winchester, and Mr. F. A. Holman.

From Mr. Stephens's flock six lambs were let at an average of £26 15s., Lord Rothschild taking one at 55 guineas, Mr. Dikken one at 42 guineas, and Mr. T. F. Buxton another at 26 guineas. Of the selling lambs, Mr. Rand (for Sir G. Cooper) bought at 3½ guineas and 26 guineas, Mr. Vernon at 21 guineas, Mr. Emseus (Germany) at 16 guineas, 15 guineas, and 13 guineas, others going at prices up to 13 guineas. The average of the forty-five let and sold worked out at £13 1s. per head.

Sixty-five ram lambs were let or sold for the Marquis of Winchester at an average of £8 4s., the best prices for letting being 34 guineas (Mr. Flower) and 16 guineas (Mr. Carefoles), the others going at from 10 guineas downwards, whilst the chief sales were ones at 26 guineas, bought by Mr. T. Lavington, and another at 20 guineas, Mr. Goldsmith. Mr. F. A. Holman had a choice selection of ram lambs from his Dunley Manor flock, and for four lambs let got the fine average of £28 17s. 6d., Lord Rothschild hiring No. 1 at 50 guineas, Mr. Harding (for Sir W. G. Pearce) No. 2 at 12 guineas, Mr. Drake No. 3 at 38 guineas, and Mr. Bragg No. 4 at 10 guineas. Of the sale lambs Mr. C. Coles bought at 50 guineas, Mr. E. A. Elney at 20 guineas and 14 guineas, Mr. Goldsmith at 17 guineas, and others at prices up to 13 guineas, the average of forty-three let and sold being £11 2s.

Other auctioneers also held sales at which the general range of prices was as follows:—Rams, 30s. to 72s.; two-tooth ewes from 35s. to 55s.; fat ewes, 37s. 6d.; six-tooth ewes, 44s. 6d. to 47s.; wether lambs, 34s. 6d. to 40s.; mixed lambs, 23s. 6d. to 35s. 6d.; chivver lambs, 33s. 6d. to 37s.; ewes (mixed ages), 34s.; draft ewes, 28s. to 44s.; grazing ewes, 27s. to 37s. 6d.

# Review of the British Corn Trade

PURING THE PAST WEEK

*Written exclusively for the Mark Lane Express.*

The wheat harvest has been proceeding in southern England under very favourable conditions, and, except on the hot chalk lands, is a good yield. In East Anglia the beginning of wheat cutting is fixed, as a rule, for to-day (Monday) and in Yorkshire for a week hence. In the West of England harvest is decidedly late.

The last reports to hand indicate very good promise in Hereford and all along the Welsh border. There are also some extremely encouraging reports from Yorkshire, Durham, Northumberland, and the Lothians. Barley has improved very noticeably during the past fortnight, and should give very good results in such important counties as Suffolk, Cambridge, Gloucester, Wilts, and Somerset. Oats need rain, but have been refreshed by passing thunderstorms in many districts. Beans are on the whole a good crop this year, especially in Cambridge, Huntingdon, Oxford, Dorset, and Lancashire. In Cheshire, however, they are oddly disappointing. But they always are a capricious crop. Potatoes promise a fair average yield, and so do roots, but of these crops it is as yet too early to speak with any confidence. Hops, of course, are the great disappointment of the year.

The American Bureau report of the 11th was issued too late in the week to influence its trade, but on the whole it is against sellers both of wheat and maize, and we must be prepared for American bearing the market for a while. That American influences will persist on the side of the buyer we do not anticipate, but the first rush of new wheat deliveries may force the hands of holders. As to maize, its improved aspect as a growing crop makes holders of old corn more ready to sell than they were in July, but the American is not the master of this trade as he used to be. Buenos Aires has a greater voice in determining value than New York, and so long as Argentina ships over a million quarters of maize monthly, the United States will find it difficult to get more than a half-penny per lb. for Indian corn. This is bedrock value, and, naturally, the wealthy operators of the States resist. American oats are reckoned a small crop this year; 828 bushels where 908 bushels were grown last year. On the other hand, it is estimated that 710 bushels of the old crop are in hand, where, at this time last year, only 620 bushels were in reserve. Barley is now said to be over an average crop.

The total wheat crop of the United States now stands, according to the latest estimate, as follows:—

|                    |                      |
|--------------------|----------------------|
| Winter wheat ..... | 493,434,000 bushels. |
| Spring wheat ..... | 278,830,000 bushels. |
| Total .....        | 772,264,000 bushels. |

The crops of recent years have been as follows:—

|            |                      |
|------------|----------------------|
| 1905 ..... | 692,980,000 bushels. |
| 1904 ..... | 553,000,000 "        |
| 1903 ..... | 637,800,000 "        |
| 1902 ..... | 670,063,000 "        |
| 1901 ..... | 748,469,000 "        |

Thus the surplus promised for export in 1906-7 is a good deal larger than had been anticipated.

The maize crop is thus estimated:—

|                     |                        |
|---------------------|------------------------|
| 1906 estimate ..... | 2,713,000,000 bushels. |
| 1905 return .....   | 2,708,000,000 "        |
| 1904 .....          | 2,467,000,000 "        |
| 1903 .....          | 2,244,000,000 "        |
| 1902 .....          | 2,523,000,000 "        |
| 1901 .....          | 1,522,519,000 "        |

The promise of the growing potatoes in America is a little above the average, 890 bushels being expected, where 863 is the average on a specific area. The buckwheat crop is a short one this year in America.

Prices since the resumption of business on the 7th have not been favourable to holders of grain at the British markets. There has been 6d per qr. decline in foreign wheat almost everywhere, and 1s. fall has been sometimes admitted in Blue Stem, Walla Walla, White Kurachee, and American Red Winter, the only sale of foreign wheats which are firmly held are fine Manitoba and Canadian high quality, Russian Winter, and the best Australian. The Argentine wheat on spot is offered at low prices, but this branch of the market is hardening a little for futures. The maize market is depressed, as we have seen by reason of the Argentine shipments. Russian barley is scarce on spot, but demand is small, and prices are not altered. New Tasmanian barley is offered at an attractively low price. For cheap Russian oats there is next to no inquiry, and prices are 3d. lower from the very reduced quotations ruling before the Bank Holiday. Canary seed is wonderfully cheap, and becomes almost worth consideration as pulse where small but extremely concentrated and nutritious grain is applicable. The flour markets are 6d. per sack lower in the week in the provinces which had not previously admitted the decline that took place in London just before the holidays.

The sales of British wheat this season have been good, and the price has been somewhat lowered by the presence of samples on sale.

This season .....

2,899,000 qr. at 28s. 9d. per qr.  
Last .....

1,618,000 " 30s. 9d. "  
The sales of British barley have been a full average, but the price has been 9d. under the mean.

This season .....

3,199,000 qr. at 24s. 3d. per qr.  
Last .....

3,133,000 " 24s. 8d. "  
The sales of British oats have been remarkably small, and buyers having but few samples to choose from, have had to pay substantially higher prices.

inferior cargo, 70s to 80s per ton. Best mixtures, 87s 6d to 90s per ton; good mixtures, 75s to 85s per ton; seconds mixtures, 60s to 70s per ton; wheat straw, 26s per load; oat straw, 26s per load; barley straw, 27s per load, all ex rail London. Foreign: Canadian mixtures, 77s per ton; good Dutch hay, 65s per ton; Algerian hay, 62s 6d to 65s per ton. French 1st and 2nd cut clover, 75s to 80s per ton; large bala wheat straw, 34s 6d per ton; small bala wheat and straw, 41s per ton. These prices are by barge delivered alongside London Thames Wharf.

## THE BALTIC.

Wheat cargoes have been receding a little in value since the 7th, and on the 11th averaged 6d. lower from the 2nd. The prices accepted included Azima best, 31s. 6d. per 492 lb.; Odessa Glurka, 30s. per 492 lb.; Red Taganrog, 28s. 6d. per 492 lb.; Victorian, 30s. 9d. per 480 lb.; Rosario, 29s. 3d. per 480 lb.; Red Winter, 28s. 3d. per 480 lb.; Hard Winter, 28s. per 480 lb.; Roumanian, 28s. 9d. per 492 lb.; and Bulgarian, 28s. 3d. per 492 lb.

Maize cargoes have declined 3d. since the beginning of August. On Saturday 20s. per 480 lb. was accepted for Argentine and 21s. 3d. for Odessa.

## VETERINARY PREPARATIONS,

and Small Articles of a Portable Character, will readily when brought regularly before the readers of the "Mark Lane Express."

This season .....

909,000 qr. at 18s. 6d. per qr.  
Last .....

1,135,000 " 17s. 1d. "  
Imports of the United Kingdom last week were as follows:—

Wheat, 595,000 qr.; a very large supply.  
Flour, 112,800 sks.; a fair supply.

Barley, 76,000 qr.; less than usual.

Oats, 129,000 qr.; a good supply.

Maize, 237,000 qr.; large arrivals.

Imports of breadstuffs since harvest have been as follows:—

Wheat .....

20,517,000 qr.  
Flour .....

4,453,000 "  
Breadstuffs .....

24,970,000 qr.  
Last season .....

26,500,000 qr.  
The supplies of wheat on passage are now as follows:—

Californian, 250,000 qr.; American, 270,000 qr.; Russian, 100,000 qr.; Indian, 870,000 qr.; Argentine, 390,000 qr.; Australian, 440,000 qr.; various, 25,000 qr.; total, 2,345,000 qr.

The quantity of flour on passage has increased to 193,000 sacks, but is still much below the mean. Of barley only 180,000 qr. (of which 80,000 are Russian) are on passage, but 475,000 qr. of oats and 1,205,000 qr. of maize are much above average expectations. The maize is thus divided:—Argentine, 1,020,000 qr.; American, 85,000 qr.; Russian, 100,000 qr.; total, 1,205,000 qr.

The Russian includes Roumanian and Bulgarian. The supplies of other staples on passage include 129,000 qr. of linseed, 22,000 qr. of rapeseed, 24,000 tons of cottonseed, 10,000 qr. of beans, 15,000 qr. of peas, and 20,000 tons of rice.

America last week sent off a somewhat larger supply of wheat, 200,000 qr. of the new winter wheat crop leaving for European ports, including the United Kingdom. Other American shipments were:—Barley, 10,000 qr.; oats, 5,000 qr.; maize, 85,000 qr.; and flour, 110,000 sacks.

Argentina continues to be the chief shipper of maize, last week's figures being: Wheat, 123,000 qr.; maize, 323,000 qr.; and linseed, 45,000 qr.

Russia seems to have a prodigious store of old oats, last week's shipments being 522,000 qr. Other shipments were 131,000 qr. of wheat, 220,000 qr. of barley, and 3,000 qr. of maize. Roumania added 66,000 qr. of wheat, 40,000 qr. of barley, and 100,000 qr. of maize.

The shipments of wheat from India were again nearly all from Kurachee. The total was 205,000 qr.—viz., Kurachee 201,000 qr., Bombay 4,000 qr., and Calcutta 27. Linseed shipments were 6,000 qr. only. Australian shipments dropped last week to 8,000 qr. of wheat. The only other shipment of importance last week was 30,000 qr. of barley from Asia Minor, being New Smyrna, Ouehah Phrygian, and Sea of Marmora grain.

Barley cargoes have been neglected as a rule, but a cargo of Californian for October shipment was sold on Friday for 25s. 9d. per 48 lb. and one of Russian, also for October shipment, for 18s. per 400 lb.

Other cargo sales have included Smyrna beans at 30s. 6d. per 480 lb., Volodga oats at 15s. 6d. per 304 lb., white Calcutta peas at 33s. per 504 lb., and Calcutta linseed at 41s. 9d. per 400 lb.

The London Corn Trade Association c. f. i. quotations for the settlement of rejections and difference in weight on wheat under Letter No. 4 of the Association East Indian Wheat Contracts are as follows, viz.:—*via* Canal.

Crop 1906.—Choice white Karachi 20s., soft red Karachi, 28s. 6d. These prices will remain in force until fresh quotations are officially issued.

The arrivals of grain and seed-laden vessels at ports of call for the week were 1 wheat, 1 Tasmanian. The sailings of grain and seed-laden vessels from ports-of-call for the week were 11 wheat (3 Birkenhead, 3 Cardiff, 1 Dublin, 1 Dunkirk, 1 Hull, 2 Limerick, 1 Plymouth, 1 Swansea, and 1 Waterford).

Since January 1, 1906, the total arrivals have been 200 wheat, 2 barley and wheat, 1 barley, 3 maize, 1 locust beans, and 23 linseed; total, 247.

Last year during the same time the arrivals were 253 wheat, 2 wheat and oats, 1 flour and wheat, 13 barley and wheat, 1 wheat and linseed, 2 flour, 8 barley, 3 maize, 1 beans, 4 locust beans, and 43 linseed; total, 333.

## LONDON HAY TRADE.

Saturday.—There were much larger supplies along at earlier part of week, and with a holiday feeling in evidence trade was of a very quiet description; during the last two days, however, a much better demand has sprung up, and the trading finishes up very steady at last week's full prices. Deliveries of old crop are getting down to a very low level, and old hay is a very firm trade; old clovers and mixtures also find a ready sale at top prices. The value of new stuff is gradually creeping up to that of old, and present differences in prices of best hays are about 5s. to 7s. 6d. per ton, and on best clovers and mixtures 10s. per ton. In fact, some users are already preferring new to old; although this season's crop in the south is a poor one as regards quantity, it has been mostly saved in splendid condition, and of first-class quality.

The straw trade has been very bad this week; excessive supplies have come along, and prices have had to be reduced 1s. to 2s. per load in order to effect sales. In the foreign market there has hardly been so much doing; large deliveries have come along, but mostly against old purchases. Canadian mixture is a slow trade 14th prices slightly easier, while other qualities are quiet at about last week's currencies.

Prices ruling are about as follows:—English old crop best meadow hay, 80s to 82s 6d per ton; good meadow hay, 72s 6d to 77s 6d per ton; inferior, 60s to 67s 6d per ton. Best clovers, 92s 6d per ton. Good clovers, 80s to 90s per ton;

# CORN MARKETS.

## LONDON.

**Mark Lane, Wednesday.**—English wheat firm, quiet. Reds quoted at 30s 6d, 33s 6d; whites, 31s, 34s. Foreign steady, about unchanged prices. South Russian, ex ship, quoted at 29s 9d to 30s 3d; landed at 30s 6d, 33s 6d; No. 1 Northern Manitoba at 31s 6d, No. 2 at 31s, No. 3 at 30s 6d; choice white Karachi at 29s; soft red Karachi as 28s 6d, all ex ship, to arrive. Flour dull, unchanged. Maize quiet, unchanged. Mixed American, ex ship, quoted at 21s 9d, landed at 22s 6d; River Plate, ex ship, at 20s 6d, 20s 9d; landed at 21s 3d. Barley firm, but quiet; supplies small. Odessa-Nicolaieff, ex ship, quoted at 18s 9d; landed at 19s. 3d. American landed at 19s 3d. Oats dull, with an easier tendency. Russians quoted at 15s 3d to 15s 9d; American at 16s 6d to 17s.

**Mark Lane, Friday.**—Wheat, English, steady, quiet. Foreign in poor request at 3d decline. South Russians quoted at 29s 6d to 33s, ex ship, 30s 3d to 33s, ex store; Persians at 31s to 32s 6d; Plata at 31s to 32s, landed; No. 1 Northern Manitoba at 31s 6d, No. 2 at 31s, No. 3 at 30s 6d, all ex ship to arrive. Flour dull and unchanged. Minnesota patents were quoted at 24s 6d; bakers at 19s 6d to 20s; Iron Dukes, ex ship, at 19s 6d; landed, at 20s. Maize dull, easier tendency; mixed American, landed, quoted at 22s 6d; River Plate, ex ship, at 20s 6d to 20s 9d; landed, at 21s 3d. Barley, firm but quiet; Odessa-Nicolaieff, ex ship, quoted at 18s 9d to 19s; landed, at 19s 6d. Oats slow and lower to sell; Russians quoted at 15s 3d to 15s 9d; Americans at 17s to 17s 6d.

## COUNTRY.

**Ashford, Tuesday.**—Attendance small; little trade done. New black winter oats were on offer and quoted at 20s to 21s, while 31s was asked for new sample of grey peas; wheat, 32s to 34s; English feeding barley, 26s to 28s; foreign grinding barley, 21s to 23s; Magazan beans, 32s to 34s; English white oats, 22s to 24s; black, 20s to 23s.

**Banbury, Thursday.**—Wheat, white (old) 30s. to 32s. per qr.; red (old), 31s to 32s per qr.; barley (old), 28s to 30s per qr.; beans (old), 33s to 34s per qr.; oats (old), 21s to 26s per qr.; peas, 30s to 32s per qr.; peas (old), 30s to 32s per qr.

**Berwick, Saturday.**—The corn market was similar to that of last week, with no samples of grain on offer.

**Birmingham, Thursday.**—There was only a small attendance at this market, and business was very quiet. Foreign wheats were about 3d per qr lower, with a slow demand. River Plate maize was 3d per qr down, and flat 9d. Grinding barley was offered at 19s per 400 lb at Sharpness, being 3d easier on the week. There were several samples of new black winter oats, which made from 18s to 18s 6d per 312 lb delivered; one sample of new white oats, for which 20s per qr was asked. For old white oats 22s to 22s 6d was required. Beans 13s 3d to 13s 6d per 196 lb.

**Brighton, Thursday.**—Slow trade and very small attendance. A very samples of new corn were shown. New white wheat, 30s. to 31s.; old white ditto, 33s. to 34s.; old red ditto, 33s. to 34s.; barley, 28s to 33s; grinding ditto, 22s to 24s; old oats, English 19s to 22s; new black winter oats, 19s to 20s; beans, 32s to 33s.

**Bristol, Thursday.**—There was a small attendance on our market to-day. English wheat, no samples offering yet. Foreign wheat unchanged. Maize and oats unaltered. Barley, the turn lower. Flour firm, but doing little. —GRACE BROTHERS.

**Bury St. Edmund's, Wednesday.**—Wheat: Old corn was hardly offered, and nominally unchanged. One or two samples of new were on the market, and some business was done at 30s 6d to 31s per qr, but there is hardly sufficient business doing at present to quote values. The quality of the new crop is undoubtedly very fine. As to the yield, we can hardly speak with authority at present. For feeding corns the market was dull, with new oats offered lower. Maize was the turn lower at 22s 3d per qr delivered for round Argentine.

**Canterbury, Saturday.**—New corn more plentiful, but prices have not yet settled down. Black winter oats of seed quality, and scaling 41 lb, sold at 20s, and white oats of 42 lb at 19s. New grey peas were offered at from 30s to 31s, but buyers were difficult to find at the latter price. Some 64 lb new wheats were held for 31s 6d, but others changed hands at 31s.

**Chester, Saturday.**—There was an absence of samples of English grain, the values of which remain unaltered. The dry weather has increased the demand for feeding stuffs, and late rates are

fully maintained. Quotations:—Wheat, white and red, 4s 7d to 4s 9d per 75 lb; barley, grinding, old, 3s 6d to 4s per 64 lb; beans, new, 5s 6d to 5s 9d; old, 6s 3d to 6s 6d per 80 lb; oats, old, 3s 2d to 3s 4d per 46 lb; Indian corn, new, 12s to 12s 6d; old, 12s 6d to 12s 9d per 240 lb; River Plate, new, 12s to 12s 6d per 240 lb.

**Colchester, Saturday.**—Fair attendance, old crop exhausted. New grain of all kinds offered. Wheat, 29s to 30s; oats, 17s to 18s; peas, 29s; rye, 21s. —JOSEPH WILES AND SON, LTD.

**Coventry, Friday.**—A small attendance. Very few lots of wheat were on offer, and prices were nominally unchanged. New oats were shown of very good condition and quality. Beans firm at late rates. Quotations: Wheat, 12s to 12s 9d per 186 lb; barley, 29s to 34s per 44s lb; oats, 25s to 26d per 35s lb; peas, 12s to 14s per 196 lb; beans, 12s 9d to 13s.

**Derby, Friday.**—Very little corn on offer, and prices continued firm at late rates. Quotations: White wheat, 32s to 34s; red, 31s to 32s; old beans, 34s to 35s; oats, 22s to 24s.

**Dublin, Friday.**—There was a fair attendance. No Irish wheat or barley. Oats slow; new samples increasing, but no material business. Flour in quiet demand. Oatmeal firm. Quotations:—Oats, 12s 3d to 13s 9d; oatmeal, extra pinhead, 12s 6d to 14s 6d; flour, 10s to 11s 6d; pearl and bran, 6s to 6s 6d.

**Doncaster, Saturday.**—Scarcely any English wheat showing, and not much demand. Prices from 11s 6d to 12s per load. Foreign wheat quiet at last week's rates. A few samples of new wheat from Cambridgeshire were shown, but the carriage rates made business prohibitive. Some new oats were shown in excellent condition, prices being from 17s 6d to 18s per qr. Old oats were a shade dearer, but maize and beans made previous rates.

**Dorchester, Saturday.**—Only a very small attendance at to day's corn market and an equally limited offer of corn, wheat as well as most other articles being almost, if not quite, exhausted. The little foreign wheat on the market met a quiet sale at 3d to 6d per qr less. Grinding barley brings late values. Prices of feeding stuffs remain nominal, with scarcely any demand. The harvest is now general all over Dorset, and great progress is being made with the stacking of the corn, which, so far, has been got together in excellent condition, whilst the crops are turning out far better than had even been anticipated. A few new samples of new winter barley, oats and rye were shown to-day.

**Glasgow, Friday.**—The market to-day is very quiet for everything, and no change has to be noted. Millers are holding off from buying wheat, while importers who have bought American flour are finding that bakers will not operate, as they hope to secure their requirements on easier terms. Mixed American maize is quoted at 13s 3d and Plate ditto at 12s 4½d per 280 lb. Feeding stuffs dull.

**Glasgow, Wednesday.**—There was the usual attendance at our corn exchange to-day. Wheat firm, and flour, if anything, in buyers' favour. Indian corn 3d dearer on the week, while maize is 1½d easier. Beans and peas unchanged. Other articles of the trade quiet at nominally unchanged prices. —GIBSON AND CLARK.

**Gloucester, Saturday.**—No English wheat on offer. Foreign wheat unchanged to 3d cheaper; River Plates, 30s 6d to 31s 6d; Russians, 30s 6d to 32s. River Plate maize unchanged, at 20s 9d to 21s; flat maize unchanged, at 22s; Bessarabian unchanged, at 21s 6d per qr.

**Grantham, Saturday.**—The attendance was small, farmers being busy with the harvest, and practically no new corn was offered. The frequent showers during the recent week have hindered the progress of harvest operations, but, given fine weather, the bulk of the corn should be in sheaves during the coming week.

**Hereford, Wednesday.**—There was a small attendance, farmers being mostly engaged in harvesting operations. Some new samples of winter-grown oats were shown in excellent condition, and these changed hands. Wheats and barleys remained unchanged. Wholesale quotations:—Wheat, 3s 9d to 3s 10d per 62 lb.; barley, 3s to 4s per 56 lb.; oats, 2s 6d to 3s per 40 lb.; beans, 4s to 4s 3d per 65 lb.; maize, 3s to 3s 3d per 60 lb.

**Ipswich, Tuesday.**—Old wheat was nominally unchanged, at about 32s per qr. From samples shown, the new crop looks like being very fine in quality. A few samples changed hands in really fine condition, threshed out straight from the field, and sold at about 31s per 504 lb delivered at Ipswich. Oats unchanged on the week; some new maize were sold at 25s to 26s per comb, and a sample of new rye at 1s 9d per comb on the line. Maize unchanged; round at 21s 6d per qr. Other feeding corns unaltered. Linseed cakes and milling stuffs all very firm on the week.

**Leeds, Friday.**—To supply the wants of local buyers whose stocks had run short owing to the

closing of the Corn Exchange on Tuesday several leading offices were reopened, and fair orders were placed for both English and foreign wheats. Prices of beans, peas, oats, and flour were at late values. **Lincoln, Friday.**—Small attendance, and trade very quiet. No new samples of English wheat were shown, though harvest operations are in full swing in the district. Foreign wheats unaltered. Feeding stuffs dearer on the week.

**Liverpool, Friday.**—Wheat.—There has been a moderate attendance of millers at the market. Wheat, however, is quiet with prices generally 3d lower for all descriptions. Flour is quiet with only a small business passing in local and foreign milled at unchanged prices. Maize—Mixed is steady with a moderate trade at about last Tuesday's rates. Plate ready for delivery scarce, and a full 4½d dearer with a fair demand. European sorts quiet, unchanged. Barley—Malting is scarce and in sellers' favour. Feeding firm at 4d advance. Beans are very firm at full prices, with a small trade passing. Peas steady and the turn dearer. Oats are quiet and the turn lower with more offering. Oatmeal quiet, unchanged. Oil-cake is firmer owing to a better demand, but quotations are unaltered. —SEGAR AND TUNNICLIFFE.

**Maidstone, Thursday.**—Trade quiet to-day, as the hot weather produces indisposition to operate in corn. Some new wheat, but price hardly yet set, about 30s. to 32s.; but millers do not peak much yet. Barley is rather dearer, as foreign supplies are small and millers offer scarce; it is required for meal. The cost of oats about 3d per qr less than last week. No change in beans or peas, nor any alteration in bran, hemp, rye, serge, or millet.

**Manchester, Thursday.**—One or two lots of English new wheat were quoted at 30s on rails. Foreign easier, and in buyers' favour. Flour quiet and unchanged. Indian corn 4d to 4½d per cental dearer. Oats steady. New English peas in moderate supply, but the demand only small. Beans firm, and upward tendency. Bran, thirds, and other articles about 6d per load dearer.

**Newcastle-on-Tyne, Saturday.**—A very quiet demand prevailed at our to-day's market for wheats; prices in the favour of buyers. Maize steady at late rates. Peas and beans remain firm at last Saturday's quotations, demand, however, is not active. Fine quality of Scotch oats are held for fully last week's quotations; common sorts, however, are difficult to dispose of, even at a slight reduction; foreign steady at late rates. No barley offering. —J. POLLARD AND CO.

**Newport, Wednesday.**—Wheat unchanged on the week. Barley and maize unaltered. Flour, fine, 23s per sack.

**Northampton, Saturday.**—Small attendance and slow trade. No new corn on offer. Wheat, 31s to 32s; malting barley, 26s to 32s; white oats, 21s to 23s; black oats, 20s to 21s; beans, 31s to 32s; peas, 30s to 35s; flour, 24s 6d to 28s 6d.

**Nottingham, Saturday.**—The only sample of new English wheat offering was not in condition. Old about cleared. Foreign held for slight advance. Grinding barley steady at full rates. Old oats and beans but few offering and values well supported. The few samples of new oats were of fair quality and good condition. Prices irregular. —ROB. HUBBLE.

**Peterborough, Saturday.**—Weather has been chiefly fine this week, and harvest work is in full progress. An odd sample or two of new wheat, showing quality good, and which made from 28s to 29s per qr. A few new winter oats offering, for which there was a slow sale at a little less money, —THE HUNT AND SON.

**Preston, Saturday.**—Prices remain nominally unchanged in the absence of supplies of farmers' wheat and other grain. Quotations:—Wheat, white, new, per windle of 220 lb, 13s 9d to 14s 3d; ditto red, 13s 6d to 14s; oats, old, per bushel, 3s 3d to 3s 4d; beans, per windle of 220 lb, 16s 6d to 17s.

**Reading, Saturday.**—Attendance rather below the average, with business again somewhat disappointing. A small quantity of new wheat realised from 32s to 33s, whilst old was a trifle easier than last week. Grinding barley sold at 26s to 28s 6d, and the best price for new oats was 18s, and old 22s 6d.

**Retford, Saturday.**—There was only one sample of new wheat, rain having hindered thrashing operations. It was of good quality, and made 30s. Old wheat was scarce, and sold at 30s to 31s. A few lots of new winter oats changed hand at 17s to 18s; old wheat, to 24s per 24 stones; round maize, 24s to 25s per 34 stones. English beans dearer. Wheat is turning out well, and barley on ground is promising.

**Ripon, Thursday.**—Owing to the Yorkshire Show there was a poor attendance and scarcely any business passing. Prices:—Wheat, 30s to 31s; ditto, foreign, 32s to 35s 6d; barley, grinding, 23s 6d to 24s 6d; ditto malting, 27s to 29s;

# MARKET SUPPLEMENT.

iii

oats, 21s to 22s 6d; maize, round, 23s to 24s; ditto flat, 25s to 26s per qr.

**Stamford, Friday.**—Attendance restricted, many agriculturists being busy with the harvest. Trade was a little quieter. Samples of new wheat were offered for the first time, but were not of really good quality, and prices were fully 2s per qr less than at the opening of last season. Most of the samples bore traces of the recent rain. Best wheat commanded only 28s per qr, and farmers were unwilling to part at that figure. New winter oats were lower at 16s to 17s per qr. Peas scarce and dear.

**Stockton, Wednesday.**—There was no local wheat showing. Foreign wheat quiet and unchanged. Oats and maize also without alteration.

**Sunderland, Saturday.**—Little grain offering. Wheat quiet and unchanged. Barley and oats steady. Arrivals nil.—E. and F. RICHARDSON.

**Workshop, Wednesday.**—Small attendance, and very little wheat shown, but there were a few samples of new oats on the market. White wheat made from 31s to 32s; red ditto, 30s to 31s; barley, 23s to 28s; old white oats, 23s to 24s; new ditto, 19s to 21s; old black oats, 22s to 23s; new ditto, 18s 6d to 19s 6d; maize, 24s to 25s 6d; beans, 35s to 36s per qr; flour, 11s 1d to 14s 6d per stone; fine shurps, 5s 5s to 6s per ton; barley meal, 6s to 6s 5s per ton; bran, 5s 5s to 6s 5s per ton.

**Winchester, Saturday.**—Old English wheat practically exhausted. Foreign quiet. Barley and oats unaltered. Spot maize 3d cheaper. Flour steady at late rates.—FEAR, COLEBROOK AND CO., LTD.

**Wisbech, Saturday.**—Very little doing at market to-day. Prices unchanged. No new grain yet ready for market, weather being showery.—JAMES FLETCHER.

**Wolverhampton, Wednesday.**—There was a holiday attendance, and little business was transacted at practically last week's quotations.

**York, Saturday.**—Very little grain on offer, farmers being as busily engaged in harvesting as inclement weather will permit. Prices nominally unchanged. Fine white wheat, 31s to 32s; red and mixed, 30s to 31s per qr of 36 stone. Feeding barley, 24s to 26s per qr of 32 stone. Oats, white Tartary 19s to 20s; ditto, black, 20s to 21s. White Garton 21s to 22s per qr of 24 stone. Rye 24s; beans 32s to 33s per qr of 36 stone.

## FOREIGN.

**Hamburg, Saturday.**—The weather is rather unsettled here, and cool; this will hinder to secure the balance of our crop in perfect condition, and the colour of those barleys still in the fields will suffer, but the quantity cannot be large. Offers of Bohemians are increasing, and this description is sure to take the lead this season. It is of nice pale colour, and prices moderate, whilst all Hungarians are more or less yellow, and relatively dear.—FRANCIS M. TAYLOR.

**Hamburg, Saturday.**—The present rainy weather is endangering the outstanding crops. Rye is mostly secured, but much wheat, barley, and oats is still on the fields. A good amount of business has been done in new German wheat, and the demand continues, but owing to the rainy weather sellers have withdrawn from the market. For 61-62 lb Upland Aug.-Sept. delivery 28s 3d per 504 lb was paid, duty deducted; River Plate, allot, is offering at 28s 1d to 30s; American hard winter, No. 2, at 28s 9d to 30s; American hard winter, No. 2, at 28s 6d; Western red winter, No. 2, allot, at 27s 9d per 480 lb, c.i.f., Hamburg. Rye firm in value, 91s; Nicolaeff on the spot is held at 22s 9d, 91s to 22s allot at 22s 6d per 480 lb, c.i.f., Hamburg. Fine new German rye 23s to 23s 6d per 480 lb, f.o.b. Cutting of barley has commenced in this country and is likely to turn out a good result as regards quantity, while quality will vary considerably. Offers from Bohemia are increasing; samples showing good colour, and mostly a well-filled grain. Prices range from 29s up to 35s for the choice quality, August-September shipment, per barge from Bohemia. Hungarian barley shows rather dark colour, and fine lots will be very scarce this season. Slovakian is offering at 30s 6d to 35s 6d, per 448 lb f.o.b. In Austria and Hungary a bonus was proposed on exported barley, but it is not likely to be carried through. Feeding barley in demand and dearer; 60/61 Kg South Russian on the spot is selling at 18s 3d to 18s 6d, prompt shipment, 17s 6d to 17s 9d per 400 lb c.i.f., Hamburg. Maize quiet. Mixed American, 21s 6d to 22s; River Plate, 20s 3d to 20s 9d per 480 lb c.i.f., Hamburg.—JOHN TATLOCK.

## Seven Years Grain Averages.

(OFFICIAL.)

|        |                       |

# TO-DAY'S MARKETS.

## THE CORN TRADE.

MARK LANE, MONDAY.

The market to-day was weak for foreign wheat, all sorts being cheaper on the fortnight, and the fall being about 9d. in the leading descriptions. A few rubbed out samples of new English were shown, and 31s. per 504 lb. was the price asked. Quality was good and condition excellent. Barley was neglected for all sorts at barely previous prices.

A few samples of new winter oats made 18s 6d to 20s per qr. Foreign oats receded 3d per qr, and were difficult to place even then. Maize was rather in buyers' favour for yellow and round, but not for flat corn. Beans and peas were extremely scarce, but Dari was in fair offer at the prices of later July. There were a few samples of new rye on sale at 26s, with buyers at 24s 6d per qr.

### BRITISH GRAIN (*Off Stands*).

## THE FLOUR TRADE.

MARK LANE, MONDAY.

The market for London makes was quiet at the concessions of the 3rd inst. The prices which London millers are now accepting are so very moderate that no further modification seems called for, at all events so long as the wheat average is 30s or over.

Country flour was neglected pending makes from new wheat being available. Prices may be given as a fortnight ago in some instances, but most sorts were reduced 6d. on the 3rd, and prices of the last market before the holiday are those still ruling.

American flour declined 3d for good bakers' grades, and Iron Duke was quoted 20s 9d per sack. There were no changes in Australian or Argentine flour.

French flour was almost completely neglected. A good business for the time of year continues to pass in bran, pollard, and middlings.

### CLOSE OF THE MARKET.

THE MARKET, UNDER THE INFLUENCE OF HOT AND CLOSE WEATHER, CLOSED IN FAVOUR OF BUYERS FOR ALL THE LEADING CEREALS.

### SEEDS

London, Monday.—A fair demand being experienced in trifolium, both early and late. Samples fine. Prices reasonable. New winter winter tares are now appearing, but prices seem high, which also may be said of the new rape now on offer.—JOHN PICKARD AND CO.

## GRAIN AND FLOUR FACTORS REPORTS.

Flour.—The trade continues in a languid condition, and buyers will only purchase for present requirements, holding off in expectation of American brands coming lower. —GREENHILL BROS. (Belfast).

Officials.—Bran continues in steady demand; prices firm, and in favour of sellers. —GREENHILL BROS. (Belfast).

Flour.—Arrivals of flour are heavy. American mills have still further reduced their prices. Grain.—Round corn 1 1/4 per boll easier. American continues scarce, and is held for 13s 3d per 280 lb. Oats dull. The low prices for Manitoba are the feature. Beans unchanged. Pease very little asked for. Oilcake 2s 6d per ton dearer. Mill stuffs—Bran is 2s 6d higher. Thirds very scarce. —MCKINNON and McDONALD (Glasgow).

Milling officials are scarce and difficult to get anything like prompt delivery, and buyers have to pay full prices. —JOHN HAWCOMB and CO.

We have moderate arrivals of wheat and flour—demand is slow, and prices are 3d. to 6d. lower for wheat. Flour is unchanged. Barley on spot scarce, prices unchanged. Maize 3d. lower for plate. Oats moderate arrivals, common quality. —COVENTRY and SHEPPARD.

### THE BALTIC 1 p.m.

STATE OF TRADE.

The cargo trade is still decidedly weak for wheat barley, and maize, but the very low prices ruling are beginning to cause an increased enquiry for oats. The oilseed cargo trade is quiet, but by no means depressed.

BUSINESS DONE.

Wheat.—Roumanian, 28s 6d per 492 lb, prompt shipment; No. 2 Hard Winter, 28s 3d per 480 lb, prompt shipment; White Kurachee, 29s per 492 lb, on passage; New South Wales, 30s 3d per 480 lb, on passage.

Maize.—Argentine, 20s per 480 lb, arrived; Argentine, 20s 3d per 480 lb, September shipment; Argentine, 20s 9d per 480 lb, November shipment; Roumania, 20s 6d per 480 lb, October shipment.

Barley.—Azoof, 18s 6d per 400 lb, prompt shipment; Kherson, 10s per 400 lb, prompt shipment.

Oats.—Archangel, 15s per 344 lb, on passage; Volodga, 15s 3d per 304 lb, Sept. shipment; White Libau, 14s per 304 lb, Nov. shipment; Petersburg, 14s 9d per 304 lb, prompt shipment.

Linseed.—Calcutta, 41s 9d per 400 lb, prompt shipment; Bombay, 43s 3d per 416 lb, September shipment; Argentine, 40s 9d per 416 lb, September shipment.

Cottonseed.—Egyptian, 47 per 2,240 lb arrived; Egyptian, 46 18s 9d per 2,240 lb, on passage; Egyptian, 46 13s 9d per 2,240 lb October shipment. Bombay, 45 3s 9d per 2,240 lb January shipment.

### TERM MARKET.

The American Bureau report has a bearish effect on fixtures for wheat. Maize fixtures are firm for remote dates, but fairly steady for early autumn.

American Red.

Wheat.....Sept. delivery, 6s 4d per cental.  
".....Oct. " No sales.  
".....Nov. " No sales.  
".....Dec. " 6s 4d per cental.

American Argentine

Maize.....4s 7d 4s 3d Sept. delivery.  
".....4s 7d 4s 3d Oct. "  
".....4s 8d 4s 4d Nov. "  
".....4s 8d 4s 5d Dec. "

Speculators in new Russian barley offered to take 17s 9d for November delivery this (Monday) morning, which is 3d decline from last week's forward terms.

### FRUIT AND VEGETABLES.

Quotations for English produce:—Grapes 8d to 3s 6d; peaches, 2s 6d to 12s 6d per dozen; pears, 2s 6d to 4s per half-sieve; apples, 2s 6d to 7s 6d per bushel; green figs, 1s to 2s; nectarines, 2s 6d to 12s per dozen; melons, 9d to 2s; red currants, 2s 6d to 3s 6d; per half-sieve; white ditto, 3s to 4s per 12 lb; raspberries, 3s 6d to 5s per dozen punnets; apricots, 1s 6d to 2s per dozen; green gages, 9d to 1s 6d per box; ditto, 3s 6d to 4s per half-sieve; plums, 1s to 3s 6d; tomatoes, 2s to 3s; artichokes, 1s 6d to 2s per dozen; French beans, 2s to 3s; scarlet runners, 1s 3d to 2s; broad beans, 9d; beetroot, 1s 6d to 2s 9d per bushel; horseradish, 9s to 12s 6d per dozen bundles; cos lettuce, 1s 6d to 2s; cabbages, 2s 6d to 3s 6d; marrows, 1s 6d to 2s per pallet; green peas, 2s 6d to 3s 6d per bushel; ditto, 3s 6d to 5s per bag; onions (green), 1s 6d to 2s per dozen bunches; mushrooms, 8s to 12s per 12 lb; endive, 1s 3d to 1s 9d per dozen; cucumbers, 4s 6d to 6s 6d per flat; celery, 10s to 12s per dozen rolls; mint, 1s to 1s 6d; sage, 1s to 1s 3d; carrots, 1s to 1s 6d; turnips, 1s to 2s; parsley, 1s 6d to 1s 9d per dozen bunches; potatoes, 5s to 7s 6d per ton.

## MARKET SUPPLEMENT.

## BREWERS' AND DISTILLERS' GRAINS.

**London, Saturday.**—Wet Grains: The market has shown a strong tendency and a much better demand at about:—Alo, 17s; porter, 14s; distillers, 27s 6d; dressed white distillery meal, 32s 6d per ton. Other articles without any particular change as follows:—Dried grains: Ale 92s 6d, mixed 86s 3d, distillers 112s 6d per ton on rail London; also ale 90s, and mixed 82s 6d per ton on rail Burton-on-Trent. Oat feed, 72s 6d; Rangoon rice meal, 96s 3d; Calcutta rice meal, 86s 3d; fine ground rice husks, 60s; rice meal, 97s 6d per ton. All the above are free on rail or dock London, seller's option.—HAMLYN and CO.

## WOOL.

**London, Saturday.**—English—per pk. of 240 lb. —Fleeces, South Down hogs, £14 10/- to £15 10s; half-bred hogs, £14 5s to £14 15s; half bred wethers, £14 to £14 10s; Kent fleeces, £13 10s to £14; South Down ewes and wethers, £14 10s to £15 10s; Leicester ewes and wethers, £13 to £13 10s; Colonial—per lb.—Vic, fleece super, 1s 11d to 2s 0d; scoured, good, 1s 11d to 2s; scoured, average, 1s 9d to 1s 10d; greasy, average to fair, 1s 1d to 1s 2d; N.S.W., second, average, 1s 7d to 1s 8d; greasy, average, 11d to 1s; S. Aus., greasy, average, 9d to 9½d; N.Z., scoured, average, 1s 8d to 1s 9½d; greasy, average, 10½d to 11½d; Cape, scoured, super., 1s 9d to 1s 10d; fleece, average, 9d to 10d; greasy, average, 7d to 8d; Natal, scoured, 1s 5d to 1s 6d; greasy, average, 8d to 8½d. Cross-breds—Gr.—Vic, good to super, 1s 3d to 1s 4d; New Zealand fine, 1s 3d to 1s 4d; medium, 1s 1d to 1s 2d; coarse, 11d to 1s 1½d.

**Canterbury, Saturday.**—Staplers are at present offering 13d to 13½d for Kent fleeces, and 9d per lb for lamb wool.

**Halifax, Saturday.**—Holidays have begun in Halifax, and business is much restricted; but there is confidence, and prices are generally sustained. Firm rates are quoted for home-grown wools, prices here being still somewhat below country rates.

## POULTRY AND GAME.

**Smithfield, Saturday.**—Fairly good supply and demand. Prices: Surrey and Sussex fowls, 3s to 3s 9d; Lincolnshire fowls, 2s to 2s 9d; Essex fowls, 2s 3d to 3s; Irish, 1s 6d to 2s 3d; goslings, 4s 6d to 6s 6d; country ducklings, 2s to 2s 9d; Aylesbury ducklings, 2s to 2s 9d; quails, 9d to 1s 3d; feathered pigeons, 7d to 8d; Bordeaux pigeons, 10d to 1s; tame rabbits, 1s 2d to 1s 6d; wild ditto, 7d to 8d; live hens, 1s 6d to 2s each; Australian rabbits, 3s 6d to 6s 6d per dozen.

## POTATOES.

**Borough, Saturday.**—Supplies were on a small scale, and experienced fair support. English Puritans, 65s to 70s; Silts, 65s to 70s; Duke of Yorks, 65s to 70s; Early Rose, 65s to 70s; Blacklands, 55s to 60s; Beauty of Hebron, 65s to 70s per ton.

**Carlisle, Saturday.**—Good supply of potatoes at both the public retail markets, and a retail demand was experienced at 5d to 5½d per stone.

**Doncaster, Saturday.**—Good supply of potatoes, and a fair demand. Prices ranged from 3s 3d per 8 stone.

**Lancaster, Saturday.**—There was a good supply of potatoes in the open market, and a fair wholesale trade. Prices: 6s to 7s per load; retail, 5½d to 7d per stone.

**Malton, Saturday.**—A few old potatoes on offer met 1s per stone. Good new potatoes made 9d to 1s per stone.

**Manchester, Saturday.**—Cheshire, new, rounds, 4s to 5s 6d; kidneys, 4s 6d to 6s per load.

**Preston, Saturday.**—A smaller business was done at 6s 6d per load; new potatoes, 5s per load of 240 lb.

**Retford, Saturday.**—Large supply of home-grown potatoes at 8s to 9s per load.

**Spitalfields, Saturday.**—Short supplies were offered, and met an improved demand. Quotations: English Puritans, 65s to 70s; Duke of Yorks, 70s to 75s; Early Rose, 55s to 60s; Beauty of Hebron, 55s to 60s; Blacklands, 55s to 60s per ton.

**Stockton, Wednesday.**—Lincolnshire potatoes £4 to £4 5s per ton.

**Workop, Wednesday.**—Good supply, which made from 7s 6d to 8s per load of 18 stones; kidney beans, 1s 2d to 1s 6d per stone.

**Wark, Saturday.**—Owing to the commencement of harvesting operations, the arrivals from Lancashire and South Lincolnshire are not so heavy, and in the wholesale market prices are a little firmer, with a steady trade at 47s to 47s 6d per ton retail, and about 2s 3d per hamper of 6 stones.

## TO-DAY'S MARKETS.

## CATTLE.

## Metropolitan Market, Islington.

|            | Monday, Aug. 13, 1906. | Monday, Aug. 14, 1906. |
|------------|------------------------|------------------------|
| Beasts     | 1,000                  | 1,000                  |
| Sheep      | 6,450                  | 7,390                  |
| Lambs      | 20                     | 10                     |
| Calves     | 20                     | 30                     |
| Pigs       | 30                     | 30                     |
| Milch Cows | 30                     | 30                     |

Quotations per 8 lb. (sinking the offal).

## ENGLISH.

|        | Inferior. | Second. | First. |
|--------|-----------|---------|--------|
|        | s. d.     | s. d.   | s. d.  |
| Beasts | 2 10      | 3 6     | 4 6    |
| Sheep  | 3 10      | 4 8     | 5 10   |
| Lambs  | 5 4       | 6 0     | 7 2    |
| Calves | 3 8       | 4 6     | 5 10   |

Pigs—per head, £16 to £21.

British arrivals include as follows:—Scotland, nil; Eastern Counties, 68; Midland, Home, and Western Counties, 890; Devon, 20; Ireland, 22.

We note to-day an increase of 280 head in the number of beasts offered for sale compared with Monday last. Trade, taken as a whole, was of a slow but steady nature, late currencies governing all transactions. The Irish arrivals consisted entirely of Waterford cattle, and met with very little demand. There was an average supply of fat butchering cows and bulls, these met with a steady inquiry from both town and country buyers, sellers in consequence were able to maintain late currencies. A clearance is expected to be made in this part of the market, though not until late in the day.

The following are top quotations per 8 lb. (sinking the offal):—

|           | To-day.     | Monday, Aug. 14, 1906. |
|-----------|-------------|------------------------|
|           | s. d.       | s. d.                  |
| Scotch    | 4 4 ex 4 6  | 4 6 ex 4 8             |
| Devons    | —           | —                      |
| Herefords | 4 4 ex 4 6  | 4 6 ex 4 8             |
| Norfolks  | —           | —                      |
| Rants     | 4 0 to 4 2  | —                      |
| Lincolns  | 3 8 to 3 10 | 3 10 to 4 0            |
| Irish     | 3 8 to 3 10 | 4 0 to 4 2             |
| Canadian  | —           | —                      |
| Fat Cows  | 3 4 to 3 6  | 3 4 to 3 6             |

There was an increase of 530 in the number of sheep and lambs penned compared with Monday last. Trade, taken as a whole, was of a firm and steady nature for both wethers and ewes, sellers experiencing no difficulty in obtaining an advance of 2d. per 8 lb. in value in most cases. Scotch descriptions were more difficult to vend, even at a decline. Irish were also slow of sale, but not being quoted any lower. There was a ready inquiry for small choice grass lambs, late currencies being well maintained; heavy descriptions met with very little inquiry. The supply included 200 Scotch, 930 Irish, and 863 from the Eastern Counties.

Undermentioned quotations are at per 8 lb. (sinking the offal) and are for the best of each class penned:—

|                      | To-day.     | Monday, Aug. 14, 1906. |
|----------------------|-------------|------------------------|
|                      | s. d.       | s. d.                  |
| 7½ to 8 st Downs     | 5 8 to 5 10 | 5 8 to 5 10            |
| 9 st Downs           | 5 6 to 5 8  | 5 6 to 5 8             |
| 10 st Halfbreds      | 5 4 to 5 6  | 5 2 to 5 4             |
| 10 st Yorkshires     | —           | —                      |
| 12 st Lincolns       | —           | —                      |
| 12 st Irish          | 5 0 to 5 2  | 5 0 to 5 2             |
| 10 st Down Ewes      | 4 0 to 4 2  | 4 0 to 4 2             |
| 11 st Halfbred ditto | 3 10 to 4 0 | 4 0 to 4 2             |
| 5 st Grass Lambs     | 7 0 to 7 2  | 4 6 to 6 6             |
| 6 st Halfbred ditto  | 5 10 to 6 0 | 5 10 to 6 0            |

Calves ruled firm and steady both in regard to tone and value, sellers both asking and obtaining an advance of from 2d to 4d per 8 lb. in value; the best on offer were quoted at from 5s 8d to 5s 10d per 8 lb. (sinking in offal).

No pigs on the market.

**London Central.**—Fair supplies, improved demand. Beef, Scotch, 4s 3d to 4s 6d; English, 3s 6d to 3s 7d; American, 3s 3d to 3s 7d. Scotch wethers, 5s to 5s 4d; ewes, 3s 4d to 3s 6d. English wethers, 4s 6d to 5s; ewes, 3s 4d to 3s 6d. Lamb, English, 5s 4d to 5s 8d. Veal, 3s 4d to 3s 8d. Pork, 3s 4d to 4s 2d per 8 lb.

## FOREIGN.

**Deptford, Monday.**—Beasts, 880. To-day's supply consisted of 563 beasts from the United States and 326 from Canada. Trade was of a slow nature at a decline in value. Best of the former were quoted at from 3s 10d to 4s; seconds, 3s 7d to 3s 9d; Canadians, 3s 6d to 3s 8d; seconds, 3s 3d to 3s 5d per 8 lb. (offal given in). On Satur-

day 1,842 beasts from the United States and 303 from Canada were offered for sale. Trade was of a firm and steady nature, the best of the former being quoted at from 4s to 4s 2d; seconds, 3s 11d, Canadian, 3s 8d to 3s 11d per 8 lb. (offal given in).

**Liverpool, Monday.**—Larger supply, cattle demand fair, but prices lower, top quotations being very exceptional. Sheep and lamb supply also larger, fair selling trade, but prices not notably different for either. Beef, 6½d to 4½d per lb.; mutton 9d to 6d; lamb 9½d to 5½d. At market 1,971 cattle and, 10,619 sheep and lambs.

## OIL SEEDS.

**Mark Lane, Monday.**—Prices are unchanged for linseed. The demand for rapeseed and cottonseed is hardening a little. Canaryseed is again lower and is now cheaper than it has been for ten years.

|                         | LIASEED, per 416 lb. | COTTONSEED, per ton.     |
|-------------------------|----------------------|--------------------------|
|                         | s. s.                | s. s.                    |
| Dutch                   | 48 to 50             | Egyptian, 137 to 139     |

| Bombay                  | 44 to 46             | per cwt.                 |
| Russian                 | 42 to 44             | English, Best, 16 to 17  |
| Argentine               | 41 to 42             | Russian, White, 14 to 15 |
| Duluth                  | 43 to 44             | Black, 13 to 14          |
|                         |                      | SESAME, per cwt.         |
| RAPESEED, per 416 lb.   | Indian, 14 to 15     |                          |
| Best English            | 61 to 63             | HEMSEED, per 336 lb.     |
| Yellow Gujarat          | 46 to 47             |                          |
| Cawnpore                | 44 to 45             | Russian, 49 to 50        |
| Brown                   | 42 to 43             | CANARYSEED, per 494 lb.  |
| Feroczeper              | 44 to 46             | English, 50 to 52        |
|                         |                      | Spanish, 80 to 84        |
| POPSEYSEED, per 377 lb. | Turkish, 44 to 46    |                          |
| Indian                  | 44 to 45             | Argentine, 42 to 43      |

## HOPS.

**Canterbury, Saturday.**—The brambles are now getting into hop, but the crop will be a very poor one. The plantations are suffering from drought, and are less satisfactory than a week ago. Values firmer, but not much business doing.

**Worcester, Saturday.**—Reports from the plantations speak of a cessation of attacks of blight. This is important, as the plants are developing into burs and hop, and it would not now be safe to wash. Trade has been at a standstill this week owing to the holidays, but holders are very firm in their demands.—CHARLES FARAN and Co.

**Borough, Monday.**—Although there is not much doing on the market, prices continue to advance. The crop prospects on the whole do not improve, and every day now that passes makes it more clear that the outcome cannot exceed that of 1904. The Continent is estimated to produce not more than half of last year's crop. The American markets are an anomaly, for although their crops are reported good, their markets are rising rapidly, and prices are now double what they were in June. The imports of hops for the month of July, 1906, were 14,240 cwt; for the corresponding month last year, 32,200 cwt. The imports of hops from January 1 to July 31, 1906, were 113,045 cwt; for the corresponding period last year, 32,808 cwt. The exports of hops for the month of July, 1906, were 783 cwt; for the corresponding month last year, 1,200 cwt. The exports of hops from England from January 1 to July 31, 1906, were 7,716 cwt; for the corresponding period last year, 11,807 cwt.—W. H. AND H. LE MAY.

## HAY AND STRAW.

**Birmingham, Friday.**—Small supply; trade quiet. Quotations: New hay, £3 5s to £3 7s 6d per ton; straw, 2s 9d per cwt.

**Derby, Friday.**—Best clover, 8s to 9s per ton; best hay, 7s to 8s 6d; second, 6s to 7s; wheat straw, 60s to 70s; pressed straw, 5s to 6s; chopped straw, 50s to 65s; peat moss, 3s to 40s.

**Hereford, Wednesday.**—Prices for old fodder remain the same as last week. No call yet for the new crop. Hay in stack, 55s to 60s; straw in bulk, 35s to 40s.

**Leeds, Tuesday.**—A holiday feeling prevails in the trade passing in the warehouses. Quotations: Old meadow hay, 7d; clover hay, 7½d; wheat straw, 5d; oat straw, 5d; and rye straw (retail), 7d per stone.

**Newcastle, Tuesday.**—Old land hay, from £4 10s to £5 per ton; new land hay, £5 10s to £6 5s; this year's growth, £5; wheat straw, £4 10s to £1 10s per ton; oat straw, £1 10s to £1 15s. There were 27 carts of hay and 13 carts of straw at market.

**Sheffield, Tuesday.**—To-day's market was of a holiday nature. A nominal business done, and little alteration in prices. Choice seeds, £3 to £5 5s; prime meadow hay, £4 10s to £4 15s; straw, £3 10s to £3 15s.

## LIVE STOCK AND MEAT TRADE REVIEW

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

### Trade in London.

The chief market day of the week falling on a Bank Holiday, trade at the Islington Market, which was the only one held, there being a blank at Deptford, was of a dull and dragging nature, rates, even for the best, having to be lowered 2d. per 8 lb. to effect sales. The majority of the supply, as usual at this season of the year, consisted of grass-fed cattle from the Midland counties; a small consignment of cattle were offered for sale, but were very little sought after. Owing to the scarcity of both town and country buyers present, sales of fat butchering cows and bulls were difficult to effect; nevertheless, late currencies governed all transactions on both market-days.

At Deptford, markets were held on Tuesday, Wednesday, and Saturday. Trade throughout the week was of a fairly firm and steady nature, the majority arriving from the United States. The total number of beasts on offer at both markets was 4,418, as against 3,818 during the preceding week, consisting of 790 British and 3,628 foreign, these latter comprising 2,705 from the United States and 953 from Canada. The following were the top rates paid per 8 lb. (sinking the offal):—80 to 90-stone Devons, 4s. 4d. ex 4s. 6d.; 90-stone Herefords, 4s. 2d. to 4s. 4d.; 90-stone Runts, 4s. to 4s. 2d.; 95-stone Irish, 4s. 4d. ex 4s. 90-stone States, 4s. 1d. to 4s. 2d.; 95-stone Canadian, 3s. 10d. to 3s. 11d.; 90-stone fat cows, 3s. 4d. to 3s. 6d.

With regard to sheep, trade was confined to the Islington market, and on Monday was of an extremely slow nature for all grades of both wethers and ewes, sellers experiencing difficulty in maintaining late rates. On Thursday, there was a little more life in the trade, but not sufficient to alter Monday's prices. Lambs met with very little demand on Monday, notwithstanding salesmen being willing to accept 2d. per 8 lb. less money, however a brisker trade was experienced on Thursday. The total number penned was 8,610 as against 10,340 during the preceding week, showing a decrease of 1,730. Best pens made per 8 lb. as follows (offal given in):—7½ to 8-stone Downs, 5s. 6d. to 5s. 8d.; 8-stone Scotch, 5s. 8d. to 6s.; 9-stone Downs, 5s. 4d. to 5s. 6d.; 10-stone Irish, 5s. to 5s. 2d. ex 10-stone half-breeds, 5s. 2d. to 5s. 4d.; 10-stone ewes, 4s. to 4s. 2d.; 5-stone fat grass lambs, 7s. to 7s. 2d.

Calves numbered 30 head.

### Trade in the West.

With the markets glutted with inferior stock, for which there is but a very restricted demand, the prevailing dullness has become much more acute since our last report, and this has been accentuated somewhat by the holiday interregnum. Only the very best grades of cattle maintain their value, a very serious drop having been experienced in all the more ordinary runs, both of dairy beasts and grazing cattle, which is all the more disappointing when the improved prospects for autumn keep are taken into account; to say nothing of the more encouraging outlook for the harvest (up till the present) than could have been expected a month back.

There has also been some reaction in the sheep trade, and, though this has only been to a trifling extent, it was hardly what had been expected now that the keep problem has been at least temporarily solved. But the chief factor seems to be a shortness of money, and, the harvest being later than usual, farmers in the corn-growing districts are, as yet, without the "ready" with which to devote to stock buying. Another thing telling against sheep again is the low price of mutton as a result of the flooding of the markets with foreign imports. For the very really good milch beasts to be met with here and there high prices, ranging from £17 up to £21, are easily obtained, and ordinary grades from £15 to £16 10s.; but for anything decidedly plain business is comparatively at a standstill, dealers quite ignoring animals of this class.

The fat stock markets are likewise very quiet, except for the very choicest grades, either of beef, mutton, lamb, veal, or pork, purveyors of any repute absolutely passing over stock of a rough description without the least inclination to buy. Some very good Devon and Shorthorn steers are to be met with at most markets, and for these

there is a steady demand at last week's rates, 10s. 6d. to 11s. 6d. per score (or from £16 to £23 each); fat cows selling at 9s. to 10s. (or £14 to £15 10s. each). Old cows or heavy fat bulls very dragging trade at 7s 6d to 8s. 6d per score. Fat wethers of medium weight and choice sucking lambs meet a ready sale, the former at 8s. to 8½d. per lb. (or from 48s. to 62s. each), and lambs from 31s. to 40s. for the best, and 28s. to 32s. for others (or 10d. to 10½d. per lb.); other lambs, 27s. to 33s. (or 9d. to 9½d.) coarset fat sheep a depressed business at 6d. to 7d. per lb. Calves a quieter sale, the hot weather affecting the price of the heavier weights, which may now be quoted from 7d. to 7½d., and for nearer weights 8d. to 8½d. Choice porkers are the only thing in the pig line which make their price, these still selling up to 10s. per score; medium weights in demand to 9s. 10d. but for anything coming within the category of "coarse" there is scarcely any demand, the prevailing low currencies of 7s. 6d. to 8s. 6d. failing to attract but very few buyers, which is hardly to be wondered at with the temperature at the point to which it has reached.

### Trade in Scotland.

The number of fat cattle on offer has been under an average. For the best descriptions an active trade has been experienced at quite last week's prices, but no advance can be quoted for secondary cattle. Sheep have been shown in small numbers, and they have met a dear market at a shade higher prices. Ewes scarce and also dearer. Fat lambs met a good trade at satisfactory prices. A very large show of calves made decidedly less money. Pigs still selling well. Store sheep met an active demand and prices continue very high. As is usual at this time of year store cattle are shown in moderate numbers. A quiet demand was experienced, and a portion of those on offer were left unsold. There was a small supply of milch cows, and they met a trade similar to that of last week. Quotations:—Top price of cattle per live cwt., 40s.; current, 38s. to 38s. 6d.; mutton, 7½d. to 9½d. per lb.—JOHN SWAN AND SONS, LTD.

### Trade in Ireland.

There was a large decrease in the supply of both cattle and sheep at last Thursday's Dublin market, and this probably had the effect of preventing a further fall in prices as cross Channel buyers were poorly represented, a few of the usual men being conspicuous by their absence. The weaker tone in the English markets made business open very slowly here, but smaller supplies saved the situation, and as the day wore on there was a slight reaction, and, in some cases, for choice beasts a little more money could be obtained than the previous market. Nicer qualities of bullocks and heifers were able to make a firmer repetition of previous terms, but for coarse cattle things were worse than last day. Cow beef was very slow and tedious to sell. There were 2,802 offered for sale, being a reduction of 115 on the week.

The live weight price for fancy beasts from 30s. to 35s. per cwt., but good useful butchering bullocks could be bought for about 29s. per cwt. Deal weight prices:—Best bullock and heifer beef, from 54s. to (for very choice) 60s. per cwt.; good second class beef, 47s. to 53s., and inferior from 42s. upwards. The English buyers present restricted their purchases to the choice qualities of beef, on account of the continued landing of foreign beef (chiefly from the Argentine Republic) at British ports, and is selling at a very low price.

The large decrease (nearly 1,000 head) in the number of sheep penned had the effect of causing a slight revival in trade. There was good demand for hoggets of best quality, for export, at steadier rates, but generally the trade was slow and depressed, particularly for ewe and coarse mutton. Lambs were in demand, especially large fat, but small, thin lambs were a drag and unwanted. Best wether mutton was worth from 7d. to 7½d.; ewes, 6½d. to 6½d.; and coarse sheep, from 5½d. to 6½d. per lb. Large heavy hoggets sold at from 45s. to 55s. each, and light to medium ditto from 36s. to 44s. Large fat lambs brought up to 35s. to 40s., and other sorts sold at from 18s. upwards, according to size and quality. Good fat lambs met with a ready sale, but lean and inferior lots were hard to turn into money. Prime felled veal was easily placed at the top rates of last market, but the majority of the calves on offer were of a coarse, unsuitable class, and were hard to sell. Choice veal was worth from 7d. to 8d. per lb.; inferior ditto, from 4½d. to 6d. Dairy cows were in small supply, but quite sufficient for the demand, which was very slack. The few really choice cows were soon cleared off at steady rates. Store cattle, despite the rather gloomy outlook for beef, continue to sell well. Mr. Gavin Low held a big sale of over 1,000 head of stores on Thursday in his paddocks adjoining the market.

Many of the cattle were in very good condition, and sold well; the demand for forward beasts was steady, and prices even. For the best polled cattle between 2½ and 3 years from £12 12s. up to £14 12s. 6d. was given. Some Herefords made up to £15 each. For yearlings business was rather tame, the live-weight prices ranging from 23s. to 30s. (for Herefords). All the Aberdeens and most of the good cattle went to England, the remainder of the stock going to home feeders. The uncertain state of the fat cattle market seems to begin to affect the store cattle trade.

There was a moderate supply of pigs, and buyers turned up in good force, men being present to represent nearly all the Irish bacon curing houses, and some had to leave without securing sufficient for their requirements.

Store pigs not in the same demand as last week. Choice light weight pigs made from 55s. to 57s. 6d. per cwt. Lean and coarse pigs not in demand.

### LONDON.

**Central Market, Friday.**—Fair supplies; trade fair for fresh meat. English beef, 3s 6d to 3s 8d; Scotch sides, 3s 10d to 4s; shorts, 4s 2d to 4s 6d; Deptford and Liverpool killed, 3s 2d to 3s 4d; refrigerated hindquarters, best, 3s 8d to 3s 10d; ditto, seconds, 3s 4d to 3s 6d; ditto, fore-quarters, 2s to 2s 4d; inferior beef, 2s 4d to 2s 8d; mutton, Scotch wethers, 5s to 5s 4d; ditto, ewes, 3s 4d to 3s 8d; English wethers, 4s 4d to 4s 10d; fat calves, 3s 4d to 3s 8d; foreign sheep, 4s to 4s 6d; English lamb, 5s 4d to 5s 8d; veal, 3s 4d to 4s 8d; exceptional, 5s; English pork, 4s to 4s 4d; Dutch ditto, 3s 8d to 4s per 8 lb.

**Islington, Thursday.**—Supply of beasts, compared with Thurs last, showed an increase of twenty head, consisting entirely of fat butchering cows and bulls, for which trade was of a dull and dragging nature, a difficulty being experienced in obtaining last Monday's quotations. Top price: Fat cows, 3s 6d; fat bulls, 2s 8d to 3s 2d. An increase of 140 in sheep market. Trade, taken as a whole, for all descriptions of both wethers and ewes was of a fairly steady nature, the tendency in regard to value being an upward one, though not quotably so. Lambs were in average numbers, and met a firm enquiry at slightly advanced rates: Best pens made per 8 lb as follows: 8-stone Downs, 5s 8d; 9-stone, 5s 6d; 10-stone, 5s 4d; 10-stone half-breeds, 5s 2d to 5s 4d; 10-stone Down ewes, 4s to 4s 2d; 5-stone fat grass lambs, 7s 2d; 6-stone half-bred, 5s 10d to 6s (offal given in). Calves were in very short number, and met a slow trade. Quotations per 8 lb: Beasts, 2s 8d to 3s 6d; sheep, 3s 8d to 5s 8d; calves, 3s 6d to 5s 6d; lambs, 5s 6d to 7s 2d. Total arrivals:—Beasts, 40; sheep and lambs, 2,690; calves, 20.

### COUNTRY.

**Ashford, Tuesday.**—Fair inquiry for beef and mutton; trade for lamb, veal, and pork dearer; small pigs going up to 6d to 1s a score. Best beef, 10s to 11s; mutton, small half-bred Downs, 5s 6d to 5s 10d; small Kent wethers, 5s to 5s 2d; lamb, 6s 6d to 7s; veal, 4s 8d to 5s; pork, roasters, 10s 6d to 11s; big hogs, 10s 6d.

**Basingstoke, Wednesday.**—At Raynbird and Son's sale yard there was the usual numerous attendance of buyers, both from the local and distant markets, to meet a supply of 32 fat beasts, 47 calves, 330 fat sheep, 78 pigs, and 81 head of dairy and store cattle, for which the following prices were realised:—Fat Devon steers made up to £22 5s, cows £16 10s, Shorthorn steers £19, heifers £15 10s, and cows £15 15s. West Highland steers up to £18, fat calves 60s to £5 10s, smaller ditto 20s to 45s, fat porkers 29s to 47s 6d, stores to 20s, dairy cows £9 to £18 15s, nineteen months old Down wethers and ewes made from 54s to 59s, smaller ditto 48s to 52s, seven months old Down lambs 42s to 48s 6d, ditto runs up to 50s, cross-bred lambs 32s to 36s 6d, old Down ewes 34s to 42s, Shorthorn ewes 41s, Cheviot ewes 38s 6d, three months old sucking lambs 28s to 36s. The extreme heat influenced the trade for fat cattle. The bidings were slow and prices lower for all except the fancy lots of choice quality and moderate weight. A good show of fat sheep and fat lambs attracted the attention of a number of buyers, and late rates were maintained in most instances. As usual, the choice small sheep and lambs had the best of the trade. Dairy cows of the best description met a ready sale at satisfactory prices; second quality sorts were not wanted, and where sold realised less money. Store cattle, owing to the extreme dry weather, met an exceedingly dull trade, the several lots on offer changing hands at low prices. Fat calves, with a short

### FARMS

never remain until when advertised in the "Mark Lane Express."

The charge is Sixpence per Line per Insertion.

### OIL and GAS ENGINES

are growing more than ever in demand, and would be still further "boomed" if regularly advertised in the "Mark Lane Express."

## MARKET SUPPLEMENT.

vii

supply made more money. Fat porkers firm trade at late rates. Store pigs sold well, a clearance being made. Ruling values: Best beasts 63d to 7d, 2nd ditto 53d to 61d; bulls, cows, and inferior, 43d to 51d per lb.; best sheep 83d to 91d, 2nd class 73d to 81d; old ewes, rams, and inferior, 61d to 71d, choice sucking lambs 101d to 103d per lb.; fat calves 7d to 8d per lb., fat porkers 95d to 103d per lb.

**Berwick, Saturday.**—There was a small show of cattle. Only 69 beasts were penned, as against 96 the previous week. The attendance of farmers and buyers was small. Cows made £17 10s to £22, and heifers with first calf £15 10s to £19.

**Birmingham, Thursday.**—Small supply of beasts, sheep and pigs. Trade fair for pigs, but slow for beasts and sheep. Quotations:—Beef, 51s to 61d per lb.; mutton, 6d to 81d per lb.; lamb, 83d to 9d per lb.; veal, 6d to 7d per lb.; bacon pigs, 10s 3d to 10s 6d per score; cutting pigs, 10s 6d per score; sows, 8s per score.

**Bristol, Thursday.**—Fat cattle were offered in about usual number, but with a limited demand trade was quiet, with advances to 5s for best qualities and 5s for secondary. Sheep and lambs were fairly numerous, but business slow, and values were unaltered. Pigs were again scarce, and baconers declined to 9s 6d per score.

**Calne, Friday.**—In a number of not less than ten, on rail within 100 miles, 3d per score extra for delivery by road. Prime stores, 6s. to 8s. 10s, 10 lb., no deduction for fat, 9s 6d per score; 8s. 10s, 10 lb., to 9s. 10s, not over 2 1/2 in. 9s 6d per score; under 10s. 10 lb., not over 2 1/2 in., 9s per score; under 11s. 10s, not over 2 1/2 in., 8s 6d per score. Pigs outside these limits at their value. —CHARLES AND THOMAS HARRIS & CO., LTD.

**Canterbury, Saturday.**—Lambs to-day were making from 17s 6d to 22s 6d, and good breeding ewes from 35s to 30s; old ewes, 20s to 32s. A moderately brisk demand.

**Carlisle, Saturday.**—The supply of Irish cattle was small, only about 300 being penned. Buyers were not numerous, and trade was rather dragging. Good-sized animals for fogging purposes made £13 to £15 10s, and wintering cattle £7 10s to £12 10s each.

**Chester, Thursday.**—A good selection of dairy stock, and fair demand. Slow inquiry for store cattle, owing to burnt-up pastures. A large number of sheep, mostly Irish wethers, and trade was quiet. Quotations for cattle and sheep were generally unchanged.

**Derby, Tuesday.**—There was no change of importance in quotations, last week's rates generally ruling. Beasts, 53d to 63d; sheep, 7d to 83d; calves, 83d; lambs, 9d.

**Devizes, Thursday.**—There was a small supply and attendance at this market to-day. New winter oats, winter barley, and rye were offered; winter oats realising 16s to 19s; winter barley, 21s to 25s; and rye, 23s to 26s per qr. The following were the quotations:—New wheat, 15s to 17s; secondary, 13s 6d to 14s 6d; best barley, 26s to 32s; secondary, 23s to 24s; rye, 23s to 26s; old black oats, 22s to 24s; new ditto, 19s to 23s; malting barley, 26s to 32s; beans, 16s to 18s; fine flour, 24s to 26s; extra fine, 27s to 30s.

**Doncaster, Saturday.**—Very poor supply of cattle, especially milch beasts, and few buyers, trade being dull. Milch beasts, £16 to £22; bullocks, £12 to £17; heifers and drapes, £11 to £13 10s; young stores, £7 to £9 each. Good show of sheep and lambs, particularly the latter; drapes ewes, 22s to 32s; lambs, 28s to 35s each.

**Dorchester, Saturday.**—Messrs. Ensor and Sons had extensive offers of most kinds of stock, including many useful stores at their repository sale to-day, which attracted a large attendance. Milchs, of anything like a good class, commanded at very ready sale at from £17 15s to £21 15s, this being a considerable rise in values, seconds making £14 10s to £16 10s. The barner trade also showed greater buoyancy, especially for fresh condition bullocks, which ranged from £20 to £28 per pair; barren heifers making £16 10s to £20; 3-year-old bulls, £20 to £21 each. Fat beef in 3-year-old bulls, £20 to £21 each. Fat beef in 10s 6d to 11s per score (or for heifers and steers from £15 5s to £20 10s); fat cows £12 15s to £15 10s (or 10s); fat bulls, £14 to £16 5s. Mutton met a steady sale at above late values:—Wethers, 45s to 51s 6d (or 8d to 83d per lb.); ewes, 44s to 46s 6d (or 63d to 67d). Supplies are very short after the holidays; a ready clearance was effected throughout.

**Dublin, Thursday.**—Better demand for cattle, very choice suitable qualities placed to slightly better advantage; other sorts, though not quite as dearer, were easier sold. The large reduction

in sheep and lambs had a staid effect on trade; but, except for cross-bred shipping hoggets, prices showed no improvement, and a clearance of rough and inferior lots could not be made. Cattle.—Live weight (best) 23s to 31s 6d per cwt.; secondary and inferior sorts, 25s to 28s 6d per cwt. Mutton.—Dead weight, 6d to 73d and 73d per lb. —GALBY, SOBS AND CO.

**Edinburgh, Wednesday.**—Supplies of store cattle and sheep were small, and trade was slow. Polled bullocks, £10 to £15; horned bullocks, to £15; Shorthorn cows, to £25; cross cows, to £20; half-bred cows, to 30s 6d; half-bred gimmers, 43s to 52s; half-bred Dinmonts, 40s per head.

**Glasgow, Wednesday.**—There was a fair show of cattle and sheep. Prices steady. Best Scotch cattle, 63s, currents, 60s; best Irish, 55s to 58s per cwt. Sheep:—Lambs, first, best hoggy, 9d; wethers, 8d; lambs, 9d to 93d per lb. Dead meat steady; best Scotch beef, 6d; Statos, 53d; Canadians, 51d; cows, 43d; hogs, 8d per lb.

**Hereford, Wednesday.**—There was a large supply of beef, but in consequence of the exceedingly hot weather trade was slower. Best heifer and bullock beef made from 63d to 67d, cow beef from 51d to 53d. Calves were a short supply, and veal dealer, making all 8d. Fair supply of sheep and lambs, the latter making up to 9d, and in a few instances passing hands at 40s apiece. Weather station made 9d, and ewe mutton 7d. There was a good demand for porks at 6d; stores also sold rapidly at good figures. Cattle trade was dull, and supply poor.

**Leicester, Saturday.**—Small supplies of home-bred stock, and trade ruled quiet. Choice milch cows, £20 to £23; good milks, £17 to £18 10s; inferior, £14 to £16; bullocks, £9 to £11 10s; calves, 15s to 35s each.

**Lincoln, Friday.**—Beasts were a small consignment, and the demand was fair. Young beasts, 40s to £10; milch cows, £17 to £21; strong beasts, £13. Lambs 32s to 35s each.

**Lynn, Tuesday.**—Supplies were about as last week, trade slow. Fat beasts, 6s 6d to 7s per stone; stores unchanged. Fat sheep, 8s 9d to 9s per stone; stores, 40s to 46s. Fat lambs, 25s to 40s; stores, 25s to 35s each.

**Manchester, Friday.**—Beef: firsts, 53d; seconds, 43d to 53d; thirds, 31d to 4d. Mutton: firsts, 73d; seconds, 63d to 73d; thirds, 53d to 6d. Veal: firsts, 6d; seconds, 5d to 53d; thirds, 4d to 43d. Lamb: firsts, 8d; seconds, 7d to 73d.

**Newcastle, Tuesday.**—There was a slow, heavy trade, prices favouring buyers. Prime heifers, 7s 9d to 8s; second-class and steers, 7s 6d to 7s 9d; coarse and inferior, 6s to 6s 6d; pigs, 6s to 7s 6d per stone; sheep, 5d to 9d; lamb, 9d to 10d; veal, 6d to 83d per lb. At market:—Cattle, 1,801; sheep and lambs, 6,559; calves, 99; pigs, 398.

**Newport, Wednesday.**—A good supply of cattle, and very short supply of sheep and lambs. A fair number of calves. Trade good. Quotations: Best English beef, 63d per lb.; secondary, 63d; cows, 83d to 93d; best wether mutton, 83d to 83d; ewes, 7d to 83d; lambs, 9d to 93d; calves, 63d; porket pigs, 10s 3d to 10s 9d per score.

**Norwich, Saturday.**—The supply of fat beasts was wholly confined to the sales, and there was little improvement in the demand, prices hardening slightly at 7s to 7s 6d per stone of 14 lb. Store cattle were represented by a very small number, chiefly of a second-rate description, and the amount of business transacted was insufficient to justify quotations. The supply of store sheep was composed of good show of breeding ewes and limited number of lambs; trade was slow, but values were firm; ewes made from 55s to 65s per head, and lambs from 28s to 38s. Fat sheep were offered in small supply, and trade ruled much upon the same lines as of late, prices for best qualities averaging from 9s 3d to 9s 9d per stone. There was a small show of both fat and store pigs, and a ready demand saw a clearance at full late rates; fat pigs averaged 7s per stone.

**Nottingham, Saturday.**—A smaller supply of store cattle than made 40s to £21, and inferior heifers, £15 to £17. A better show of calves, which met with a slower trade, making 25s to 45s. No sheep or lambs.

**Preston, Wednesday.**—There was only a holiday attendance at to-day's market, and little business was done. The supplies of beef and cattle were up to the average. Trade in calves was slow. Quotations:—Heifers and bullocks, 6d to 63d; cows and bulls, 43d to 53d; lambs, 83d to 9d; hogs, 83d to 9d; ewes, 7d to 83d; tup, 6d; calves, 53d to 6d per lb.

**Reford, Saturday.**—A fair show of stock, and quotations very low. Good milch cows, £16 to £18; inferior, to £14. Steers and heifers were a drug, and barely maintained late rates.

**Romford, Wednesday.**—Short supply of fat beasts: trade a little better. Best, 4s 2d to 4s 4d; middlings, 3s 10d to 4s per stone. Calves in short supply; trade very slow at 4s 8d to 4s 10d per stone. Sheep in fair supply; trade fair. Best

small sheep, 5s 4d to 5s 6d; large, 5s to 5s 2d per stone. Ewes in average supply; trade unchanged at 4s 2d to 4s 4d per stone. Short supply of lambs; trade slow at 6s to 7s per stone. No store beasts on offer. Pigs scarce; trade very slow at late rates.

**Sheffield, Tuesday.**—Very little doing in cattle. Only a few milch beasts shown, which met with a slow sale at £18 to £21; secondary qualities, £16 to £17 10s. No sheep.

**Shrewsbury, Tuesday.**—Small supplies, but good attendance of buyers, and prices a shade better than last week. Quotations:—Beef, 53d to 63d per lb.; mutton, 7d to 83d per lb.; veal, 6d to 63d per lb.; porket pigs, 9s to 10s per score; bacon pigs, 9s to 10s per score. Numbers offered as follows:—Cattle 42s, sheep and lambs 1,764, calves 77, pigs 245.

**Stockton, Wednesday.**—Numbers on offer, 118 cattle, 9 sheep, and 237 pigs. A smaller show of the best cattle, which met with a short trade at 7s 6d to 8s per stone, whilst rougher kinds made 6s 6d to 7s per stone. Young sheep made 83d per lb, lambs 10d, ewes 7d, and tups 6d. The pork trade was quiet, last week's prices ruling.

**Thame, Tuesday.**—There was a capital supply of stock for a holiday market, and the usual company of buyers who regularly attend this market were present. Best beef still maintains late rates, a clearance being effected. There was slightly more demand for fat cows, which realised a trifle more money; but the trade for these is far from satisfactory. Sheep were in good demand, both ewes and wethers making more money. Lambs scarce and dear. Small supply of pork, for which there was a great demand at higher prices. Messrs. Bond and Burrows sale comprised 97 fat beasts, 159 fat sheep, 64 fat and weaning calves, and 35 fat pigs. Fat oxen made from £16 to £21 5s; fat heifers, £14 to £19 7s 6d; fat wethers, 44s to 53s 6d; fat ewes, 40s to 57s; fat lambs, 30s to 50s; fat porkers, 32s to 44s; bacon hogs, £4 to £4 10s; fat calves, £3 to £4 5s; weaning cow calves, 20s to 35s; bull calves, 10s to 48s.

**Truro, Wednesday.**—Business fairly brisk. Attendance very good. Fat bullocks, 55s to 60s per cwt.; barreners and store bullocks, 40s to 45s; cows and calves, £9 to £15 each; rearing calves, 14s to 43s; wethers, 7d to 73d per lb.; ewes, 53d to 6d; lambs, 7d to 73d; pigs, 14s 9d to 40s 6d each; beef, 6d to 8d per lb.; mutton, 6d to 8d; lamb, 8d to 9d; veal, 6d to 8d; pork, 6d to 8d; bacon, uncured, 6d to 73d; ditto, cured, 7d to 9d; pork carcasses, 5d to 53d.

**Wolverhampton, Wednesday.**—Fewer animals penned, and quiet demand. Quotations: Beef, 5d to 63d per lb.; mutton, 83d to 9d per lb.; lamb, 9d to 10d per lb.; calves, 63d to 73d per lb.; bacon pigs, 10s to 10s 6d; porkets, 10s 6d to 11s; sows, 8s to 9s per score.

**Workop, Wednesday.**—Fair supply of all kinds of stock, except sheep, which were scarce. Beef was only a moderate trade, best qualities making from 6s 6d to 7s, and secondary qualities 6s to 6s 3d per stone; best Southdown wethers and cross-bred mutton made from 81d to 83d; ewes and other sorts, 6d to 7d per lb.; lamb, for which there was an exceptionally brisk trade, made from 9d to 93d, and veal 8d to 83d per lb.

## FOREIGN.

**Yorkhill, Monday.**—Moderate supplies of Canadian and United States cattle were on offer at the usual weekly sales to-day, 517 head being penned. All the cattle were from Baltimore and Montreal, and were delivered in good condition. There was a fair attendance of buyers, but trade was quieter than at the three previous sales, and a further drop in the price of first-class bullocks was noted, the reduction amounting to about 2s per cwt dead weight, while bulls, which continue scarce were not only cashed at recent rates but in some instances advances were obtained for extra choice qualities. First-class bullocks of useful weights and sizes were sold at 50s per cwt dead weight, while inferior qualities were cashed down to 54s per cwt. Bulls of heavy class sold at about 48s per cwt dead weight, prime choice beasts making 50s per cwt, and a superior lot up to 52s per cwt.

**Yorkhill, Tuesday.**—Five extra sales of American and Canadian cattle were held at the Foreign Animals Wharf, 723 head being penned, all being from Montreal. There was a fair attendance of buyers, but business was the turn quiet from the previous day's transactions, and much

With its fine connection amongst Live Stock Owners, the "Mark Lane Express" is undoubtedly ONE of the BEST MEDIA for the Disposal of Pedigree Live Stock, either by Public Auction or Private Treaty.

The Journal goes directly into the hands of likely purchasers at home and abroad.

All Advertisements ordered for the "Mark Lane Express" appear simultaneously in the THIN paper COLONIAL AND FOREIGN EDITION

for circulation abroad, WITHOUT EXTRA COST to the Advertiser.

quotations are only slightly altered, a larger number of animals changed hands at the lower scale of quotations. Well-finished bullocks of handy sizes and weights and of good useful qualities sold about 54s per cwt dead weight, a few of extra choice make touching 55s per cwt, and secondary, middling, and inferior descriptions were cashed down to 51s and 52s per cwt. A few extra choice prime bulls were sold at about 50s per cwt dead weight, while course and heavy animals sold from 46s up to 48s per cwt.

### FEEDING STUFFS.

**Hull, Tuesday.**—Linseed has been steady throughout the week. River Plate: Spot, 41s; July-August, 40s 6d. Duluth: August-September and September-October sold at 40s 6d to 42s. Calcutta: July-August held for 42s. Petersburg sold at 40s 7½d to 40s 9d August-September. Cottonseed.—During the past week there has only been a small business passing at £6 16s 3d spot, £6 15s passage, which are to-day's values, and latter paid August. New crop, September, £6 16s 3d, business done October at £6 10s, and £6 6s 3d still required November-January. Bombay, near at hand, done at £5 2s 6d to £5 3s. Sellers ask £5 7s August-September, and a sale October-November reported at £5 6s 3d. A few lots December-January and January-February changed hands at about £5 2s. Oils.—The market is steady. Linseed 19s spot, 19s 1½d August, 19s 4½d September-December. Cottonseed Oil: 20s 3d spot, 20s 3d August, 18s 3d November-April.—KEIGHTLEY, MAXTED, AND CO.

**London, Thursday.**—Oil cakes.—Linseed cakes strong. London made £7 18s 9d to £8. Cotton cakes firmer. London-made £4 8s 9d to £5.—THE PRODUCE BROKERS COMPANY, LTD.

**Liverpool, Friday.**—With genial weather the harvesting of corn crops has begun, and will soon be general throughout the country. In the meantime trade as usual in feeding stuffs is inactive though values are firm.

Opposite the Comedy Theatre.

which for some time past have ruled by far the best value on the market. Russians are becoming scarce on spot, and are 2s 6d more money than last week, which is also the case with London made, whilst all other descriptions are 1s 3d more money. Cotton Cakes.—Only a limited quantity of Egyptians now remain in warehouse, and to-day's value is £4 17s 6d, ex quay. English and Bombay are unchanged since last week. Decorticated do not offer on spot, but a parcel of meal may be bought at £7 10s to £7 12s 6d. Rape Cakes.—Quiet. East India, 25s; Ravison, £4 15s. Maize Germ Meal.—Landed lots of White American still offer at £5 15s with English make selling at £5 10s to £5 12s 6d. Maize Glutted Feed is in good request at £5 15s per ton. Rice Meal.—Parcels of Rangoon in warehouse are quoted at £4 13s 9d to £4 15s, but there are sellers of steamer lots afloat at £4 10s to £4 11s 3d ex ship terms. Locust beans are unchanged at £5 15s for whole and £6 for Kibbled. Nitrate of soda is the turn dearer at £10 17s 6d for present delivery and £11 2s 6d for spring.

Otley: 1s 9d per 24 oz roll. Redruth: 10½d. Runcorn: 1s 2d to 1s 3d. St. Austell: 1s 3d. Stamford: 11d to 1s. Stockport: 1s 2d. Tavistock: 1s 3d to 1s 6d. Totnes: 1s 6d to 1s 7d.  
**Saturday.**—Appleby: 11d to 1s. Berwick: 1s 1d to 1s 2d. Bridgnorth: 1s to 1s 3d. Carlisle: 11d to 1s. Doncaster: 1s 3d. Grantham: 1s 3d. Howden: 1s to 1s 2d. Ipswich: 1s 2d to 1s 3d. Lancaster: 11½d to 1s 2d. Malton: 1s 3d. Pontefract, 1s 1d to 1s 2d. Retford: 1s 5d to 1s 6d. Richmond (Yorks): 1s 4d. Shrewsbury: 1s 1d to 1s 3d. Skipton: 1s to 1s. 1d. Stokesley: 1s 1d to 1s 2d. Whitby: 1s 1d to 1s 3d. Worcester: 10d to 1s 2d. York: 1s to 1s 2d.

### CHEESE.

**Glasgow, Wednesday.**—Arrivals of cheese moderate in Glasgow. Market floors are now well covered, and demand has fallen off, as grocers and provision dealers have in fair working stocks. The consequence is that holders are willing to meet buyers to the extent of a shilling or two. Cheddars quoted from 58s to 64s per cwt, and Dunlops from 55s to 62s. Trade look for prices coming back.

**Highbridge, Tuesday.**—There were 23 tons of cheese pitched, and with a large attendance all was cleared. Best dairies realised up to 58s per cwt, secondary dairies, 53s to 56s 6d; and other dairies, 47s to 52s. A few inferior lots failed to reach 42s. Cheddars made 63s to 65s; truckles, 60s 6d to 62s.

### ADVERTISEMENTS RECEIVED TOO LATE FOR CLASSIFICATION.

#### PRELIMINARY NOTICE.

**THE ANNUAL SALE of Pedigree**  
Clydesdales, Hackneys and Ponies,  
the property of the Seaham Harbour  
Stud Co., will be held on  
WEDNESDAY, SEPTEMBER 19.

from the above Registered Flock;  
when Mr. Fisher will be glad to see  
his friends.  
Sale after 1 o'clock luncheon.  
Conveyances will meet the trains at  
Beverley and Aram Stations.  
Auctioneers' Office,  
Market Place, Beverley.

# Review of the British Corn Trade

DURING THE PAST WEEK

*Written exclusively for the Mark Lane Express.*

The unsettled weather of the last five or six days has caused a certain delay in harvesting, but the rains have done more good than harm on the whole, and we can speak more hopefully of the meadows and the aftermath than we could a week ago. The new wheat is making an appearance on our southern markets, and is of a fully satisfactory character, in most instances weight, quality, and shape all being good. The summer heat this year has been very uniform and general without excess. Thus it results that there are scarcely any shrivelled or parched grains and very few misshapen ones. Farmers will be most ill-advised if they press their new wheat unduly on sale. A 30s. level should be the lowest entertained. We hear that the new wheat in France is above the average in milling quality, and is threshing out well in yield to the acre.

Reserves of old wheat in England are thus estimated:

|                     |             |
|---------------------|-------------|
| Aug. 18, 1906 ..... | 269,000 qr. |
| Aug. 19, 1905 ..... | 315,000 qr. |
| Aug. 20, 1904 ..... | 296,000 qr. |

The stocks of foreign wheat, including flour, thus compare:—

|                     |               |
|---------------------|---------------|
| Aug. 18, 1906 ..... | 2,620,000 qr. |
| Aug. 19, 1905 ..... | 2,420,000 qr. |
| Aug. 20, 1904 ..... | 2,170,000 qr. |

It will be seen that the transition from one cereal to another will evidently be effected without any pressure of want being felt in the wheat trade. The stocks of barley, however, are extremely low, and there is an equal exhaustion of both English and foreign grain of the 1905 crop. Oats are now a rarity as far as 1905 specimens of English are concerned, but foreign are unusually abundant, and being pressed on sale are 3d. to 6d. cheaper on the week.

Returns are now to hand of bread-stuffs shipments from the United States for the shipping year completed July 31 last. They prove somewhat larger than had been anticipated:—

|              |                 |
|--------------|-----------------|
| 1905-6 ..... | 14,075,000 qrs. |
| 1904-5 ..... | 14,005,000 "    |
| 1903-4 ..... | 13,625,000 "    |

The shipments of South America for the same period were very heavy, and show how since three years ago the trade of the River Plate and of Bahia Blanca (which is on the South Atlantic) has increased. The following figures include Uruguay and Chile:—

|              |                 |
|--------------|-----------------|
| 1905-6 ..... | 11,457,000 qrs. |
| 1904-5 ..... | 11,616,000 "    |
| 1903-4 ..... | 8,510,000 "     |

The shipments from India, on the other hand, have fallen off, and lead one to imagine that the Government estimates of the last two crops may have been in excess of the truth. There seems little reason to suppose that India is hoarding grain:—

## LONDON HAY TRADE.

**Saturday.**—Supplies have been coming along better this week, but not yet in large quantities. However, with a slow sale it has been more than sufficient to meet all requirements. There is no change in prices to report, but it has only been with the greatest of difficulty that values have been maintained. Prime old stubs are still the most in demand, and as the supplies of this quality are very short they fully maintain their value. There is a large quantity of ordinary stuff along which finds a very quiet sale. The deliveries of new crop are getting heavier, and with quality of some being generally very good, they find a ready sale at prices slightly below that of old.

Straw has been coming along in very large quantities, and with a poor demand prices are again lower. The foreign trade has been rather quiet this week; there have been large shipments of Canadian mixture, which finds a quiet trade, and slightly less money has been accepted; other qualities are unchanged at last week's currencies.

Prices ruling are about as follows:—English old crop best meadow hay, 80s to 82s 6d per ton; good meadow hay, 72s 6d to 77s 6d per ton; inferior, 60s to 67s 6d per ton. Best clovers, 92s 6d per ton. Good clovers, 80s 6d to 90s per ton; inferior clover, 70s to 80s per ton. Best mixtures, 87s 6d to 90s per ton; good mixtures, 75s to 85s per ton; seconds mixtures, 60s to 70s per ton; wheat straw, 25s per ton; oat straw, 25s per ton; barley straw, 27s per ton. Foreign: Canadian mixtures, 70s per ton; good Dutch hay, 65s per ton; Algerian hay, 62s 6d to 65s

|              |                |
|--------------|----------------|
| 1905-6 ..... | 3,190,000 qrs. |
| 1904-5 ..... | 9,040,000 "    |
| 1903-4 ..... | 7,175,000 "    |

Russia has been an extraordinarily active seller of wheat. The following figures are given for the sale of uniformity for the shipping year ended July 31, 1906, but a full third of the total has been sent by rail and cart across the frontiers. The German indebtedness to Russia has been especially great:—

|              |                 |
|--------------|-----------------|
| 1905-6 ..... | 19,600,000 qrs. |
| 1904-5 ..... | 23,760,000 "    |
| 1903-4 ..... | 17,650,000 "    |

There are now on passage to the United Kingdom 2,332,000 qrs. of wheat, of which 275,000 qrs. are Californian, 280,000 American, 90,000 Russian, 852,000 Indian, 391,000 Argentine, 435,000 Australasian, and 20,000 various. A week ago 2,345,000 qrs. were on passage.

The supply of flour on passage has increased to 268,000 sacks, but is still much below the average.

Of barley 277,000 qr. are afloat, including an increased supply of Asiatic.

Of oats 475,000 qr. are on passage, which is much above the average.

Maize expectations are as follows:—

|                 |             |
|-----------------|-------------|
| American .....  | 85,000 qr.  |
| Argentine ..... | 1,020,000 " |
| Russian .....   | 100,000 "   |

Total .....

Other expectations include 120,000 qr. of linseed and 23,000 qr. of rapeseed.

The sales of British wheat at the statute markets have been as follows for the fifty completed weeks of the cereal year:—

This season ..... 2,906,000 qr., at 28s. 10d. per qr.  
Last season ..... 1,626,000 qr., at 30s. 9d. "

Large sales: lower prices.

The sales of British barley show little difference between the two years:—

This season ..... 3,199,500 qr., at 24s. 3d. per qr.  
Last season ..... 3,133,000 qr., at 24s. 7d. "

The sales, &c., of British oats show a rise in price resulting from very restricted surpluses to be spared for use off the farm:—

This season ..... 914,000 qr. at 18s. 6d. per qr.  
Last season ..... 1,144,000 qr., at 17s. 2d. "

The imports last week of the United Kingdom were as follows:—

Wheat, 538,000 qr.: a large supply.  
Flour, 83,000 sks.: a small supply.  
Barley, 47,700 qr.: a small supply.  
Oats, 111,000 qr.: bare average arrivals.  
Maize, 277,000 qr.: heavy imports.  
The imports for the fifty completed weeks of the cereal year have been:—  
Wheat, 21,055,000 qr.: moderate arrivals.  
Flour, 5,527,600 sks.: moderate arrivals.

per ton. French 1st and 2nd cut clover, 73s per ton; large bale wheat straw, 52s 6d per ton; small bale wheat and straw, 41s per ton. These prices are by barge delivered alongside London Thames Wharf.

## THE BALTIC.

London Corn Trade Association prices for Indian wheat cargoes are 29s. per 492 lb. for White Kurrachee, and 28s. 6d. for Red Kurrachee. No Bombay or Calcutta cargoes are quoted by the association, a rare occurrence in August. Wheat cargo sales from the 14th to 18th inclusive were difficult to effect, and prices tended in buyers' favour. There is, however, never anything like absolute stagnation in this great business and we are able to report the following transactions:—Victorian sold for 31s. per 480 lb.; New South Wales for 30s. 3d. per 480 lb.; No. 1 Northern Manitoba for 29s. 9d. per 480 lb.; No. 2 Hard Winter for 28s. 3d. per 480 lb.; No. 3 Red Winter for 27s. 9d. per 480 lb.; Roumanian for 28s. 3d. per 492 lb.; and Bahia Blanca for 28s. per 480 lb.

Maize cargoes were weak from the 14th to 17th, and at the close of the week 3d. less money was accepted, business passing at 20s. 6d. per 480 lb. for La Plata, 20s. 6d. per 480 lb. for Roumanian, and 20s. 9d. for Odessa, also per 480 lb. No American was sold.

Barley cargoes have been weak, and despite the small supply on passage. A cargo now loading at Nicolaiiff has fetched 18s. 6d. per 400 lb., and another of the same weight loading at

Barley, 5,597,000 qr.: fair supplies.  
Oats, 5,592,000 qr.: fair supplies.  
Maize, 10,290,000 qr.: good arrivals.

The maize total, however, is not at all extraordinary, and it is only since June that it has become at all remarkable. Nothing under 12,000,000 qr. for the year is a plethora of this much-used feeding stuff. If less than 10,000,000 are to hand, inquiry becomes a little excited and prices rise. Average needs are anything between ten and twelve millions, and vary with the supply of cheap oats, Russian barley and East Indian small pulse. The barley, oat, and maize supplies for the cereal year look as if they would be found early in September next to have corresponded pretty closely with the mean of the past ten years.

Messrs. Scotten and Snydacker, of Chicago, write:—"We have garnered a big crop of winter wheat of most excellent quality, and there is little question the North American continent will make a new production record. In regard to our own North-west crop, it must be remembered there is a very large increase in the Durum area, which mainly comes off the Erie area, that a grade we have very little use for in this country from a consuming standpoint, and hence must look abroad for a market for the bulk of that crop. So it is more than likely the North-west will not produce as much spring life wheat as she does ordinarily, though her late crop, barring accident, will be a large one. A Canadian official estimates that country will have 100,000,000 bushels for export, barring future accidents."

Subsequent advices by cable confirm the facts reported in the above letter. The well-known agency of Bradstreet's published their annual estimate of the American wheat surplus last week. It works out at about 28,500,000 qr. of 480 lb. American exports have appreciated in the past, but have never quite attained the total of 30,000,000 qr. American shipments last week were 181,000 qr. of wheat, 11,000 qr. of barley, 46,000 qr. of oats, 114,000 qr. of maize, and 97,000 sks. of flour.

Argentina last week shipped 126,000 qr. of wheat, 323,000 qr. of maize, and 45,000 qr. of linseed. The maize shipments are, of course, the feature of South American exports at present. The disastrous earthquake of the 17th did not extend to the eastern seaboard of South America, whence alone grain is now being shipped.

Russia shipped 140,000 qr. of wheat, 139,000 qr. of barley, 500,000 qr. of oats, and 37,000 qr. of maize, which are liberal exports for the time of year. Roumanian added 90,000 qr. of wheat, 12,000 qr. of barley, and 83,000 qr. of maize.

India shipped 96,000 qr. of wheat and 14,000 qr. of linseed. Australasian shipments were limited to 4,000 qr. of wheat.

Kustendize has been sold for 18s. per qr. Both are to sail as soon as loaded.

Other cargo sales of the week included Volodga oats at 15s. 3d. per 304 lb. Kurrachee Gram at 27s. per 504 lb. Portuguese Carobs at 98s. per ton, and Egyptian Cottonseed at 47 per ton.

The arrivals of grain and seed-laden vessels at ports of call for the week were 4 wheat (1 vessel); Melbourne, 1 Portland (0.), and 1 Sydney. 1 Barley (Penco). Total 5.

The sailings of grain and seed-laden vessels from ports of call for the week were 3 wheat 1 Hull, 1 Limerick, and 1 London).

Since January 1, 1906, the total arrivals have been 204 wheat, 2 barley and wheat, 2 barley, 3 maize, 1 locust beans, and 23 linseed; total, 235.

Last year during the same time the arrivals were 256 wheat, 2 wheat and oats, 1 flour and wheat, 13 barley and wheat, 1 wheat and linseed, 2 flour, 8 barley, 3 maize, 1 beans, 4 locust beans, and 43 linseed; total, 336.

## POULTRY AND GAME.

**Smithfield.** Saturday.—Good supply, but a poor demand. (Coolings, 5s to 6s; country ducklings, 2s to 2s 6d; Surrey and Sussex fowls, 2s 6d to 3s 6d; Lincolnshire fowls, 2s to 2s 6d; Essex fowls, 2s to 2s 9d; Irish fowls, 1s 6d to 2s; quails, 1s to 1s 4d; feathered pigeons, 7d to 9d; Bordaues pigeons, 1s to 1s 2d; English hares, 2s 6d to 3s; leverets, 1s 9d to 2s; tame rabbits, 1s 2d to 1s 6d; wild rabbits, 6d to 8d; live hens, 1s 9d to 2s 3d each; Australian rabbits, 5s 6d to 6s 6d per dozen; young grouse, 5s to 6s; old, 3s 6d to 4s per brace.

## CORN MARKETS.

## LONDON.

**Mark Lane, Wednesday.**—Wheat, English dull, with an easier tendency. Foreign held at late rates, but demand very quiet. South Russian, ex ship, quoted 28s 9d to 31s, landed at 30s 6d, to 33s 6d; Plate at 31s to 32s; Persian, 30s to 30s 6d—all ex quay; choice white Karachi ex ship, at 29s 3d. Flour quiet, unchanged. Hungarian quoted at 29s, Minnesota patent at 24s 6d, bakers at 19s 6d. Maize dull, unchanged. Mixed American, landed quoted at 22s, 6d, River Plate, ex ship, at 20s 6d to 20s 9d, landed at 21s to 21s 3d. Barley firm, quiet. Odessa-Nico, ex ship, to arrive, quoted at 18s 6d; landed at 19s 6d. Oats slow, unchanged.

**Mark Lane, Friday.**—Wheat dull, unchanged. New whites quoted at 30s 6d to 32s 6d; reds at 30s to 32s. Foreign held at about late rates, but in poor request. Hard winter, ex ship, quoted at 30s; No. 2 red winter at 29s 9d; choice white Karachi at 29s 3d; red Karachi at 28s 6d; No. 1 Northern Manitoba at 31s 6d. Flour quiet, unchanged. Minnesota patents quoted at 24s 6d; bakers at 19s 6d. Maize steady, quiet, at about late prices. River Plate, ex ship, quoted at 20s 6d to 20s 9d; landed at 21s to 21s 3d. Barley firmly held, but inactive. Odessa-Nicolaief, ex ship, quoted at 18s 6d; landed, at 19s 6d. Oats rather firmer, but quiet. Russians quoted at 15s 3d to 15s 9d; Americans at 16s 6d.

## COUNTRY.

**Ashford, Tuesday.**—The harvest is in full swing, and farmers being very busy the attendance was smaller than usual. A few samples of new wheat were on offer, at 29s to 31s per quarter, the latter in the case of 65lb per bushel. New black winter oats were quoted at 19s to 21s, and new white oats at the same figure. New grey peas made 29s to 31s. The new corn was of good quality and condition. Old corn and foreign stuff unchanged on the week.

**Banbury, Thursday.**—Wheat, white (old), 29s to 31s per qr; red (old), 28s to 31s per qr; barley (old), 28s per qr; beans (old), 32s to 34s per qr; oats, 16s to 20s per qr; oats (old), 21s to 25s per qr; peas, 30s to 32s per qr; (old), 30s to per qr.

**Berwick, Saturday.**—No change whatever in the corn market from last week, with no samples of grain offering.

**Birmingham, Thursday.**—Fair attendance. English wheats scarce, and making from 31s to 32s per qr. A few samples of new English wheat on offer from 28s to 30s per qr. Quiet trade for foreign wheats, at an occasional 3d decline. Plates, 30s 6d to 31s, Sharpness; Russians, 30s 3d to 30s 6d, Sharpness; flat maize, 21s 9d, Sharpness; Plate maize, 20s 6d, Bristol; grinding barley 18s 9d, Sharpness.

**Brighton, Thursday.**—Quiet trade and small attendance. New wheat in better supply; quality very fine. Prices 28s to 30s per qr. Grinding barley, 22s to 24s; old oats, English 20s to 23s; new spring oats, 16s 6d to 17s 6d; peas, 28s to 30s; beans, 33s to 35s.

**Bristol, Thursday.**—There is scarcely any English wheat on offer yet. Foreign, 3d lower. Maize, 3d lower. Barley, 3d to 6d decline. Oats unchanged. Flour, slow to sell, values unchanged.

—GRACE BROTHERS.

**Bury St. Edmunds, Wednesday.**—The market was thinly attended, people being in the midst of harvest, in glorious weather. There was very little new corn on the market. A few samples of fine new wheat changed hands at 28s to 29s per qr. Maize unchanged at 22s 6d to 22s 9d for 100lb, and 22s 3d for Plate. No change in other feeding corns, but all feeding stuffs were firm at last week's prices.

**Cambridge, Saturday.**—There was a small supply of new wheat, which made from 27s to 28s 6d per 50lb lb. A few samples of barley sold readily, at from 27s to 30s per 32 stone. Oats unchanged.

**Canterbury, Saturday.**—New wheats were 1s cheaper to-day, 64lb lots only making 30s. Oats were also lower, black winter making up to 19s 6d and good average quality whites to 19s. The new barleys showed good quality. Grey peas, 29s to 30s per qr. New tares, up to 6s 9d per bushel.

**Carlisle, Saturday.**—Very small supply of oats in our market to-day, and demand at late prices; 22s to 23s per 336 lb.—THOMAS ROBINSON.

**Chester, Saturday.**—In consequence of the broken weather, there was an absence of new samples. Old wheat and oats are now very scarce, and values fully maintained. American Indian corn is not coming forward rapidly, and stocks are rapidly declining. New River plate is more plentiful. Quotations: Wheat, white and red,

4s 7d to 4s 9d per 75 lb; grinding barley, old, 3s. 6d. to 4s per 64 lb; beans, new, 5s 6d to 5s 9d; old, 6s 3d to 6s 6d per 50 lb; oats, old, 3s 3d to 3s 4d per 46 lb; Indian corn, new, 12s to 12s 6d; old, 12s 6d to 12s 9d per 240 lb; River Plate, new, 11s 2d to 12s 3d per 240 lb.

**Chichester, Wednesday.**—A good attendance, quiet business. New white wheat, 28s to 30s; new red ditto, 28s to 30s; old white ditto, 33s to 33s 6d; grinding barley, 20s 6d; oats, English, 18s to 22s; new black and grey winter oats, 19s to 20s 6d; peas, 34s; maize, 21s to 22s 6d; flour, 25s to 26s.

**Colchester, Saturday.**—Fair attendance. Wheat made 28s 6d to 29s per 50lb lb; oats, 16s 6d to 17s 6d per 336 lb.—JOSEPH WILES AND SON, LTD.

**Coventry, Friday.**—A moderate attendance. Not much wheat on offer. Trade in oats slack. Quotations generally were: Wheat, 12s to 12s 6d per 186 lb; barley, 29s to 34s per 448 lb; oats, 25s to 26s 6d per 352 lb; beans, 12s 9d to 13s 3d per 196 lb; peas, 12s to 14s per 196 lb.

**Derby, Friday.**—Scarcely any wheat offering, and it sold at irregular prices. Wheat, white, 32s to 34s; red, 31s to 32s; new red, 30s to 31s; beans, old, 34s to 36s; oats, old, 24s to 25s; new, 18s to 19s.

**Devizes, Thursday.**—New wheat, 15s to 17s; secondary, 13s 6d to 14s 6d; best barley, 26s to 32s; secondary, 20s to 24s; rye, 23s to 26s; old black oats, 22s to 24s; new ditto, 19s to 23s; malting barley, 26s to 32s; beans, 16s to 18s; fine flour, 24s to 26s; extra fine, 27s to 30s.

**Doncaster, Saturday.**—Market very thinly attended. Small supply of old English wheat, and trade slow. Prices from 11s to 11s 9d per load. A sample of new wheat was shown of moderate quality, and sold for 28s per qr, or 26s delivered. Very little doing in foreign wheat, which was unchanged. Maize firm. Old oats advanced 3d per qr.

**Dorchester, Saturday.**—Consequent on farmers being busily engaged in the harvest field there was but a very limited attendance to-day, and a correspondingly small amount of business transacted. Supplies were on an equally limited scale, last year's grain being conspicuous by its absence, most of the granaries as well as corn stacks having been completely depleted of their stocks—in fact we seldom ever remember a year in which farmers had so thoroughly cleared their corn as this year. A few samples of the new season's grain were shown, and the bulk handled very well. Some farmers asked 28s per qr for the new corn, and some 30s; but these were mere "feelers," and but little business was done, values just yet being too uncertain. Old corn was generally rather easier all round.

**Dublin, Friday.**—No Irish wheat and barley. Oats in slow demand. Flour quiet and oatmeal firm. Bran scarce and values good. Pollard very scarce and dear. Oats, 11s 6d to 14s; oatmeal, extra, pinehead, 12s 6d to 14s 6d; flour, 10s to 11s 6d; pollard and bran, 6s to 6s 6d.

**Glasgow, Wednesday.**—The weather during the past week has been wet, with considerable rainfall and heavy clouds, and little or no sunshine. There was the usual attendance at our corn exchange to-day. Wheat quiet, but steady, at late rates. Flour quiet, with no change in values since last week. Maize unaltered on the week. Corn firmer, and fully 3d to 4½d per boll dearer owing to scarcity. Barley scarce, and held for 1½d per boll advance. Oats unchanged for home, but easier for foreign. Beans and peas nominally unchanged. Bran and thirds firm. Oatmeal steady, but quiet.—HIBSON AND CLARK.

**Glasgow, Friday.**—Market dull for wheat and flour, and prices unaltered. Mixed American maize scarce and in retail request at 13s 6d; round, 12s 4½d to 12s 6d per 280 lb. Oats steadier. A few parcels of new English oats quoted at fancy rates. No new Scotch oats yet marketed. Barley the turn dealer, due to scarcity. Oatmeal dull. Peas and beans quiet.

**Gloucester, Saturday.**—No English wheat on offer. Foreign firm but quiet at last week's prices. Plate maize 3d lower; flat and Messarian unchanged. Barley 3d lower. Little doing in oats, which are 6d lower.

**Grantham, Saturday.**—Poor attendance, and with the exception of an old sample or two of wheat and a single sample of black oats, there was no new corn on the market. For wheat, 28s 6d per qr was paid, whilst 16s 6d to 17s was quoted for oats.

**Hereford, Wednesday.**—Trade on Exchange was exceedingly slow and attendance small. A few samples of old wheat changed hands at previous prices, and one or two new were shown, which were held for prices over buyers' ideas; this also applied to several samples of new barleys. New oats are coming out, and are being offered more plentifully at moderate prices. Wholesale quotations:—Wheat, 3s 9d to 3s 10d per 60 lb; barley, 3s to 4s per 56 lb; oats, 2s 6d to 3s 3d

per 40 lb; beans, 4s to 4s 3d per 65½ lb; maize, 3s to 3s 3d per 60 lb.

**Ipswich, Tuesday.**—Old wheat was hardly offered, and prices were purely nominal. A fair supply of new wheat, most of which was in fine, dry condition, and of exceptionally fine quality. Prices ranged from 28s 6d to 30s per quarter. Old oats firm and unchanged; new winters were sold at 17s 6d to 18s 6d per quarter. Old bean steady at 32s to 33s per quarter. New peas, on or two parcels changed hands, at 30s to 31s per quarter. Maize unchanged for round at 21s 6d per quarter.

**Leeds, Tuesday.**—Heavy showers since last Wednesday have interfered with harvest work and delayed the supply of new wheat. There has been rather more looking after wheat, good old Russians and shipped parcels of new meeting some inquiry. On the whole, however, there has been little animation in the trade, and late prices have been maintained with difficulty. New English wheat tend in buyers' favour. Feeding stuffs a slow trade at about last week's prices.—DUNN AND CO.

**Leeds, Friday.**—Old English wheats fully maintained recent quotations; new samples were scarce at from 28s to 30s per quarter. All kinds of foreign wheat were firmly held, best qualities being the turn dealer. Foreign malting barley was rather higher, and feeding also in sellers' favour. Beans, peas, oats, and maize were without change. Flour was in improved demand, seconds and thirds making more money.

**Leicester, Saturday.**—Fair attendance, with a limited supply of home-grown wheats. Trade sluggish, buyers waiting for larger supplies of new samples. Red wheats, 31s to 33s; white wheats, 32s to 34s; new wheats, 31s to 32s per 36 stones. Barley quiet; beans firm, old oats, 28s to 35s; new oats, 18s to 20s per 26 stones.

**Lincoln, Friday.**—Moderate attendance, and little business passing. One or two samples of new English wheat came to hand, and sold at varying prices according to condition. Feeding stuffs firm at late rates.

**Liverpool, Friday.**—Market moderately attended. Wheat in moderate demand for American, which are mostly ½d lower, but Indian in good request at 4d more money. Flour: rather more inquiry for American, but quiet trade for home-made brands; prices unchanged. Maize: a moderate trade passing at about ½d advance for mixed American; Plate quiet, a shade easier; other qualities about unaltered. Barley firm, with moderate demand and light offerings. Beans steady at late rates, except for Syrian, which, being liberally offered, are considerably lower. Peas quiet at about recent rates. Oats quiet, at frequently lower prices for foreign; old English firm at full rates, new not offering. Oatmeal dull at late rates, but steady. Oatcake a quiet trade, without quotable change in values.—SEGAR AND THORNTON.

**Manchester, Thursday.**—More new English wheat was on offer at 31s to 32s 6d delivered at Manchester. Flour slow. Indian corn unchanged and easier. Oats in buyers' favour. Barley: Foreign rather dearer. Beans and peas steady. Bran 6d per load dearer.

**Newark, Wednesday.**—Quiet market, but fair inquiries. Wheat, old 31s 6d to 33s, new 29s to 30s; barley, malting none, grinding 22s to 24s; white oats, old 23s, new 19s; black oats, 17s to 18s 6d; beans, old 36s to 37s per qr.

**Newcastle-on-Tyne, Saturday.**—A quiet demand for wheat at our to-day's market; prices, however, remain unchanged. Maize steady, and slightly in the favour of sellers. Oats firm and slightly dearer; foreign, however, was steady at late rates for spot parcels, cheaper to arrive. Peas and beans unchanged in values, with a fair demand. Barley remains unchanged.—JOSEPH POLLARD AND CO.

**Newport, Wednesday.**—Wheat unchanged on the week. Barley and maize unaltered. Flour, fines, 23s 6d per sack.

**Northampton, Saturday.**—Small attendance, but fair business. A few samples of new wheat were on offer, the best samples of which made 28s, while new oats made from 16s to 18s. Prices: New wheat, 27s to 28s; barley, 26s to 32s; white oats, 16s to 18s 6d; black oats, 16s to 18s; peas, 27s to 30s; flour, 25s to 29s.

**Nottingham, Saturday.**—A few samples of new wheat offering, quality and condition various, prices irregular, 28s to 30s, 50 lb. Grinding barley steady, sale at unaltered prices. Oats, few samples of new quality, and condition good, 17s 6d to 18s 6d per 336 lb. Old oats and beans but few offering, prices in sellers' favour.—R. HUBBLE.

**Peterborough, Saturday.**—Showery weather this week has hindered harvest work and stopped threshing, so there has been but little new corn showing to-day. Trade for it only slow. Wheat making about 28s. Oats, 17s to 17s 6d.—THOMAS HILL AND SON.

**Preston, Saturday.**—There was a fair at-

# MARKET SUPPLEMENT.

iii

tendance, but samples of new grain are not yet reached forward, and further delay is probable, with a deteriorating effect upon quality and condition, if the wet weather of the past few days continues. Quotations:—Wheat, white, new, per q. of 32 stone. Oats firm; white Tartary, 19s to 20s; black, 20s to 21s; White Gorton, 21s to 22s per q. of 24 stone. Rye 24s, beans 32s to 33s per q. of 36 stone.

**Reading, Saturday.**—A slightly improved attendance, with trade somewhat better. Wheat made from 27s to 32s, and grinding barley 25s to 28s; new oats 16s to 18s 6d, and old 19s to 23s; beans, 31s to 38s; peas, 30s to 33s; rye, 22s to 24s 6d; tares, 5s 6d to 6s per bushel. Flour sold at late rates.

**Retford, Saturday.**—Attendance small, owing to the harvest. Trade generally very quiet and prices low. New wheat, of which there was but little on offer, sold at 31s, and old up to 31s per q. Small lots of maize changed hands freely at 24s 6d to 25s 6d per 34 stone, delivered here. New oats, 17s to 18s; best old oats, to 24s per 24 stone. The yield this harvest is said to be equal to expectations, especially wheat.

**Ripon, Thursday.**—Poor attendance, scarcely any business being done. Prices:—Wheat, 30s to 31s; ditto, foreign, 32s to 35s 6d; barley, grinding, 23s 6d to 24s 6d; ditto malting, 27s to 29s; oats, 21s to 22s 6d; maize, round, 23s to 24s; ditto flat, 23s to 26s per qr.

**Sheffield, Tuesday.**—Quiet demand, new corn, with the exception of an odd sample or two, not being offered. Old wheat was quoted 6d per qr less. A few new oats were on offer, black winters making about 19s per qr delivered. Grinding barley scarce, and 6d per qr dearer. Quotations:—White wheat 32s 6d to 33s, red 32s 6d to 33s per 504 lb; black oats 19s to 19s 6d, white 22s 6d to 23s 6d; grinding barley 32s to 32s 6d, blue 53s to 70s per 504 lb; English beans 47s to 47s 6d per 332 lb; grinding barley 24s 6d to 25s, malting 28s to 32s per 448 lb; small Indian corn 24s to 24s 6d, new Plate 22s 3d to 22s 9d, flat 24s 6d to 25s per 480 lb.

**Shrewsbury, Saturday.**—Wheat, 13s 3d to 13s 9d per 225 lb; old oats, 14s to 15s per 225 lb; peas, 13s to 14s per 240 lb; beans, 14s 6d to 15s 6d per 240 lb.

**Sarnford, Friday.**—Farmers were busy in the harvest field, and supplies were limited. Many of the samples of wheat offered were not of good quality and bore traces of the recent rains, and did not bring in more than 22s. to 29s.; new oats, 16s. to 17s.; old oats, 20s. to 28s.; winter barley, 22s. to 29s.; old beans, 32s. to 35s.; peas, 45s. to 55s. per qr.

**Stockton, Wednesday.**—There was no local wheat showing. Foreign wheat quiet and unchanged. Oats and maize also without alteration.

**Sunderland, Saturday.**—Farmers have but little grain to offer, and there is little change in prices of wheat, barley or oats. Arrivals continue. Oats 25s 3d; foreign, nil. — E. AND F. RICHARDSON.

**Tunbridge Wells, Friday.**—New wheat, 33s 6d to 34s; new red ditto, 33s to 33s 6d; old white ditto, 34s to 35s; old red ditto, 33s 6d to 34s; barley, 28s to 34s; grinding ditto, 23s. to 25s; oats, English, 18s 6d to 23s; rye, 24s to 25s; peas, 32s to 37s; beans, 32s to 36s; tares, 42s. to 50s; maize, 22s to 24s.

**Warwick, Saturday.**—The market here is still very quiet. No new grain showing, the bad weather during the last week having prevented threshing. Values unaltered on the week.

**Winchester, Saturday.**—New English wheat not offered freely at present. Foreign firm. Barley, oats, and maize unaltered. Flour rather dull, and barely late rates. —FEAR, COLEBROOK AND CO., LTD.

**Wisbech, Saturday.**—A few samples of new grain offering at market to-day. New wheat of good quality sold at 28s per 504 lb. New oats, 17s per 336 lb. Showery weather retard harvest operations. —JAMES FLECHER.

**Wolverhampton, Wednesday.**—There was a small attendance, and a dull tone characterised the market. Little business was transacted, and quotations were unaltered.

**Workop, Wednesday.**—Very poor attendance, with scarcely any grain showing, farmers being busy with the harvest. Old white wheat, 30s 6d to 31s 6d; red ditto, 30s to 31s; grinding barley, 26s to 28s; old white oats, 23s to 24s 6d; new ditto, 18s to 19s; old black oats, 22s to 23s; new ditto, 17s to 19s; maize, 24s to 25s per qr; old beans, 36s to 37s per 38 stones.

**Yeovil, Friday.**—English wheat was nominally quoted 30s to 33s for best, and 26s 6d to 29s for secondary; foreign, 32s 6d to 34s. Grinding barley, foreign, 19s 3d to 19s 9d; English barley, 20s 6d to 32s; secondary, 20s 6d to 24s; English white oats, 21s 6d to 21s; black, 22s to 24s 3d; Irish white, 22s 6d to 25s; beans, 32s to 33s; winter tares, 54s to 62s 6d; spring ditto, 62s to 68s. Little more inquiry for flour. Milling offals and meals a good market.

**York, Saturday.**—A holiday market, and small attendance of farmers. Wheat was scarce; fine white, 30s to 31s; red and mixed, 29s to 30s per qr of 36 stone. Milling barley, 25s to 26s per qr of 32 stone. Oats firm; white Tartary, 19s to 20s; black, 20s to 21s; White Gorton, 21s to 22s per q. of 24 stone. Rye 24s, beans 32s to 33s per q. of 36 stone.

## FOREIGN.

**Hamburg, Saturday.**—The weather is a little unsettled, and market firm; prices are tending rather upwards, as maltsters and brewers are rather anxious to commence the season, but supplies are small so far, and available stocks command full prices, especially Bohemian. Chevaliers are in good and general demand, but also Hungarians are bought freely; prices fully maintained, and offers so far are small. —FRANCIS M. TH. DUNNE.

## CORN STATISTICS

**Imports of Foreign and Colonial Corn.**  
Statement of the quantities of Foreign and Colonial Corn Imported into the United Kingdom in the week ended Saturday, August 18, 1906:—

|                                                         | Wheat          | Barley    | Oats      | Maize     |
|---------------------------------------------------------|----------------|-----------|-----------|-----------|

| 1905..       | 28s. 10d. | per 480 lb. |       |
| Barley ..... | 25s. 4d.  | per 400 lb. |       |
| Oats .....   | 18s. 11d. | per 312 lb. |       |

## TO-DAY'S MARKETS.

## THE CORN TRADE.

MARK LANE, MONDAY.

There was a moderate show of new wheat at the Exchange to-day, and 29s was accepted for some nice new red 504 lb natural, as well as selling weight. Foreign was 6d lower on the week for nearly all descriptions, and American new crop was offered for prompt shipment so cheaply that the maintenance even of present reduced values was not easy.

Maize was fully as dear for flat corn but round and yellow sorts were inclined to go cheaper. A few samples of new English barley were shown, and 33s was paid for a good sample, 44s lb. to the quarter. Foreign was 3d lower for all 400 lb. sorts.

New English oats were in fair supply of winter type, 19s. per 336 lb. was about the price. The demand for foreign oats was meagre, and prices gave way a full 3d. per qr. Beans and peas remained scarce and dear. Linseed cakes were firm, and cottonseed cakes were inclined to go dearer.

## BRITISH GRAIN (Of Stands).

# MARKET SUPPLEMENT.

V

## HAY AND STRAW.

**Birmingham, Friday.**—Small supply; trade slow. New hay made £3 to £3 5s per ton; clover, £2 15s to £3 15s per ton.

**Bristol, Friday.**—New hay, 65s to 70s per ton; old clover hay, 80s to 85s; old meadow hay, 75s to 80s; wheat straw, 55s to 60s per ton.

**Derby, Friday.**—Best clover, 85s to 90s; best hay, 75s to 87s 6d; second, 65s to 70s; wheat straw, 60s to 70s; pressed 50s to 60s; chop straw, 60s to 65s; peat moss, 35s to 40s.

**Hereford, Wednesday.**—Business in hay and straw was about the same as last week. New hay was not asked for. Hay in stack, 50s to 60s per ton; straw in bulk, 35s to 40s.

**Lancaster, Saturday.**—Meadow hay, 7d; clover, 7½d; wheat straw, 4½d; oat straw, 4d per stone.

**Leeds, Tuesday.**—The demand in the warehouses continues quiet, and prices of old hay and straw are unchanged. Quotations: Old meadow hay, 7d; clover hay, 7½d; wheat straw, 5d; oat straw, 5d; and rye straw (retail), 7d per stone.

**Lincoln, Friday.**—Best new hay and seeds made 60s to 65s; secondary quality, 50s to 55s.; old hay and seeds, 75s to 80s; straw, 35 per ton on the ground.

**Manchester, Friday.**—Hay, new, 4½d to 4¾d; clover, new, 4½d to 5½d; straw, oat, 3½d to 4½d per stone.

**Newcastle, Tuesday.**—Old land hay, from £4 15s to £4 5s per ton; this year's growth, £4 4s to £4 5s; new land hay, £5 15s to £6 5s; this year's growth, £4 17s 6d to £5; wheat straw, £1 10s to £1 15s per load; oat straw, £1 10s to £1 14s. There were 26 carts of hay and 13 carts of straw at market.

**Nottingham, Saturday.**—Fair supply at market, which met a good demand for best old. Inferior to good hay, 75s to 85s; prime ditto, 85s to 100s.; inferior to good clover, 75s to 83s.; prime ditto, 95s to 105s.; wheat straw, 50s to 60s.; new hay, 60s to 70s.; new seeds, 75s to 85s per ton.

**Sheffield, Tuesday.**—Supplies very small, and trade showed little improvement. Choice old seeds, £5 to £5 5s; choice hay, £4 10s to £4 15s; straw, £2 15s to £3 5s.

| Lambs .....  | 5 8       | 6 4     | 7 4    |
| Calves ..... | —         | —       | —      |
| Pigs .....   | —         | —       | —      |

Milch cows, per head, £16 to £21.

British arrivals include as follows:—Scotland, nil; Eastern Counties, 61; Midland, Home, and Western Counties, 984; Devon, 15; Ireland, nil.

Today's supply, compared with Monday last, showed an increase of sixty head, the majority, as usual at this season of the year, arriving from the Midland Counties, Scotland and Ireland not even being represented. Trade for both prime and second quality fat beasts ruled slow; nevertheless, all sales were governed by last Monday's currencies. There was less inquiry from both town and country buyers for fat butchering cows and bulls, consequently the tendency in regard to value was a downward one, though barely sufficient to quote. There is little prospect of a clearance being effected in this part of the market to-day.

The following are top quotations per 8 lb. (sinking the offal):—

|                 | To-day.     | Monday, Aug. 21, 1905. |
|-----------------|-------------|------------------------|
|                 | s. d.       | s. d.                  |
| Scotch .....    | —           | —                      |
| Devons .....    | 4 4 to 4 6  | 4 6 to 4 8             |
| Herefords ..... | 4 4 ex 4 6  | —                      |
| Norfolks .....  | —           | —                      |
| Runts .....     | 4 0 to 4 2  | 4 0 to 4 6             |
| Lincolns .....  | 3 8 to 3 10 | 3 10 to 4 0            |
| Irish .....     | —           | 4 0 to 4 5             |
| Canadian .....  | —           | —                      |
| Fat Cows .....  | 3 4 ex 3 6  | 3 4 ex 3 6             |

In the sheep market there was a decrease of 590 in the number of sheep and lambs penned compared with Monday last, this being attributed to the falling off in point of number in the Scotch consignments. Trade for both wethers and ewes was firm and steady, anything choice and of small weight making an advance of 2d. per 8 lb. in value; Scotch sheep shared also in the general brightening up of trade, and were also quoted 2d. higher, whilst Irish, on the other hand, met with less inquiry, but fully maintained late rates. There was a ready demand for lambs, and these being in average supply, met with a better trade at fully late rates. A clearance is confidently expected to be made in this part of the market. The supply included 100 Scotch, 1,140 Irish, and 502 from the Eastern Counties.

Undermentioned quotations are at per 8 lb. (sinking the offal) and are for the best of each class penned:—

|                            | To-day.     | Monday, Aug. 21, 1905. |
|----------------------------|-------------|------------------------|
|                            | s. d.       | s. d.                  |
| 7½ to 8 st Downs .....     | 5 10 to 6 0 | 5 6 to 5 8             |
| 9 st. Downs .....          | 5 8 to 5 10 | 5 4 to 5 6             |
| 10 st Halfbreds .....      | 5 4 to 5 6  | 5 2 to 5 4             |
| 12 st Yorkshires .....     | —           | —                      |
| 12 st Lincolns .....       | —           | —                      |
| 10 st Irish .....          | 5 0 to 5 2  | 5 2 to 5 4             |
| 10 st Down Ewes .....      | 4 2 to 4 4  | 4 10 to 4 0            |
| 11 st Halfbred ditto ..... | 4 0 to 4 2  | 3 8 to 3 10            |
| 5 st Down Lambs .....      | 7 2 to 7 4  | 6 0 to 6 2             |
| 6 st Halfbred ditto .....  | 6 2 to 6 4  | 5 8 to 5 10            |

Calf trade nominal.

No pigs on offer.

**London Central.**—Supplies good, better inquiry. Beef, Scotch, 4s 2d to 4s 4d; English, 3s 6d to 3s 7d; American, 3s 3d to 3s 6d. Mutton, Scotch wethers, 5s to 5s 4d; ewes, 3s 8d to 3s 10d. English wethers, 4s 6d; ewes, 3s 2d to 3s 8d. Lamb, English, 5s to 5s 8d. Scotch, 6s; New Zealand, 3s to 3s 4d. Veal, 3s 8d to 4s 4d. Pork, 3s 8d to 4s 4d per 8 lbs.

## FOREIGN.

**Deptford, Monday.**—Beasts, 610. To-day's supply compared with Monday last showed a decrease of 279 head, and consisted entirely of shipments from the United States. Trade was of a fairly steady nature, a slight advance in value

being noticeable for the best. Besides the above 290 more were withheld for Wednesday. The best on offer were quoted at from 4s to 4s 4d; exceptional, 4s 2d; second, 3s 9d to 3s 11d per 8 lb sinking the offal. On Saturday 2,319 beasts from the United States were offered for sale, and with a slow trade were quoted at from 3s 11d to 4s 1d; second, 3s 9d to 3s 10d per 8 lb (offal given in).

## FEEDING STUFFS.

**London, Monday.**—The market for linseed cake continues firm, but, as usual during harvest, farmers are not sending orders. Deoatified and ordinary cottoncake unaltered. Linseed: Market strong and advancing.

|                                       |                    |                 |                 |
|---------------------------------------|--------------------|-----------------|-----------------|
| English Linseed Cake .....            | ex mill            | 8 0             | 0 to 8 5 0      |
| American Calcutta Linseed .....       | ex quay            | —               | —               |

| 416 lb .....                          | ex warehouse       | None.           | —               |

—ROBT. & JOHN HEWETSON.

## HOPS.

**Borough, Monday.**—The market is quiet, but prices continue to advance. The crop is now nearing maturity, and can be safely estimated not to exceed 280,000 cwt.; whilst many experts maintain that 250,000 cwt is the utmost. The consumption is at least 700,000 cwt; the stock in brewers' hands and the possible imports will be subject to a serious strain to make good this deficiency.—W. H. and H. LE MAY.

## SEEDS.

**London, Monday.**—Good business passing in trifolium, both early and late. Samples fine. Prices reasonable. New winter tares also new are coming out more freely. Samples show fine qualities, but stiff prices are asked so far.—JOHN PICARD AND CO.

## WOOL.

**Canterbury, Saturday.**—Trade very slow, flockmasters holding for an advance. Present quotations:—Kent fleeces, 13d to 13½d; half-breds, 13d; Downs, 14d to 15d; lamb wool, 9d per lb.

**Halifax, Saturday.**—The market for wool is very quiet, business being chiefly of a hand-to-mouth character. Home-grown wools are selling at rates which are below those current in the country, but the belief here is that the highest prices this season will not be reached again, and so the disposition of staplers is to let country stocks alone.

**London, Saturday.**—English—per pk. of 240 lb. —Fleeces, South Down hogs, £14 10s to £15 10s; half-bred hogs, £14 5s to £14 15s; half-bred wethers, £14 to £14 10s; Kent fleeces, £13 10s to £14; South Down ewes and wethers, £14 10s to £15 10s; Leicester ewes and wethers, £13 to £13 10s; Colonial—per lb.—Vic. fleece super, 1s 11½d to 2s 0½d; scored, good, 1s 11d to 2s; scored, average, 1s 9d to 1s 10½d; greasy, average to fair, 1s 1d to 1s 2d; N.S.W., second, average, 1s 7d to 1s 8d; greasy, average, 11½d to 1s; S. Aus., greasy, average, 9d to 9½d; N.Z., scored, average, 1s 8d to 1s 9½d; greasy, average, 7d to 8d; Cape, scored, super, 1s 9d to 1s 10½d; fleece, average, 9d to 10d; greasy, average, 7d to 8d; Natal, scored, 1s 5d to 1s 6d; greasy, average, 8d to 8½d. Crossbreds—Gr. Vic. good to super, 1s 3d to 1s 4d; New Zealand fine, 1s 3d to 1s 4½d; medium, 1s 1d to 1s 2½d; coarse, 11½d to 1s 1½d.

## LIVE STOCK AND MEAT TRADE REVIEW

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

### Trade in London.

With a slight increase in the supply of both prime and second quality beasts at Islington, trade for all descriptions was slow but steady, late rates governing all transactions. The Irish arrivals consisted entirely of Waterford cattle, but met with very little inquiry. As usual the majority of the supply was drawn from the Midland Counties. Fat butchering cows and bulls on Monday met with more inquiry from both town and country buyers, late currencies being well maintained, but on Thursday ruled very slow; nevertheless no lower rates can be quoted.

At the foreign cattle market, Deptford, there was a rather larger supply, the majority, as usual, arriving from the United States. Trade throughout the week ruled slow and dragging, with a downward tendency in value. The total number on offer at both markets was 5,508, as against 4,418 during the preceding week, consisting of 1,040 British (increase 280) and 4,468 foreign (increase 810), comprising 4,142 from the United States and 326 from Canada. The following were the top rates obtained per lb. (sinking the offer): 90 to 95 stone Herefords, 4s. 4d. ex. 4s. 6d.; 95 stone Runts, 4s. to 4s. 2d.; 100 stone Lincolns, 3s. 8d. to 3s. 10d.; 95 stone Irish, 3s. 8d. to 3s. 10d.; 90 stone States, 3s. 10d. to 4s.; 95 stone Canals, 3s. 6d. to 3s. 8d.; 90 stone fat cows, 3s. 4d. to 3s. 6d.

With regard to sheep, trade, as usual, was confined to the Islington market, and ruled of a firmer and steadier nature for both wethers and ewes, sellers both asking and obtaining an advance of 2d. per 8 lb. in value. Scotch descriptions were not so readily sought after, consequently were difficult to vend, notwithstanding sellers being willing to accept a decline in value. On Thursday a further advance of 2d. per 8 lb. for English sheep was made, with a firm trade. Small choice grass lambs met with a good inquiry on both market days, on Thursday salesmen asking an advance of 2d. per 8 lb. in value. The total number penned was 8,700, as against 8,610 during the preceding week. Best pens made per 8 lbs. as follows, sinking the offer:—7½ to 8 stone Downs, 5s 8d to 5s 10d.; 9 stone Downs, 5s 6d to 5s 8d.; 10 stone Half-breds, 5s 4d to 5s 6d.; 10 stone Downs, 5s 4d to 5s 6d.; 10 stone Irish, 5s to 5s 2d.; 10 stone Down ewes, 4s to 4s 2d.; 11 stone Half-bred ditto, 3s 10d to 4s.; 5 stone Grass-fed lambs, 7s to 7s 2d.; 6 stone Half-bred ditto, 5s 10d to 6s.

Calves numbered 80 head and ruled firm and steady both in regard to tone and value, an advance from 2d to 4d per 8 lb. in value being quoted.

### Trade in the West.

Supplies of stores still continue to come very freely to hand, especially of the more ordinary grades, for which there is distinctly but very little of any call, the dry weather making speculators very cautious. Dairy cattle of a good stamp have, however, been in considerably more demand since the holidays at slightly enhanced rates, deep-milking heifers within the last few days touched £22, though a more average quotation is from £17 to £21, which is readily commanded by another at all suitable for town or other milk-walks, where a good supply of milk is of greater consideration than an extra pound or two in acquiring the best milchers on the market. Secondary descriptions are but little wanted at prices ranging from £16 down to as low as £11 or £12 for old cows, which have further dropped in value, whilst the better-class milchers are unobtainably dearer. Grazing cattle also continue to meet a slow sale at declining values for bullocks out of condition; but good, fresh, young barreners meet a quick trade at full values—£24 to £30—the latter figure being only reached for nice young heifers or steers that want but little attention in the matter of finishing off.

The supply of good quality fat beasts has been scarcely as large as usual during the last few days, and possibly this may be due to graziers holding their stocks back owing to the hot weather. Bullocks of choice quality and nice weights have, as a consequence, found a quicker sale, especially small Devons and nice Shorthorns, as well occasionally as a few runts, and prices for this class of beef have been against the buyer, the best weights bringing 4s. 8d. to 4s. 10d. per stone, the more ordinary grades 4s. 4d. to 4s. 6d., and coarse weights from 4s. to 4s. 2d., with a very slow trade at the quotation. Fat calves, owing to diminished offerings, have met a little stronger sale at outside values for the neatest weights—4s. 6d. to 4s. 8d. Choice grades of small wether mutton have met a quick trade at from 46s. to 52s. each (or 5s. 10d.

to 6s. 2d. per stone); heavier sheep, 54s. to 59s. (5s. 4d. to 5s. 8d.); fat ewes, 38s. to 48s. (or 3s. 10d. to 4s. 2d.). Best sucking lambs, 32s. to 40s. each (or 6s. 8d. to 7s. per stone); mutton lambs, 40s. to 50s. (or 6s. 4d. to 6s. 6d.). Fat porkers or neat baconers are the only things in fat pigs that claim anything like attention, these making from 9s. up to 10s. 6d. per score. Heavier weights very indifferent sale owing to the warm weather.

### Trade in Ireland.

Last Thursday's Dublin market was a better one for both cattle and sheep than the previous one. The number of cattle and sheep on offer was about the same, but buyers—both cross-Channel and home—were more numerous, and seemingly more anxious to purchase, as the weather was cooler and more suitable for killing. Cattle numbered 2,807, or five more than the preceding market, and sheep 7,728, an increase of 28 on the week. Still, in both departments, especially sheep, the supply was much smaller than in the corresponding week of 1905. English buyers were well represented, and finding the supplies limited, bought in a much more spirited manner than at late markets. Business began early in the morning and was well kept up, a good clearance being effected of all beasts but those of very poor quality. The live-weight prices ruling were from 22s. to 32s. per cwt. for best; coarse qualities from 24s. to 26s. Some fancy Hereford and Aberdeen-Angus crosses made up to 33s. per cwt. The approximate dead-weight prices were—Prime ox and heifer beef from 54s. to 57s. 6d. per cwt.; good secondary beef, 47s. to 53s., and inferior from 42s. to 46s. per cwt. Cow beef was rather a slow trade, some being sold at very cheap rates, and a few of the rougher sort did not find purchasers. All round, however, sellers had little reason to complain.

In the sheep market the demand for good sheep was decidedly firmer than last day. Home trade mutton was without much change. Heavy wethers cautiously dealt with in view of warmer weather, but those of smaller size moved fairly well, but the general inclination was to fill requirements from the lighter sort of ewes. The buying for hogs was suitable for the London market was brisk with prices favouring sellers. A strong business, too, was done in fat lambs—one very choice lot bringing the record price for this year, 47s. 6d. each, being bought to send to the Isle of Man. Coarse sheep did not clear well, owing to the large quantity of foreign mutton arriving weekly at British ports. Last week it totalled 79,884 cwt., as against 64,000 for corresponding week of last year. Best wether mutton sold at from 7d. to 7½d.; ewe, 6d. to 7½d.; and coarse sheep from 5½d. upwards. Large heavy hogs made from 45s. to 55s. each; small to medium ditto, 38s. to 44s. Small lambs sold from 18s. to 24s., and medium to large from 26s. to 40s. Veal was a slow trade; choice veal not worth more than from 7d. to 7½d., inferior selling from 4½d. per lb. upwards.

Trade in store cattle getting slack, and prices at country fair generally lower. Messrs. Cuffe and Sons and Messrs. R. and J. Wilkinson held sales in Dublin on Thursday, which were well attended, but rates were hardly so high as they have ruled for the last month or so. There was a fair attendance of shipping buyers at the pig market, but home traders were not up to the usual strength. The offering of pigs was moderate, but trade was quiet and prices difficult to maintain, and quotations generally showing a loss of 2s. to 3s. on the week. Choice light-weight pigs made from 52s. to 54s. per cwt. Good store pigs in brisk demand.

## LONDON.

**Central Market, Friday.**—Fair supplies, and trade very slow for beef, but firm for mutton and lamb: English beef, 3s 4d to 3s 6d; Scotch sides, 3s 10d to 4s; shorts, 4s 2d to 4s 6d; Deptford and Liverpool killed, 3s 2d to 3s 6d; refrigerated hindquarters, best, 3s 1d to 4s; ditto, seconds, 3s 6d to 3s 8d; ditto, fore-quarters, 2s 2d to 2s 6d; inferior beef, 2s 4d to 2s 8d; mutton, Scotch wethers, 5s to 5s 4d; ditto, lambs, 5s 8d to 6s; ditto ewes, 3s 4d to 3s 8d; English wethers, 4s 4d to 5s; ewes, 3s 4d to 3s 8d; foreign sheep, 4s to 4s 8d; English lamb, 5s 4d to 5s 8d; veal, 3s 4d to 4s 8d; English pork, 3s 10d to 4s 4d; Dutch ditto, 3s 8d to 4s per 8 lb.

**Islington, Thursday.**—Supply of beasts consisted chiefly of fat butchering cows and bulls, for which trade was dull and dragging, prices ruling in favour of buyers, though not quotably so. Absolutely no demand for prime quality cattle. Top value: Fat cows, 3s 4d to 3s 6d; fat bulls, 2s 10d to 3s 2d per 8 lb. The sheep trade was decidedly firmer for both wethers and ewes, an advance of fully 2d per 8 lb being made on all transactions. Lambs met a good inquiry, anything small and choice finding ready purchasers at an advance of 2d per 8 lb. Best pen made per 8 lb as follows: 7½ stone to 8 stone Down sheep, 5s 10d

to 6s; 9 stone ditto, 5s 8d to 5s 10d; 10 stone ditto, 5s 6d; 10 stone half-breds, 5s 4d to 5s 6d; 10 stone Down ewes, 4s 4d; 5 stone fat grass lambs, 7s 4d; 6 stone half-bred ditto, 6s 2d. Rather larger number of calves, which met a limited demand, a reduction of fully 2d per 8 lb having to be made to effect sales. Quotations per 8 lb, sinking the offer: Beasts, 2s 10d to 3s 6d; sheep, 4s 8d to 6s; calves, 3s 10d to 5s 8d; lambs, 5s 6d to 7s 4d.

## COUNTRY.

**Ashford, Tuesday.**—Beef and mutton sold slowly, without alteration in price, beasts making up to 4s 4d; Down sheep, 5s 10d; and Kents, 5s 2d. Veal dealer, at 5s to 5s 4d. Lamb cheaper, nothing over 6s 8d. Pork was unchanged, roasters making 4s 2d to 4s 4d.

**Berwick, Saturday.**—Attendance of farmers and buyers small, quality of stock fair, and trade dull. Stricks, 47 10s to £10 10s; two-year-olds, £12 10s.

**Birmingham, Thursday.**—Small supply of beasts, sheep and pigs. Trade fair for lambs and pigs; trade slow for beasts. Beef, 5d to 6½d (Herefords 6½d) per lb; mutton, 6½d to 8½d per lb; lamb, 8½d to 9½d per lb; veal, 6d to 7d per lb; bacon pigs, 10s 6d per score; cutting pigs, 10s 6d per score; sows, 6s to 8s 4d per score.

**Bristol, Thursday.**—There was a very short supply of beef at the market, and trade was slow. Prices for best qualities dropped 1s., touching 56s per cwt, and ranging up to 58s. Sheep in moderate numbers, business quiet; Down wethers ½d higher per lb, 8½d. There were few pigs.

**Calne, Wednesday.**—In lots of not less than ten, on rail within 100 miles, 3d per score extra for delivery by road. Prime stores, 6s. to 8s. 10s. 10, no deduction for fat, 10s per score; 8s. 10s. to 9s. 10s. 10, not over 2½ in. 10s. per score; under 10s. 10, not over 2½ in. 9s 6d per score; under 11s. 10, not over 2½ in. 9s per score. Pigs outside these limits at their value.—CHARLES AND THOMAS HARRIS & CO., LTD.

**Canterbury, Saturday.**—The dry weather tends to check business. Ewe lambs ranged from 19s to 23s 6d, and wether lambs up to 25s; ewe sheep were selling at from 22s to 43s per head. Cows and calves, £17 10s.

**Carlisle, Saturday.**—About 300 Irish cattle were exposed for sale, the bulk being wintering heifers. Buyers were well represented, but trade moved slowly. Small heifers, 46 10s to £10 10s; better sorts, for feeding, £13 to £15 10s each.

**Chester, Thursday.**—Fair supplies. Trade was confined to the best cattle, and for these buyers declined to pay any advance. Milch cows made £17 to £22, calves £15 to £19, barrens £10 to £12, heifers 29 to £14, and stricks £8 to £10. A good supply of sheep, but few were sold.

**Chichester, Wednesday.**—Trade for fat cattle ruled firm, at fully late rates. Fresh calved and calving cows and heifers were in brisk demand at higher prices. Higher cattle met with little inquiry, and several lots remained unsold. Quotations:—Beef, 4s 6d to 4s 10d; Southdown sheep, 6s 2d to 6s 6d; West country sheep, 5s 8d to 6s 2d; lamb, 7s to 7s 6d; ewes, 4s 2d to 4s 6d; veal, 4s to 4s 6d; pork, 3s 8d to 4s.

**Colchester, Friday.**—There was a very short supply, the little there was offering selling as follows:—Beef (gras), 4s 4d to 4s 6d per stone; mutton 5s 6d to 5s 8d per stone; lamb, 7s per stone; pork, 8s to 9s 6d per score.

**Derby, Tuesday.**—A fair attendance, and a good sale for all first quality beasts and sheep, the latter being very dear. Beasts, 5½d to 6½d; sheep, 8d to 9d.

**Doncaster, Saturday.**—Moderate supply of cattle and good supply of sheep. Only poor attendance and fair trade at late rates. Milch beasts, £17 to £22; bullocks, £12 to £17; heifers and drapes, £11 to £16; stricks, £9 to £11; and young stores, £7 to £9 each. Sheep made 45s to 50s; ewes, 32s to 38s; lambs, 30s to 35s each.

**Dorchester, Saturday.**—Supplies came very freely to hand, and to-day's cattle market, both at Messrs. Duke and Sons and also at Messrs. Symonds and Sampson's, and buyers were well represented. There were some specially choice fat bullocks stalled, amongst which were some rare steers and heifers, which commanded a fairly brisk sale at from £15 15s to £21 15s (or 11s to 11s 6d per score); fat cows, £10 to £14 5s (with a slower sale at 10s per score). The milch beasts was again pretty active, especially for good heifers and also for useful cows, these making £16 10s to £21 (for heifers) and £15 to £13 for cows; in calves also a fair sale at £7 10s to £10 each. The mutton trade was fairly good for the choicer grades, but slow for anything plain. Down wethers sold readily at 45s 6d to 54s (or 8d to 8½d per lb); fat ewes, 38s 6d to 45s 6d (or 7d to 7½d); and lambs from 34s 6d to 42s (or 10d per lb for choicest grades and 9d to 9½d for others).

**Dublin, Thursday.**—Choice well-finished cattle in fair request at last week's prices, other

## MARKET SUPPLEMENT.

vii

sorts easier sold and a fair clearance effected. We had more life in the sheep and lamb department, best suitable lots for home and export slightly favouring sellers, middling and inferior qualities easier placed at last week's rates. Cattle.—Live weight (best) 28s to 31s per cwt. Fancy heifers touching 32s per cwt. Secondary sorts, 26s to 28s per cwt. Mutton.—Dead weight, 6d to 7½d per lb. Lambs, 18s to 40s. (GANLY, SONS AND CO.)

**Edinburgh.** Wednesday.—For store sheep there was a fair selling trade. Half-bred gimmers made from 46s to 52s; Cheviot Dimouts up to 41s; half-bred lambs to 33s; Cheviot shearlings to 43s; and half-bred sheep to 43s. Store cattle were a small show, with a fair demand; two-year-old bullocks up to 14s, and stirks to 8s. A small show of cows, with a good trade; Shorthorns up to 22s; and Ayrshires to 19s 10s.

**Glasgow.** Wednesday.—Shortest market at this period of the year for a long time. Demand fair and values steady to firm. Quotations:—Top Scotch cattle, 64s per cwt.; Irish, 58s; top hogs, 9½d to 10d per lb.; top wethers, 8d to 9d; lambs, 9d to 10d. Dead meat, however, slow owing to hot weather. Best Scotch beef, 6½d; Irish, 5½d; Canadians, 5d; Irish, 4½d; hogs, 8d.

**Hereford.** Wednesday.—A dull trade prevailed in beef, the supply being overdone. Best bullock and heifer beef made 6d per lb., and cow beef 4½d to 5d. Calves were a good supply, and trade ruled firm, veal making 7d. A moderate business took place in sheep, of which there was a fair supply. Best wether mutton realised 8d, and ewe mutton 6d. Fat lambs fetched about 9d per lb., and a good supply of store lambs also sold well. The pig trade was firm, the supply not being over large. Porks made 5d to 6d. Store pigs few and very dear. Store cattle, a small supply, met with a dull trade.

**Lincoln.** Friday.—Small consignment of beasts, and trade was slow. Young beasts, 48s to 110s; milch cows, 17s to 22s; strong beasts, to 113s; lambs, 30s to 37s each.

**Leicester.** Saturday.—Restricted supplies of home-bred bullocks. Trade ruled sluggish and prices were fully 10s per head lower. Milch cows did not sell so freely, choice lots making 19s to 22s; good lots, 16s to 17s 10s; secondary, 14s to 15s; Shorthorn bullocks, 11s to 13s 10s; Welsh cattle, 12s to 14s; young stock, 15s to 16s; calves, 15s to 28s per cwt.

**Lynn.** Tuesday.—Scarcely any store beasts, and no quotation possible. Fat beasts not quite so numerous, and trade a little firmer at 6s 9d to 7s 3d per stone. Average supply of sheep for the time of year, stores making 40s to 46s each. Fat sheep 8s 9d to 9s 6d per stone. Stores lambs, 25s to 35s; fat lambs, 25s to 40s each.

**Manchester.** Friday.—Beef: firsts, 5½d; seconds, 4½d to 5d; thirds, 3½d to 4d. Mutton: firsts, 7½d; seconds, 6½d to 7½d; thirds, 5½d to 6s. Veal: firsts, 6d; seconds, 5d to 5½d; thirds, 4d to 4½d. Lamb: firsts, 7½d; seconds, 6½d to 7d.

**Newcastle.** Tuesday.—Prices drooping. Prime heifers, 7s 6d to 7s 9d; second-class 7s to 7s 6d; steers, 7s 3d to 7s 6d; coarse and inferior, 6s to 6s 6d. Pig trade firm at 6s 3d to 7s 9d. Sheep favouring buyers at 5d to 8½d; lambs, 8½d to 9½d; veal, 6d to 8½d. At market: Cattle, 1,811; sheep and lambs, 9,219; calves, 120; pigs, 369.

**Newport.** Wednesday.—A larger supply of cattle, sheep, and lambs. A fair number of ewes. Prices were well maintained. Best English beef, 6½d per lb; secondary, 6½d; cows, 4½d to 5d; best wether mutton, 8½d to 8½d; ewes, 6½d to 7d; lambs, 9d to 9½d; calves, 6½d to 7½d; porker pigs, 10s 6d to 10s 9d per score.

**Norwich.** Saturday.—There was a fair supply of fat beasts, and trade ruled about the same as last week, at 7s to 7s 6d per stone of 14 lb. There were very few store cattle on offer, and were principally Irish; the demand was poor, but there was no variation in values; prices ranged from 46s to 47s per head. Store sheep made but a small market, and consisted principally of breeding ewes; trade was very quiet at about late rates. Lambs made from 32s to 40s per head, and breeding ewes 48s to 60s. Fat sheep were offered in limited supply, and met with a steady demand at 8s 6d to 9s per stone. There was a small show of both fat and store pigs, and trade was a trifle sharper. Fat pigs averaged 7s per stone. A clearance was effected.

**Nottingham.** Saturday.—A fair supply of stock, but trade slow. Best milking cows made 21s 18s to 22s, and younger animals 15s 10s to 17s each. Calves realised 30s to 50s. No sheep or lambs were shown.

**Preston.** Wednesday.—There was a smaller supply in consequence of the holidays, and trade was rather slow, values being barely maintained. Quotations:—Heifers and bullocks, 6d to 6½d, with some exceptionally choice beasts at 6½d; cows and bulls, 5d to 6d; hogg sheep, 8½d; lambs, 9d; calves, 6½d per lb.

**Retford.** Saturday.—There was no improve-

ment in the store stock trade. Quotations were very low for both milch cows and young cattle, the former making 14s to 16s, and the latter 14s to 19s; calves, 26s to 40s each.

**Romford.** Wednesday.—Short supply of fat beasts; trade very slow. Best, 4s 2d to 4s 4d; middlings, 3s 10d to 4s per stone. Calves scarce; trade a trifle better at 1s 8d to 1s 10d per stone. Sheep in average supply; trade about the same. Choice small sheep, 5s 8d to 6s; large, 5s to 5s 2d; ewes, 4s to 4s 2d per stone. A short supply of lambs; trade a little better at 6s 2d to 6s 4d per stone. No store beasts on offer. Fair supply of pigs; trade rather better at late rates.

**Sheffield.** Tuesday.—Small show of cattle. Milch cows in fair demand, and made 11s to 12s 10s; smaller cattle, 11s 10s to 15s 10s.

**Stockton.** Wednesday.—There were on offer 140 cattle, 167 sheep, and 143 pigs. Rather a smaller show of the best cattle, which met with a better and firmer trade at 7s 6d to 8s per stone, whilst rougher kinds made 6s to 6s 6d. Lambs fetched 10d per lb; young sheep, 9d; ewes, 7d; and tups 6d per lb. Pigs were not quite so numerous, and prices were inclined upwards, porkers making 7s 6d per stone, mediums 7s, and sows 6s 6d.

**Shrewsbury.** Tuesday.—Usual supplies, and good trade all round. Quotations:—Beef, 5½d to 6½d per lb; mutton, 7d to 8d per lb; lamb, 8d to 8½d per lb; veal, 6½d to 7½d per lb; porker pigs, 9s to 9s 6d per score; bacon pigs, 8s 6d to 9s 6d score. Cows with calves up to 22s 15s.

**Thame.** Tuesday.—There was an exceedingly large all-round entry of stock at this market on Tuesday last, and with a full attendance of buyers from London, Reading, Newbury, Wallington, Henley, Maidenhead, Aylesbury, Oxford, Wycombe, Missenden, Beaconsfield, and surrounding villages. Trade ruled brisk throughout. There was a grand show of cattle, best quality was in keen demand, and there was decidedly more trade for fat cows, an all-round rise of 2d per stone being quotable. Messrs. Bond and Burrows had a wonderful fine lot of sheep, and were supported by a very large number of buyers. Trade was keen throughout, and every lot with the exception of two ewes were disposed of. This firm's sale comprises 100 fat beasts, 489 fat and store sheep, 94 fat and weaning calves, and 98 fat and store pigs. Fat oxen made from 15s 15s to 15s 10s; fat heifers, 14s to 15s; fat wethers, 48s to 56s; fat ewes, 42s to 60s 6d; fat lambs, 34s to 44s 6d; fat calves, 13s to 14s 10s; weaning cow calves, 20s to 45s; bull calves 10s to 45s; bacon hogs, 12s to 25s; porkers, 26s to 35s.

**Truro.** Wednesday.—Business fairly brisk. Attendance very good. Fat bullocks, 56s to 58s per cwt.; barreners and store bullocks, 40s to 45s each; cows and calves, 19s to 15s; rearing calves, 15s to 40s; wethers, 7d to 7½d per lb; ewes, 5½d to 6½d; lambs, 7d to 7½d; pigs, 13s to 35s; fat calves, 13s to 14s; mutton, 6d to 8d; veal, 8d to 9d; veal, 6d to 8d; pig, 6d to 8d; bacon, uncured, 6d to 7½d; ditto, cured, 7d to 9d; pork carcasses, 5d to 5½d.

**Wolverhampton.** Wednesday.—A larger number of animals penned, and fair demand. Quotations:—Beef, 6d to 7d per lb; mutton, 6½d to 9d per lb; lamb, 9d to 10d per lb; veal, 6½d to 7½d per lb; bacon pigs, 10s to 10s 6d per score; porkers, 10s 6d to 11s per score; sows, 8s to 9s per score.

**Workop.** Wednesday.—Small show, with beef 3d per stone cheaper. Best beef, 6s 6d to 6s 9d; secondary, 6s to 6s 6d per stone; best Southdown wether and cross-bred, 8d to 8½d; ewes, 6d to 7d; lamb, 9d to 9½d; veal, 8d per lb.

**Yeovil.** Friday.—Milking animals continue in good demand. Cows with calves sold at 17s 5s to 22s 5s; secondary, 13s 15s to 16s 10s; heifers and calves, 15s 10s to 19s 5s; in-calf cows, 14s 10s to 17s 15s; in-calf heifers, 13s 5s to 17s 5s; barreners, 10s to 15s 15s; steers, 10s 5s to 14s 5s; yearling heifers, 7d 10s to 8s 15s; horn wethers, 4s 6d to 5s 6d; horn ewes, 4s to 5s; horn Chilter lambs, 28s to 32s; Down wethers, 4s to 50s; Down ewes, 40s to 46s 6d; slip pigs, 17s 6d to 26s; stores, 40s to 45s.

**York.** Thursday.—There was a large number of lambs on offer, which met with a slow trade. Best choice crossed lambs made up to 34s, others 27s to 32s. A few North country lambs made 34s to 38s. Best choice crossed sheep made up to 52s, and others 44s to 50s, and Muslams from 40s to 46s. There was rather a large show of Irish store cattle, but only a few were sold at late rates. Small show of calving and milch cows. Calvers made 19 guineas to 20 guineas each.

## FOREIGN.

**Yorkhill.** Monday.—Large supplies of Canadian cattle were on offer at the usual weekly sales held to-day, 1,362 head being penned. All were from Montreal, and were delivered in good condition. There was a large attendance of buyers, but

trade was at times slow, and prices, owing to the large supplies, were generally lower for all classes of bullocks, but bulls, being scarce, made about late rates. Bullocks of first-class quality made up to 54s per cwt dead weight, while secondary, middling, and inferior animals were disposed of from 50s to 52s per cwt. Prime choice bulls were cashed at about 50s per cwt dead weight, and rough and coarse qualities down to 46s per cwt.

## FEEDING STUFFS.

**Liverpool, Friday.**—The following are current prices:—

—H. JONES LANGAR AND CO.

**Mark Lane, Monday.**—Linsced Cakes.—There is quite an average consumptive demand, but practically no speculative inquiry, and with only a moderate quantity of Foreign available both for spot and for shipment the market is well supported. All descriptions remain steady at last week's prices. Cotton cakes.—With decreasing stocks of Egyptian and the probability of no further supplies for at least a month, holders have again raised their limits and prices are 2s 6d advance on last week, which also applies to English and Bombay: Decorticated do not offer, but American meal in the warehouse is 1s 3d more money. Rape cakes.—Firm but unchanged. Maize Germ Meal.—White American just arrived is procurable at last week's price, whilst English makes are 1s 3d less money. Maize Gluten Feed unchanged at 45 15s. Rice Meal.—Landed lots of Rangoon make 44 13s 6d to 44 15s, but there are sellers of steamer parcels afloat at 44 10s to 44 11s 3d ex ship terms. Locust beans are without alteration at 45 15s for whole and 46 2d per ton for Kibbled. Dried Brewers' Ale Grains are exceptional value at 44 10s to 44 15s per ton as to quality.

## CHEESE.

**Glasgow, Wednesday.**—Moderate arrival of cheese, and fair trade. Cheddars 60s to 64s, and

Dunlops 55s to 62s per cwt. Canadians claiming a moderate amount of attention are inclined to be firmer.

**Highbridge, Tuesday.**—There were 24 tons of cheese pitched, and with a large attendance all was cleared. Best dairies realised up to 57s 6d per cwt.; secondary dairies, 54s to 55s 6d; and other dairies, 46s to 52s. A few inferior lots failed to reach 42s. Cheddars made 62s to 65s; truckles, 60s to 61s 6d; doubles, 58s.

**Newport, Wednesday.**—About 8 tons pitched, a brisk demand, and a fairly good attendance of buyers. Quotations: Caerphilly, 44s to 52s per cwt.; fancy dairies, 53s to 55s; truckles, 65s to 63; Derbys, 61s to 66s.

## FRUIT AND VEGETABLES.

**Covent Garden, Saturday.**—A steady demand prevailed for a good supply of fruit and green-stuffs. Quotations for English produce: Apples, 2s 6d to 8s per bushel; pears, 2s to 4s per half-sieve; grapes, 8d to 2s; red currants, 2s 6d to 3s 6d per half-sieve; raspberries, 3s 6d to 9s per dozen punnets; green figs, 1s to 4s; nectarines, 2s to 10s 6d per dozen; peaches, 2s to 12s per dozen; tomatoes, 2s 6d to 3s 6d per 12 lb; plums, 2s to 6s 6d per half-sieve; greengages, 8d to 1s 3d per box; ditto, 2s to 3s 6d per half-sieve; scarlet runners, 1s to 1s 6d; French beans, 1s 6d to 2s; beetroot, 1s 6d to 1s 9d per bushel; cos lettuce, 1s 6d to 2s; vegetable marrows, 1s 6d to 2s 3d; cabbages, 2s 6d to 3s per tally; green peas, 2s to 3s per bushel; ditto, 4s to 6s per bag; sage, 9d to 1s; carrots, 1s to 1s 6d; turnips, 1s to 1s 6d; parsley, 1s 6d to 1s 9d; mint, 1s to 1s 6d per dozen bunches; artichokes, 1s to 2s per dozen; mushrooms, 6s to 12s per 12 lb; cucumbers, 3s 6d to 6s per flat; potatoes, 55s to 75s per ton.

## BREWERS' AND DISTILLERS' GRAINS.
